Mr. CRAWFORD. Mr. Chairman, I ask unanimous consent that the gentleman may proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from Michigan [Mr. CRAWFORD]?

There was no objection.

Mr. CRAWFORD. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield.

Mr. CRAWFORD. The gentleman from Iowa [Mr. JENSEN] comes from one of the great agricultural areas of the world. He should not overlook the fact that these projects involve farmers, and that when it is decided to undertake a project there is a burden placed on the farmers for so-called water rent, which the farmer has to pay annually. Now, if you place that price for water at a level where the farmer cannot afford to pay for the water on the basis of his cost of farming operations, what are you going to do to the farmer?

Mr. JOHNSON of California. You will probably injure the farmer, and that is one of the reasons why you divert power revenues from the irrigation features of the project.

Mr. CRAWFORD. It makes it impossible for the farmer to operate, and therefore the project would become in a state where it would not be economically feasible, and the project would pass out of the picture and the land would not be brought under cultivation and the food would not be produced.

Mr. JOHNSON of California. I thank the gentleman for that contribution.

Now, there is another matter that has been discussed and that seems somewhat confusing to some Members who are unfamiliar with reclamation. There seems to be some objection to the fact that interest is paid. Do you not realize that every private utility in the country simply borrows most money that goes into the works of the utility? They put out a bond issue repayable in 20 or 30 or 40 years, and I have never seen one yet, where when the expiration time of the bonds came around, that they did not refinance it. The consumers in California pay on into eternity, not only the capital cost but also the interest on the borrowed money that the utility used in developing the utility. Private utilities do the very same thing as the Reclamation Bureau, but they never end it. Their debts are perpetual, and added into the rate is the interest paid on utility bond issues. The Reclamation Bureau will at least in 78 years at most finally get the capital investment paid up and terminate the interest payments.

Mr. RANKIN. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California Yes; certainly I yield.

Mr. RANKIN. Almost invariably those power companies, especially where they are owned by a large holding company, inflate their investment.

Mr. JOHNSON of California. They do not do that in my State. I disagree with you there, because, as far as it applies to my State, our utilities are well regulated; have no watered stock, and they are very efficient.

Mr. RANKIN. But you are overcharged $60,000,000 a year. If you did not have Los Angeles as a yardstick, you would be overcharged $100,000,000 a year.

Mr. JOHNSON of California. That may be true, but I personally do not know it to be a fact. But the point is the committee made a thorough study. It determined that the 78-year period was advantageous and necessary in certain cases. Frankly, I would like to have seen them designate a shorter period to amortize these investments, but I am willing to accept their judgment after they have had these full and complete hearings. But the point we must remember continuously is that there is not one single dollar that is ultimately taken out of the general taxpayers of America to take care of these projects. The beneficiaries, and they alone, pay for these projects.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. JOHNSON of California. I yield to the gentleman from Arizona.

Mr. MURDOCK. I want to compliment the gentleman. I have watched his work in connection with this and many other bills. He comes from the heart of the great central valley in California, an empire in the making. It is already a rich empire but its possibilities have scarcely been touched. The gentleman has the right philosophy. He is thinking of his children and his grandchildren. If we allowed salt to take possession of the delta region around the great bay there would not be anything much for his children and his neighbor's children. If we control it as we think this bill will help do, it will be there for many centuries, not only for his grandchildren but for many generations to come.

Mr. JOHNSON of California. I thank the gentleman from Arizona. I hope my present conduct and my future conduct may justify the compliment. Salinity control is one aspect of the reclamation program that is not often thought of. We are trying to reclaim, and we have reclaimed, land against water in the low reaches of the San Joaquin and Sacramento Rivers. During the past 25 years on two separate occasions the encroachment of salinity from San Francisco Bay has seriously impeded the productivity of the soil, and in some cases actually damaged and put these lands out of production. This bill would take care of that situation.

But the point that I want to emphasize again is that all the people are getting the benefit of every last dollar of this money and the result adds immeasurably to the wealth of the United States. Again I emphasize that only the beneficiaries pay the capital cost.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. ELLIOTT. Mr. Chairman, I rise in opposition to the pro forma amendment and ask unanimous consent to proceed for five additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The gentleman from California is recognized for 10 minutes.

Mr. ELLIOTT. Mr. Chairman, what I am about to say cannot be termed a political statement in any way. As a matter of fact, when I finish my work here in 1948 I will not be with you in 1949. I have already made that announcement in my district. I have had the pleasure of serving this House for 11 years. I think I can truthfully say that I am the only Member of the present Congress who has ever paid a power bill in the amount of $485 each month for electric power to pump water. If there is any Member here who has paid that much

or more to pump water out of the ground, I wish he would stand up so I may meet him.

Mr. Chairman, I am not a professional man by trade or in any sense of the word; I am a farmer, a livestock raiser, and have been all my life. I believe that I know something about irrigation and reclamation—if and when we ever get it. More than 30 years ago I was privileged to pay about $1,500 at a little public gathering to set in motion the first study of the Central Valley project now under construction in the State of California.

I have heard various remarks during the last 3 days about this bill, and part of those remarks are not truthful, I am sorry to say. I have heard Members say we have had this under consideration by this committee for 3 years. If those who say that will just stop to think back, they will realize that this Committee on Public Lands and the other committees that are merged with it did not come into being until January of 1947. The chairman of the present committee was not a member of the Committee on Public Lands or the Committee on Irrigation and Reclamation of the House during the 11 years I have been here; and a lot of the other members now on the committee were not even Members of Congress 3 years ago.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. ELLIOTT. Not at this particular moment. If I have time later I will yield. I may say that the chairman of the subcommittee was a member of the committee. I think that takes care of what the gentleman had in mind.

I have sat here and tried to go along from time to time with Members of this House. I hear men severely criticized for the position they take. For instance, the gentleman from Iowa [Mr. JENSEN], in his capacity, has taken a lot the last 3 days. With the kind of beans and bread I was raised on I would not take some of the remarks that have been fired at him by many Members of this body in public, out in the road, or in the park, because I think there is a time and place for everything.

I have seen men acting in the capacity of the gentleman from Iowa [Mr. JENSEN] stand up and defy the Bureau of the Budget and tell them to give us more money to carry on and complete projects as badly needed as we have needed flood control and irrigation in recent years. Just last December was a fair example. The President and the Bureau of the Budget sent to the House a certain amount for a supplemental appropriation. We appeared before the committee and justified our statement that more money was needed to complete work on our projects. What did the members of the committee do? They overrode the Bureau of the Budget and the President's recommendation to give us more money to carry out a great project. We have not had rain in my area to speak of. There were about 3 inches of rain in 1947, none so far this year. We needed that additional money to build the project in order to provide water for the San Joaquin Valley.

The gentleman from Iowa [Mr. JENSEN] has been blamed in the eyes of the public, through the press, and speeches that have been made on the floor of this House. Who are the ones that should answer? The bureaucrats.

We convened here on the 17th of November 1947. No one in the Department of the Interior said we were out of money for these four major projects that were going on at that time in the United States; but on the 30th day of November the Bureau of Reclamation, Department of the Interior, announced that the Central Valley project was one of the four projects for which funds were exhausted. It was stopped. To date work on the project has not started. It will cost millions of dollars to get that in motion again.

Was that the fault of the gentleman from Iowa? Oh, no. He and two other members of the committee were in California in the latter part of 1947. They toured the entire State with people from the Bureau of Reclamation, Department of the Interior. I asked the direct question of the men representing the Department of the Interior in the presence of the Congressmen: Do you have plenty of money? Their answer was yes. Yet a few days later the project was stopped.

The whole blame has been placed on the entire Congress. It is stated that we did not provide enough money to do a job. The blame was placed on the gentleman from Iowa [Mr. JENSEN], chairman of the Subcommittee on Appropriations. Mr. Chairman, it is a good thing I was not chairman of the committee, because I would not have taken the abuse that was piled on him and his committee because the project was stopped.

What did your bureaucrats down here say? What did they do? They sent out letters requesting that all of the money be spent by January 1 or before if possible in order to put the Congress in an embarrassing position.

Mr. Chairman, this bill here gives the Bureau of Reclamation a great deal more power. What are we thinking of? Where is your intestinal fortitude that your forefathers injected into you? We have lost the punch. We are only interested in passing out bouquets to Members to make them feel they have done a great job. You will not do a great job if you pass this bill, in my estimation. I think it is a disgrace and a shame to think that legislation is brought in here when people in the irrigation and reclamation districts have been treated like they have. Congress is going to pay out more money to start new projects rather than complete the ones they have already started.

I stayed in California when Congress convened in January to cover the entire Central Valley project in my State from one end to the other in order to get a complete break-down as to what percentage was needed for each additional unit to be constructed. I say to you in all sincerity, Mr. Chairman, that we have got to get our house in order and control these bureaucrats down here on the Avenue or your people from back home will hear results later on that you will not like, and I do not care what State you are from.

Mr. Chairman, practically every Member of this House in 1946 ran on a platform providing for taking control away from the bureaucrats, yet I have not seen a piece of legislation go through here to take away one thing. In 9 cases out of 10 a bill that passes this Congress is written by a bureau, not the Congress. When you attempt to amend it here you are stopped in your tracks. Why?

Those are questions that go through my mind and it is one of the reasons I am not going to run for office in 1948 along with the rest of you.

I will go home and run my own little business like I did before. I do not propose to be pushed around by a bunch of dillywackers down here that never got a vote from anybody. But, we are being pushed around all the time. You know that that is the truth just the same as I do. I want to say, in all sincerity, that I propose to offer a motion to recommit. I think it should be sent back to the committee. I think the rug should be pulled out from under the bureaucrats downtown here so that the Congress will have something to say about what is going on, how, and where.

As far as the 78-year provision is concerned, I think the time is coming when we ought to pay our bills as we go along. I raised my children by saying, "When you buy something, and buy it on time, you pay more for it." The California Central Valley project has a 39-year provision. Here we come along and we extend it to 78 years. We better be paying these bills as we go along, because the time has come when the taxpayers are going to say, "We want a little reduction in taxes," and we should pay now when we can afford to pay.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. WELCH. Mr. Chairman, I ask unanimous consent to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WELCH. Mr. Chairman, this Congress, before its adjournment, will be called upon to appropriate huge sums of money to build for national defense the greatest air force in all history. Airplanes are built principally of aluminum. It will require millions of tons of aluminum to carry out this program. Aluminum can be only electrically processed. Were it not for the electricity provided by publicly owned hydroelectric projects, the demands for airplane aluminum, which were in excess of over a million tons per year during the war, could not have been met. Let someone challenge that statement.

There is a shortage of electric power in every section of the United States. More electric power is being used at the present time than during the peak of the war. Great projects such as TVA, Grand Coulee, and Bonneville on the Columbia River furnished the electric power necessary to process the aluminum used in the construction of the planes which won the war. The Columbia River projects are taxed to the limit. Every kilowatt of power produced on the Columbia River is contracted for and applications for more power are pouring in.

To carry out this program of a mighty air force, every kilowatt of hydroelectric power which can be produced by either private or public enterprise is absolutely necessary.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I want to say this: That I have listened to the speech of the gentleman from California [Mr. ELLIOTT] with great interest. I think it took a lot of courage for him to come down here and say what he said. The thing that has been going on in here the last 3 or 4 days is what worries me. I think he is eminently correct.

I am going to insert in 2 or 3 days a letter that I wrote to a REA manager, Mr. Howard G. Crocker, manager, Northwest Electric Cooperative, Inc., Woodward, Okla., in my State, and I will tell you why I am going to do it, and it applies to the bureaucrats in charge of the REA administration here in Washington and the national legislative representative of the REA, Mr. Clyde Ellis, here in Washington. I believe in REA, and on two occasions here I supported REA amendments, that are record votes, offered by the gentleman from Mississippi [Mr. RANKIN]. Yet I got a letter 3 or 4 days ago from a REA co-op manager, Mr. Crocker, down in my State that said "it was becoming increasingly difficult to explain to our farmers in Oklahoma why Congress takes the attitude it does in refusing to set up funds for REA." I took about three pages to write Mr. Crocker and tell him this: That I wish he would use due care in talking to his farmers when he points out that these amendments were defeated, and not leave the impression with my farmers and with my people that I am against the REA program. I opposed the sale of the Chouteau steam-generating plant out at the Oklahoma Ordnance Works to the Grand River Dam Authority there in my State because I do not believe in any steam-generating plant being sold there to the GRDA plant in direct competition with the taxpaying utility industries in my State. And because I did that, this little $15,000 squirt, Clyde Ellis, up here and Claude Wickard over in the REA and the REA managers in my State are going to tell my people down there that I am against REA. It is going to cause me to have to come out on the stump and tell them that time after time I have voted for REA, and what the Oklahoma farmers and what the other farmers of this country want is electric energy out on their farms, and not having these high-salaried experts up here to fight the private power companies.

I will tell you this: I have had friends of TVA talk to me about what a grand proposition it was; and when I questioned them in some respects, they said, "Why, it is going to pay out in 35 years." Now, I do not know if it will ever be paid out. But, anyway, now this bill provides 78 years for paying out, and probably 10 years from now they will be wanting 100 years or 150 years. I am for these projects, but they must be on a sound basis. I say to you that if this thing keeps going which we saw here last spring when a few of us tried to cut appropriations sought for the Southwestern Power Administration, another grandiose plan that they have down in the southwestern part of the United States to gradually take over the States of Oklahoma, Arkansas, Louisiana, Texas, and Missouri, and build up another TVA, like you have got up in Nebraska and Tennessee, and like you have got up in the Northwest, you are going to finally accomplish what a group of planners set out to do years and years ago; you are going to find that gradually you are going to nationalize the whole industry.

You are finally going to do what they set out to do back about 1914—you are going to find that gradually you are going to get the whole industry nationalized, and this will be the camel's nose under the tent. Then you are going to get the railroads and you are going to get the oil industry all nationalized, so that we will find ourselves some fine day in the same position they are finding themselves over in England. That is what this bureaucratic control will eventually lead to—nationalization of all our basic industries.

This is the point I want to make: The gentleman from California [Mr. ELLIOTT] has been for irrigation and reclamation. He has fought for it. Yet he told you what the gentleman from Iowa [Mr. JENSEN] did—that you have to go with them all the way—you have to help socialize or nationalize this country, so that finally we will be in the shape they are in over in England.

This thing will no doubt be fully discussed down in Oklahoma this summer. I know there are probably some Members here who will say—and if they do not, Mr. Clyde Ellis will—that because I am not for the Southwestern Power Administration, which will eventually drive every private utility company in my State out of business, I am against REA. That is what they tell my farmers down there. They say, "We cannot extend the line out to you because Congress will not appropriate the money." Then, when the farmers write me and I tell them the truth, those REA managers come back and say, "Well, it is because we cannot get poles or condensers," or that sort of thing. What they are trying to do—these REA co-op managers in my State—is to make the farmers think that we are not appropriating the money—that I, for instance, am an enemy of REA—so they can keep putting the good old heat on.

The CHAIRMAN. The time of the gentleman from Oklahoma has expired.

Mr. JOHNSON of Oklahoma. Mr. Chairman, I ask unanimous consent to proceed for two additional minutes.

Mr. MILLER of Nebraska. Reserving the right to object, Mr. Chairman, the gentleman is discussing a subject which is out of order. I am not going to object to this request, but I think we would like to finish with this bill, and I shall object from now on to anyone speaking out of order.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JOHNSON of Oklahoma. To satisfy the gentleman from Nebraska [Mr. MILLER], the point I am trying to make is this: There are those of us that believe in REA, who want to get some electricity out to the American farmer, but the REA managers down in my State go out to the farmer and say, "If we could get more money here, Johns-Mansville, Inc., or some other industry, would come in here and put up a lot of manufacturing plants and we would get a lot of industrial users." When that time comes in my State, when they start thinking about the industrial users, they will be just as bad as the private utilities once were. They will be trying to sell electric energy in large blocks, and the American farmer can go to hades, as far as they are concerned. I want to get electricity out to the Oklahoma farmers, and I do not want to have my integrity challenged every time I am against this bureaucratic bunch who are trying to extend their control over the lifeblood of this country.

The reason I make this talk is this: I am going to go along with this bill; I am for it in principle; but I do not like this business of talking about the TVA when you come in here one day trying to prove one point and say what a grand thing it is and say it will pay out not in 50 years but in 35 or 40 years, and then the next month you try to make another point, and state that it is going to take 78 years to pay out and the 2½-percent interest rate is going to cause you to raise rates. Do you not think that is something the private utility industries of this country have been fighting when they have to go out and borrow money? And they also pay taxes. That is the reason you get the rates you do. There is no such thing as cheap electricity, as far as I am concerned. Somebody has to pay for it. You do not get anything given to you in this world for nothing.

I have schools in my State where this Grand River Dam Authority is located where they had to close 12 schools last year on account of lack of funds, and the other 76 counties had to send in $70,000 a year to keep their schools going, so that up in that area they could get what they call cheap power. It is time to give some consideration to our taxpaying industries and stop forcing them into competition with a tax-free sovereign.

Mr. CRAWFORD. Mr. Chairman, I move to strike out the last word.

Mr. ROCKWELL. Mr. Chairman, I move that debate on the bill close in 15 minutes, the gentleman from Michigan [Mr. CRAWFORD] be allotted five additional minutes with the 5 minutes remaining to be allotted to the gentleman from Mississippi [Mr. RANKIN].

The motion was agreed to.

Mr. CRAWFORD. Mr. Chairman, I think it can truthfully be said historically in our country that men who sit in the House and Senate of the United States have to assume the responsibility of legislating for our people. Those who have no special responsibility to the electorate can deal with matters in such manner and make statements as rash as they desire to make. The fact remains that this Congress and the Congresses that have gone before have established an irrigation and reclamation program in this country which I think you will find covers

about 17 of the Western States. In those projects you have invested a considerable amount of money. Irrigation and reclamation has been accepted as an institution in the United States. You are shifting populations and bringing thousands of acres of land into cultivation which was previously desert land. You are producing fantastic tonnages of foodstuffs on those lands where a sufficient amount of water has been made available. It is my suggestion that you not scuttle this program by getting all heated up here in the closing minutes of debate on this bill.

Mr. Chairman, I have not been on this committee in recent years, except since the first of January 1947. When I first came to Congress I spent several years on the committee and was introduced to this whole program. I have not been ignorant of some of the things that have been going on, because I continually travel this section of the country to try to keep myself informed of what is going on out there. I have seen some great changes. During the past fall I took the time to go down through the great Central Valley project of California. That is a vast food empire. The country will need every pound of food that can be produced there during the next 50 to 100 years. The irrigation and reclamation projects which have been approved heretofore and which are now under way and which future Congresses will approve will see that the natural waters on those ranges are harnessed and put through the dams and spillways and that the power will be harnessed and that the soil will be watered: make no mistake about that. Incidentally, you know that this is a political question. The men who are going to handle the work on the floor of the House and the Senate during this year, next year, and in the years to come are not going to ignore the 17 Western States: if you want to think of that for awhile, you can do so. This year I have been devoting all of my time to work on the Committee on Public Lands. I resigned from the Committee on Banking and Currency voluntarily because I thought I saw something coming up in the West that would need a little bit of attention and I wanted to give some of my energy to the proposition out there. I have no financial interest out there in this area. My State is not particularly interested in this, except that we want to sell automobiles out there, and we want to sell other things that we produce in Michigan. So here is a national undertaking. I think it would be in order to observe that it may not be many months before you will be building such projects as you have before you on this map, in the River Jordan Valley, over in the Holy Land, and in other countries—a la Marshall plan. I can comprehend that you will go in there and harness those areas in connection with your efforts in Palestine, and furnish the money on a 50-year basis, or even a 100-year basis if necessary. It may be better to do that and let those folks produce some foodstuffs themselves and have some electricity rather than to produce it here and ship it over there to them as a gift. You have accepted as a national institution the proposition of REA.

Are there any political party leaders who want to repeal that work in this country? I do not think so. If you want to, get up, and I will yield you the time to say that you want to do that.

This bill is to amend the Reclamation Project Act of 1939 in such a way as to include among the purposes to which the estimated costs of proposed Federal reclamation projects may be allocated certain additional purposes, to wit:

> Recreation, salinity control, and silt control, to authorize the reexamination of projects heretofore authorized for the purpose of determining whether any part of their costs is allocable to fish and wildlife preservation and to such additional nonreimbursable purposes to permit allocations to such purposes, where appropriate; to provide for the nonreimbursability of operation and maintenance costs attributable to nonreimbursable purposes; and to reduce the rate of interest required to be returned on the power investment from 3 to 2½ percent per annum. The bill would settle the long-standing controversy over application of interest returned on the power investment by providing that not more than one-fifth of the revenues derived from the interest component of power rates may be applied on irrigation costs charged to power and that the balance of such revenues must be accounted for as interest.

The gentleman from California [Mr. ELLIOTT] has an interest in the Central Valley project and he spoke about giving great powers that have not been given before. Take the report of the committee, on pages 4 and 5, and see where the present law authcrizes the Secretary of the Interior:

> If the proposed construction is found by the Secretary to have engineering feasibility and if the repayable and returnable allocations to irrigation, power, and municipal water supply or other miscellaneous purposes found by the Secretary to be proper, together with any allocation to flood control or navigation made under subsection (b) of this section equal the total estimated cost of construction as determined by the Secretary, then the new project, new division of a project, or supplemental works on a project, covered by his findings shall be deemed authorized and may be undertaken by the Secretary.

I am reading the present law.

Mr. MURDOCK. Mr. Chairman, will the gentleman yield?

Mr. CRAWFORD. I yield.

Mr. MURDOCK. You are reading the present law which gives the Secretary of the Interior more power than he could possibly have under the bill before us?

Mr. CRAWFORD. And why did you give him that power? Because here are projects of such a nature that you do not go out and bring those great undertakings into operation until some department of Government first performs. That is the reason you put it in the law. This bill is not giving him new power with respect to that authority to go out and do these things. So do not get excited about that.

Now, when his proposition first came to my attention—and this arose during my absence from the committee during the years I was not serving on the committee—I told the men on the committee, I am interested in three things: First, I want to know that the interest paid on these projects is sufficiently high to take care of the bond buyers and taxpayers of this country who advance the money for these operations.

Second. I want to know that the life of the project will come within the cost or the concept which is established to make these charges against farmers and against power users.

Third. I do not want to be a party to financing projects which burden the people in the State of Michigan, for instance, to pay for power used by people in the Western States at a price to those people in the Western States which is unfair to the people in Michigan.

In my opinion, this bill squares with those proposals which I laid down; otherwise I would not be supporting it.

You can get all excited about this, and throw this back into the committee and let the committee work another year or two upon the proposition—and certainly this thing has been under discussion since the Solicitor gave his ruling. And may I ask the chairman of the subcommittee when that was?

Mr. FERNANDEZ. 1944.

Mr. CRAWFORD. That was in 1944.

The CHAIRMAN. The time of the gentleman from Michigan has expired.

Mr. RANKIN. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I desire to answer the distinguished gentleman from Massachusetts [Mr. BATES].

First, he talked about Bonneville and the development of the Columbia River, stating that it was primarily for flood control and navigation. I was here when that bill was passed, and was one of the leaders in the fight for the development of the Columbia River. It was understood then that Bonneville was essentially a power project.

When a movement was made to cut the Grand Coulee Dam off and make it a low dam, I led the fight against it. Some Members at that time said they did not need this power. I asked them, When? They said, "Now." I asked them, "What about 25 years from now, or 50 years from now?" We are looking at this proposition from a long-range standpoint. The power development in these irrigation projects is just as necessary as the irrigation itself.

Now, you talk about the cost of TVA power. You are making power generated at Boulder Dam available in Los Angeles at 4 mills a kilowatt-hour wholesale, 268 miles away.

My home town, Tupelo, Miss., is approximately 100 miles from Muscle Shoals and we are paying 4.72 mills a kilowatt-hour for TVA power, wholesale.

In other words, we are paying a slightly higher rate for power transmitted a hundred miles than Los Angeles is paying for Boulder Dam power transmitted 268 miles.

When the Secretary of the Interior got ready to fix a yardstick rate for the Bonneville administration he called me and asked me if I would object to their making those rates lower than the TVA yardstick rates.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. No; not now.

The Secretary said: "We can supply this power cheaper than they can from the TVA."

I said: "Then, certainly I have no objection."

Therefore the power distributed from the Bonneville Dam, and the Grand Coulee Dam, and from the Umatilla or McNary Dam is being supplied to the people of that area at a cheaper rate than we are paying in the TVA area.

If they can get power in the Central Valley distributed for that area economically at a lower rate than we are paying in the TVA area, then I say go ahead and do it.

Let me say to the gentleman from Massachusetts that I am one of the men in this House who advocated from the beginning the development of the water power on the St. Lawrence River. There are 12,000,000,000 kilowatt-hours of electricity a year going to waste there.

Mr. NICHOLSON. Mr. Chairman, will the gentleman yield?

Mr. RANKIN. No; I am going to tell the gentleman something now.

Six billion kilowatts of that power belong on the American side. That power can be generated at 1.77 mills a kilowatt-hour. That means all prime power; that is, steady all-the-year-around power, and also secondary power that comes only with flood waters. That power can be transmitted at .04 of a mill a kilowatt-hour for every hundred miles.

I am telling you what the engineers for the opposition as well as the engineers supporting the project testified to before the committee. They said that power could be transmitted at four-tenths of a mill per kilowatt-hour for every 100 miles. It could be transmitted 300 miles for 1.2 mills a kilowatt-hour. That would reach every point in Massachusetts, and I think it would reach every point in the district represented by the gentleman now standing.

You can take that power and lay it down within that distribution radius at a cheaper rate than we are paying throughout the TVA area.

Therefore, here is a yardstick that would probably break the power rates in New York by $200,000,000 a year, and probably wipe out the $62,000,000 that the people of Masachusetts are overcharged every year as compared with the Bonneville rates or the Ontario rates.

Mr. Chairman, I am for the development of all this water power that can be developed, and for getting it to the people in the area at the lowest possible rates.

The CHAIRMAN. The time of the gentleman from Mississippi has expired.

Mr. DAWSON of Utah. Mr. Chairman, I wish to stress a matter of national importance upon which this bill will certainly have a substantial effect. I refer to the depletion of our expendable resources of oil and gas which, once used, can never be replaced and which are being depleted at an alarming rate. We have been made most uncomfortably aware in the last few days of the necessity of conserving these supplies. In fact, we are now being warned by many large oil companies that production cannot keep up with our consumption. Yet in 1946, California alone used over 10,000,000 barrels of oil for the production of electric power when, at the same time, potential hydroelectric plants of proposed multipurpose projects on the Colorado River, within reach of the California and Arizona markets, could have produced three times the amount of energy produced by this oil.

Our experts tell me that these potential hydroelectric developments with reasonable maintenance and replacements will last upward of 100 years while some facilities such as dams, reservoirs, and canals will be useful for a much longer period. The bill we have under consideration calls for repayment of the investment in power facilities within 78 years or within the life of the project, if that is less than 78 years.

A repayment period of up to 78 years for all power facilities is quite conservative since, in most cases, it will be much less than the useful life of the project. Lengthening the repayment period will make many future projects financially feasible which otherwise may be unfeasible.

Today we should not dare to say that we cannot afford to develop our comparatively perpetual water power, particularly when it is only one feature of vastly important multipurpose projects, if such a stand means the greater use of expendable fuel, especially oil and gas. Rather, we should change our arbitrary yardstick of measuring feasibility to require the more logical and realistic repayment of the project throughout its life.

In calendar year of 1946, 35 percent of the electric energy produced by all electric utilities in the United States was from hydroelectric plants. In that same year, 36,000,000 barrels of fuel oil, 307,000,000,000 cubic feet of gas, and 72,000,000 tons of coal, were used in the production of electric energy. The Bureau of Reclamation estimates that in the next 6 years new hydroelectric plants developed in connection with their great multipurpose projects throughout the West, can be added, to produce electricity, the equivalent of over 30,000,000 barrels of fuel oil.

Let us view this matter from another angle. The development and use of the water resources of our country must be accomplished on a basin-wide basis. We have already developed immensely successful projects, but all components of such a basin development should logically be developed. We have no business to develop the first part and then sit down and twiddle our fingers because later developments do not have as much butterfat in them as the original developments. We must develop all of our practically perpetual water resources if only to save our expendable resources of fuel.

Our great conservation agencies are, by congressional direction, in the business of developing the country to make it most useful to the people of today and to assist the generations of tomorrow by conserving our resources. This may sound like we are trying to have our cake and eat it, too, but actually we can have a fuller life today and still save more of our expendable resources if we take full advantage of those nearly perpetual resources of hydro power. With full development of potential water resources now known to exist, it is estimated that the Columbia River Basin alone could produce 60,000,000,000 kilowatt-hours of energy a year, central and northern California 20,000,000,000 kilowatt-hours a year, and the upper and lower Colorado Basins 30,000,000,000 kilowatt-hours a year. These three areas could therefore produce an average of 110,000,000,000 of kilowatt-hours a year. This compares to about 255,000,000,000 of kilowatt-hours of electric energy produced last year by all of the utility plants of the country, both fuel and hydroelectric.

In these three basins alone, we have now developed capacity to produce annually about 30,000,000,000 of kilowatt-hours of hydroelectric energy. The difference between this and the full present and potential hydroelectric output, or nearly 80,000,000,000 of kilowatt-hours, corresponds to at least 160,000,000 barrels of oil, or 960,000,000,000 cubic feet of gas. If this hydroelectric capacity is not developed as fast as it can be used it will be necessary to make up the deficit from fuel-electric plants.

To sum this matter up, I believe that it is logical to consider that repayment of reimbursable investment for these great multipurpose projects can be made with safety to the Government if the pay-out period is extended to more nearly coincide with the life period of the project. If this is done, the maximum development of our water resources will be made possible. My second conclusion is that we should not burn our precious and expendable resources of oil and gas under the boilers of our stationary plants any more than we can help and, to prevent this, we must develop our hydro resources as fast as possible. Such fuel should be conserved for use in those places which have little or no other source of supply, such as oil for ship drive, automobiles, and planes, and gas for domestic and industrial uses.

I advocate the passage of this bill as a logical and proper basis for determining repayment requirements and as a powerful aid to the fullest conservation of our most valuable but expendable reserves of oil and gas.

Mr. HOBBS. Mr. Chairman, I offer a preferential motion.

The Clerk read as follows:

Mr. HOBBS moves to strike out the enacting clause of H. R. 2873.

Mr. HOBBS. Mr. Chairman, I offer this motion because it is the only way I can override the opposition of the gentleman in charge of this bill who moved to close debate and refused me 5 minutes. I do not wish to be understood, however, as pressing this motion because I think the House ought to have a chance to vote on this important bill, 99.44 percent of which, the percentage of purity in Ivory soap, I am in favor of. But I do wish to present a thought.

Mr. ROCKWELL. Mr. Chairman, will the gentleman yield?

Mr. HOBBS. Of course, sir, I am glad to yield to the gentleman from Colorado.

Mr. ROCKWELL. May I inform the gentleman that there were 8 or 10 gentlemen who wished to speak on the bill and we felt it was about time to close debate. There was nothing against the gentleman individually.

Mr. HOBBS. If that be so, that is all the more reason why the gentleman should not have offered his motion. I am only one of the least of the unimportant Members of this House. If there were 8 or 10 Members who wished to speak why should we be denied that privilege, especially when the House is recessing till Monday?

But be that as it may, I want to go on and give you this one point and I wish you would listen to me. I am not talking to hear myself talk. I want to read to you what this law in section 9 (a) says:

No expenditures for the construction of any new project, new division of a project, or new supplemental works on a project shall be made, nor shall estimates be submitted therefor, by the Secretary until after he has made an investigation thereof and has submitted to the President and to the Congress his report and findings on-

That has to do with new projects. Subsection (7) provides:

(7) the part of the estimated cost which can properly be allocated to preservation and propagation of fish and wildlife, * * *, or recreation, * * *, or general salinity control, or silt control. Costs allocated pursuant to such findings, together with the annual operation and maintenance costs attributable to the same purposes, shall be nonreimbursable and nonreturnable.

These are the purposes in point in the consideration of the motion to recommit, which I had planned to offer and which is on the Clerk's desk.

I favor every word of these quotations from the pending bill.

Mr. Chairman, what I am inveighing against is not these features, but the new retroactive feature that I sought to strike out by the amendment I offered yesterday, which was defeated, and which appears in lines 5 through 15, on page 7. This would eliminate the requirement of an estimate of the cost after investigation, report, and findings of the Secretary.

So, my motion to recommit the bill simply instructs the committee to report with an amendment requiring the retroactive effect be limited to those projects heretofore authorized as to which an estimate of the cost was made as required by law. There is the joker in this bill. It stipulates that without any estimate of cost, the Secretary may go back 40 years and give away some $40,000,000. Without such amendment we open the door on all of these projects heretofore authorized. You say there need not be made any estimate of the cost, and no report or findings that are required in the cases of new projects, although two of these projects have paid out in full over the years. You say that that contract which was then made is no good and the Secretary could charge the cost of these benefits up to the Federal Treasury. I do not know what will become of the money. But you say that these safeguards which are desirable as to new projects, are not desirable as to the old.

Therefore, I submit that my amendment, the offering of which would be required by my motion to recommit—making the forgiveness apply only to those old projects as to which there had been, as required by law in the case of every new project, an estimate of the cost in advance—is not merely wise, but vital, and should have been adopted. That is the reason I wanted to make a motion to recommit on that ground, and that ground only, but since I am not going to have that opportunity, I asked for these 5 minutes to explain to you that this is an important change and it may take out of the Treasury some $40,000,000 without any justification or finding of fact or estimate of cost.

Mr. Chairman, I ask unanimous consent to withdraw my motion.

The CHAIRMAN. Is there objection to the request of the gentleman from Alabama?

There was no objection.

The CHAIRMAN. The question is on the committee substitute amendment.

The committee substitute amendment was agreed to.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. DONDERO, Chairman of the Committee of the Whole House on the State of the Union, reported that Committee, having had under consideration the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939, pursuant to House Resolution 430, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

The question is on the committee substitute amendment.

The committee substitute amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

Mr. ELLIOTT. Mr. Speaker, I offer a motion to recommit.

The SPEAKER. Is the gentleman opposed to the bill?

Mr. ELLIOTT. I am in its present form, Mr. Speaker; yes.

The SPEAKER. The Clerk will report the motion to recommit.

The Clerk read as follows:

Motion to recommit: Mr. ELLIOTT moves to recommit the bill H. R. 2873 to the Committee on Public Lands and report the same back to the House forthwith with the following amendments:

On page 6, line 11, strike out all of line 11 and the remainder of the page down to the word "new" on line 25, and insert the word "A."

On page 8, line 21, strike out "78" and insert "50."

On page 9, line 2, strike out all of the line beginning with the word "within" and all of the remainder of the page down to the word "of" (where it appears the second time) in line 7, and insert "within 50 years from the date when each power feature becomes revenue producing or the period of years provided in subsection 9 (d) hereof, whichever may be the shorter."

Mr. ROCKWELL. Mr. Speaker, I move the previous question on the motion to recommit.

The previous question was ordered.

The SPEAKER. The question is on the motion to recommit.

The question was taken; and on a division (demanded by Mr. ELLIOTT) there were—ayes 109, noes 84.

Mr. PETERSON. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. The Chair will count. [After counting.] Two hundred and twenty-four Members are present, a quorum.

Mr. ROCKWELL. Mr. Speaker, I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 210, nays 152, not voting 68, as follows:

[Roll No. 4]

So the motion to recommit was agreed to.

The Clerk announced the following pairs:

On this vote:

Mr. Tibbott for, with Mr. King against.

Mr. Thomas of New Jersey for, with Mrs. Douglas against.

Mr. Hartley for, with Mr. Miller of California against.

Mr. Gavin for, with Mr. Marcantonio against.

Mr. Hardie Scott for, with Mr. Lane against.

General pairs until further notice:

Mr. Dirksen with Mr. Keogh.

Mr. Macy with Mr. Hébert.

Mr. Judd with Mr. Boggs of Louisiana.

Mr. Horan with Mr. Buckley.

Mr. Buffett with Mr. Multer.

Mr. Byrnes of Wisconsin with Mr. Morgan.

Mr. Chadwick with Mr. Domengeaux.

Mr. Corbett with Mr. Evins.

Mr. Kilburn with Mr. Rooney.

Mr. Stratton with Mr. Buchanan.

Mr. Mathews with Mr. Heffernan.

Mr. Merrow with Mr. Kee.

Mr. Fulton with Mr. Kefauver.

Mr. Woodruff with Mr. Chapman.

Mr. Poulson with Mr. Byrne of New York.

Mr. Plumley with Mr. Philbin.

Mr. August H. Andresen with Mr. Rivers.

Mr. Chiperfield with Mr. O'Toole.

Mr. Cotton with Mr. Brooks.

Mr. Lichtenwalter with Mr. Pfeifer.

Mr. Jenkins of Pennsylvania with Mr. Barden.

Mr. Gamble with Mr. Powell.

Mr. Gillie with Mr. Passman.

Mr. Gwinn of New York with Mr. Murray of Tennessee.

Mr. COFFIN, Mr. BRADLEY, and Mrs. ROGERS of Massachusetts changed their votes from "nay" to "yea."

Mr. BLAND changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

The SPEAKER. The Chair recognizes the gentleman from Colorado [Mr. ROCKWELL].

Mr. ROCKWELL. Mr. Speaker, pursuant to the instructions of the House as contained in the motion to recommit, I report back the bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939, with an amendment, which I send to the desk.

The Clerk read as follows:

On page 6, line 11, strike out all of line 11 and the remainder of the page down to the word "new", on line 25, and insert the word "A"; and on page 8, line 21, strike out "78" and insert "50"; and on page 9, line 2, strike out all of the line beginning with the word "within" and all of the remainder of the page down to the word "of" (where it appears the second time), in line 7, and insert "within 50 years from the date when each power feature becomes revenue producing or the period of years provided in subsection 9 (d) hereof, whichever may be the shorter."

The SPEAKER. The question is on the amendment.

Mr. WELCH. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The question was taken; and there were—yeas 220, nays 134, not voting 76, as follows:

[Roll No. 5]

So the bill was passed.

The Clerk announced the following pairs:

On this vote:

Mr. Arends for, with Mr. Rayburn against.

Mr. Thomas of New Jersey for, with Mr. King against.

Mr. Hartley for, with Mrs. Douglas against.

Mr. Gavin for, with Mr. Miller of California against.

Mr. Lichtenwalter for, with Mr. Marcantonio against.

Mr. Tibbott for, with Mr. Lane against.

Mr. Cox for, with Mr. Celler against.

Mr. Macy for, with Mr. Buchanan against.

Additional general pairs:

Mr. Woodruff with Mr. Hébert.

Mr. Knutson with Mr. Boggs of Louisiana.

Mr. Kilburn with Mr. Rooney.

Mr. Dirksen with Mr. Kee.

Mr. Fulton with Mr. Clark.

Mr. Gillie with Mr. Keogh.

Mr. Corbett with Mr. Chapman.

Mr. McDowell with Mr. Buckley.

Mr. Horan with Mr. Dawson.

Mr. Jenkins of Pennsylvania with Mr. Evins.

Mr. Buffett with Mr. Heffernan.

Mr. Chadwick with Mr. Davis of Georgia.

Mr. Chiperfield with Mr. O'Toole.

Mr. Gamble with Mr. Philbin.

Mr. Gwinn of New York with Mr. Domengeaux.

Mr. Andrews of New York with Mr. Pfeiffer.

Mr. August H. Andresen with Mr. Rivers.

Mr. Judd with Mr. Jones of North Carolina.

Mr. Mathews with Mr. Lesinski.

Mr. Merrow with Mr. Morgan.

Mr. Poulson with Mr. Morrison.

Mr. Stratton with Mr. Cravens.

Mr. Buck with Mr. Byrne of New York.

Mr. Cole of Kansas with Mr. Multer.

Mr. Byrnes of Wisconsin with Mr. Kefauver.

Mr. Jennings with Mr. Barden.

Mr. MEADE of Kentucky changed his vote from "nay" to "yea."

Mr. ANGELL changed his vote from "yea" to "nay."

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PROGRAM FOR NEXT WEEK

Mr. HALLECK. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

Mr. HALLECK. Mr. Speaker, I have asked for this time in order to announce the program for next week.

Next Monday is District day. I do not yet know whether or not there will be any bills from that committee, but if there are, of course, they will be disposed of first. Then we propose to call up the bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for the relief of internees in certain cases. The consideration of that bill will be continued on Tuesday if it is not completed on Monday.

The program for Wednesday is undetermined.

It is expected that on Thursday and Friday of next week there will be general debate on the tax bill, H. R. 4790.

EXTENSION OF REMARKS

Mr. ARNOLD (at the request of Mr. HALLECK) was given permission to extend his remarks in the RECORD and include an article.

Mr. ELLIS asked and was given permission to extend his remarks in the RECORD and include two letters.

Mr. CROW asked and was given permission to extend his remarks in the RECORD and include a statement on the West Virginia plan for veterans' housing.

Mr. WILLIAMS asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. SPENCE asked and was given permission to extend his remarks in the RECORD and include an article appearing in the January issue of the Southern Banker by Hon. John D. Goodloe, Chairman of the Board of the Reconstruction Finance Corporation.

Mr. GORDON asked and was given permission to extend his remarks in the RECORD and include an editorial which appeared in the New York Times entitled "The Nazi-Soviet Documents."

Mr. KLEIN asked and was given permission to extend his remarks in the RECORD in two instances and include in each editorials from the New York Post.

Mrs. SMITH of Maine asked and was given permission to extend her remarks in the RECORD in two instances and include in one an editorial from the Christian Science Monitor and in the other some data concerning the veterans' subsistence bill.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to extend my remarks in the RECORD in two instances, in the first to include a letter written to the Speaker by General Gray asking for money for an investigation of insurance matters, and in the other to include a letter from the Attorney General of the Commonwealth of Massachusetts enclosing a bill that he requests be introduced.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

SUGAR PRICES

Mr. BEALL. Mr. Speaker, I ask unanimous consent to extend my remarks at this point in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Maryland?

There was no objection.

Mr. BEALL. Mr. Speaker, last week I introduced a resolution in the House asking for a complete investigation of all phases of the sugar industry. My purpose in doing this was to find out just how much sugar prices can be reduced since there is evidence that they are too high. I feel that if we can take one commodity at a time and reduce prices on it, we might get somewhere in our fight against inflation. Six days after I introduced my resolution the price of refined sugar in New York fell 40 cents a hundred pounds. That may not seem like a lot of money, but if all segments of the sugar industry drop their prices by this amount, we already have a saving to the American housewife of some $64,000,000, since we will consume about 8,000,000 tons of sugar in this country this year. It is unfortunate that this price reduction was not announced before I introduced my resolution.

LEAVE OF ABSENCE

Mr. KUNKEL. Mr. Speaker, I ask unanimous consent that my colleague the gentleman from New York [Mr. GAMBLE] be granted leave of absence for today on account of official business.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The SPEAKER. Under previous order of the House, the gentleman from Michigan [Mr. ENGEL] is recognized for 20 minutes.

WASTE AND EXTRAVAGANCE IN THE ARMY

Mr. ENGEL of Michigan. Mr. Speaker, this will be my fourteenth year as a Member of Congress and my twelfth year as a member of the Military Subcommittee of the Appropriations Committee. During that time I have done everything in my power to prevent waste of the taxpayers' dollars. During the war, because of war conditions, I have refrained from calling the attention of the House to the outrageous, willful, and unnecessary waste of the taxpayers' money. The war is over. The War Department continues to throw money down the military rat hole despite every effort I have made to prevent their doing so. I have come to the conclusion that only by following what Woodrow Wilson called a policy of "pitiless publicity" can we hope to protect the taxpayer from the profligate and inexcusable waste of his money on the part of the military forces and other agencies. This is the only way we can reduce waste and expenditures necessary to reduce taxes. I shall call the attention of the House and of the public to such cases of waste as they come up from time to time during the present session of Congress.

Mr. Speaker, I want to now call the attention of the House to such an instance of inexcusable waste. In August and September of 1945 the War Department Subcommittee of the Appropriations Committee visited various military installations overseas. During the early part of September we flew the hump from Kunming, China, to Chabua, India. From there we went to Calcutta, to Agra, to New Delhi, and then to Karachi, India, making various inspections. This is the story of Maj. Gen. George C. Richards. War Department budget officer, and Karachi, India. For some unexplainable reason we were held at New Delhi for 2½ days. We arrived at Karachi at 11 o'clock in the forenoon and despite the fact that we were told we were to have a full day there we were scheduled to leave at 1:15 p. m. on the same day. Immediately upon our arrival we were taken in jeeps to various installations with an army officer on each arm. At approximately 12 o'clock we passed through the officers' club to get to the officers' mess. I stopped to talk to a number of young air officers, mostly second and first lieutenants who were apparently waiting for us. The other members of the party went into the dining room. It wasn't very long before General Richards called me saying that we had to eat and leave at 1:15 p. m. After eating a sandwich I came back and talked to these young officers. They told me that according to the schedule they were to have 1 hour with the committee, from 1 to 2 o'clock p. m., and that the enlisted men were to have an hour, between 2 and 3 o'clock; that apparently they were rushing us out of Karachi because they did not want us to talk with them. I informed them that I was glad to hear what they had to say, but that I wanted no hearsay but only statements of people who had first-hand information. These young officers were very bitter. They assured me that they had first-hand information. I asked for a pad and pencil and began to take their statements. The rest of the members of the committee and officers were still in the mess hall. After about 30 minutes they came out and started for the plane which was scheduled to leave as I stated at 1:15 p. m. General Richards remained behind to round up everybody and, apparently missing me, came back to the club rooms. He saw me talking to these young officers and informed me that the plane was leaving and requested me to go to the plane. I kept on taking the testimony stating that I would be along in a little while. He came a second time and insisted that I come, stating that the plane was leaving. I replied that I had flown 30,000 miles to obtain information and that I was going to obtain the information these men had if it took me until Christmas; that he could take the plane and leave, I was going to stay. General Richards then walked up to a second lieutenant with whom I was talking and said, "Lieutenant you report everything you say

here to your commanding officer." Here we had a major general, the budget officer of the United States Army, ordering a second lieutenant to report everything he said to a Member of Congress to his commanding officer.

General Richards could have had only one purpose in making that statement and that was to bluff the young officer into keeping still. In the meantime the other members of the committee and of the party, including the Commanding General of Karachi area, had come back to the club room and were standing a short distance from where we were talking. I turned to General Richards and said, "Come on, we are going to see that commanding officer." We walked over to the commanding officer, a general whose name I do not recall. I informed him that if he or any officer in the Army asked any soldier or officer to whom I had talked, any questions or made them report to them anything they had told me, I was going to hang his hide on the floor of the House, shoot it full of holes, and then introduce a resolution demanding that the War Department court martial such officer for interfering with a congressional investigation. By that time we had some 40 or 50 young officers in the mess hall. I insisted that everyone leave the room with the exception of the members of the committee and the committee clerk, and that these young officers be permitted to tell their story to the members of the committee. General Richards, the commanding officer, and all others left the room, and I then continued my questioning of the various witnesses. Here is a partial list of the things that I learned. For fear of reprisal on any officer who may still be in the Army, I shall for the present omit names.

Fancy tile had been hauled by air from Bombay, India, 500 miles to Karachi, the latter part of August 1945 and a patio was constructed for the officers' club in which we were then conferring. This was done after VJ-day. I have the name of the copilot who piloted the plane. They transported a small Austin car by air from Karachi, India, to New Delhi for an American colonel, Russell W. Munson, without a manifest or billing. The colonel did not like the color of the car so it was transported back from New Delhi to Karachi by air. A flight officer testified that during the 3 months previous he only carried two cargoes which he considered necessary. They transported an 8,000 pound printing press by air with type from Karachi to Agra where it was left setting on a warehouse floor. The supply officer made the statement that it was the only way he could get rid of it. New tools and instruments in the original packages were destroyed. An enlisted man, a welder, showed a captain a new welding set of tools, instruments, and so forth, that he had taken from one of the packages which was about to be destroyed. They hauled a great deal of equipment and supplies by air from Khartoum and Cairo, Egypt, to Karachi, a distance from two and three thousand miles. Many of these supplies were burned at a base called Malair about 8 miles east of Karachi. A lieutenant saw them burning gloves worth $2 a pair, 75 parachutes, new A-2 flying jackets, aircraft spare parts and some aircraft instruments were smashed with an axe. A lieutenant did the smashing. Another lieutenant heard a Major Griffith, assistant technical supply officer from Calcutta, state that he had been sent there from headquarters to get rid of the supplies. Flying jackets and equipment were taken from the men who were on the way back home and then were destroyed and burned. They transported the following from a project in Africa known as the Peacock project to Karachi, India, during April and May 1945: 570 Simmons mattresses, 270 springs, 240 bedsteads, chairs, commodes, barbed wire, and a plane load of empty "coke" bottles.

When I got to Cairo, Egypt, I personally checked the manifests and found where they had shipped hundreds of beds, springs, and mattresses by air for officers. Later, when I got to Rome, I found battle-fatigued men at a rest camp sleeping on board bunks with light pads, without springs. It is about 2,000 miles from Khartoum, Egypt, to Karachi, and about 3,000 miles from Cairo to Karachi. One officer told me he had carried a cargo of bamboo poles over the Hump by air. I have two photographs of the burning grounds at Malair, India, where the material was burned which they hauled from the Peacock project in Africa. These two photographs were taken August 25, 1945. This was all done after the war was over. I never saw a group of young officers whose morale was lower, who felt more bitter toward their superior officers than did this young group of flying officers at Karachi, India.

When we came to Chungking, China, I was told by some young air transport pilots that they were hauling India cotton over the Hump to China. The trip over the Himalaya Mountains—some 20,000 feet high—was the most dangerous flying that has been engaged in. Some 1,200 fliers lost their lives flying the Hump. I questioned the officers in charge at Chungking, but they professed to know nothing about it. I picked up the same story at Kunming, China, and again was told by the officers they had no information about cotton being flown over the Hump. The next day our committee flew the Hump from Kunming, China, to Chabua, India. When we arrived at Chabua an attempt was made, in my judgment, to rush us from the airport to the mess hall. After some insistence, they took us finally to the warehouse from which supplies were being shipped across the Hump. I found 375 tons of India cotton on the warehouse floor waiting for air transportation across the Hump. I examined the manifests and found 375 more tons had already been shipped by air, or a total of 750 tons of India cotton was being shipped by air across the most dangerous air route in the world, a route where 1,200 boys lost their lives. I was later informed that the cotton was worth from 15 to 20 cents a pound, the cost of transportation was more than $2 a pound. The British got the price of the cotton and we paid the cost of transportation. These facts were verified by some of the pilots at Karachi who had taken part in the shipping of some of this cotton. The bitter feeling among these Air Corps men was brought about, in my judgment, by the loss of lives of their comrades in flying across the Hump material which these men considered useless.

MEETING WITH ENLISTED MEN

After the meeting with the officers, we went to a meeting for enlisted men in a rather large hall. The hall was packed. I estimated that some 300 men attended that meeting. The chairman of the subcommittee took charge, everyone in the crowd tried to talk at once and the turmoil was so great it was difficult to do anything in the short time available. At least nothing was done and no notes of any information were taken to my knowledge. These men were all very bitter at the treatment they had received and particularly because of the way matériel was being destroyed. I personally was unable to obtain any information at that meeting with one exception. I did obtain at that enlisted men's meeting the two pictures of the burning grounds at Malair. After a rather fruitless and unsuccessful meeting with the enlisted men we continued on our trip.

Maj. Gen. George C. Richards, budget officer of the United States Army, following his usual practice, did everything in his power to cover up and prevent our committee from obtaining information. I had a recent conference with Secretary of the Army, Kenneth C. Royall, in my office. I gave him all these and other facts regarding Maj. Gen. George C. Richards, Army budget officer. I shall give the House some of these other facts from time to time. When Secretary Royall asked me what was the matter with General Richards, I told him personally in my office that the only difference between Gen. George C. Richards and an old Tom cat was that the old Tom cat had the common decency to cover up only his own dirt. Gen. George C. Richards covered up or tried to cover up Army dirt wherever he saw there was danger of uncovering it. The initial "C" must stand for "Coverup" and his full name should be Maj. Gen. George "Coverup" Richards. General and Secretary Royall's answer was to appoint Maj. Gen. George "Coverup" Richards, Comptroller of the Department of the Army where he will undoubtedly be made a lieutenant general. Apparently the chance of a man's promotion in the Army is enhanced by, and sometimes based on, his ability to cover up Army waste and extravagance. Secretary Kenneth Royall, by his action has placed the stamp of approval upon Maj. Gen. George "Coverup" Richards' action and conduct in preventing Congress from obtaining necessary facts in framing a budget and must therefore assume the responsibility for General Richards' conduct in the above and other instances which I shall give from time to time. I am wondering whether the Secretary's full name is

Kenneth "Coverup" Royall. If it is not, he earned that name by his naming Maj. Gen. George "Coverup" Richards, Comptroller of the Department of the Army.

Modern science tells us that sunlight is a great remedy for some diseases. I am from here on going to use Woodrow Wilson's method, hoping that the light of pitiless publicity will cure some of these cankerous diseases in our Military Establishment and protect the taxpayer who foots the bill. In the meantime I want to suggest to Secretary Royall that inasmuch as he is apparently basing the promotion of Maj. Gen. George "Coverup" Richards upon his ability to cover up Army dirt, he is entitled to at least seven instead of three stars. Anything less than seven stars would not be justified on the basis apparently used in his promotion. In fact, why not make him Secretary of National Defense, if that is to be the policy of the newly established Department of the Army?

The SPEAKER. Under previous special order of the House, the gentleman from Wisconsin [Mr. SMITH] is recognized for 20 minutes.

SOME FACTS ABOUT THE MARSHALL PLAN

Mr. SMITH of Wisconsin. Mr. Speaker, I want to bring to the attention of Members of the House and the country facts in connection with the so-called Marshall plan. We have heard a great deal about the necessity for approval of the Marshall plan because it is designed to defeat and contain communism all over the world.

A very interesting report has been made by the committee representing the 16 nations that met in Europe. I have gone through that report, but nowhere in it do I find that these countries are worried about communism taking over if this plan is not reported favorably.

Mr. Speaker, it is in the public interest for Members of the Congress to keep the public informed on important legislative matters such as the so-called Marshall-plan bill, H. R. 4840.

Much is at stake as we come to consider the merits of this legislation. There is a wide difference of opinion as to its objective and certainly a wide gulf between those who are for it and those who are in opposition.

Mr. Speaker, the objective of the bill we are considering must be viewed in relation to the request made by the 16 cooperating nations of Europe. A report was compiled by the Committee of European Economic Cooperation, and it seems to me that if we are to fully understand the request that has been made we should become familiar with it.

Let us first consider a statement in the bill before us which has a bearing on this problem. On page 2, line 5, of the bill is this statement:

> Unless normal economic conditions and stable international economic relationships are restored in Europe, it will not be possible for the countries of Europe to achieve a working economy independent of abnormal outside assistance, or to maintain free institutions and national independence.

In short, Mr. Speaker, we are to believe that those countries cannot maintain free institutions and national independence unless the Marshall plan is adopted. That is what we say. But what does the report of those nations say?

Mr. Speaker, I can find no language in the report to the effect that the aid requested is necessary to maintain free institutions and national independence. Not one word anywhere to indicate that there is the fear of communism, as we have been led to believe by witnesses who have appeared before congressional committees. Is this not very strange?

In the preamble to the general report, page 1, the objective of the meeting in Paris was "for the purpose of developing an economic recovery program." The State Department, in its report to our committee, page 25, says that "6 years of war and enemy occupation have wrought heavy toll on the people and the economic structure of Europe." There is no mention of communism there. Unless there is more convincing proof, Mr. Speaker, no case has been made to justify such a fear.

Again referring to the CEEC report, the point made by the State Department is that the war and enemy occupation of those countries destroyed their economic structures. On page 7, however, is a significant statement which seems to deny the allegation:

> 12. Nevertheless recovery proceeded well, indeed, much faster than after the end of the First World War. Eighteen months after the end of fighting in Europe, industry and transport were moving again vigorously and the work of reconstruction was getting under way. This was made possible by the efforts of the European countries themselves, with generous assistance from the United States and other countries and from UNRRA. So successful were these efforts that by the end of 1946 industrial production in Belgium, France, and the Netherlands had recovered to 85–95 percent of the prewar level, whilst Italian industrial production was back to 60 percent of prewar level. In the United Kingdom the process of demobilization of the war economy had been accomplished smoothly and the prewar level of national output had been fully restored. In the Scandinavian countries production was steadily rising. In the case of agricultural production, which, though hard hit by the war, had not declined to the same extent as industrial production, the beginning of recovery was evident in all countries in 1946. Indeed, the participating countries as a whole had made a good and resolute start on their task.

To me this is an amazing statement, in fact it is a confession that from the end of the war to the end of 1946, industrial production in those countries had reached 85 to 95 percent of prewar levels and Italy was up to 60 percent of prewar, and, believe it or not, in the United Kingdom the prewar level of national output had been fully restored. Even agriculture had made a good recovery in all countries in 1946.

Mr. Speaker, that is not the story that has been told to the people of the United States. I have honestly believed that the present chaotic condition in Europe was a result of war damage and enemy occupation. Obviously that is not the case, for the facts are that a prewar level of production had been reached up to the end of 1946.

We do know, Mr. Speaker, that Europe had a severe winter in 1946–47 and also suffered a record-breaking drought, which may have added considerably to the present situation, but those facts are not stressed in the CEEC report.

As the record now stands, the break in the economic structure occurred in 1947, but there is not much information on the reasons therefor. If there was a rapid recovery, more rapid than after World War I, what, aside from the weather, has caused this break-down? The record thus far is silent. I shall not attempt to answer that question, but ask what do these countries now seek under the Marshall plan, as reflected in the legislation before us?

There is language in chapter II, page 11, No. 25, of the CEEC report, which leaves no doubt that the participating countries are not asking for a restoration of their economies to a prewar level, but are actually requesting assistance over a 4-year period and at a level of production comparable to what the United States had attained in the period from 1940 to 1944. Here is the exact language, on page 11, No. 25:

> The production expansion which is envisaged by 1951 is similar in general scale to that achieved by the United States in the mobilization years 1940 to 1944.

Then follows this footnote:

> In the United States from 1940 to 1944, coal output increased by 34 percent, steel output by 31 percent, electric power output by 61 percent. The European coal output is planned to increase by 33 percent from 1947 to 1951, steel output (excluding Germany) by 60 percent, and power output by 39 percent.

Particular attention is called to the significance of production objectives of the plan which envisage production "expansion achieved by the United States in the mobilization years of 1940–44." How much did we expand in those war years? According to one Federal report, in 1940, the physical volume of our production was 25 percent higher than for the average of the years 1935–39. In 1944, however, physical volume was up 88 percent over the 1940 level.

From this it must be concluded that the European countries do not want our support of a program that would assist in establishing their economies on a prewar basis. But they want assistance to establish an economy equal to our own during the most productive period in our history.

Mr. CASE of South Dakota. Mr. Speaker, will the gentleman yield?

Mr. SMITH of Wisconsin. I yield to the gentleman from South Dakota.

Mr. CASE of South Dakota. If Europe is to be put on the same productive level as we, does not the gentleman think the people in the various countries of Europe should all work as hard and for as many days of work per week and as many hours of work per week as we do?

Mr. SMITH of Wisconsin. Yes, indeed. I think that follows, of course.

Again, referring to the report by the Committee of European Economic Cooperation, volume 1, page 58, chapter VIII, dealing with conclusions, paragraph 161 states:

The participating countries are determined to overcome their difficulties as far as they can by their own exertions, and the realization of the 4-year program will restore the prewar level of agricultural production in the participating countries as a whole and will exceed it in coal, steel, and manufacturing industry generally. The scale of this effort will not only solve the immediate production problem but will also provide the basis for a further raising of European production in the following years to levels never before contemplated in Europe. This is the foundation for a sound and workable European economy which can once again play its full part within the wider framework of world trade.

Mr. Speaker, feeding the hungry is a humane objective. So is preventing Communists from overrunning the countries of Europe. But the basic objective of H. R. 4840 is an economic one, namely, financial assistance. If that fails, the social and political byproducts go down with it. If we take the Paris report and use it as the basis for our action here, I do not see how the economic rehabilitation of Europe can be achieved. The theory seems to be that American help should remedy the deficiencies of European production which had reached a prewar level at the end of 1946, or about 1 year ago.

Mr. Speaker, it is a remarkable fact that the major part of the help sought consists in commodities which Europe itself can produce.

First, there is plenty of coal to be mined in England, Germany, and France, if men can be induced to mine it.

Second, there is plenty of tillable soil in France and French North Africa if it can be put into cultivation.

Third, there are large steel plants in England, France, Belgium, Germany, and Luxemburg if they are put into production. The Paris report confirms these facts but asks for temporary supplementation of the deficiencies now existing.

Will the deficiencies become temporary or chronic? It takes a measure of optimism to say they will be temporary.

Mr. Speaker, the fact is that the policies of European governments are conducive to these deficiencies as a result of the beliefs and influences of political parties, unions, and pressure groups. There is no promise that these policies will be changed. And the bill under consideration does not cure that situation.

The present European economy is based upon a system of rations and allocations. What the Paris report really asks for is the commodities to implement the rations of food, the allocations of raw materials, and the equipment for capital investment. In other words, even with our help the same old system that is bankrupting the world will continue to operate. Does it make sense?

Thus, American help is not going to provide what is most needed in Europe today, namely, incentives. Without incentives to increase production there is little chance that European production will pick up and fill out the deficiencies which the American contribution is called upon to remedy temporarily.

French food production will remain low so long as present conditions endure. The market towns have not been supplied or restocked since 1940. The French farmer is accused of hoarding, but so-called hoarding is the result of the lack of other incentive goods in exchange for agricultural produce. For a number of years these farmers have fed the city people without ever getting goods in exchange. They are now weary of giving something for nothing. Thus the American farmer must supply these deficiencies so long as the French farmer remains unrewarded. This factor is disregarded in European plans. A Sears, Roebuck catalog with the goods would stimulate agricultural produce to a great extent.

Take our American drugstore complete with its display of merchandise and set it up in any district of Europe and the psychological effect would be tremendous. It would also be the best possible propaganda for the American way of life.

Why not revive key sectors of European economy through recourse to American consumer goods, to be paid for with dollar scrip which was earned as wages by the workers? For instance, the Coal Board of England might receive a grant-in-aid allowing it to stock mine-town shops with American goods and priced in dollars and payable in this scrip. The vital problem is to reward labor of all kinds with a means of payment valid wherever the merchandise is available.

Mr. Speaker, European governments today have a fear of a free-market economy. It does not seem prudent to strengthen in practice the control of national governments upon foreign commerce by the complete recognition of their monopoly of dollars and dollar goods. This is what is actually proposed under the Marshall plan.

The Paris plan pays lip service to European cooperation when it is in fact nothing more than a shopping list of the European governments.

Our administration has taken the Paris plan, altered its figures, but it has failed to question the underlying assumptions of the plan. The fact is that those assumptions are based upon economic policies which have proved disastrous to date.

Ultimately, it is not beneficial to aid Europe in such a way that economic rehabilitation shall not be achieved. Yet that is what happens under the bill before us.

It would appear necessary to restore normal breathing to the European economy by some artificial means, such as the direct lifting up of some key sectors by the introduction of consumer goods and the distribution of real dollars as suggested above.

The gradual introduction of freely circulating dollars into Europe may be the way to European salvation.

EXTENSION OF REMARKS

Mr. McCOWEN asked and was given permission to revise and extend his remarks and include a letter.

LEAVE OF ABSENCE

By unanimous consent, Mr. MATHEWS (at the request of Mr. TOWE) was granted leave of absence on account of illness.

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. KLEIN] is recognized for 30 minutes.

THE PALESTINE SITUATION

Mr. KLEIN. Mr. Speaker, I do not expect to take all of the time allotted to me. I regret that due to the lateness of the hour there are so few Members here. I hope those who are here may read my speech in the RECORD tomorrow and possibly prevail upon some of our colleagues to read it as well.

I believe it is terribly important at this particular time to give some thought to the problem which I want to present to you now.

Mr. Speaker, man's inhumanity to man is nowhere more spectacularly displayed today than in the Arab peninsula. It is probably true that in this very hour in which I speak some unarmed man or woman has been shot and killed for no other reason than the defiance of the United Nations by medieval Arab chieftains with the acquiescence and possible connivance of the British in Palestine.

PROMISES LOST IN SEA OF OIL

Many of you in this Chamber are of Irish extraction, and your family traditions tell you of the slaughter of Irishmen for the sake of absentee British landlords. You may have been brought up to revere that stirring old song of the Irish fight for liberation, "They're hangin' men and women for the wearin' of the green."

Since the League of Nations mandate was given Great Britain a similar situation has developed in the Holy Land.

For almost 10 years the struggle of the Jews in Palestine has been directed toward a corrupt and cynical British repudiation of the terms of the mandate. The bright promises of 1917 have been forgotten, perhaps drowned in a sea of oil.

The national Jewish home has become a world issue, and overwhelmingly world opinion has leaned toward full sympathy with the Jewish cause.

Time after time after time the British Government has betrayed its own promises.

PARTITION OF PALESTINE DETERMINED

Despite this, the hopes of the world for peace and justice arose anew with the creation of the United Nations. The issue was decided last November in the general assembly of the United Nations when, by a decisive majority vote, the assembly agreed to carry out the recommendations of its own interim committee on Palestine, and to determine and enforce a partition which was acceptable to the Palestine Jewish Agency.

Out of that partition was born the new Palestinian state.

From the moment the vote on partition was taken the Arab states have asserted that they are not bound by the solemn covenants into which they entered by their acceptance into the United Nations.

They have rejected the most fundamental concept of democratic action—the principle of majority rule.

UN CHALLENGED BY ARABS

The Arab states have said, in effect, that in spite of the most binding agreements of their membership in the United Nations, they refuse to recognize majority action if the majority votes against them.

This is a clear challenge to the United Nations.

The whole structure of voluntary world government, for which the world fought and bled 6 years, can fall on this single defiance.

The Arab states have not waited to debate the issue.

They have once more plunged an unhappy world into an undeclared warfare—a shooting war.

Innocent men and women, and little children too, Jew and Arab alike, are being uselessly slaughtered.

The United States Government stands today in an equivocal position in Palestine.

There can be no doubt but that American leadership in the General Assembly brought about the successful vote on partition.

Furthermore, the American delegation acted upon direct instructions from the President and the Secretary of State, overriding the timid State Department apologists for English double-dealing.

UNITED STATES POSITION ILLOGICAL

Yet simultaneously the embargo provisions of the Neutrality Act and the powers of the Export Licensing Act have been invoked to deprive the citizens of the new Palestinian state of all means of self-defense, while the Arabs find arms on every side—some stolen, some purchased, some merely appearing by magic out of the boundless desert.

The position of the United States becomes illogical, indefensible, and untenable, especially with the discovery that American shotgun ammunition can be shipped to Arabs while explosives intended for Palestine are seized and destroyed and the shippers imprisoned. New and startling disclosures about shipments to Arabs will come out soon.

We cannot take the lead in the creation of an infant state, and then deprive that state of all means of self-defense.

This is a monstrous illogic which can only suggest that our Department of State has learned nothing from the tragic results of our neutrality in Spain a decade ago.

The analogy is not complete, because there do not exist today two powerful Fascist states anxious to make the Arab peninsula a testing ground for the war of the future.

BLOOD NEEDLESSLY SHED

But the analogy does hold true to this extent: That the Arabs who are rioting in Palestine are doing so only at the instigation of that bloody ally of Hitler, the Grand Mufti of Jerusalem, with the full blessing of the surrounding Arab states, which can readily supply food, arms, trucks, supplies, and ammunition to the Mufti's mobs.

The blood being shed in Palestine today is being needlessly shed.

The Jews in that tiny new principality of Palestine do not want battle and riot and sudden death. They want peace in which to organize their government and prepare to take over their new responsibilities, peace in which to build their irrigation works and till their fields and operate their factories.

Nor do the Arab inhabitants of Palestine want violence, except for the mobs of pillagers led by the Mufti and his coconspirators. The Arab workmen want only an opportunity to work in peace, side by side with their Jewish neighbors, as they have done for the last 60 years. The Jews have brought to Palestine new standards of living, new ideas of material comfort, new visions of a democratic way of life.

PALESTINE DISORDERS INSTIGATED BY ARABS

Their Arab neighbors like this new life. They live, work, play, and prosper side by side with the Jews. They benefit by the Jewish irrigation works, new agricultural methods, factories, fisheries, newspapers, radios, and solid low-cost modern houses.

The disorders in Palestine are completely artificial.

They are inspired and encouraged by the governments of the Arab states, who are themselves members of the UN and by their membership morally and legally bound to support the majority action of the assembly. There is and can be no moral justification, in the eyes of the world, for the campaign of violence directed against the new Palestinian government and the decision of the Assembly.

The pattern of Nazi terror in the disorders is not accidental.

The moving spirit of armed resistance to the United Nations is the murderous ex-Mufti and his crew, supported by former officers from the German Army, some Arab, some outlaws from other nations. Some of the officers in the Arab forces are retired British officers.

In Palestine itself the British troops have openly sided with the insurgent Arab marauders. They have disarmed and immobilized the Jewish resistance forces while ignoring Arab outrages.

JEWS ARE LEFT DEFENSELESS

The embargo against the shipment of weapons and ammunition to Palestine by our own State Department has exactly the same effect.

The Arabs can obtain all the weapons they can possibly need from the government forces of the Arab states.

Great Britain has announced that the Government feels bound to carry out contracts already entered into for the delivery of war material. No one knows how much German material reached Arab hands during the early years of World War II.

Only the Palestinian Jews are left utterly defenseless.

The American position is unworthy.

It raises the ugly suspicion that again the Middle East Division of the Department of State is indulging in rapid double talk, sabotaging the policies laid down by President Truman and Secretary Marshall, and betraying the people in favor of the feudal landlords and oil companies.

Mr. Speaker, the United States of America took the initiative for strong action by the United Nations.

The world hailed the moral courage of that act.

To maintain our position of moral leadership in bringing justice to a brave people, we must now continue our bold course.

RAISING OF EMBARGO URGED

Most earnestly, most respectfully, and with clear understanding of the diplomatic and political problems involved, I urge the administration to raise the embargo at once.

I urge the administration to warn the Arab states against their continued insolence, and to make it crystal clear that the United States will take all necessary steps to enforce the warning by economic and diplomatic sanctions.

I urge our Government to insist to Great Britain that she abide equally by the majority action of the United Nations and that she join with the United States at once in providing arms to the Haganah for police work, not by stealth and by private individuals, but openly and officially on a commonsense selective basis.

This raises the delicate issue of a United Nations police force. There is no time now for the establishment, arming, training, and dispatch of United Nations forces, entirely aside from the debate which quite properly would precede such action.

No such issue is involved in allowing the underground forces to become an effective constabulary to carry out police powers in the Jewish territory of Palestine.

NO TIME TO BE LOST

Many of the Haganah members are veterans of the war against fascism. They have had military training. They are disciplined, brave, and able. Knowing that the United States, England, and Russia, are backing them in carrying out the mandate of the United Nations, the Haganah can, if armed and equipped, defend the new government effectively and with skill and justice, and can prevent the present violence from moving into open and naked warfare.

There is no time to be lost.

The moral leadership and inspiration of the United States is at stake. The future of the United Nations is at stake. The future of the Middle East is at stake. And, Mr. Speaker, I say this with all solemnity, it may well be that the peace of the world is at stake.

The Middle East is the powder keg of the earth today.

The world is exhausted, prostrated, worn out by 10 years of war and destruction.

Yet here in the sands and oil fields of the Middle East, with its medieval feudalism, its violent currents of religious fanaticism and supernationalism, its vast but undeveloped riches, and its historic significance, could develop the long struggle which might, too easily, flare into another world war.

That must not happen.

WE CAN INSURE PEACE

If we act decisively we can ward off the evils of war. We can bring peace and prosperity to the Middle East. We can make sure of continued peace. We can create a haven for the ravaged, helpless Jews of Europe, and make it possible for them to create a new life and a new country, thus relieving the rest of the world of the burden of supporting them.

We can make a substantial payment of the debt modern civilization owes to a rugged indomitable people who have preserved their culture and their national and religious entity through centuries of oppression and dispersal.

We can bolster the world food supply by encouraging new agricultural production in the Mideast under the industrious Jews.

We can support the United Nations as a force for universal peace, and make certain that the United Nations survives its first major test.

Mr. Speaker, I not only urge an affirmative and positive course of action on the administration, and particularly on the Department of State, toward the Palestine question, but I urge this House, as it loves freedom and justice and prosperity, to support the administration in that course. This is something far above any question of politics, and I do not speak here as a Democrat, nor as an adherent of the Jewish faith. I speak only as an American believing profoundly in America and in democracy.

Under unanimous consent, I include as part of my remarks an editorial from the New York Herald Tribune, an advertisement of the American Christian Palestine Committee, and several short news stories from the New York Herald Tribune, the New York Times, and other newspapers:

To the United States and the United Nations:

Since the United Nations General Assembly voted for the partition of Palestine on November 29, 1947, a shameful and deeply disquieting situation has arisen to which public opinion cannot remain indifferent.

Openly defying the United Nations, the governments of the Arab states, themselves members of the UN, are deliberately encouraging aggression against the Jews of Palestine. They are using Syria, Lebanon, Egypt, and Iraq as bases for these operations. They are providing funds, ammunition, and military training, and have already launched attacks in force from Syria and Lebanon against Palestinian Jews. In Palestine itself this state of affairs has resulted in unbridled violence by armed Arab bands organized by Haj Amin el Husseini, the same Arab leader who during the war immeasurably aided Hitler in broadcasts from Berlin urging the Moslems of the Middle East to revolt against the Allies.

This campaign of violence has no moral justification. It is directed against a decision of the United Nations made after nearly 20 committees of inquiry had investigated the problem of Palestine over a period of more than 25 years. The decision of the United Nations was, moreover, a compromise which granted national states in Palestine to both Jews and Arabs.

The campaign of violence we now witness is not a spontaneous uprising by the majority of Palestine's Arabs. On the contrary, they wish to live in peace with their Jewish neighbors. But they are terrorized by the ex-Mufti's bands assisted by his confederates in Cairo, Baghdad, Beirut, and Damascus. Significantly, Arab violence is largely directed against Jerusalem which, according to the UN decision, is to be an international territory because it is sacred to the Christian world.

The campaign of Arab aggression, led by a group of former Nazi allies and their accomplices across the frontiers, is therefore directed not only against the Jews, not only against the peaceful majority of Palestine's Arabs, but against the authority of the United Nations itself.

This is a bold attempt to blackmail the United Nations into submission. It is an attempt by violence to render impotent the first great decision of the United Nations. If this campaign succeeds, it will reduce the United Nations to a debating society. At a moment when world peace is the hope of all men of good will, it will smash the effectiveness of the only instrument for international peace we possess. It will disillusion those millions who had hopes that at last some way other than the holocaust of war could be found to settle international problems.

If the United Nations cannot make its Palestine decision stick, if a handful of willful men can prevent a UN decision from being carried out because they do not like that decision, then no future action of the UN will have more worth than the paper upon which it is written.

For this state of affairs not only the ex-Mufti and his cohorts are responsible. Other powers are not wholly free of responsibility. The British Government, which insisted that it retain control over Palestine and sole responsibility for law and order until the termination of the Palestine mandate, seems either unwilling or unable to maintain law and order. We do not attempt to judge whether this policy is dictated by unwillingness or inability. But the fact remains that the security situation in Palestine is steadily deteriorating.

One thing is certain, while Arab bands attack Jewish settlements, blockade wide areas, and waylay traffic on the highways, British officials and forces have repeatedly interfered with Jewish defense and counterattack, repeatedly arrested and disarmed the defenders, and repeatedly confiscated their armaments.

The United Nations has not yet taken action against those overt acts of its Arab member-governments which constitute an open defiance of the resolution of the General Assembly and of the Charter itself. Nor has the United Nations reacted as yet to the fact that the ex-Mufti's bands and the attitude of the British administration are a clear challenge and threat to the authority of this international body.

Even if the only issue at stake were the safety of the 700,000 Jews of Palestine, American public opinion should have been deeply concerned. Our Government was largely instrumental in bringing about the United Nations decision on partition. What had we in mind when we encouraged the aspirations of the Jewish people to nationhood in Palestine? Was it our intention to leave them there defenseless?

Much more is at stake than our moral responsibility toward the Jews. We repeat, the very future of the United Nations is in jeopardy. This open defiance of the United Nations' decision comes from a group of middle eastern states which depend upon the UN and the Western World for sovereignty and international recognition, for political and military protection, as well as economic development. If we permit such conduct on the part of the Arab states, then the authority of the United Nations will suffer a staggering blow which can result in incalculable harm to men everywhere.

Let us make no mistake about the danger involved in this situation. The conflict may assume world-wide dimensions, or, alternatively, this aggression of the Arab states can be restrained, thus making the Palestine solution a potent factor for peace and stability in the world. America must help to determine whether the effectiveness of the United Nations shall be destroyed or strengthened.

The United States wants peace in the world. It is to its vital interests to uphold the Palestine decision of the United Nations. Our Government should, therefore, actively support the following measures:

1. A stern warning to the Arab states calling for an end to the sabotage of the UN decision.

2. An unmistakably clear declaration to Great Britain that as long as she remains in Palestine, her armed forces can be neither neutral nor quasi neutral, but must act in defense of public law and the UN decision.

3. Immediate use of the proper UN agencies to provide international military protection for Palestine Jewry and make immediately available the necessary military force to implement the United Nations decision on Palestine.

4. Immediate equipment of the Haganah under United Nations auspices to enable this Jewish constabulary defense force to carry out police powers within Jewish territory in Palestine.

Only in this manner can the United States and the United Nations prevent the threatened conflagration. The delay in implementing the UN decision has encouraged the Arab League and the ex-Mufti in their defiance of the UN and have forced the Jewish people to resort to desperate means to provide themselves with arms for their defense and for the maintenance of the UN decision.

American Christian Palestine Committee: Dr. Henry A. Atkinson, Senator Owen Brewster, Frank Buxton, Bartley C. Crum, Samuel Guy Inman, Senator Edwin C. Johnson, Dr. Walter C. Lowdermilk, Senator James E. Murray, Prof. Harry A. Overstreet, Dr. Daniel A. Poling, Dr. Ralph W. Sockman, Senator Charles W. Tobey, Senator Robert F. Wagner.

[From the New York Herald Tribune of January 20, 1948]

ARMS FOR PALESTINE

It is indefensible, as the newly formed committee to arm the Jewish state declares, for the United States to put its whole influence behind the creation of a Jewish state in Palestine and then impose an embargo on the export of the arms which are more and more plainly indispensable to such a state's survival. The notion that there is something immoral about providing arms in a situation which one has deliberately created with the full knowledge that arms would be necessary is redolent of that mawkishness which seems too often to confuse every in-

ternational issue. The first and simplest answer to the sudden question of arms for Palestine is to lift the embargo at once. The least which the United States can offer to the Jewish agency and to Haganah is free access to the available supplies or weapons for self-defense.

This is the first and obvious answer. It is not the full answer. The questions of security and of enforcement were obviously central to the United Nations' decision for a partition of Palestine; yet these were precisely the questions which were shirked by all the great powers. They cannot be shirked much longer. The legal foundations for the partition of Palestine have been left on swampy ground. Legally, partition has been recommended by the General Assembly as a measure for meeting a situation, in the language of the Charter, "likely to impair the general welfare of friendly relations among nations." The Arab states are fomenting a warlike rebellion against this recommendation. They can truthfully assert that the Assembly has no binding power; on the other hand, they are themselves bound by the general obligation on all United Nations members to settle international disputes only by peaceful means and to refrain from the threat or use of force in any manner inconsistent with the purposes of the United Nations.

Administration of partition, in the transition period, was vested by the Assembly in its Palestine Commission. But the Assembly, aware of the uncertainty of the authority thus conferred, specifically requested that if a threat to peace arose during the transition period, the Security Council should act under its general power to deal with such threats. The threat has not only arisen; it is imminent. There is no reason why the United States should deny arms to the Jewish community in Palestine. But there is at the same time every reason why the United States should raise the basic question of enforcement in the Security Council, at once and emphatically, and demand a clear decision on the underlying responsibilities. Without it, this country will have to give Jewish Palestine access to arms, since this country was so largely instrumental in offering Jewish Palestine a freedom which everyone knew would be dangerous. But since it is the UN Assembly, under the aegis of the Security Council, which has decreed and is immediately responsible for partition, the United States both may and must ask a decision on enforcement from the Council.

WASHINGTON MEMO

(Editor, Charles Van Devander; associates, Oliver Pilat, James A. Wechsler, and William O. Player, Jr.)

UNITED STATES TO BLAME FOR ZION BLOODSHED—ARABS THINK WE DON'T BACK PARTITION

WASHINGTON, January 20.—Unless there is a drastic change in Washington policy the United States Government—meaning the Truman administration—is going to find itself bearing full responsibility for continued bloodshed in Palestine.

Confidential reports reaching here show that the Arab people are being assured by their leaders that the United States does not really support the United Nations plan for partition of the Holy Land. They are being told that the official United States position was merely a "necessary political gesture," and that the great western democracy doesn't intend to do anything to back it up.

Unfortunately nothing that has happened in Washington supplies a convincing refutation of this unlovely view of American motives. The Arab leaders, themselves, now are apparently accepting their own propaganda and testing it out with increasing audacity.

Last week, for instance, some 600 Arabs, reportedly commanded by Syrian officers, crossed the border to attack two Jewish settlements (Kfar Szold and Dan) in Upper Galilee.

A confidential report received here from within the Arab territory said the raid was "intended to be a trial balloon to sound out the UN and American reactions." If that was indeed its purpose, the result can only have been to encourage Arab boldness. The American Government took no action and the UN—without such initiative from Washington—continued to twiddle its thumbs nervously.

Actually, there is no real secret about the strategy of the Arab leaders. Shortly after the UN decision in favor of partition two of the principal Arab leaders began their attack openly on the sincerity of this Government by declaring that American public opinion was turning against the official United States stand. These Arab spokesmen were Faris El Khoury, of Syria, and Jamal Husseini, representative of the Mufti's Higher Committee for Palestine.

Just last week an Arab daily newspaper in Brooklyn, Al-Sameer, reported the sailing of an American Arab, Yussus Ahmad Nijim, for Lebanon.

According to the Arab newspaper: "Nijim asked the people in the State Department to furnish him with arguments for the defense of United States policy on Palestine. He was told 'What has taken place in the UN is not an act of state, for the UN is no government. The Arabs may accept the UN decision or repudiate.' "

That account, it may be taken for granted, has by now been widely circulated among the Arab populations of Syria, Lebanon, and the rest of the Near East. Its natural result, in the absence of any affirmative United States support of the UN partition decree, will be to increase Arab intransigence.

The British position on Palestine is reasonable, straightforward, and aboveboard. The British opposed the partition plan, and since its approval by the UN they have been remarkably frank about their moral and military support of the Arabs.

The United States, however, having been chiefly responsible for UN approval of partition, has a moral obligation, as certainly as it has the moral and material prestige, to see that the plan is effectuated without unnecessary loss of life.

What is needed, observers here agree, is a clear demonstration that the United States genuinely supports the UN decision. This could be provided not only in words, but by removal of the arms embargo which hampers the Palestinian Jews in their self-defense and by a protest to the UN Security Council against Syrian violations of the Palestinian border. Until steps are taken, many Americans will be inclined to wonder whether the Arabs—and the British—may not be right in believing that Washington is just "playing domestic politics" with the future of Palestine and with the lives of its unhappy people.

[From the New York Herald Tribune of January 20, 1948]

ZIONISTS ACCUSE BRITAIN, AND INVERCHAPEL REPLIES

The American Zionist Emergency Council, 342 Madison Avenue, made public yesterday an exchange of correspondence with Lord Inverchapel, British Ambassador at Washington, beginning with a telegram of January 8 in which the council charged the British with "quasi neutrality" in Palestine. It said the British military and police, "while suppressing, disarming, and imprisoning Jewish defense forces, tolerate and actually abet terrorist attacks of Arab bands."

Replying on January 12, Lord Inverchapel said he could not "accept the implication," and it "is not surprising that in some cases Jews have been prevented from taking the law into their own hands, as this can only increase the confusion." To prevent incidents altogether, he said, "it would very probably be necessary to put the whole country under martial law."

He said also that "while I have no wish to condone Arab attacks or to underestimate the suffering which they have caused, I do believe that consideration must be given to the difficulties which face the administration in Palestine."

To this Israel Goldstein, acting chairman, replied on January 19. In his letter he said: "You will forgive me for telling you that a growing segment of public opinion is unable to explain the British attitude on any other grounds than that the British have deliberately embarked upon a policy of benevolent toleration toward the Arab riots in the beginning in order to encourage their growth; and that now with the riots having assumed major proportions, British forces become somewhat more active in combating them in the hope this would lead to a request by the United Nations or by the Jews themselves for continued British occupation of Palestine."

ARABS IN KHAKI ATTACK COLONY WITH MORTARS—JEWS BEAT OFF ORGANIZED THRUST AT YEHIAM, SUFFER FOUR DEAD; FOUR KILLED NEARBY

(By Fitzhugh Turner)

JERUSALEM, January 20.—Uniformed Arabs attacked the isolated Jewish colony of Yehiam in northern Palestine today, in an operation conducted along military lines and employing mortars for the first time on the Arab side in Palestine's undeclared war.

Members of Haganah, the Jewish defense force, fought off the attackers but, according to an official communique, suffered four dead and six injured.

An armored car escorting a tank truck carrying water to the besieged settlement was stopped by 150 to 200 Arabs at a roadblock 9 miles from its destination, according to Haganah. In an ensuing fight four Jewish settlement police were killed and six wounded. A British constable also was wounded.

FOUR HUNDRED AND FIFTY REPORTED IN ATTACK

Jewish sources in Jerusalem said three men in uniform resembling those of the Iraq Army led the attack of 450 Arabs on the colony, but this was not confirmed tonight. British police and a company of the Middlesex Regiment of the British Army were at the scene, and reported the Arabs had been dressed in khaki uniform. They used machine guns and rifles as well as mortars.

The fight was one of the heaviest thus far, but although Haganah claimed it inflicted a number of Arab casualties, no figures were available here.

Yehiam, a settlement with 800 acres of land, is built on a hilltop in western Galilee, near a ruined Crusader castle and 11 miles northeast of the old Crusader port of Acre. It was established in June 1946, and was named for a Haganah commander killed while blowing up bridges during a campaign against the British mandate government. About 80 persons lived there in peacetime, but recently children had been removed and Haganah had sent in reinforcements.

(Mr. KLEIN asked and was given permission to revise and extend his remarks and include an editorial from the New York Herald Tribune, an advertisement of the American Jewish Palestine Committee, and other matter.)

MAJ. GEN. GEORGE C. RICHARDS

Mr. WALTER. Mr. Speaker, I ask unanimous consent to address the House for 2 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. WALTER. Mr. Speaker, I listened quite attentively a few minutes ago to the address delivered by the gentleman from Michigan [Mr. ENGEL] in which he made some very serious charges against Maj. Gen. George C. Richards. As I understood the speech made by the gentleman from Michigan he complained because General Richards directed some junior officers to report the things they were saying to our distinguished colleague to their commanding officer. I cannot think of a more proper order to be made than that one. Certainly if any action was to be taken by anyone for misconduct it was incumbent upon the officer in the theater who was directly in command to take whatever action was proper under the circumstances. To attack General Richards through innuendo is, indeed, unfair.

General Richards has served as budget officer of the Army under three Secretaries of War. That his services were recognized is proven by the fact that he was decorated for the services that he rendered in those positions. I do not think that any Member of Congress wants to be unfair about as distinguished an officer as General Richards has proven himself to be.

I have discussed the incidents complained of by the gentleman from Michigan with other members of the committee who were on the same trip with the gentleman and they did not view the things that our distinguished friend discussed in the same light in which he saw them.

SENATE ENROLLED BILLS SIGNED

The SPEAKER announced his signature to enrolled bills of the Senate of the following titles:

S. 84. An act for the relief of Mrs. Clinton R. Sharp;

S. 99. An act for the relief of John T. Hollandsworth, Jr.;

S. 136. An act for the relief of Ioannis Stephanes;

S. 166. An act for the relief of Anna M. Kinat (Mrs. John P. Taylor);

S. 167. An act for the relief of Mrs. Yoneko Nakazawa;

S. 185. An act for the relief of Thomas Abadia;

S. 186. An act for the relief of Santiago Naveran;

S. 187. An act for the relief of Antonio Arguinzonis;

S. 189. An act for the relief of Simon Fermin Ibarra;

S. 190. An act for the relief of Pedro Ugalde;

S. 191. An act for the relief of Julian Uriarte;

S. 192. An act for the relief of Juan Liona;

S. 258. An act for the relief of Troy Charles Davis, Jr.

S. 298. An act for the relief of certain Basque aliens;

S. 339. An act for the relief of Lucy Jefferson Weil;

S. 851. An act for the relief of Belmont Properties Corp.;

BILLS AND JOINT RESOLUTION PRESENTED TO THE PRESIDENT

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee did, on January 21, 1948, present to the President, for his approval, bills and a joint resolution of the House of the following titles:

H. R. 3111. For the relief of Louis H. Deaver;

H. R. 3342. To promote the better understanding of the United States among the peoples of the world and to strengthen cooperative international relations; and

H. J. Res. 232. Providing for membership and participation by the United States in the South Pacific Commission and authorizing an appropriation therefor.

ADJOURNMENT

Mr. CASE of South Dakota. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 5 o'clock and 4 minutes p. m.), under its previous order, the House adjourned until Monday, January 26, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1233. A letter from the Acting Administrator, Federal Security Agency, transmitting a report of all claims paid by this Agency for the period August 2, 1946, to December 31, 1947; to the Committee on the Judiciary.

1234. A letter from the Administrator, Veterans' Administration, transmitting a draft of a proposed bill to amend Public Law No. 432, Seventy-sixth Congress, to include an allowance of expenses incurred by Veterans' Administration beneficiaries and their attendants in authorized travel for vocational rehabilitation purposes; to the Committee on Veterans' Affairs.

1235. A letter from the Director, Administrative Office of the United States Courts, transmitting a copy of the detailed statement of expenditures of appropriations for the United States Court of Customs and Patent Appeals for the fiscal year ended June 30, 1947; to the Committee on Expenditures in the Executive Departments.

1236. A letter from the Administrator, Veterans' Administration, transmitting a draft of a joint resolution authorizing the Administrator of Veterans' Affairs to reimburse the Commission on Organization of the Executive Branch of the Government for certain sums expended in connection with its study of the Veterans' Administration; to the Committee on Veterans' Affairs.

1237. A letter from the Secretary of Agriculture, transmitting a draft of a proposed bill to provide for making available the Government-owned alcohol plant at Muscatine, Iowa, for the production of products from agricultural commodities in the furtherance of authorized programs of the Department of Agriculture, and for other purposes; to the Committee on Agriculture.

1238. A letter from the Attorney General, transmitting a report reciting facts and pertinent provisions of law in the cases of 298 individuals whose deportation has been suspended for more than 6 months, together with a statement of the reason for such suspension; to the Committee on the Judiciary.

1239. A communication from the President of the United States, transmitting supplemental estimates of appropriation for the fiscal year 1948 and prior fiscal years in the amount of $1,320,174,315, contract authorizations in the amount of $218,486,000, and a rescission of an appropriation in the amount of $150,000,000, together with certain proposed provisions and increases in limitations pertaining to existing appropriations (H. Doc. No. 502); to the Committee on Appropriations and ordered to be printed.

1240. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1949 in the amount of $319,500 for the Department of Agriculture (H. Doc. No. 503); to the Committee on Appropriations and ordered to be printed.

1241. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1949 in the amount of $2,450,000 for the Department of the Army (H. Doc. No. 504); to the Committee on Appropriations and ordered to be printed.

1242. A communication from the President of the United States, transmitting a revised estimate of appropriation for the fiscal year 1949, involving a decrease of $35,000,000 for the Civil Service Commission, in the form of an amendment to the budget for said fiscal year (H. Doc. No. 505); to the Committee on Appropriations and ordered to be printed.

1243. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1949 in the amount of $140,000 for the Department of Commerce, in the form of an amendment to the budget for said fiscal year (H. Doc. No. 506); to the Committee on Appropriations and ordered to be printed.

1244. A communication from the President of the United States, transmitting a supplemental estimate of appropriation for the fiscal year 1949 in the amount of $445,000 for the Office of Defense Transportation, in the form of an amendment to the budget for said fiscal year (H. Doc. No. 507); to the Committee on Appropriations and ordered to be printed.

1245. A letter from the Administrator, Housing and Home Finance Agency, transmitting a draft of a proposed bill to authorize Defense Homes Corporation to convey to Howard University certain lands in the District of Columbia, and for other purposes; to the Committee on Banking and Currency.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. LECOMPTE: Committee on House Administration. House Resolution 410. Resolution to pay a gratuity to Louise M. Clarkson; without amendment (Rept. No. 1251). Referred to the House Calendar.

Mr. LECOMPTE: Committee on House Administration. House Resolution 432. Resolution for the relief of Georgia Reed; without amendment (Rept. No. 1252). Referred to the House Calendar.

Mr. FELLOWS: Committee on the Judiciary. H. R. 4838. A bill to extend the period

of validity of the act to facilitate the admission into the United States of the alien fiancées or fiancés of members of the armed forces of the United States; with an amendment (Rept. No. 1253). Referred to the Committee of the Whole House on the State of the Union.

Mr. REES: Committee on Post Office and Civil Service. Preliminary report pursuant to House Resolution 176, Eightieth Congress, first session, regarding survey and study of civil service; without amendment (Rept. No. 1254). Referred to the Committee of the Whole House on the State of the Union.

Mr. HESELTON: Committee on Interstate and Foreign Commerce. H. R. 4426. A bill to provide basic authority for certain functions and activities of the Weather Bureau, and for other purposes; with amendments (Rept. No. 1256). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FELLOWS: Committee on the Judiciary. H. R. 1022. A bill for the relief of Peter Bednar, Francisco Bednar, Ruth Eva Bednar, Peter Walter Bednar, and William Joseph Bednar; with an amendment (Rept. No. 1255). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CASE of New Jersey:

H. R. 5097. A bill to incorporate the National Quartet Association; to the Committee on the Judiciary.

By Mr. GILLIE:

H. R. 5098. A bill to enable the Secretary of Agriculture to conduct research on foot-and-mouth disease and other diseases of animals and to amend the act of May 29, 1884 (23 Stat. 31), as amended, by adding another section; to the Committee on Agriculture.

By Mr. McDONOUGH:

H. R. 5099. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. SCOBLICK:

H. R. 5100. A bill to amend the Servicemen's Readjustment Act of 1944 to provide an additional period of 52 weeks in which unemployed veterans may receive readjustment allowances; to the Committee on Veterans' Affairs.

By Mr. SMATHERS:

H. R. 5101. A bill to amend the Reconstruction Finance Corporation Act, as amended; to the Committee on Banking and Currency.

By Mr. VAN ZANDT:

H. R. 5102. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

By Mr. WEICHEL:

H. R. 5103. A bill to amend the Canal Zone Code, and for other purposes; to the Committee on Merchant Marine and Fisheries.

H. R. 5104. A bill to amend the Canal Zone Code for the purpose of incorporating the Panama Railroad Co.; to the Committee on Merchant Marine and Fisheries.

By Mr. BRAMBLETT:

H. R. 5105. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. BRYSON:

H. R. 5106. A bill to provide for changes in the time of holding court in certain divisions in the eastern and western districts of South Carolina; to the Committee on the Judiciary.

By Mr. EDWIN ARTHUR HALL:

H. R. 5107. A bill to relieve the shortage of fuel oil to home owners; to the Committee on Interstate and Foreign Commerce.

By Mr. KNUTSON:

H. R. 5108. A bill to provide free postage for gift packages of food and clothing mailed to certain foreign countries; to the Committee on Post Office and Civil Service.

By Mr. RICHARDS:

H. R. 5109. A bill to increase the normal tax and surtax exemptions of single persons to $1,000 and of married persons to $2,000; to the Committee on Ways and Means.

By Mrs. ROGERS of Massachusetts:

H. R. 5110. A bill relating to the eligibility for pensions of certain widows and children of veterans of World Wars I and II; to the Committee on Veterans' Affairs.

By Mr. SASSCER:

H. R. 5111. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to change the base period for the determination of parity for Maryland tobacco from August 1919 to July 1929 to the period from January 1936 to December 1945; to the Committee on Agriculture.

By Mr. SCOBLICK:

H. R. 5112. A bill to amend the Civil Service Retirement Act of May 29, 1930, as amended; to the Committee on Post Office and Civil Service.

By Mrs. ROGERS of Massachusetts:

H. J. Res. 307. Joint resolution authorizing the Administrator of Veterans' Affairs to reimburse the Commission on Organization of the Executive Branch of the Government for certain sums expended in connection with its study of the Veterans' Administration; to the Committee on Veterans' Affairs.

By Mr. MILLER of Nebraska:

H. Con. Res. 132. Concurrent resolution to establish standards for education in American history and the Constitution of the United States in the public-school system of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. LEA:

H. R. 5113. A bill for the relief of the estate of John W. Mitchell, deceased; to the Committee on Expenditures in the Executive Departments.

By Mr. O'BRIEN:

H. R. 5114. A bill for the relief of Arthur J. McGurn; to the Committee on the Judiciary.

By Mr. HUGH D. SCOTT, JR.:

H. R. 5115. A bill for the relief of Chiyoko Michimoto; to the Committee on the Judiciary.

By Mr. CAMP:

H. J. Res. 306. Joint resolution for the relief of Hans Kraney and Clare Felten Kraney; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1198. By Mr. LEWIS: Petition of 27 residents of Bridgeport, Ohio, and vicinity, circulated by Unit 227, American Legion Auxiliary, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1199. By Mrs. NORTON: Petition of Downtown Civic Club, Inc., Bayonne, N. J., urging the enactment of legislation to increase the rates of pensions to disabled veterans; to the Committee on Veterans' Affairs.

1200. By the SPEAKER: Petition of Lithuanian American Council, Chicago, Ill., petitioning consideration of their resolution with reference to enacting legislation designed to facilitate voluntary relief assistance to displaced persons in Europe; to the Committee on Post Office and Civil Service.

WALTER C. PLOESER, *Chairman.*

SENATE

FRIDAY, JANUARY 23, 1948

(Legislative day of Wednesday, January 21, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Our Father, let not Thy servants become discouraged or grow weary in well-doing.

Bolster their faith that with Thee there is an answer to every question and a solution to every problem.

Under Thy guidance, let them know that they are not leading a forlorn hope, but are the spokesmen for a good way of life.

Help us all to keep it good and to make it better. Through Jesus Christ our Lord. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 23, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. HARRY P. CAIN, a Senator from the State of Washington, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. CAIN thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Wednesday, January 21, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE

A message from the House of Representatives by Mr. Maurer, one of its reading clerks, announced that the House had passed a bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939, in which it requested the concurrence of the Senate.

MEETINGS OF COMMITTEES DURING SESSION OF THE SENATE

Mr. WHERRY. Mr. President, I ask unanimous consent that the Subcommittee on Commodity Speculation of the Senate Committee on Appropriations be granted permission to sit during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, the order is made.

Mr. LODGE. Mr. President, at the request of the Committee on Foreign Relations, I ask unanimous consent that that committee be authorized to hold hearings during the session of the Senate today.

The ACTING PRESIDENT pro tempore. Without objection, permission is granted.

PUBLIC HEARINGS BY SUBCOMMITTEE ON FLOOD CONTROL AND IMPROVEMENT OF RIVERS AND HARBORS, COMMITTEE ON PUBLIC WORKS

Mr. MALONE. Mr. President, I wish to take this opportunity to announce that the Subcommittee on Flood Control and Improvement of Rivers and Harbors of the Committee on Public Works will hold public hearings in room 412, Senate Office Building, beginning at 10:30 a. m., March 15, 1948, on Senate bill 1277, to amend the Tennessee Valley Authority Act of 1933, as amended, and for other purposes. At that time the subcommittee will be glad to hear all interested parties who may wish to offer testimony on the provisions of this measure. Witnesses are requested to file with the committee written statements of their proposed testimony at least 3 days in advance of the hearing date.

Mr. President, I also wish to take this opportunity to announce that the Subcommittee on Flood Control and Improvement of Rivers and Harbors of the Committee on Public Works will hold public hearings on Thursday, January 29, 1948, at 10 a. m., on Senate Joint Resolution No. 155, rescinding an order of the Federal Power Commission authorizing redevelopment of the Wilder Dam project. The subcommittee will also hold public hearings on Friday, January 30, 1948, at 10:30 a. m., on Senate bill 1651, to amend the General Bridge Act of 1946. All interested parties will be afforded the opportunity to be heard concerning these bills. Witnesses are requested to file with the committee written statements of their proposed testimony at least 3 days in advance of the hearings.

LEAVES OF ABSENCE

Mr. BALDWIN. Mr. President, I have a very important meeting to attend in Connecticut tonight and I ask unanimous consent to be absent from the Senate after 12:30 p. m. today.

The ACTING PRESIDENT pro tempore. Without objection, the order is made.

Mr. WHERRY asked and obtained consent that Mr. FLANDERS be excused from attendance on Monday and Wednesday next.

Mr. WHERRY asked and obtained consent that Mr. FLANDERS be excused from attendance on Monday and Wednesday next.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

SUSPENSION OF DEPORTATION OF ALIENS

A letter from the Attorney General, transmitting, pursuant to law, a report reciting the facts and pertinent provisions of law in the cases of 298 individuals whose deportation has been suspended for more than 6 months by the Commissioner of Immigration and Naturalization Service under the authority vested in the Attorney General, together with a statement of the reason for such suspension (with accompanying papers); to the Committee on the Judiciary.

REPORT ON TORT CLAIMS PAID BY FEDERAL SECURITY AGENCY

A letter from the Acting Administrator, Federal Security Agency, transmitting, pursuant to law, a report of all claims paid by that Agency under the Federal Tort Claims Act, for the period August 2, 1946, to December 31, 1947 (with an accompanying report); to the Committee on the Judiciary.

CONVEYANCE OF CERTAIN LANDS IN THE DISTRICT OF COLUMBIA TO HOWARD UNIVERSITY

A letter from the Administrator, Housing and Home Finance Agency, transmitting a draft of proposed legislation to authorize Defense Homes Corporation to convey to Howard University certain lands in the District of Columbia, and for other purposes (with accompanying papers); to the Committee on Banking and Currency.

TRAVEL EXPENSES INCURRED BY VETERANS' ADMINISTRATION BENEFICIARIES AND ATTENDANTS

A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation to amend Public Law No. 432, Seventy-sixth Congress, to include an allowance of expenses incurred by Veterans' Administration beneficiaries and their attendants in authorized travel for vocational rehabilitation purposes (with accompanying papers); to the Committee on Finance.

REIMBURSEMENT OF COMMISSION ON ORGANIZATION OF EXECUTIVE BRANCH FOR CERTAIN EXPENDITURES

A letter from the Administrator of Veterans' Affairs, transmitting a draft of proposed legislation authorizing the Administrator of Veterans' Affairs to reimburse the Commission on Organization of the Executive Branch of the Government for certain sums expended in connection with its study

of the Veterans' Administration (with an accompanying paper); to the Committee on Finance.

REPORT OF EXPENDITURES BY UNITED STATES COURT OF CUSTOMS AND PATENT APPEALS

A letter from the Director, administrative office of the United States courts, transmitting, pursuant to law, a report of expenditures of appropriations for the United States Court of Customs and Patent Appeals, for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

REPORTS ON DISPOSAL OF RECORDS BY THE NATIONAL ARCHIVIST

A letter from the Archivist of the United States, transmitting, pursuant to law, reports as to the records authorized for disposal by the Archivist of the United States (with accompanying reports); to the Committee on Rules and Administration.

STOCK PILING

A letter from the Chairman of the Munitions Board, National Military Establishment, Washington, D. C., transmitting, pursuant to law, a confidential report concerning stock piling (with an accompanying report); to the Committee on Armed Services (in confidence).

RECEIPTS AND EXPENDITURES BY CHESAPEAKE & POTOMAC TELEPHONE CO.

A letter from the vice president and comptroller of the Chesapeake & Potomac Telephone Co., transmitting, pursuant to law, a report of receipts and expenditures of the Chesapeake & Potomac Telephone Co. for the year 1947 (with an accompanying report); to the Committee on the District of Columbia.

BALANCE SHEET OF CHESAPEAKE & POTOMAC TELEPHONE CO.

A letter from the vice president and comptroller of the Chesapeake & Potomac Telephone Co., transmitting, pursuant to law, a comparative general balance sheet of the Chesapeake & Potomac Telephone Co. for the year 1947 (with accompanying papers); to the Committee on the District of Columbia.

DISPOSITION OF EXECUTIVE PAPERS

A letter from the Archivist of the United States, transmitting, pursuant to law, a list of papers and documents on the files of several departments and agencies of the Government which are not needed in the conduct of business and have no permanent value or historical interest, and requesting action looking to their disposition (with accompanying papers); to a Joint Select Committee on the Disposition of Papers in the Executive Departments.

The ACTING PRESIDENT pro tempore appointed Mr. LANGER and Mr. CHAVEZ members of the committee on the part of the Senate.

PETITIONS AND MEMORIAL

Petitions, etc., were laid before the Senate, or presented, and referred as indicated:

By the ACTING PRESIDENT pro tempore:

A resolution adopted by the National Board of Directors, Fleet Reserve Association, Washington, D. C., favoring the enactment of legislation providing for universal military training; to the Committee on Armed Services.

By Mr. McMAHON:

A petition signed by sundry citizens of the State of Connecticut, praying for the enactment of H. R. 4695, to amend the Railroad Retirement Act of 1937 so as to provide full annuities, at compensation of half salary or wages, for persons who have completed 30 years of service; to the Committee on Labor and Public Welfare.

By Mr. CAPPER:

A petition signed by sundry members of the Georgia Women's Christian Temperance Union and 669 citizens of the State of Georgia praying for the enactment of Senate bill 265, to prohibit the transportation of alcoholic beverage advertising in interstate commerce; to the Committee on Interstate and Foreign Commerce.

A memorial signed by 60 citizens of Fredonia, Kans., remonstrating against the enactment of legislation providing universal military training; to the Committee on Armed Services.

RESOLUTION BY LONG BEACH (CALIF.) CHAMBER OF COMMERCE RELATING TO AIR SUPREMACY

Mr. KNOWLAND. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution adopted by the Long Beach (Calif.) Chamber of Commerce on December 29, 1947, relative to the necessity for America to regain air supremacy.

There being no objection, the resolution was received, referred to the Committee on Armed Services, and ordered to be printed in the RECORD, as follows:

WE MUST REGAIN AIR SUPREMACY

Whereas the United States has demonstrated its desire to live in peace with the world; and

In every generation it has been drawn into a terrible war for which it was unprepared; and

This unpreparedness has cost many thousands of lives and billions of dollars; and

The security of our homes, families, property, and Nation depends upon adequate national defense; and

An air force superior to that of any enemy is the strongest deterrent to aggression and the best immediate means of defense: Therefore it is hereby

Resolved, That the Congress of the United States be urgently requested to adopt promptly a national air policy which will assure:

1. A modern powerful Air Force in being.
2. Enough trained personnel to man this Air Force.
3. Sufficient research and development to guarantee that America remains first in this field.
4. Strategically located bases of operation.
5. An adequate system of air transportation which in effect is an auxiliary and supplement to the Air Force.
6. A strong independent aircraft industry capable of rapid expansion.
7. Designation of standby plants from those already constructed to provide a stronger basic production nucleus to meet any national emergency.
8. Creation of an additional separate stock pile of critical materials for aircraft manufacture and maintenance.

Adopted December 29, 1947.

THE BOARD OF DIRECTORS,
LONG BEACH CHAMBER OF COMMERCE.

PROTEST AGAINST RATIONING OF BUTTER—RESOLUTION BY KANSAS BUTTER INSTITUTE

Mr. CAPPER. Mr. President, I send to the desk and ask unanimous consent to have printed in the RECORD, an appropriately referred resolution adopted in Manhattan, Kans., on January 12, 1948, by the eighth annual meeting of the Kansas Butter Institute. They make a strong argument for their stand, and I am glad to bring this resolution to the attention of the Senate.

There being no objection, the resolutions were received, referred to the Committee on Banking and Currency, and ordered to be printed in the RECORD, as follows:

RESOLUTIONS ADOPTED AT THE EIGHTH ANNUAL MEETING OF THE KANSAS BUTTER INSTITUTE, JANUARY 12–13, 1948

Whereas the eastern subcommittee for Price Investigation of the Congressional Joint Committee on the Economic Report has recently recommended consideration of a return to rationing of butter along with meat and poultry. Whereas the President's message to the special session of Congress on November 17, suggested a possibility of the return of rationing and price controls: Therefore be it

Resolved, That the members of the Kansas Butter Institute record their unalterable opposition to rationing of butter in peacetime, with or without the imposition of control over butter prices. Rationing of butter in wartime resulted in gross inequities of distribution, which would be intolerable in peacetime. These maladjustments would be magnified and intensified in a situation where the wartime influences which brought about some degree of compliance would be virtually nonexistent today; be it further

Resolved, That the Members of Congress be reminded that if this country is to have an adequate supply of butter in the future the price of butter must be permitted to find such levels as will permit the dairy cow to compete against beef cattle, hogs, poultry, and world grain markets for a share of the feed necessary for milk production. The OPA ceiling prices on butter were arbitrarily low in relation to other farm products and caused a severe cut in butter production. If we are ever to regain adeqate production for recommended nutritional needs it will be because butter prices find such levels or will induce our American farmers to produce more cream for butter making; and be it further

Resolved, That copies of this resolution be forwarded to all Kansas Members of the Congress of the United States.

Whereas the establishment of a fund to be used for the specific purpose of research pertinent to the butter industry of Kansas would be beneficial to all members of this association and contribute to the further development of the Kansas dairy industry: Be it

Resolved, That the board of directors give consideration to ways and means of creating such an annual fund to be granted to the dairy husbandry section of the Kansas Agricultural Experiment Station.

CONCURRENT RESOLUTIONS OF MISSISSIPPI LEGISLATURE

Mr. EASTLAND. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a concurrent resolution endorsing the Marshall plan, adopted by the Mississippi Legislature, as I understand, by unanimous vote.

There being no objection, the concurrent resolution was received, referred to the Committee on Foreign Relations, and, under the rule, ordered to be printed in the RECORD, as follows:

Senate Concurrent Resolution 7

Concurrent resolution approving the Marshall plan as presented to the American people and Congress by General Marshall and memorializing Congress to pass adequate appropriation to insure the recovering of western Europe

Be it resolved by the Senate of the State of Mississippi (the house of representatives concurring therein), That—

Whereas the objective of the Communist Party of the Union of Socialist Soviet Republics is to sovietize and enslave the universe

through stealth, trickery, treason, subversive and dictatorial power, and to this end Russia dominates or has absorbed such nations as Finland, Estonia, Lithuania, Latvia, Poland, Rumania, Bulgaria, Yugoslavia, Hungary, Albania, Czechoslovakia, parts of Austria, Germany, Manchuria, northern Korea, Outer Mongolia, and northern China; and

Whereas to accomplish these ends Russia has ignored the Atlantic Charter, violated the agreements of Yalta and Tehran, and broken every precept of man and God; and

Whereas poverty, sickness, hunger in proud democratic nations are the instrumentalities by which the Soviets seek to conquer; and

Whereas if Greece, Italy, and France succumb to the revolutionary and brutal tactics of the Communists, then western Europe, with its 270,000,000 people, will be encompassed by the Communists and enslaved by its commissars and secret police; and

Whereas the arrogance of the Soviet leaders, the propaganda of the Communists, and the infiltration of their fellow travelers, have tended to confuse and bewilder our own citizens; and

Whereas the aggression of the Communists must be stopped or the 2-year cold war may evolve into another world war; and

Whereas the insults and injuries of the Communists have exhausted our patience; and

Whereas to prevent World War III, Secretary Marshall has proposed a program known as the Marshall plan to restore the operation and production of western Europe; and

Whereas the late war cost the United States $100,000,000,000 in the last 12 months of hostilities, and the cost of the Marshall plan will amount only to a 2-month expenditure of World War II: Now, therefore, be it hereby

Resolved by the Senate of the State of Mississippi (the house of representatives concurring herein), That the Marshall plan as presented to the American people and Congress by General Marshall be, and is hereby, approved and that Congress be memorialized to pass adequate appropriations to insure the recovery of western Europe at the earliest possible moment, and the Members of Congress from Mississippi in the House and Senate are hereby petitioned to aggressively support and vote for such legislation, and that a copy of this resolution be transmitted to the Members of Congress from Mississippi and to the author of the plan, the distinguished Secretary of State, General Marshall; be it further

Resolved, That the other sovereign States of the Nation be requested to urge Congress to take favorable action on this great issue; be it further

Resolved, That a member of this body be designated by the Speaker to deliver a copy of this resolution to General Marshall at Atlanta, Ga., on Thursday, January 22, at the meeting of the National Cotton Council.

Mr. EASTLAND. Mr. President, on January 21, 1948, the House of Representatives of the State of Mississippi adopted a concurrent resolution endorsing Governor Wright's warning to the national leadership, which resolution was concurred in by the State senate on January 22. I ask unanimous consent to present the resolution for appropriate reference and that it be printed at this point in the body of the RECORD.

There being no objection, the concurrent resolution was received, referred to the Committee on the Judiciary, and, under the rule, ordered to be printed in the RECORD, as follows:

House Concurrent Resolution 15

Concurrent resolution commending Gov. Fielding Wright and approving his stand in defense of the South and the principles and traditions for which she stands against political activities designed to destroy them

Be it resolved by the House of Representatives of the State of Mississippi (the senate concurring therein), That the courageous and fearless stand taken by Gov. Fielding Wright in defense of the South against political aggression, abuse and misrepresentation, designed to disrupt and destroy southern institutions, traditions, and way of life, and which do violence to fundamental principles of constitutional, democratic government, and particularly the right of the States to solve their domestic problems, and adopt laws and policies for local self-government, be, and the same is hereby commended and approved, and we, the duly elected representatives of the people of Mississippi, join the Governor in the warning given to the leaders of the National Democratic Party and to the Nation, that Mississippians and southerners will no longer tolerate these abuses and efforts to destroy the South and her institutions, and hereby pledge our full support to the Governor in his efforts to protect and uphold the principles, traditions, and way of life of our beloved Southland.

STATEMENT BY GOVERNOR WRIGHT OF MISSISSIPPI TO THE LEADERS OF THE DEMOCRATIC PARTY

Mr. EASTLAND. Mr. President, the newspapers a few days ago carried a story of a warning issued by the Governor of Mississippi to the leaders of the Democratic Party, which warning was incorporated in his inaugural address. I have in my hand a correct copy of the statement made by the Governor, and I ask unanimous consent that it be printed at this point in my remarks, in the body of the RECORD.

There being no objection, the address was ordered to be printed in the RECORD, as follows:

Facing the future, as your chief executive, I would be remiss in my responsibilities if your attention were not directed to the fact that we are living in unsettled, uncertain, and even perilous times. One need not be a diplomat nor a student of international affairs to see the many danger flags flying throughout the world in the field of international relations as democracy clashes with communism in a struggle which will determine whether or not these two ideologies can live together in cooperation or if we must once again maintain our heritage and our freedom in the cold and cruel crucible of war. Nor need one be an economic prophet to realize that the inflation running rampant in this country today—if allowed to continue its mad flight unchecked—will eventually, and in the not-to-far-distant future, lead us into the depths of another great depression.

But, serious as these problems may be, they can be met and solved if approached in the spirit of common sense, honesty, and unselfishness which has characterized our efforts in so many difficult and trying times in the past.

And as we search for the answers to these problems, there is yet another most serious conflict being thrust upon the people of Mississippi and our beloved Southland; thrust upon us in the Congress of the United States and through press and radio services throughout the country. That is the campaign of abuse and misrepresentation being levelled against our section by those who seek to tear down and disrupt our institutions and our way of life. They are using as their tools such infamous proposals as FEPC, anti-lynching legislation, anti-poll-tax bills, and now the antisegregation proposals.

The charge of dereliction of duty could be hurled at me by the citizens of this State were I to fail to direct your thoughts to the vicious effect of the proposals of the committee appointed by the President of the United States to study and make recommendations under the guise of preservation of civil liberties. Those of you who read and studied the report recognize in it a further, and I might say, the most dangerous step, toward the destruction of those traditions and customs so vital to our way of life, particularly in our Southland.

These measures and the proposals of this committee are deliberately aimed to wreck the South and our institutions. But they are far more sinister than being mere pieces of antisouthern legislation and recommendations, for hidden under their misleading titles and guarded phraseology are elements so completely foreign to our American way of living and thinking that they will, if enacted, eventually destroy this Nation and all of the freedoms which we have long cherished and maintained.

The advocates of today's antisouthern legislation disregard the great instrument creating this Government which makes of us a union of sovereign States. This Nation, of which we are so justly proud, has grown great amid our very many differences of ideas. Each of our 48 States has made singular and specific contributions to the national whole because while they are different the people had the individual leeway to decide their own best methods for solving their local problems. Individuals in this Nation have achieved the heights because they had the right to use their own personal talents, and no man was standardized or limited to any given level of attainment or service to or among his fellows.

With this record of achievement which has made our country the greatest in the world—with our structure of republican government which has enabled our sovereign States to live together in relative harmony and progress and which has brought to all our people a standard of living never before achieved in human history—I cannot understand why there are those in this land today and in the Congress of the United States who would begin its disintegration by such types of nefarious legislation as I have previously mentioned. The legislation to which I have referred flagrantly invades the sovereign rights of the individual States. It undertakes to destroy our proper privilege of solving our own individual problems in the light of all our circumstances.

Aside from this fundamental right, such legislation violates the very experience of man, namely, that the problems of human relationships are so varied and diverse that we can never begin to solve all of them by laws. They can only be answered by education and continuing progress in the light of truth as God may give us wisdom to see and embrace the truth. And they can only be solved by the people who understand and know and are familiar with the problem.

Here in Mississippi and the South may be found the greatest example in human history of harmonious relationships ever recorded as existing between two so different and distinct races as the white and the Negro, living so closely together and in such nearly equal numbers. The uninterrupted progress which has been made will be continued in an orderly, effective manner if both races are left alone by those unfamiliar with the true situation. This problem is being solved by Mississippians and by southerners in a wholesome and constructive manner. We know that human relationship cannot be equalized

and balanced by legislation, unless through such legislation the power of the State is exercised to force all men into a pattern—a rigid pattern which would operate to destroy the freedoms of all and cut off our march of progress.

We believe that the people of each of the 48 States—north, south, east, and west—are the most capable of judging their own respective local needs and meeting them. We know that this was the program set up by our founding fathers and guaranteed in our Constitution.

In Mississippi, and I think in the other States known as the South, we feel that our rights are being threatened by enemies of the South who are in fact also enemies of the Nation. We are convinced that in upholding our position in this current struggle, we are in fact maintaining the interests of all the American people and each of the 48 States. Yes, we are confident that we are by our position upholding the rights of the members of all races and sections.

As a lifelong Democrat, as a descendant of Democrats, as the Governor of this Nation's most Democratic State, I would regret to see the day come when Mississippi or the South should break with the Democratic Party in a national election. But vital principles and eternal truths transcend party lines, and the day is now at hand when determined action must be taken.

We have repeatedly seen the proposal of various measures in the Congress which were not for the best interests of the Nation but definitely designed to appeal to certain voting groups holding the balance of power in other States. We of the South will no longer tolerate being the target for this type of legislation which would not only destroy our way of life, but which, if enacted, would eventually destroy the United States. The time has come for the militant people of the South and the Nation, who have never shirked any patriotic responsibility, to band together for the preservation of true Americanism. United in our cause, we serve not only ourselves and our neighbors, but all of our fellow citizens throughout the Nation.

As we face this particular task I invite the patience, calm deliberation, counsel, and cooperation of all men of good will and true Americanism, wherever they may be. We are Democrats; we have been loyal to the Democratic Party at all times, in its periods of success as well as in the dark days of despair. We voted the Democratic ticket when no other section stayed with the banner. We have never shirked, nor have we ever faltered in our loyalty to our party. There are some who subscribe to the belief that due to this record of faithful service we are taken for granted and are not deemed worthy of consideration in formulating party policy and platforms. A continuation of the harassing and unfair legislation to which I have referred will compel all of us to such a conclusion.

This is a new day in State and national politics and circumstances may make necessary a new, and, we hope, a temporary approach to national politics by our State and Southland. We have always remained true to the traditions of our party and will continue to do so, but when the national leaders attempt to change those principles for which the party stands, we intend to fight for its preservation with all means at our hands. We must make our national leaders fully realize we mean precisely what we say, and we must, if necessary, implement our words with positive action. We warn them now, to take heed. Drastic though our methods may be, and as far reaching as the results may prove, we are certain that the ultimate consequence will fully justify any temporary set-back that may follow our action.

Mr. EASTLAND. Mr. President, I may say that I have been informed that the statement made by the Governor of Mississippi has been endorsed editorially by practically all the daily newspapers in the State of Mississippi, and by a number of special meetings of county bar associations in Mississippi.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. RUSSELL, from the Committee on Armed Services:

S. 1528. A bill to authorize the Secretary of War and the Secretary of the Navy to accept and use gifts, devices, and bequests for schools, hospitals, libraries, museums, cemeteries, and other institutions under the jurisdiction of the War Department, or Navy Department, and for other purposes; with amendments (Rept. No. 829).

By Mr. TYDINGS, from the Committee on Armed Services:

S. 1470. A bill to amend the act entitled "An act to make provision for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers' Training Corps, and Citizens' Military Training Camps who are injured or contract disease while engaged in military training, and for other purposes," approved June 15, 1936, as amended; with amendments (Rept. No. 830), and

S. 1802. A bill to authorize the President to award the Medal of Honor to the unknown American who lost his life while serving overseas in the armed forces of the United States during the Second World War; without amendment (Rept. No. 831).

By Mr. GURNEY, from the Committee on Armed Services:

S. 1214. A bill to amend the act entitled "An act to provide for the training of officers for the naval service, and for other purposes," approved August 13, 1946; with amendments (Rept. No. 832); and

S. 1521. A bill to authorize the Secretary of War and the Secretary of the Navy to detail scientific and technical employees of the War Department or the Army, and the Naval Establishment, to duty in privately owned plants and laboratories; with amendments (Rept. No. 833).

By Mr. GURNEY (for Mr. BRIDGES), from the Committee on Armed Services:

S. 1783. A bill to provide for retention in the service of certain disabled Army personnel, and for other purposes; with amendments (Rept. No. 834); and

S. 1961. A bill to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes; without amendment (Rept. No. 835).

By Mr. GURNEY (for Mr. ROBERTSON of Wyoming), from the Committee on Armed Services:

S. 1791. A bill to transfer certain lands at Camp Phillips, Kans., to the War Department; with amendments (Rept. No. 836).

By Mr. KILGORE, from the Committee on Armed Services:

S. 1673. A bill to authorize the promotion of James Y. Parker, Army serial number O20712, as major, Army of the United States, as of March 1, 1942, under the act of February 16, 1942 (56 Stat. 94), and for other purposes; without amendment (Rept. No. 837).

By Mr. BALDWIN, from the Committee on Armed Services:

S. 1298. A bill to validate payments heretofore made by disbursing officers of the United States Government covering cost of shipment of household effects of civilian employees, and for other purposes; with amendments (Rept. No. 838).

By Mr. BYRD, from the Committee on Armed Services:

S. 1796. A bill to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes; with an amendment (Rept. No. 839).

By Mr. WILSON, from the Committee on Armed Services:

S. 1794. A bill to authorize the Houston Council, Navy League of the United States, to construct a reflecting pool at the United States naval hospital, Houston, Tex.; without amendment (Rept. No. 840).

By Mr. MAYBANK, from the Committee on Armed Services:

S. 1800. A bill relating to the restrictions on the use of crypt and window spaces of the United States Naval Academy chapel; without amendment (Rept. No. 841).

By Mr. SALTONSTALL, from the Committee on Armed Services:

H. R. 774. A bill to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective Departments; with amendments (Rept. No. 843).

By Mr. HILL, from the Committee on Armed Services:

H. R. 3645. A bill relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes; without amendment (Rept. No. 844).

By Mr. MORSE, from the Committee on Armed Services:

S. 1799. A bill to amend the act of June 3, 1916, as amended, to make it applicable to the Canal Zone, Guam, American Samoa, and the Virgin Islands; without amendment (Rept. No. 842).

By Mr. FERGUSON, from the Committee on Expenditures in the Executive Departments:

H. R. 2239. A bill to amend section 13 (a) of the Surplus Property Act of 1944, as amended; with amendments (Rept. No. 845).

SENATE WAR INVESTIGATING COMMITTEE—EXTENSION OF TIME FOR FILING REPORTS

Mr. BREWSTER. Mr. President, I ask permission for the Senate War Investigating Committee to file reports any time during the month of February. That will mean an extension of 1 month from the time originally fixed. I also ask for permission to use whatever assistance may be necessary for that purpose. I call this request to the attention of the Senator from Kentucky. I think he would like to be apprised of the request for the extension of time.

Mr. BARKLEY. Mr. President, will not the Senator from Maine repeat the request?

Mr. BREWSTER. I asked to have the time extended for the filing of reports by the War Investigating Committee during the month of February, and that it might use whatever assistance is necessary for that purpose.

Mr. BARKLEY. May I understand that is only for the purpose of enabling the committee to make a report?

Mr. BREWSTER. To make reports.

Mr. BARKLEY. But not for the purpose of conducting further hearings or investigations?

Mr. BREWSTER. That is correct.

Mr. BARKLEY. To make reports on the testimony already adduced?

Mr. BREWSTER. We shall conclude all hearings before the end of this month.

Mr. BARKLEY. This month?

Mr. BREWSTER. Yes.

Mr. BARKLEY. So that the extension through February is for the purpose of enabling the committee to make reports based upon the hearings it will have conducted by that time?

Mr. BREWSTER. That is correct.

The ACTING PRESIDENT pro tempore. Without objection, the order is made.

The order was reduced to writing, as follows:

Ordered, That the time for filing reports of the Special Committee To Investigate the National Defense Program, pursuant to Senate Resolution 46, Eightieth Congress, first session, be, and the same is hereby, extended to February 29, 1948, inclusive; and that the said committee be, and it is hereby, authorized to continue up to and including said date the employment of necessary clerical assistants to complete the performance of its duties and to pay incidental expenses incurred in connection therewith.

BILLS INTRODUCED

Bills were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JENNER:

S. 2048. A bill for the relief of Mrs. Renata Cuff; to the Committee on the Judiciary.

(Mr. MALONE introduced Senate bill 2049, for the relief of the Alamo Irrigation Co., which was referred to the Committee on the Judiciary, and appears under a separate heading.)

(Mr. MALONE also introduced Senate bill 2050 for the relief of Gracy Mariluch, which was referred to the Committee on the Judiciary, and appears under a separate heading.)

By Mr. IVES:

S. 2051. A bill for the relief of Samuel Ezratty; and

S. 2052. A bill for the relief of Father Louis Naclerio; to the Committee on the Judiciary.

By Mr. McMAHON (by request):

S. 2053. A bill for the relief of Collins Sterling Smith; and

S. 2054. A bill for the relief of Engebert Axer; to the Committee on the Judiciary.

S. 2055. A bill to amend the Railroad Retirement Act of 1937 so as to provide full annuities, at compensation of half salary or wages, for persons who have completed 30 years of service; to the Committee on Labor and Public Welfare.

By Mr. TYDINGS (for himself and Mr. O'CONOR):

S. 2056. A bill to amend the Agricultural Adjustment Act of 1938, as amended, to change the base period for the determination of parity for Maryland tobacco from August 1919 to July 1929 to the period from January 1936 to December 1945; to the Committee on Agriculture and Forestry.

By Mr. LANGER:

S. 2057. A bill to authorize the admission into the United States of persons of races indigenous to Indonesia, to make them racially eligible for naturalization, and for other purposes; to the Committee on the Judiciary.

By Mr. PEPPER:

S. 2058. A bill to amend paragraph 1772 of the Tariff Act of 1930, as amended; to the Committee on Finance.

S. 2059. A bill for the relief of Joyce Violet Angel; and

S. 2060. A bill for the relief of Edward Wikner Percival; to the Committee on the Judiciary.

ALAMO IRRIGATION CO.

Mr. MALONE. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill for the relief of the Alamo Irrigation Co., and I request that the explanatory statement be printed in the RECORD, as part of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, the bill will be received and appropriately referred, and, without objection, the statement presented by the Senator from Nevada will be printed in the RECORD.

There being no objection, the bill (S. 2049) for the relief of the Alamo Irrigation Co., introduced by Mr. MALONE, was received, read twice by its title, and referred to the Committee on the Judiciary.

The explantory statement presented by Mr. MALONE was ordered to be printed in the RECORD, as follows:

EXPLANATORY STATEMENT BY SENATOR MALONE

The Alamo Irrigation Co. is asking for a waiver of interest on a loan made to them by the Farmers' Home Administration on August 7, 1947, for the purpose of building an irrigation canal. They were prevented from applying for the funds granted under this loan first, because of the impossibility of securing acceptable bids during the fall of 1936, and thereafter by the necessity of using the existing canal to transport irrigation water to farms until the 1947 crops were matured.

They feel they were not actually entitled to use the funds until June 10, 1947, when a representative of the FHA and the board of directors of the company met and approved the type of lining to be used in construction of the canal.

The interest which would be waived under this bill is for the period August 7, 1946, to June 17, 1947, and amounts to $1,193.50.

The amount of the loan, $46,200, was deposited in a joint account, on August 7, 1946. No funds could be drawn against the account without both the signature of an officer of the Alamo Irrigation Co. and a supervisor appointed by the FHA.

The first withdrawal was made June 17, 1947, in the amount of $165. Up to the present time they have spent $26,732.61.

None of the money was used for any purpose during the period for which the refund of interest is claimed, August 7, 1946, to June 17, 1947.

The matter has been discussed with Mr. R. W. Hollenberg, State director of the FHA in Nevada and California, who directly handled the case, who says the FHA would like to waive the interest, but that it must be done by means of a bill in Congress.

GRACY MARILUCH

Mr. MALONE. Mr. President, I ask unanimous consent to introduce for appropriate reference a bill for the relief of Gracy Mariluch, and I request that an explanatory statement by me may be printed in the RECORD, as part of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, the bill will be received and appropriately referred, and, without objection, the statement presented by the Senator from Nevada will be printed in the RECORD.

There being no objection, the bill (S. 2050) for the relief of Gracy Mariluch, introduced by Mr. MALONE, was received, read twice by its title, and referred to the Committee on the Judiciary.

The explanatory statement presented by Mr. MALONE was ordered to be printed in the RECORD, as follows:

EXPLANATORY STATEMENT BY SENATOR MALONE

Miss Gracy Mariluch, 24, who has lived in France since 40 days after her birth, had intended to accompany her mother, sister, and brother to the United States to make their home in Elko, Nev.

Her mother is a former resident of Nevada and her brother was born in the United States and served in World War II.

Her mother is studying to prepare for application for citizenship.

The necessary papers had been prepared for the entire family to live in the United States under the French quota when it was discovered that Miss Gracy Mariluch would come under the Spanish quota, since she was born in Spain while her parents were en route from the United States to France.

To await her admission under the Spanish quota would necessitate a separation of the family for nearly 10 years.

HOUSE BILL REFERRED

The bill (H. R. 2873) to amend certain provisions of the Reclamation Project Act of 1939, was read twice by its title, and referred to the Committee on Public Lands.

CHALLENGES AND RESPONSIBILITIES OF AMERICAN LAW—ADDRESS BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD an address entitled "Challenges and Responsibilities of American Law," delivered by him before the Federal Bar Association, Washington, D. C., January 22, 1948, which appears in the Appendix.]

ADDRESS BY SENATOR GREEN IN REPLY TO SENATOR TAFT

[Mr. McMAHON asked and obtained leave to have printed in the RECORD an address delivered by Senator GREEN at Providence, R. I., January 19, 1948, in reply to Senator TAFT, which appears in the Appendix.]

OPPOSITION OF CERTAIN RAILWAY BROTHERHOODS TO THE ST. LAWRENCE SEAWAY PROJECT—STATEMENT BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD a statement prepared by him on the subject of the opposition of certain railway brotherhoods to the St. Lawrence seaway project, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL FROM THE MANITOWOC (WIS.) HERALD-TIMES

[Mr. HATCH asked and obtained leave to have printed in the RECORD an editorial entitled "Backing the Seaway," published in the Manitowoc (Wis.) Herald-Times, which appears in the Appendix.]

THE ST. LAWRENCE SEAWAY—EDITORIAL FROM THE WASHINGTON POST

[Mr. LANGER asked and obtained leave to have printed in the RECORD an editorial entitled "St. Lawrence Seaway," published in the Washington Post of January 21, 1948, which appears in the Appendix.]

MEAT RATIONING — EDITORIAL FROM THE OMAHA WORLD-HERALD

[Mr. WHERRY asked and obtained leave to have printed in the RECORD an editorial entitled "A Thin Line Between," from the Omaha World-Herald of January 21, 1948, which appears in the Appendix.]

IDEOLOGY OR BALANCE OF POWER?—ARTICLE BY WILLIAM G. CARLETON

[Mr. PEPPER asked and obtained leave to have printed in the RECORD an article entitled "Ideology or Balance of Power?" by William G. Carleton, professor of political

science at the University of Florida, published in the Yale Review, which appears in the Appendix.]

THE STRANGE CASE OF THE TAFT-HARTLEY LAW—ARTICLE FROM THE READER'S DIGEST

[Mr. WATKINS asked and obtained leave to have printed in the RECORD an article entitled "The Strange Case of the Taft-Hartley Law," by Claude Robinson, president, Opinion Research Corp., published in the September 1947 issue of the Reader's Digest, which appears in the Appendix.]

CONTROL OF USE OF GRAIN FOR PRODUCTION OF SPIRITS

The ACTING PRESIDENT pro tempore. Under the order of Wednesday, the unfinished business, Senate bill 637, a bill to amend the Civil Service Retirement Act of May 29, 1930, as amended, will be temporarily laid aside, and the Senate will proceed to consider Senate bill 1842, which will be stated by title.

The CHIEF CLERK. A bill (S. 1842) to amend the Second Decontrol Act of 1947.

Mr. WHERRY. Mr. President, the legislative program for the day has already been stated by the Chair. The business to be proceeded with now is Senate bill 1842, reported by the Senator from Vermont [Mr. FLANDERS]. I ask unanimous consent that the Senate proceed with the consideration of that bill at this time.

There being no objection, the Senate proceeded to consider the bill (S. 1842) to amend the Second Decontrol Act of 1947, which had been reported from the Committee on Banking and Currency, with amendments.

Mr. WHERRY. Mr. President, I suggest that the junior Senator from Vermont [Mr. FLANDERS] be recognized, when it will be my purpose to ask for a quorum, so that all Senators may be present to hear the discussion.

Mr. FLANDERS obtained the floor.

Mr. WHERRY. Mr. President, will the Senator from Vermont yield?

Mr. FLANDERS. I yield.

Mr. WHERRY. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Hayden	Morse
Baldwin	Hickenlooper	Murray
Barkley	Hill	O'Conor
Brewster	Hoey	O'Daniel
Bricker	Holland	Overton
Buck	Ives	Pepper
Bushfield	Jenner	Revercomb
Butler	Johnson, Colo.	Robertson, Va.
Byrd	Johnston, S. C.	Russell
Cain	Kem	Saltonstall
Capper	Kilgore	Smith
Chavez	Knowland	Sparkman
Connally	Langer	Stennis
Cooper	Lodge	Taft
Donnell	Lucas	Taylor
Downey	McCarran	Thomas, Okla.
Dworshak	McCarthy	Thomas, Utah
Eastland	McClellan	Thye
Ecton	McFarland	Tobey
Ellender	McGrath	Tydings
Ferguson	McKellar	Umstead
Flanders	McMahon	Vandenberg
Fulbright	Magnuson	Watkins
George	Malone	Wherry
Green	Martin	Wiley
Gurney	Maybank	Williams
Hatch	Millikin	Wilson
Hawkes	Moore	Young

Mr. WHERRY. I announce that the Senator from Minnesota [Mr. BALL] is absent on official State business.

The Senator from New Hampshire [Mr. BRIDGES], and the Senator from Kansas [Mr. REED] are necessarily absent.

The Senator from Illinois [Mr. BROOKS] is detained on official business.

The Senator from Indiana [Mr. CAPEHART] is absent by leave of the Senate.

The Senator from Oregon [Mr. CORDON] is necessarily absent on official business of the Committee on Public Lands.

The Senator from Wyoming [Mr. ROBERTSON] is absent on official business.

Mr. LUCAS. I announce that the Senator from Pennsylvania [Mr. MYERS], the Senator from Wyoming [Mr. O'MAHONEY], and the Senator from Tennessee [Mr. STEWART] are absent on public business.

The Senator from New York [Mr. WAGNER] is necessarily absent.

The ACTING PRESIDENT pro tempore. Eighty-four Senators having answered to their names, a quorum is present.

Mr. FLANDERS. Mr. President, I report Senate bill 1842 with amendments. This is a bill which was introduced by the Senator from West Virginia [Mr. KILGORE] for himself and the Senator from Vermont [Mr. AIKEN], to amend the Second Decontrol Act of 1947. The bill was referred to the Committee on Banking and Currency, and by the chairman of that committee referred to a subcommittee of which I was chairman. On examining the bill I think we found that there was more in it than appeared in the words as quickly read. It appeared that it was a grant of power for the allocation of grain for any purpose, rather than simply for the allocation of grain for distilling or brewing.

Furthermore, we found that there was a very great divergence of opinion among those in the distilling industry with regard to the bill, which made it seem completely necessary to have full hearings on the bill. Since the act which it would replace expires at the end of this month, there was evidently going to be no time to hold the necessary hearings, and have the measure passed through the Senate and the House and sent to the President. That would have been particularly unfortunate, because should it turn out to be the intention of the Congress to extend the powers of allocation, there would very evidently have been an interregnum between the expiring act and the new act during which the purposes of the new act would have been defeated.

Furthermore, a suggestion came to the chairman of the subcommittee from the junior Senator from Kentucky [Mr. COOPER] asking particularly that we be sure of having time enough for hearings on the bill. The junior Senator from Kentucky has had a great deal of experience with this matter because the subject of allocation had previously been referred to the Committee on the Judiciary, and he had had the primary responsibility for handling the subject of grain allocation.

In view of all this it seemed wise to the subcommittee to recommend an amendment and the subcommittee so reported to the full Banking and Currency Committee, and the Banking and Currency Committee has reported to the Senate the amendment which I shall read, which is an amendment in the way of substitution. The amendment is as follows:

That section 4 (b) of the joint resolution entitled "Joint resolution to aid in the stabilization of commodity prices, to aid in further stabilizing the economy of the United States, and for other purposes," approved December 30, 1947 (Public Law 395, 80th Cong.), is amended by striking out "January 31, 1948" and inserting in lieu thereof "February 29, 1948."

The entire purpose of the amendment is to give time for proper hearings on a subject on which hearings must be held if we are to handle the legislation with knowledge and understanding of the situations involved in it.

I wish to state two things quite clearly. The first is that the motion for continuing the present existing authority for allocation for another month was not made by the Department of Agriculture or by any part of the administration. It had its genesis in the subcommittee of the Committee on Banking and Currency. It is solely our responsibility.

Mr. BARKLEY. Mr. President, will the Senator yield?

Mr. FLANDERS. I yield.

Mr. BARKLEY. When the Senator first rose he said something about reporting the Kilgore bill. I did not understand that he was reporting the bill, but that he was reporting on it. Is that correct?

Mr. FLANDERS. We are reporting the bill amended as I indicated; and the amendment is in the nature of a substitute.

Mr. BARKLEY. I am a little confused as to the legislation on which it is proposed to hold hearings. I assumed that the motion was to take up the bill extending the time until the 29th of February. The time will expire on the 31st of January. Is it on the Kilgore bill or similar legislation that hearings are to be held?

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. FLANDERS. I yield.

Mr. WHERRY. My understanding is that it is proposed that the bill as reported is to be amended by an amendment in the nature of a substitute.

Mr. FLANDERS. That is correct.

Mr. BARKLEY. All the bill does is to extend the time from January 31 to February 29.

Mr. FLANDERS. That is all it does.

Mr. BARKLEY. That, of course, is different from the Kilgore bill.

Mr. FLANDERS. It is my idea—and I will check with the chairman of the Committee on Banking and Currency—that the hearings to be held on this subject will be of such a nature as to guide our conclusions on the subject matter of the original Kilgore bill.

Mr. BARKLEY. As I understand, the Senator is asking that the date be extended in order to give the committee time to hold hearings on the general subject.

Mr. FLANDERS. That is correct.

Mr. BARKLEY. And to obtain all the facts upon the subject. A week or so ago I urged upon the Senator that the facts

could not be obtained by hearings scheduled originally for last Tuesday, which hearings were postponed.

Mr. FLANDERS. That is correct.

Mr. BARKLEY. The pending measure merely changes the date of expiration of the present law. So if the extension is granted by the Congress, the committee will then fix another date upon which to hear all interests involved and determine whether there should be further legislation after the 29th of February, or a further extension, and if so, under what conditions the extension should be granted. Is that correct?

Mr. FLANDERS. That is correct. I should like to say also that it is the intention of the subcommittee to proceed with the utmost possible expedition so that we may have satisfactory hearings and reach proper conclusions as to further legislation long before the date stated in the amendment, the last day of February.

Mr. TOBEY. Mr. President, will the Senator yield?

Mr. FLANDERS. I yield.

Mr. TOBEY. I will say to the Senator from Kentucky that he could not have better expressed the intent of the committee and of the subcommittee as to the purpose in extending the time. The committee will use the additional time to prosecute as diligently and continuously as possible hearings on the entire subject.

Mr. BARKLEY. All Senators will understand, I am sure, the importance of settling this question. With month-to-month extensions, not only is the industry in a state of uncertainty, but the employees working for the industry do not know whether they are to have work for 30 days or whether they are to be cut off entirely. It is very necessary that the question be determined as soon as possible, so that this constant suspension in midair on the part of those who depend upon this industry for their work and the support of their families may be ended, and they may have some reasonable opportunity to know what to expect.

Mr. TOBEY. The Senator realizes the conditions within the committee.

Mr. BARKLEY. I appreciate them. I am expressing the hope that if this extension is granted the committee will, with all possible diligence, arrive at a final conclusion as to what should be done.

Mr. TOBEY. It is a great characteristic of Vermont to prosecute everything with diligence and with great effect. I pay tribute to the State of Vermont.

Mr. BARKLEY. Mr. President, in response to the remarks of the Senator from New Hampshire, we in Kentucky are in a position to pay tribute to the diligence of Vermont, because if it had not been for such diligence Kentucky would have been the fourteenth State instead of the fifteenth. Vermont got in a little ahead of us.

Mr. President, I ask unanimous consent to have printed in the body of the RECORD, in connection with the interrogatory which I propounded awhile ago to the Senator from Vermont, a letter which I have received from Miss Margaret Comley, of Louisville, Ky., who writes to me on the stationery of the Brown-Forman Distillers Corp., giving in some detail the situation with reference to unemployment in connection with this industry. I do not know what her interests are in the company, or whether she has any financial interest. She says that she has been in charge of the unemployment division in this institution. She writes a very earnest letter, and I think it would be worth while to have it printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

BROWN-FORMAN DISTILLERS CORP.,
Louisville, Ky., January 22, 1948.

Hon. ALBEN W. BARKLEY,
Senate Building, Washington, D. C.

HONORABLE BARKLEY: This letter is written directly to you in protest against Secretary Anderson's action insofar as the grain allotment in the distilling industry is concerned. I, a distillery worker, resent to the utmost the discriminatory legislation directed against the distilling industry, which, in my opinion, is quite un-American.

Immediately following the attack on Pearl Harbor the distilling industry without hesitation converted their industries over to the producing of alcohol for governmental purposes. This alcohol was used for ammunition, medicinal purposes, etc. We very graciously accepted the whisky holidays granted us. This procedure was following through until the war in both the European theater and Pacific theater was ended.

However, this country, although not still at war, is extending an unnecessary hardship on the distilling industry. When one considers that the distilling industry uses less than 1 percent of the total grain crop it is most unfair that we should be bled completely, thus causing a catastrophe where many, many thousands of American citizens are concerned and in actuality feathering the nest of our foreign distillers. Why should it be that we, due to the fact that grain allotment to us has been curtailed to an impossible quota to permit us to function, sit by and watch Europe use the grain allotted to them to manufacture spirits and in turn ship same to this country under the recently reduced import duty? This is undermining the American principles of free enterprise.

The revenue received from the whisky industry is an item in itself. When the production of this product ceases this revenue will also cease. The State and Federal Government will nave to be reimbursed for this loss, and therefore the taxpayer will have another burden placed upon him.

Without the proper amount of grain to manufacture whisky distillery plants must be closed down. This means unemployment. It would do well for Secretary Anderson and others responsible for the curtailment of grain to our industry to witness the behind the scenes. When a man bearing the responsibility of providing a livelihood for himself and his family is laid off, he is at a loss to provide rent, food, clothing, medical expenses, etc., for his family. I have been affiliated with the employee relations department. This meant coming in contact daily with the office workers and the laborers. It wasn't a very easy pill to swallow, Mr. BARKLEY, when a man's face bore the traces of worry because he was told he was no longer employed as we were unable to furnish work for him due to the grain shortage, and it was even worse to try to answer the question invariably put to you, and that was, "How much longer do you think it will be before we resume operations?" The distilling industry is a profession just as any other profession. Men are trained and skilled in the art of this work. When this knowledge has been taken away from him due to unemployment he is at a complete loss to find employment in another field. This applies most strenuously to a man who is up in age. This condition does not affect a handful of people, but very close to a million people in America. I fail to understand why a million American citizens should be forced to seek charity, while a foreign nation benefits. This is a draw-back on our charity organizations, which are wholly dependent on the balance of Americans supporting same, and who are trying earnestly to make ends meet with the ridiculously high prices involved on any item purchased these days. It can only be termed as a vicious circle.

It isn't a question as to whether we of the distilling industry are demanding that the hungry families of Europe not be fed. We Americans very freely exercise the privilege of sending clothing to those less fortunates, and we are more than willing to do our share toward helping to fed them. But, why should the feeding of these people be primarily at the expense of the distilling industry? I feel that a certain amount of grain should be alloted to them, that is, the countries in dire stress, but in my opinion, the amount allotted to them should be curtailed exclusively to the proper sources for the making of flour, bread, etc. But, definitely, when it is evidenced that any part of this grain allotment is being used for the making of spirits then that country should be cut off from their allotment entirely. This would mean that our allotment to those countries could be cut in half, and give us, the distilling industry, an opportunity to function, and not prove a fight for survival as it now is.

Congress will recall the days of prohibition. Why should we discontinue the making of a product that is pure and can be consumed without poisonous effects, thus permitting the bootlegging of a product made in basements, and filthy surroundings, the ingredients of which are injurious? Bootlegging was performed on a large scale during the prohibition days, and once the distillers are forced to close their doors, we again will be faced with this desperate problem.

Several days ago a commentator made the announcement, that the grain crop for this year is not quite as large, but almost equivalent to that of last year, but, in all probability we would be forced to ration grain for this country next year. Presently, here in Louisville, the price of a loaf of bread is 17 cents—an exorbitant price. This is truly an unnecessary condition. Now, how can a man who is unemployed combat this? And, why should we be forced to do so at the expense of taking care of our foreign countries?

I am, with the other million of Americans, asking, Mr. BARKLEY, that something be done to put a stop to this situation. As a member of the distilling industry, I ask that we be extended more leniency where the grain allotment is concerned. We are American citizens, and ask to be treated as such. By this I mean, permitting us to continue operations, and on a full-time scale. You, our representative, are our voice in this matter.

Respectfully,

MARGARET COMLEY.

Mr. AIKEN. Mr. President, will the Senator from Vermont yield?

Mr. FLANDERS. I yield.

Mr. AIKEN. I should like to inquire if it is the intention of the subcommittee to introduce a bill on which to hold hearings.

Mr. FLANDERS. It is my assumption that the bill would not be written until we were well along with the hearings.

Mr. AIKEN. Is it the intention to hold hearings and then write the bill?

Mr. FLANDERS. The hearings will be in anticipation of a bill.

Mr. AIKEN. I think that procedure is entirely satisfactory.

The ACTING PRESIDENT pro tempore. The question is on agreeing to

the committee amendment, which will be stated.

The CHIEF CLERK. It is proposed to strike out all after the enacting clause and insert the following:

That section 4 (b) of the joint resolution entitled "Joint resolution to aid in the stabilization of commodity prices, to aid in further stabilizing the economy of the United States, and for other purposes," approved December 30, 1947 (Public Law 395, 80th Cong.), is amended by striking out "January 31, 1948" and inserting in lieu thereof "February 29, 1948."

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment.

The amendment was agreed to.

The bill (S. 1842) was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to extend to February 29, 1948, the period during which the use of grain for the production of distilled spirits or neutral spirits for beverage purposes may be controlled under title III of the Second War Powers Act, 1942."

CIVIL SERVICE RETIREMENT BENEFITS

The Senate resumed the consideration of the bill (S. 637) to amend the Civil Service Retirement Act of May 29, 1930, as amended.

Mr. WHERRY. Mr. President, the bill the Senate is now to consider is the civil service retirement bill. The chairman of the Committee on Post Office and Civil Service, the Senator from North Dakota [Mr. LANGER], is present and will be in charge of the bill.

Mr. LANGER. Mr. President, I ask that the committee amendment be stated.

The amendment was to strike out all after the enacting clause and to insert the following:

That section 1 of the Civil Service Retirement Act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 1. (a) Any officer or employee to whom this act applies who shall have attained or shall hereafter attain the age of 60 years and have rendered at least 10 years of service computed as prescribed in section 5 of this act shall, upon separation from the service, be paid an annuity computed as provided in section 4 of this act.

"(b) Any officer or employee to whom this act applies who shall have attained the age of 55 years and have rendered at least 10 years of service computed as prescribed in section 5 may voluntarily retire and shall be paid an immediate life annuity computed as provided in section 4 of this act, reduced by one-half of 1 percent for each full month such officer or employee is under the age of 60 years.

"(c) Any officer or employee to whom this act applies, after having rendered at least 25 years of service computed as prescribed in section 5 of this act, (1) upon involuntary separation from the service not by removal for cause on charges of misconduct or delinquency, or (2) upon voluntary separation from the service if such officer or employee had accepted a position with a lower rate of basic salary, pay, or compensation after having been so involuntarily separated from a position with a higher rate of basic salary, pay, or compensation, and was receiving less than such higher rate at the time of his voluntary separation, shall be paid an immediate life annuity computed as provided in section 4 of this act reduced by one-fourth of 1 percent for each full month such officer or employee is under the age of 60 years."

SEC. 2. Section 2 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 2. (a) Except as provided in section 204 of the act of June 30, 1932 (47 Stat. 404), and section 3 of the act of July 13, 1937 (50 Stat. 512), any officer or employee to whom this act applies who shall have completed 10 years of service computed as provided in section 5 of this act shall, on the last day of the month in which he attains the age of 70 years, or completes 10 years of service if then beyond such age, be automatically separated from the service, and all salary, pay, or compensation shall cease from that date, and the head of each department, branch, or independent office of the Government concerned shall notify each such employee under his direction of the date of his separation from the service at least 60 days in advance thereof: *Provided,* That should the head of the department, branch, or independent office fail, through error, to give timely notification, the employee's separation from the service shall not be effected without his consent until the expiration of said 60-day period. Upon such separation, the officer or employee shall be eligible for retirement on annuity as provided in section 4 hereof.

"(b) No person who is receiving an annuity under the provisions of this act and who has reached the age of 60 years shall be eligible again to appointment to any appointive office, position, or employment under the Government of the United States or of the District of Columbia, unless the appointing authority determines that he is possessed of special qualifications: *Provided,* That no deductions for the retirement fund shall be withheld from the salary, pay, or compensation of such person, but there shall be deducted from his salary, pay, or compensation otherwise payable a sum equal to the retirement annuity allocable to the period of actual employment: *Provided further,* That the annuity in such case shall not be redetermined upon such person's subsequent separation from the service."

SEC. 3. (a) Paragraph (6) of section 3A of the act of May 29, 1930, as amended, is amended to read as follows:

"(6) (a) In the case of a Member of Congress who becomes separated from the service before he completes an aggregate of 6 years of service as a Member of Congress, and who is not retired for disability, the total amount deducted from his basic salary, pay, or compensation as a Member of Congress shall be returned to such Member of Congress. No such Member of Congress shall thereafter become eligible to receive an annuity as provided in this section unless the amounts so returned are redeposited with interest at 4 percent compounded on December 31 of each year, but interest shall not be required covering any period of separation from the service.

"(b) In case a Member of Congress shall die the total sums deducted from his basic salary, pay, or compensation or deposited by him, together with interest at 4 percent per annum to December 31, 1947, and at 3 percent per annum thereafter, compounded on December 31 of each year shall be paid, upon the establishment of a valid claim therefor, in the order of precedence prescribed in sction 12.

"(c) In case a former Member of Congress receiving an annuity under this section shall die without having received in annuities an amount equal to the amount of annuities purchasable with the total sums deducted from his basic salary, pay, or compensation or deposited by him, together with interest at 4 percent per annum to December 31, 1947, and at 3 percent per annum thereafter, compounded on December 31 of each year, the difference and/or any accrued annuity due shall be paid, upon the establishment of a valid claim therefor, in the order of precedence prescribed in section 12."

(b) Except as provided in this section the amendments made by this act shall not apply to any person subject to the provisions of section 3A of the act of May 29, 1930, as amended.

SEC. 4. Section 4 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 4. (a) The annuity of an officer or employee retired under this act shall be a life annuity, terminable upon the death of the annuitant and shall be an amount equal to the following: (1) 1½ percent of the average annual basic salary, pay, or compensation received by the officer or employee during any five consecutive years of allowable service at the option of the officer or employee multiplied by the years of service, or (2) 1 percent of the average annual basic salary, pay, or compensation received by the officer or employee during any five consecutive years of allowable service at the option of the officer or employee multiplied by the years of service, plus a sum equal to $25 for each year of such service: *Provided,* That if deposit or redeposit under section 7, 9, or 12 (b) hereof has not been made, the annuity for the period or periods of service covered by the deposit or redeposit shall be in an amount equal to 1 percent of the average annual basic salary, pay, or compensation received by the officer or employee during any five consecutive years of allowable service at the option of the officer or employee multiplied by the years of such service: *Provided further,* That in no case shall the annuity exceed an amount equal to 90 percent of the highest average annual basic salary, pay, or compensation received by the officer or employee during five consecutive years of allowable service.

"(b) Any officer or employee retiring under the provisions of this act may at the time of his retirement elect to receive in lieu of the life annuity described herein a reduced annuity payable to him during his life, and an annuity after his death payable to a survivor annuitant, duly designated in writing and filed with the Civil Service Commission at the time of his retirement, during the life of such survivor annuitant equal to 50 percent of such reduced annuity and upon the death of such survivor annuitant all payments shall cease and no further annuity shall be due and payable. The annuity hereunder payable to the officer or employee shall be 90 percent of the life annuity otherwise payable if the survivor annuitant is the same age or older than the annuitant, or is less than 5 years younger than the annuitant; 85 percent if the survivor annuitant is 5 but less than 10 years younger; 80 percent if the surivivor annuitant is 10 but less than 15 years younger; 75 percent if the survivor annuitant is 15 but less than 20 years younger; 70 percent if the survivor annuitant is 20 but less than 25 years younger; and 60 percent if the survivor annuitant is 25 or more years younger: *Provided,* That no person may be designated as survivor annuitant unless he shall be related to the employee within one of the following classes: husband or wife; child (including stepchild or legally adopted child but excluding grandchild); parent (including stepparent or adopted parent); brother or sister (including those of half or whole blood, stepbrother or sister).

"(c) For the purpose of this act all periods of service shall be computed in accordance with section 5 hereof, and the monthly annuity installment shall be fixed at the nearest dollar.

"(d) The term 'basic salary, pay, or compensation,' wherever used in this act, shall be so construed as to exclude from the operation of the act all bonuses, allowances, overtime pay, or salary, pay, or compensation given in addition to the base pay of the position as fixed by law or regulation."

SEC. 5. The first paragraph of section 5 of the act of May 29, 1930, as amended, is amended to read as follows:

"Subject to the provisions of section 9 hereof, the aggregate period of service which forms the basis for calculating the amount of any annuity provided in this act shall be computed from the date of original employment, whether as a classified or an unclassified officer or employee in the civil service of the United States, or in the service of the District of Columbia, including periods of service at different times and in one or more departments, branches, or independent offices, or the legislative branch of the Government, and also periods of service performed overseas under authority of the United States, and periods of honorable service in the Army, Navy, Marine Corps, or Coast Guard of the United States; in the case of an officer or employee, however, who is eligible for and receives retired pay on account of military or naval service, the period of service upon which such retired pay is based shall not be included, except that in the case of an officer or employee who is eligible for and receives retired pay on account of a service-connected disability incurred in combat with an enemy of the United States or resulting from an explosion of an instrument of war, the period of the military service shall be included: *Provided,* That an officer or employee must have served for a total period of not less than 5 years exclusive of such military or naval service before he shall be eligible for annuity under this act. Nothing in this act shall be construed as to affect in any manner an officer's or employee's right to retired pay, pension, or compensation in addition to the annuity herein provided."

SEC. 6. The first three paragraphs of section 6 of the act of May 29, 1930, as amended, are amended to read as follows:

"Any officer or employee to whom this act applies who shall have served for a total period of not less than 5 years computed as provided in section 5 of this act, and who, before meeting the age and service requirements for retirement under section 1 (a) hereof, becomes totally disabled for useful and efficient service in the grade or class of position occupied by the officer or employee, by reason of disease or injury not due to vicious habits, intemperance, or willful misconduct on the part of the officer or employee, shall upon his own application or upon the request or order of the head of the department, branch, or independent office concerned, be retired on an annuity computed in accordance with the provisions of section 4 hereof: *Provided,* That proof of freedom from vicious habits, intemperance, or willful misconduct for a period of more than 5 years next prior to becoming so disabled for useful and efficient service, shall not be required in any case. No officer or employee shall be retired under the provisions of this section unless examined by a medical officer of the United States, or a duly qualified physician or surgeon, or board of physicians or surgeons, designated by the Civil Service Commission for that purpose, and found to be disabled in the degree and in the manner specified herein. No claim shall be allowed under the provisions of this section unless the application for retirement shall have been executed prior to the applicant's separation from the service or within 6 months thereafter. The time limitation for execution of claims for retirement under the terms of this section may be waived by the Civil Service Commission in case of an officer or employee who at the date of separation from service or within 6 months thereafter is receiving hospital treatment, but the application in such case must be filed with the Civil Service Commission not later than 6 months after the termination of such hospitalization; in the case of any such person heretofore separated from service application may be filed within 6 months after the effective date of this act. Such time limitation may similarly be waived in the case of an officer or employee who at the date of separation from service or within 6 months thereafter is mentally incompetent, but the application in such case must be filed with the Civil Service Commission within 1 year from the date of restoration of such person to competency or the appointment of a fiduciary whichever is the earlier.

"Every annuitant retired under the provisions of this section unless the disability for which retired be permanent in character, shall at the expiration of 1 year from the date of such retirement and annually thereafter, until reaching age 60, be examined under the direction of the Civil Service Commission by a medical officer of the United States, or a duly qualified physician or surgeon, or board of physicians or surgeons designated by the Civil Service Commission for that purpose, in order to ascertain the nature and degree of the annuitant's disability, if any. If an annuitant shall recover before reaching age 60 and be restored to an earning capacity which would permit him to be appointed to some appropriate position fairly comparable in compensation to the position occupied at the time of retirement, payment of the annuity shall be continued temporarily to afford the annuitant opportunity to seek such available position, but not in any case exceeding 1 year from the date of the medical examination showing such recovery. Should the annuitant fail to appear for examination as required under this section, payment of the annuity shall be suspended until continuance of the disability shall have been satisfactorily established. The Civil Service Commission may order or direct at any time such medical or other examination as it shall deem necessary to determine the facts relative to the nature and degree of disability of any officer or employee retired on an annuity under this section.

"If a recovered disability annuitant whose annuity is discontinued subsequent to June 30, 1945, shall fail to obtain reemployment in any position included in the provisions of this act, he shall be considered as having been involuntarily separated from the service within the meaning of section 7 (a) of this act as of the date he was retired for disability and shall, after the discontinuance of the disability annuity, be entitled to a deferred annuity in accordance with the provisions of such section."

SEC. 7. Section 7 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 7. (a) Should any officer or employee to whom this act applies, after having served a total of 5 years computed as prescribed in section 5 of this act and before becoming eligible for retirement on annuity under section 1 (a) become involuntarily separated not by removal for cause on charges of misconduct or delinquency, such officer or employee shall be paid as he may elect, (A) a deferred annuity beginning at the age of 62 years computed as provided in section 4 of this act, or (B) the total amount credited to his individual account plus a reduced deferred annuity beginning at the age of 62 years computed as provided in section 4 of this act.

"(b) Should any officer or employee to whom this act applies, other than an officer or employee described in subsection (a), after having served a total of 10 years computed as prescribed in section 5 of this act and before becoming eligible for retirement on annuity under section 1 (a), become separated from the service, such officer or employee shall be paid as he may elect, (A) a deferred annuity beginning at the age of 65 years computed as provided in section 4 of this act, or (B) the total amount credited to his individual account plus a reduced deferred annuity beginning at the age of 65 years computed as provided in section 4 of this act.

"(c) No officer or employee who receives a return of deductions under this section shall thereafter receive full credit for the period of service covered by the refund unless he shall be reemployed in a position within the purview of this act and redeposit the amount so returned."

SEC. 8. Section 8 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 8. In the case of any officer or employee who before the effective date of this act shall have been retired on annuity under the provisions of the act of May 22, 1920, as amended, or section 8 (a) of the act of June 16, 1933, the annuity shall be increased, effective on the first day of the fourth month following the month in which this act is enacted by 25 percent or $300, whichever is the lesser: *Provided,* That each such annuitant may, prior to the effective date herein prescribed, elect to retain his present annuity, in lieu of the increased annuity provided by this section, and name his wife to receive upon his death one-half of his present annuity during the remainder of her life and upon her death no further annuity shall be due or payable.

"In case any officer or employee shall have been separated subsequent to January 23, 1942, and prior to date of approval of this act and have acquired title to annuity under section 7 of the act of May 29, 1930, as amended, beginning after such date of approval, such annuity shall be computed in accordance with section 4 of this act, but any reduction applicable thereto shall be determined as if this act had not been enacted: *Provided,* That any such officer or employee may elect to forfeit his right to such annuity and elect in lieu thereof to receive the benefits provided by section 7 of this act."

SEC. 9. Section 9 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 9. Each officer or employee within the purview of this act may deposit to the credit of the 'civil-service retirement and disability fund' a sum equal to 2½ percent of his basic salary, pay, or compensation received for services rendered after July 31, 1920, and prior to July 1, 1926; 3½ percent of the basic salary, pay, or compensation for services rendered from and after July 1, 1926, and prior to July 1, 1942; 5 percent of such basic pay, salary, or compensation for services rendered from and after July 1, 1942, and prior to the first day of the first pay period in 1948, and also 6 percent thereafter, covering service during which no deductions were withheld for deposit in the said fund. Each such officer or employee may elect to make such deposits in installments during the continuance of his service in such amounts and under such conditions as may be determined in each instance by the Civil Service Commission. The amount so deposited shall be credited to the individual account of the officer or employee in the said fund. Upon making such deposit, the officer or employee shall be entitled to full credit for the period or periods of service involved: *Provided,* That no deposit shall be required for any service rendered prior to August 1, 1920, or for periods of honorable service in the Army, Navy, Marine Corps, or Coast Guard of the United States."

SEC. 10. The first two paragraphs of section 10 of the act of May 29, 1930, as amended, are amended to read as follows:

"Beginning as of July 1, 1942, there shall be deducted and withheld from the basic salary, pay, or compensation of each officer or employee to whom this act applies a sum equal to 5 percent of such officer's or employee's basic salary, pay, or compensation: *Provided,* That from and after the first day of the first pay period in 1948, there shall be deducted and withheld from the basic salary, pay, or compensation of each officer or employee to whom this act applies a sum equal to 6 percent of such officer's or employee's basic salary, pay, or compensation.

The amounts so deducted and withheld from the basic salary, pay, or compensation of each officer or employee shall, in accordance with such procedure as may be prescribed by the Comptroller General of the United States, be deposited in the Treasury of the United States to the credit of the 'civil-service retirement and disability fund' created by the act of May 22, 1920, and said fund is hereby appropriated for the payment of annuities, refunds, and allowances as provided in this act.

"Any officer or employee may at his option and under such regulations as may be prescribed by the Civil Service Commission deposit additional sums in multiples of $25 but not to exceed 10 percent of his annual basic salary, pay, or compensation, for service rendered since August 1, 1920, which amount together with interest thereon at 3 percent per annum compounded as of December 31 of each year, shall, at the date of his retirement, be available to purchase, as he shall elect and in accordance with such rules and regulations as may be prescribed by the Civil Service Commission, an annuity in addition to the annuity provided by this act. The life annuity shall consist of $7 for each $100 in case the officer or employee has not reached age 60; $8 if he has reached age 60 but not age 65; $9 if he has reached age 65 but not age 70; and $10 if he has reached age 70. In the event of death or separation from the service of such officer or employee before becoming eligible for retirement on annuity, the total amount so deposited with interest at 3 percent per annum to date of death or separation compounded on December 31 of each year shall be refunded in accordance with the provisions of section 12 of this act."

SEC. 11. Section 12 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 12. (a) Under such regulations as may be prescribed by the Civil Service Commission the amounts deducted and withheld from the basic salary, pay, or compensation of each officer or employee for credit to the 'civil-service retirement and disability fund' created by the act of May 22, 1920, covering service from and after August 1, 1920, shall be credited to an individual account of such officer or employee.

"(b) (1) In the case of any officer or employee to whom this act applies who shall become involuntarily separated not by removal for cause on charges of misconduct or delinquency, before he shall have completed an aggregate of 5 years of service computed in accordance with section 5 of this act, the amounts credited to his individual account together with interest at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter to date of separation shall be returned to such officer or employee.

"(2) In the case of any officer or employee to whom this act applies who shall be transferred to a position not within the purview of this act, or who shall become absolutely separated from the service (other than by involuntary separation not for cause on charges of misconduct or delinquency) before he shall have completed an aggregate of 10 years of service computed in accordance with section 5 of this act, the amounts credited to his individual account shall be returned to such officer or employee.

"(3) All amounts returned to an officer or employee under this subsection must, upon reinstatement, retransfer, or reappointment to a position within the purview of this act, be redeposited by such officer or employee before he may receive full credit for the service covered by the refund.

"(c) (1) In case any officer or employee to whom this act applies shall die after having rendered at least 5 years of civilian service computed as prescribed in section 5 of this act and is survived by a widow, such widow shall be paid an annuity beginning the first day of the month following the death of the officer or employee or following the widow's attainment of age 60, whichever is the later, equal to one-half the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee: *Provided,* That such payments shall cease upon death or remarriage of the widow.

"(2) In case any officer or employee to whom this act applies shall die after having rendered at least 5 years of civilian service computed as prescribed in section 5 of this act and is survived by a widow and a surviving child or children, such widow shall be paid an immediate annuity terminable upon death, remarriage, or upon termination of payments to the last surviving child, equal to one-half the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee. There shall also be paid to or on behalf of each such child an immediate annuity equal to one-fourth the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee, but not to exceed $900 divided by the number of such children or $360, whichever is lesser. Upon the death of such widow, the annuity of such child or children shall be recomputed and paid as provided in section 12 (c) (3) hereof.

"(3) In case any officer or employee to whom this act applies shall die after having rendered at least 5 years of civilian service computed as prescribed in section 5 of this act and leaves no surviving widow but leaves a surviving child or children, there shall be paid to or on behalf of each such child an immediate annuity equal to one-half the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee, but not to exceed $1,200 divided by the number of such children or $480, whichever is lesser.

"(4) The annuity payable to a child under this subsection shall be terminable upon (A) his attaining the age of 18 years, (B) his marriage, or (C) his death, whichever first occurs, except that if such child is incapable of self-support by reason of mental or physical disability his annuity shall be terminable only upon death, marriage, or recovery from such disability. In any case in which the annuity of a child, under this subsection, is terminated, the annuities of any other child or children, based upon the service of the same officer or employee, shall be recomputed and paid as though the child whose annuity was so terminated had not survived such officer or employee.

"(d) As used in this section—

"(1) The term 'widow' means a surviving wife of an individual, who either (A) shall have been married to such individual for at least 5 years immediately preceding his death, or (B) is the mother of issue by such marriage.

"(2) The term 'child' means an unmarried child under the age of 18 or an unmarried child who because of physical or mental disability is incapable of self-support, a dependent stepchild, or an adopted child.

"(3) Questions of dependency and disability arising under this section shall be determined by the Civil Service Commission and its decisions with respect to such matters shall be final and conclusive and shall not be subject to review. The Commission may order or direct at any time such medical or other examinations as it shall deem necessary to determine the facts relative to the nature and degree of disability of any annuitant or applicant for annuity under this section, and may suspend or deny any such annuity for failure to submit to any such examination.

"(e) In case an officer or employee to whom this act applies shall die (1) before having rendered 5 years of civilian service computed as prescribed in section 5 of this act or without a survivor or survivors entitled to annuity benefits provided by section 12 (c) hereof the total amount of deductions credited to his individual account with interest thereon at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter compounded on December 31 of each year to date of death or (2) leaving a survivor or survivors entitled to such annuity benefits the total amount of deductions credited to his individual account without interest, shall be paid upon the establishment of a valid claim therefor in the following order of precedence:

"First, to the beneficiary or beneficiaries designated in writing by such officer or employee and recorded with the Civil Service Commission;

"Second, if there be no such beneficiary, to the duly appointed executor or administrator of the estate of such officer or employee;

"Third, if there be no such beneficiary or executor or administrator payment may be made, after the expiration of 30 days from the date of the death of the officer or employee, to such person or persons as may appear in the judgment of the Civil Service Commission to be legally entitled thereto, and such payment shall be a bar to recovery by any other person.

"(f) In case a retired employee who has not elected a joint and survivorship annuity as provided in section 4 (b) of this act shall die without having received in annuities an amount equal to the total amount credited to his individual account with interest thereon at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter compounded on December 31 of each year to date of retirement, the difference and/or any accrued annuity due shall be paid upon the establishment of a valid claim therefor, in the following order of precedence:

"First, to the beneficiary or beneficiaries designated in writing by such annuitant and recorded with the Civil Service Commission;

"Second, if there be no such beneficiary, to the duly appointed executor or administrator of the estate of such annuitant;

"Third, if there be no such beneficiary, or executor or administrator, payment may be made, after the expiration of 30 days from the date of the death of the annuitant, to such person or persons as may appear in the judgment of the Civil Service Commission to be legally entitled thereto, and such payment shall be a bar to recovery by any other person.

"(g) Where any payment under this act is to be made to a minor, or to a person mentally incompetent or under other legal disability adjudged by a court of competent jurisdiction, such payment may be made to the person who is constituted guardian or other fiduciary by the law of the State of residence of such claimant or is otherwise legally vested with the care of the claimant or his estate: *Provided,* That where no guardian or other fiduciary of the person under legal disability has been appointed under the laws of the State of residence of the claimant, the Civil Service Commission shall determine the person who is otherwise legally vested with the care of the claimant or his estate.

"(h) In case a former employee entitled to the return of the amount credited to his individual account shall become legally incompetent, the total amount due may be paid to a duly appointed guardian or committee of such former employee. If the amount of refund due such former employee does not exceed $1,000, and if there has been no demand upon the Civil Service Commission by a duly appointed guardian or committee, payment may be made, after the expiration of 30 days from date of separation from the service, to such person or persons, in the discretion of the Commission, who may have the care and custody of such former employee, and such payment shall be a bar to recover by any other person.

"(i) Each employee or annuitant to whom this act applies shall, under regulations prescribed by the Civil Service Commission, designate a beneficiary or beneficiaries to whom shall be paid, upon the death of the employee or annuitant any sum remaining to his credit (including any accrued annuity) under the provisions of this act."

SEC. 12. The first paragraph of section 13 of the act of May 29, 1930, as amended, is amended to read as follows:

"Annuities granted under the terms of this act shall accrue monthly and shall be due and payable in monthly installments on the first business day of the month following the month or other period for which the annuity shall have accrued. Payment of all annuities, refunds, and allowances granted hereunder shall be made by checks drawn and issued by the Treasury Department in such form and manner and with such safeguards as shall be prescribed by the Civil Service Commission in accordance with the laws, rules, and regulations governing accounting that may be found applicable to such payments."

SEC. 13. The third paragraph of section 13 of the act of May 29, 1930, as amended, is amended to read as follows:

"An annuity granted for retirement under the provisions of section 1 or 2 of this act shall commence the 1st day of the month following the date of separation from the service, or on the 1st day of the month following the month in which salary shall cease provided the employee meets the age and service requirements for retirement at that time, and shall continue during the life of the annuitant. An annuity granted under the provisions of section 6 or 7 hereof shall be subject to the limitations specified in said sections."

SEC. 14. Section 14 of the act of May 29, 1930, as amended, is hereby repealed.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the committee amendment.

Mr. LANGER. Mr. President, the principal purposes of the bill as amended by the committee are to provide benefits for dependent survivors of employees dying in service, to permit retired employees now on the annuity rolls to obtain certain increased annuity benefits or in lieu thereof to obtain certain benefits for their widows, to provide simpler and more equitable methods for computing annuities, to reduce service requirements for both age and optional retirement, to permit refunds upon separation prior to retirement without regard to length of service, to increase the rate of employees' contributions to the retirement fund, and to simplify administration of the Retirement Act.

I may say that shortly after the Senate committee reported this bill, by a vote of 12 to 1, the House passed House bill 1427, known as the Stevenson bill. We have had various conferences in an effort to agree upon certain amendments. The proposed Taft substitute which the Senator from Ohio submitted on Monday, and which is printed and on the desks of Senators, has been carefully considered by the staff of the Committee on Post Office and Civil Service.

Not only that, but all the members of the Post Office and Civil Service Committee whom I have been able to see in connection with it agree with me that substantially the substitute bill, which is known as the Taft bill, meets with the approval of the various members of the committee.

Mr. WILLIAMS. Mr. President, will the Senator yield?

The ACTING PRESIDENT pro tempore. Does the Senator from North Dakota yield to the Senator from Delaware?

Mr. LANGER. Not now, Mr. President. So far as I, as chairman of the committee, am concerned, I believe the Taft substitute bill in many respects is a more liberal bill and a better one than the original Senate bill 637 as introduced by my distinguished colleague [Mr. CHAVEZ] and myself.

I therefore move that all the language after the enacting clause be stricken out and that the Taft bill be substituted therefor.

Mr. TAFT. Mr. President, a point of order.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. TAFT. The difficulty in doing that is that I do not know whether amendments to the substitute bill would be in order.

The ACTING PRESIDENT pro tempore. The Chair has been informed that such amendments would be in order. The committee substitute is to be considered as original text and an amendment thereto subject to amendment in one degree.

Mr. LANGER. I call the attention of the Senate particularly to this fact, that Senate bill 637——

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. LANGER. Not at this time.

Mr. WILLIAMS. A point of order, Mr. President.

The ACTING PRESIDENT pro tempore. The Senator will state it.

Mr. WILLIAMS. I am trying to get back to the subject of the Taft bill as a substitute. Has that bill been agreed to?

The ACTING PRESIDENT pro tempore. The Senator's question is, Has the so-called Taft amendment been agreed to by the Senate?

Mr. WILLIAMS. That is correct.

The ACTING PRESIDENT pro tempore. The answer is that it has not been.

Mr. LANGER. I wish particularly to call the attention of the Senate to the fact that in the House no provision was made for children of deceased employees, while in the Taft substitute that matter is taken care of. Another very desirable feature is the fact that the age at which a widow may become eligible has been reduced from 60 years to 50 years.

I now yield to my distinguished colleague from New Mexico [Mr. CHAVEZ], and I also yield the floor.

Mr. CHAVEZ. The committee has been working on Senate bill 637 many months. Extended hearings were held, and the committee came to the conclusion that a retirement bill was in order and that the matter had too long been delayed. The Senator from Ohio [Mr. TAFT] has submitted a substitute. I have studied the substitute very carefully, and have come to the conclusion that notwithstanding the changes made by the Taft substitute, the main purposes of Senate bill 637, as originally introduced by the Senator from North Dakota [Mr. LANGER] and myself are carried out in the Taft measure. The point I should like to make is that a retirement bill should be passed, and that the Taft substitute carries out practically everything that was included in the Langer-Chavez bill.

Mr. TAFT. Mr. President, will the Senator yield?

Mr. CHAVEZ. I yield.

Mr. TAFT. I wish to explain how I happened to become connected with this matter.

Mr. CHAVEZ. If the Senator will permit, let me say that in my opinion the substitute bill changes the Langer-Chavez bill very little, in such unimportant respects that the big proposition of passing a retirement bill should be carried out even if we have to pass the Taft substitute, which I am perfectly willing to do. I hope the Senate will realize that the most important thing to be considered now is whether a retirement bill shall be passed at this time. The committee felt that it should. The Taft substitute, as I stated before, which the Senator from Ohio will explain, is entirely satisfactory to the majority of the committee.

Mr. TAFT. Mr. President, will the Senator yield?

Mr. CHAVEZ. I yield. As a matter of fact, I yield the floor.

Mr. TAFT. Mr. President, this has nothing particularly to do with the bill under discussion, but I have been attempting at the last session and at this to try to obtain some reconciliation of differing views. There is on the calendar, as the Senator knows, the House bill, the so-called Stevenson bill, which in some respects is different from the Langer-Chavez bill. In working it over we took some sections of one bill and some sections of the other and endeavored to reconcile differences and to fill some of the loopholes that existed. So that this substitute is not particularly a bill of mine; it is really the Langer-Chavez-Stevenson bill. I do not wish to maintain that there are any important changes; it is simply an attempt to reconcile differences in existing views.

Mr. CHAVEZ. I am sure the Senator from Ohio is entirely correct. I have stated heretofore and will state again that it is still the Langer-Chavez bill with some amendments submitted by the Senator from Ohio in the way of a substitute which would endeavor to compromise the views on the House side and the views on the Senate side. The main purpose is to try to pass a retirement bill.

The ACTING PRESIDENT pro tempore. Without objection, the amendment in the nature of a substitute offered by the Senator from North Dakota [Mr. LANGER] will be printed in full in the RECORD without reading.

The amendment was to strike out all after the enacting clause and insert in lieu thereof the following:

That section 2 of the Civil Service Retirement Act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 2. (a) Except as provided in section 204 of the act of June 30, 1932 (47 Stat. 404),

and section 3 of the act of July 13, 1937 (50 Stat. 512), any officer or employee to whom this act applies who shall have completed 10 years of service computed as provided in section 5 of this act shall, on the last day of the month in which he attains the age of 70 years, or completes 10 years of service if the beyond such age, be automatically separated from the service, and all salary, pay, or compensation shall cease from that date, and the head of each department, branch, or independent office of the Government concerned shall notify each such employee under his direction of the date of his separation from the service at least 60 days in advance thereof: *Provided,* That should the head of the department, branch, or independent office fail, through error, to give timely notification, the employee's separation from the service shall not be effected without his consent until the expiration of said 60-day period. Upon such separation, the officer or employee shall be eligible for retirement on annuity as provided in section 4 hereof.

"(b) No person who is receiving an annuity under the provisions of this act and who has reached the age of 60 years shall be eligible again to appointment to any appointive office, position, or employment unde the Government of the United States or of the District of Columbia, unless the appointing authority determines that he is possessed of special qualifications: *Provided,* That no deductions for the retirement fund shall be withheld from the salary, pay, or compensation of such person, but there shall be deducted from his salary, pay, or compensation otherwise payable a sum equal to the retirement annuity allocable to the period of actual employment: *Provided further,* That the annuity in such case shall not be redetermined upon such person's subsequent separation from the service."

SEC. 2. Section 4 of the act of May 9, 1930, as amended, is amended to read as follows:

"SEC. 4. (a) The annuity of an officer or employee retired under this act shall be a life annuity, terminable upon the death of the annuitant and shall be an amount equal to the following: (1) 1½ percent of the average annual basic salary, pay, or compensation received by the officer or employee during any five consecutive years of allowable service at the option of the officer or employee multiplied by the years of service not exceeding 35 years, or (2) 1 percent of the average annual basic salary, pay, or compensation received by the officer or employee during any five consecutive years of allowable service at the option of the officer or employee multiplied by the years of service not exceeding 35 years, plus a sum equal to $25 for each year of such service but not exceeding 35 years: *Provided,* That in no case shall the annuity exceed an amount equal to 80 percent of the highest average annual basic salary, pay, or compensation received by the officer or employee during five consecutive years of allowable service.

"(b) Any officer or employee, if a husband, retiring under the provisions of section 1, 2, or 6 of this act may at the time of his retirement elect to receive in lieu of the life annuity described herein a reduced annuity and an annuity after his death payable to his surviving widow equal to 50 percent of such life annuity. The annuity of the officer or employee making such election shall be equal to 90 percent of such life annuity, reduced by three-fourths of 1 percent of such life annuity for each full year, if any, his wife is under the age of 60 at the date of such election; but shall in no case be less than 75 percent of such life annuity. The annuity of such widow shall begin on the first day of the month in which the death of the husband occurs or the first day of the month following the widow's attainment of age 50, whichever is the later, and shall terminate upon her death or remarriage.

"(c) For the purpose of this act all periods of service shall be computed in accordance with section 5 hereof, and the monthly annuity installment shall be fixed at the nearest dollar.

"(d) The term 'basic salary, pay, or compensation', wherever used in this act, shall be so construed as to exclude from the operation of the act all bonuses, allowances, overtime pay, or salary, pay, or compensation given in addition to the base pay of the position as fixed by law or regulation."

SEC. 3. The first paragraph of section 5 of the act of May 29, 1930, as amended, is amended to read as follows:

"Subject to the provisions of section 9 hereof, the aggregate period of service which forms the basis for calculating the amount of any annuity provided in this act shall be computed from the date of original employment, whether as a classified or an unclassified officer or employee in the civil service of the United States, or in the service of the District of Columbia, including periods of service at different times and in one or more departments, branches, or independent offices, or the legislative branch of the Government, and also periods of service performed overseas under authority of the United States and periods of honorable service in the Army, Navy, Marine Corps, or Coast Guard of the United States; in the case of an officer or employee, however, who is eligible for and receives retired pay on account of military or naval service, the period of service upon which such retired pay is based shall not be included, except that in the case of an officer or employee who is eligible for and receives retired pay on account of a service-connected disability incurred in combat with an enemy of the United States or resulting from an explosion of an instrument of war, the period of the military service shall be included: *Provided,* That an officer or employee must have served for a total period of not less than 5 years, exclusive of such military or naval service, before he shall be eligible for annuity under this act. Nothing in this act shall be construed as to affect in any manner an officer's or employee's right to retired pay, pension, or compensation in addition to the annuity herein provided."

SEC. 4. The first three paragraphs of section 6 of the act of May 29, 1930, as amended, are amended to read as follows:

"Any officer or employee to whom this act applies who shall have served for a total period of not less than 5 years computed as provided in section 5 of this act, and who, before becoming eligible for retirement under the conditions defined in the preceding section hereof, becomes totally disabled for useful and efficient service in the grade or class of position occupied by the officer or employee, by reason of disease or injury not due to vicious habits, intemperance, or willful misconduct on the part of the officer or employee, shall upon his own application or upon the request or order of the head of the department, branch, or independent office concerned, be retired on an annuity computed in accordance with the provisions of section 4 hereof: *Provided,* That proof of freedom from vicious habits, intemperance, or willful misconduct for a period of more than 5 years next prior to becoming so disabled for useful and efficient service, shall not be required in any case. No officer or employee shall be retired under the provisions of this section unless examined by a medical officer of the United States or a duly qualified physician or surgeon, or board of physicians or surgeons, designated by the Civil Service Commission for that purpose, and found to be disabled in the degree and in the manner specified herein. No claim shall be allowed under the provisions of this section unless the application for retirement shall have been executed prior to the applicant's separation from the service or within 6 months thereafter. The time limitation for execution of claims for retirement under the terms of this section may be waived by the Civil Service Commission in case of an officer or employee who at the date of separation from service or within 6 months thereafter is receiving hospital treatment but the application in such case must be filed with the Civil Service Commission not later than 6 months after the termination of such hospitalization; in the case of any such person heretofore separated from service application may be filed within 6 months after the effective date of this act. Such time limitation may similarly be waived in the case of an officer or employee who at the date of separation from service or within 6 months thereafter is mentally incompetent, but the application in such case must be filed with the Civil Service Commission within 1 year from the date of restoration of such person to competency or the appointment of a fiduciary whichever is the earlier.

"Every annuitant retired under the provisions of this section unless the disability for which retired be permanent in character, shall at the expiration of 1 year from the date of such retirement and annually thereafter, until reaching age 60, be examined under the direction of the Civil Service Commission by a medical officer of the United States, or a duly qualified physician or surgeon, or board of physicians or surgeons designated by the Civil Service Commission for that purpose, in order to ascertain the nature and degree of the annuitant's disability, if any. If an annuitant shall recover before reaching age 60 and be restored to an earning capacity which would permit him to be appointed to some appropriate position fairly comparable in compensation to the position occupied at the time of retirement, payment of the annuity shall be continued temporarily to afford the annuitant opportunity to seek such available position, but not in any case exceeding 1 year from the date of the medical examination showing such recovery. Should the annuitant fail to appear for examination as required under this section, payment of the annuity shall be suspended until continuance of the disability shall have been satisfactorily established. The Civil Service Commission may order or direct at any time such medical or other examination as it shall deem necessary to determine the facts relative to the nature and degree of disability of any officer or employee retired on an annuity under this section.

"If a recovered disability annuitant whose annuity is discontinued subsequent to June 30, 1945, shall fail to obtain reemployment in any position included in the provisions of this act, he shall be considered as having been separated from the service within the meaning of section 7 (a) of this act as of the date he was retired for disability and shall, after the discontinuance of the disability annuity, be entitled to a deferred annuity in accordance with the provisions of such section."

SEC. 5. Section 7 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 7. (a) Should any officer or employee to whom this act applies after having rendered 5 years of civilian service, computed as prescribed in section 5 of this act, and before becoming eligible for retirement under this act become separated from the service, such officer or employee shall be paid as he may elect, (A) a deferred annuity beginning at the age of 62 years, or the age at separation if beyond the age of 62 computed as provided in section 4 (a) of this act, or (B) the total amount credited to his individual account together with interest at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter compounded on December 31 of each year to date of separation.

"(b) All amounts returned to an officer or employee under this section must upon reinstatement, retransfer, or reappointment to a position within the purview of this act be redeposited, together with interest at 4 percent per annum to December 1, 1947, and 3 percent per annum thereafter, compounded on December 31 of each year, by such officer or employee before he may receive any credit for the service covered by the refund."

SEC. 6. Section 8 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 8. In the case of any officer or employee who before the effective date of this act shall have been retired on annuity under the provisions of the act of May 22, 1920, as amended, or section 8 (a) of the act of June 16, 1933, the annuity shall be increased, effective on the first day of the second month following the month in which this act is enacted by 25 percent or $300, whichever is the lesser: *Provided*, That each such annuitant may, prior to the effective date herein prescribed, elect to retain his or her present annuity, in lieu of the increased annuity provided by this section, and name his wife or her husband to receive upon his or her death one-half of his or her present annuity but not to exceed $600 per annum during the remainder of the life of such surviving husband or wife and upon the death of such survivor no further annuity shall be due or payable.

"In case any officer or employee shall have been separated subsequent to January 23, 1942, and prior to effective date of this act and have acquired title to annuity under section 7 of the act of May 29, 1930, as amended, beginning after such effective date, such annuity shall be computed as if this act had not been enacted: *Provided*, That any such officer or employee may elect to forfeit his right to such annuity and elect in lieu thereof to receive a refund as provided by section 7 of this act."

SEC. 7. Section 9 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 9. Each officer or employee within the purview of this act may deposit with interest at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter, compounded on December 31 of each year, to the credit of the 'civil-service retirement and disability fund' a sum equal to 2½ percent of his basic salary, pay, or compensation received for services rendered after July 31, 1920, and prior to July 1, 1926; 3½ percent of the basic salary, pay, or compensation for services rendered from and after July 1, 1926, and prior to July 1, 1942; 5 percent of such basic pay, salary, or compensation for services rendered from and after July 1, 1942, and prior to the first day of the first pay period which begins after June 30, 1948, and also 6 percent thereafter, covering service during which no deductions were withheld for deposit in the said fund. Each such officer or employee may elect to make such deposits in installments during the continuance of his service in such amounts and under such conditions as may be determined in each instance by the Civil Service Commission. The amount so deposited shall be credited to the individual account of the officer or employee in the said fund. Unless such deposit is made, no credit shall be allowed for the period or periods of service involved: *Provided*, That no deposit shall be required for any service rendered prior to August 1, 1920, or for periods of honorable service in the Army, Navy, Marine Corps, or Coast Guard of the United States."

SEC. 8. The first paragraph of section 10 of the act of May 29, 1930, as amended, is amended to read as follows:

"Beginning as of July 1, 1942, there shall be deducted and withheld from the basic salary, pay, or compensation of each officer or employee to whom this act applies a sum equal to 5 percent of such officer's or employee's basic salary, pay, or compensation: *Provided*, That from and after the first day of the first pay period which begins after June 30, 1948, there shall be deducted and withheld from the basic salary, pay, or compensation of each officer or employee to whom this act applies a sum equal to 6 percent of such officer's or employee's basic salary, pay, or compensation. The amounts so deducted and withheld from the basic salary, pay, or compensation of each officer or employee shall, in accordance with such procedure as may be prescribed by the Comptroller General of the United States, be deposited in the Treasury of the United States to the credit of the 'civil-service retirement and disability fund' created by the act of May 22, 1920, and said fund is hereby appropriated for the payment of annuities, refunds, and allowances as provided in this act."

SEC. 9. Section 12 of the act of May 29, 1930, as amended, is amended to read as follows:

"SEC. 12. (a) Under such regulations as may be prescribed by the Civil Service Commission, the amounts deducted and withheld from the basic salary, pay, or compensation of each officer or employee for credit to the 'civil-service retirement and disability fund' created by the act of May 22, 1920, covering service from and after August 1, 1920, shall be credited to an individual account of such officer or employee.

"(b) (1) In the case of any officer or employee to whom this act applies who shall become absolutely separated from the service before he shall have completed an aggregate of 5 years of service computed as prescribed in section 5 of this act, or who shall be transferred to a position not within the purview of this act, the amount credited to his individual account together with interest at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter compounded on December 31 of each year to date of separation shall be returned to such officer or employee: *Provided*, That in computing interest under this subsection, a fractional part of a month in the total service covered by the refund shall be disregarded, and no interest shall be allowed in any case unless the service covered by the refund aggregates more than 1 year.

"(2) All amounts returned to an officer or employee under this subsection must, upon reinstatement, retransfer, or reappointment to a position within the purview of this act, be redeposited by such officer or employee before he may receive any credit for the service covered by the refund.

"(c) (1) In case any officer or employee to whom this act applies shall die after having rendered at least 5 years of civilian service computed as prescribed in section 5 of this act and is survived by a widow, such widow shall be paid an annuity beginning the first day of the month following the death of the officer or employee or following the widow's attainment of age 50, whichever is the later, equal to one-half the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee: *Provided*, That such payments shall cease upon death or remarriage of the widow.

"(2) In case any officer or employee to whom this act applies shall die after having rendered at least 5 years of civilian service computed as prescribed in section 5 of this act and is survived by a widow and a surviving child or children, such widow shall be paid an immediate annuity terminable upon death or remarriage, equal to one-half the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee. There shall also be paid to or on behalf of each such child an immediate annuity equal to one-fourth the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee, but not to exceed $900 divided by the number of such children or $360, whichever is lesser. Upon the death of such widow, the annuity of such child or children shall be recomputed and paid as provided in section 12 (c) (3) hereof.

"(3) In case any officer or employee to whom this act applies shall die after having rendered at least 5 years of civilian service computed as prescribed in section 5 of this act and leaves no surviving widow but leaves a surviving child or children, there shall be paid to or on behalf of each such child an immediate annuity equal to one-half the amount of an annuity computed as provided in section 4 hereof with respect to such officer or employee, but not to exceed $1,200 divided by the number of such children or $480, whichever is lesser.

"(4) The annuity payable to a child under this subsection shall be terminable upon (A) his attaining the age of 18 years, (B) his marriage, or (C) his death, whichever first occurs, except that if such child is incapable of self-support by reason of mental or physical disability his annuity shall be terminable only upon death, marriage, or recovery from such disability. In any case in which the annuity of a child, under this subsection, is terminated, the annuities of any other child or children, based upon the service of the same officer or employee, shall be recomputed and paid as though the child whose annuity was so terminated had not survived such officer or employee.

"(5) Any surviving widow entitled to an annuity under this subsection may elect to waive the right to receive such annuity and to receive in lieu thereof a refund of amounts credited to the individual account of the officer or employee with interest thereon at the rate of 4 percent per annum to December 31, 1947, and 3 percent thereafter, compounded on December 31 of each year to the date of such officer's or employee's death. In any case in which a surviving widow elects to receive a refund under this paragraph, no annuity shall be payable to such widow or to any surviving child of the officer or employee under this subsection. This paragraph shall not be applicable in the case of the surviving widow of any officer or employee if such officer or employee shall have filed a notice in writing with the Civil Service Commission to the effect that he does not desire such paragraph to be applicable in his case.

"(d) As used in this section—

"(1) The term 'widow' means a surviving wife of an individual, who either (A) shall have been married to such individual for at least 5 years immediately preceding his death, or (B) is the mother of issue by such marriage.

"(2) The term 'child' means an unmarried child, including a dependent stepchild or an adopted child, under the age of 18, or an unmarried child who because of physical or mental disability is incapable of self-support, a dependent stepchild, or an adopted child.

"(3) Questions of dependency and disability arising under this section shall be determined by the Civil Service Commission and its decisions with respect to such matters shall be final and conclusive and shall not be subject to review. The Commission may order or direct at any time such medical or other examinations as it shall deem necessary to determine the facts relative to the nature and degree of disability of any annuitant or applicant for annuity under this section, and may suspend or deny any such annuity for failure to submit to any such examination.

"(e) In case (1) an officer or employee to whom this act applies shall die before having

rendered 5 years of civilian service computed as prescribed in section 5 of this act or without a survivor or survivors entitled to annuity benefits provided by section 12 (c) hereof the total amount of deductions credited to his individual account with interest thereon at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter compounded on December 31 of each year to date of death, or (2) the annuity of an annuitant under section 12 (c) shall terminate before he and any other persons who shall have received an annuity based upon the service of the officer or employee shall have received in annuities an aggregate amount equal to the amount to the credit of such employee's individual account as of the date of commencement of the annuity under section 12 (c) and no other person is entitled to an annuity based upon such service, the total amount of deductions remaining to the credit of the individual account of such officer or employee, with interest thereon at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter, compounded on December 31 of each year, to the date of commencement of such annuity, shall be paid upon the establishment of a valid claim therefor, in the following order of precedence:

"First, to the beneficiary or beneficiaries designated in writing by such officer or employee and recorded with the Civil Service Commission.

"Second, if there be no such beneficiary, to the duly appointed executor or administrator of the estate of such officer or employee.

"Third, if there be no such beneficiary or executor or administrator, payment may be made, after the expiration of 30 days from the date of the death of the officer or employee, to such person or persons as may appear in the judgment of the Civil Service Commission to be legally entitled thereto, and such payment shall be a bar to recovery by any other person.

"(f) In case a retired employee who has not elected a joint and survivorship annuity as provided in section 4 (b) of this act shall die without having received in annuities an amount equal to the total amount credited to his individual account with interest thereon at 4 percent per annum to December 31, 1947, and 3 percent per annum thereafter compounded on December 31 of each year to date of retirement, the difference and/or any accrued annuity due shall be paid upon the establishment of a valid claim therefor, in the following order of precedence:

"First, to the beneficiary or beneficiaries designated in writing by such annuitant and recorded with the Civil Service Commission.

"Second, if there be no such beneficiary, to the duly appointed executor or administrator of the estate of such annuitant.

"Third, if there be no such beneficiary, or executor or administrator, payment may be made, after the expiration of 30 days from the date of the death of the annuitant, to such person or persons as may appear in the judgment of the Civil Service Commission to be legally entitled thereto, and such payment shall be a bar to recovery by any other person.

"(g) Where any payment under this act is to be made to a minor, or to a person mentally incompetent or under other legal disability adjudged by a court of competent jurisdiction, such payment may be made to the person who is constituted guardian or other fiduciary by the law of the State of residence of such claimant or is otherwise legally vested with the care of the claimant or his estate: *Provided*, That where no guardian or other fiduciary of the person under legal disability has been appointed under the laws of the State of residence of the claimant, the Civil Service Commission shall determine the person who is otherwise legally vested with the care of the claimant or his estate.

"(h) In case a former employee entitled to the return of the amount credited to his individual account shall become legally incompetent, the total amount due may be paid to a duly appointed guardian or committee of such former employee. If the amount of refund due such former employee does not exceed $1,000, and if there has been no demand upon the Civil Service Commission by a duly appointed guardian or committee, payment may be made, after the expiration of 30 days from date of separation from the service, to such person or persons, in the discretion of the Commission, who may have the care and custody of such former employee, and such payment shall be a bar to recovery by any other person.

"(i) Each employee or annuitant to whom this act applies shall, under regulations prescribed by the Civil Service Commission, designate a beneficiary or beneficiaries to whom shall be paid, upon the death of the employee or annuitant any sum remaining to his credit (including any accrued annuity) under the provisions of this act."

SEC. 10. The first paragraph of section 13 of the act of May 29, 1930, as amended, is amended to read as follows:

"Annuities granted under the terms of this act shall accrue monthly and shall be due and payable in monthly installments on the first business day of the month following the month or other period for which the annuity shall have accrued. Payment of all annuities, refunds, and allowances granted hereunder shall be made by checks drawn and issued by the Treasury Department in such form and manner and with such safeguards as shall be prescribed by the Civil Service Commission in accordance with the laws, rules, and regulations governing accounting that may be found applicable to such payments."

SEC. 11. The third paragraph of section 13 of the act of May 29, 1930, as amended, is amended to read as follows:

"An annuity granted for retirement under the provisions of section 1 or 2 of this act shall commence the first day of the month following the date of separation from the service, or on the first day of the month following the month in which salary shall cease, provided the employee meets the age and service requirements for retirement at that time, and shall continue during the life of the annuitant. An annuity granted under the provisions of section 6 or 7 hereof shall be subject to the limitations specified in said sections."

SEC. 12. Section 14 of the act of May 29, 1930, as amended, is hereby repealed.

SEC. 13. Except insofar as amendments made by this act change rates of interest, such amendments shall not apply to any person subject to the provisions of section 3A of the act of May 29, 1930, as amended, and the rights and obligations of such person under such act shall continue as though this act had not been enacted.

Mr. McMAHON. I should like to address an inquiry to the chairman of the committee. At the last session a retirement bill was passed. As I understand, there is nothing in this substitute which in any way conflicts with the rights granted in connection with the Federal Bureau of Investigation at the last session?

Mr. LANGER. That is correct.

Mr. TAFT. I will say to the Senator from Connecticut that the provisions relating to the Federal Bureau of Investigation stand without amendment in this substitute bill.

Mr. McMAHON. I thank the Senator.

Mr. BYRD. Mr. President, I should like to ask how many retirement plans are in effect besides this bill. How many agencies of the Government have their own retirement plans?

Mr. LANGER. I do not know exactly, but the intention is to cover in this bill everyone we possibly can.

Mr. BYRD. Has not the committee any information as to how many agencies have their own retirement plans?

Mr. LANGER. No; it has not.

Mr. BYRD. There are quite a large number, are there not?

Mr. LANGER. Yes.

Mr. WILLIAMS. Mr. President, has the amendment been agreed to?

The ACTING PRESIDENT pro tempore. No; it has not.

The question is on agreeing to the amendment which has been offered in lieu of the committee amendment.

Mr. TAFT. Mr. President, I offer three amendments. I think I have the right to modify the substitute. These three amendments are on the desk of the Senators in mimeograph form and will be part of the substitute to be discussed.

The ACTING PRESIDENT pro tempore. The Chair wishes to determine whether the Senator from Ohio desires to have the amendments considered and acted upon en bloc or individually.

Mr. TAFT. I think I have a right to modify the amendment simply by requesting that it be thus modified. So I request that it be modified by the adoption of these three amendments. Then a motion to strike out will be in order.

Mr. BYRD. Mr. President, these are very important amendments. I happen to favor two of them, but I am opposed to one. I wish to enter my protest against having all three of them considered and acted upon at one time.

Mr. TAFT. Then, Mr. President, I modify my request, and I now ask that the substitute be modified by adopting the amendment to section 14 and the amendment on page 18, as to which I understand the Senator from Virginia has no objection.

Mr. BYRD. That is correct; I have no objection at all to them.

Mr. TAFT. And thereafter I shall move the other amendment, which then can be discussed.

Mr. BYRD. The amendment which the Senator from Virginia wishes to hear fully discussed is the one on page 11, in line 15.

Mr. TAFT. Yes. I shall reserve that at this time, and shall offer it later for action by the Senate.

Mr. BYRD. Very well.

The ACTING PRESIDENT pro tempore. The modifications proposed by the Senator from Ohio to his own amendment will be made.

The modifications are as follows:

On page 18, line 12, after "(2)", insert the following: "any separated officer or employee who is entiled to a deferred annuity as provided in section 7 hereof shall die before having established a valid claim for annuity, the total amount credited to his individual account with interest at 4 percent per annum

to December 31, 1947, or the date of separation, whichever is earlier, and 3 percent per annum thereafter, compounded on December 31 of each year, to date of death, or (3)."

On page 23, after line 3, add a new section as follows:

"SEC. 14. Section 3 (a) of the act of May 29, 1930, as amended is amended by adding at the end thereof the following:

" 'Notwithstanding any other provision of this act, any officer or employee in the legislative branch of the Government within the classes of officers or employees which were made eligible for the benefits of this act by the act of July 13, 1937, serving in such position on the effective date of this act, may give notice of his desire to come within the purview of this act at any time prior to July 1, 1948.' "

Mr. TAFT. Mr. President, I now offer to my amendment in the nature of a substitute the amendment which I send to the desk and ask to have stated.

The ACTING PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 11, line 15, it is proposed to strike out the word "may" and insert in lieu thereof "shall."

On page 12, beginning with the word "Unless", in line 10, strike out through the word "involved", in line 12, and insert in lieu thereof the following: "notwithstanding the failure of an officer or employee to make such deposit, credit shall be allowed for the service rendered, but the annuity of such employee shall be reduced by an amount equal to the amount of annuity such deposit would purchase if made, unless the officer or employee shall elect to eliminate such service entirely from credit under this act."

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Ohio to his amendment in the nature of a substitute.

Mr. TAFT. Mr. President, I should like to make a brief statement at this time as to the general purposes of the bill.

This bill revises the civil-service retirement system which covers most of the civil-service employees in various employments under the Federal Government. As the Senator from Virginia has pointed out, there are perhaps 12 other retirement plans applying to Federal employees. The State Department has a separate plan, the TVA has a separate plan, and so forth. It is unfortunate that this entire subject has not been subjected to more complete study and coordination.

Nevertheless, this particular proposal, covering the bulk of the employees of the Government, has been before the Senate for a year, now.

Mr. REVERCOMB. Mr. President, will the Senator yield at this point?

Mr. TAFT. I yield.

Mr. REVERCOMB. Is the Senator from Ohio addressing his remarks to the bill, as presented, or to the substitute which he is offering?

Mr. TAFT. I am addressing my remarks to the substitute. We are working now on the substitute which I have offered, but which is a combination of the House bill and the Senate bill. However, I am speaking now of the program as amended by the substitute.

Mr. WILLIAMS. Mr. President, will the Senator yield for a question?

Mr. TAFT. I yield.

Mr. WILLIAMS. Has any estimate been made of the prospective cost to the Government of the substitute bill?

Mr. TAFT. The last estimate which has been made is that it will cost approximately $42,000,000 a year, in addition to the present cost. However, if the Senator does not mind my doing so, I prefer first to make a statement as to the general nature of the bill, and what it does.

Mr. WILLIAMS. Will the Senator yield at this point for a further question?

Mr. TAFT. I yield.

Mr. WILLIAMS. I notice that the chairman of the committee has said that the substitute is a more liberal measure. I wonder whether the Senator from Ohio feels that this is a more expensive bill than Senate bill 637, or whether it is a cheaper bill.

Mr. TAFT. It is a cheaper bill; its cost will be approximately $42,000,000 less, according to the estimate of the actuaries.

Mr. WILLIAMS. Mr. President, will the Senator yield further?

Mr. TAFT. I yield.

Mr. WILLIAMS. In the committee report on Senate bill 637, which is the bill before us, the cost is estimated as follows:

It is estimated by the Civil Service Commission that the contributions from the employees plus the savings brought about through the economies cited above would almost totally finance the cost of S. 637, as amended. On the basis of maximum estimated expenditures and minimum estimated savings, the ultimate cost to the Government when the system reaches maturity, approximately 30 years hence, may be four or five million dollars per year; no immediate increase in appropriations is required.

I now understand from the Senator from Ohio that he has a bill which will be $60,000,000 cheaper than this bill, but still will cost us $40,000,000 a year more than the original bill. Is that correct?

Mr. TAFT. The statement I made was that after the present plan is amended by the bill as presented under the substitute plan, it will increase by $42,000,000 a year the annual pensions paid by the United States Government. It will be less expensive than the Langer bill.

Mr. WILLIAMS. It will be less expensive by $60,000,000, and yet it will cost us $42,000,000 more. I do not quite understand that.

Mr. TAFT. I have no defense to make for the various varying estimates submitted by different Government departments in the past, but the one upon which I am relying shows that the Stevenson bill, the House bill, would cost approximately $84,000,000 more than the present system, and the substitute would cost approximately $42,000,000 more than the present system.

Mr. WILLIAMS. Let me ask the Senator from Ohio when the estimate of $84,000,000 as to the House bill was made, and by whom.

Mr. TAFT. Under date of January 16, by a letter of which the Senator from Delaware has a copy, I am sure.

Mr. WILLIAMS. That is correct.

Mr. TAFT. It was addressed to the Honorable Harry B. Mitchell, President of the Civil Service Commission, by the Government actuaries.

Mr. WILLIAMS. As the Senator has said, I have received a copy of the letter. But the point I cannot quite understand is that I hold in my hand at this time a copy of another letter, under date of July 24, signed by Mr. Mitchell, President of the Civil Service Commission, in which he gave a report on the same bill, House bill 4127; and at that time he said the cost would be only $15,000,000. The report is signed by the same group of actuaries, and no amendments have been made to the bill thus far.

Mr. TAFT. Of course, I do not propose to reconcile different statements submitted by different Government officials at different times.

All I can say is what this letter shows. I ask consent that it be printed at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

JANUARY 16, 1948.

Hon. HARRY B. MITCHELL,
President, United States Civil Service Commission, Washington, D. C.

DEAR MR. MITCHELL: In accordance with the request of the Civil Service Commission, the Board of Actuaries, joining with Mr. John D. Phenix, actuary and statistician of the Senate Civil Service Committee, and Maurice S. Brown, actuary of the Civil Service Commission, has prepared a new valuation of the cost to the Government of the existing Civil Service Retirement and Disability Fund as of September 30, 1947, and the corresponding cost as it would be if the bill H. R. 4127, passed by the House of Representatives on July 21, 1947, became a law. The figures have been rushed and the results are submitted in this communication without delaying the submission for the preparation of a report. The work was done under the immediate supervision of Mr. Brown.

On August 29, 1947, you joined WILLIAM LANGER, chairman of the Senate Committee on Civil Service, in requesting data as to sex, years of service, age, and salary from all departments and agencies having members under the Civil Service Retirement Act. From some departments complete returns were secured, and from others, sample returns were submitted. The results gave a sample of better than 30 percent of the entire membership. For departments which submitted on the sampling basis, the results were adjusted to represent the total number of current employees as reported by such departments. The total membership thus obtained was 1,510,670 members on an annual compensation base of $4,438,862,859, and all figures of cost presented herein were predicated on this membership.

Records of annuitants are maintained by the Retirement Division of the Commission. Including an allowance for applications and the process of adjudication, the retired roll on September 30, 1947, was 120,684 persons drawing allowances at the rate of $109,760,951 per annum.

In calculating the costs under the two sets of retirement provisions, the Board has shown the contribution rates necessary to liquidate the accrued liability, that is, the liability on account of prior service, as the percentages of the total active pay roll, which represent interest at the valuation rate of 4 percent on the respective amounts of the accrued liabilities under the two plans. This procedure gives a lower percentage rate of

pay roll than does the one previously used by the Board with respect to prior service contributions under the existing law. However, it was deemed desirable to proceed in this manner in order not to include in the figures comparing the relative costs of the two groups of provisions, an allowance for the amortization of the accrued liability which might tend to overstate the true differences between the plans. The revised normal cost of the provisions under the existing law and the normal cost of the provisions under the proposed law as obtained from the present valuations are as follows:

TABLE 1.—*The normal cost of the various benefits allowable under the existing plan, expressed as percentages of pay roll, compared with the corresponding costs under H. R. 4127 as passed by the House of Representatives on July 21, 1947*

Benefit	Normal rates		Ratio of H. R. 4127 to existing plan
	Existing plan	H. R. 4127	
	Percent	*Percent*	*Percent*
Service	4.59	5.09	111
Disability	.75	.84	112
Discontinued service:			
Voluntary	.39	.38	97
Involuntary	.58	.82	141
Return of contributions on withdrawal without a retirement benefit and on death	1.14	1.08	95
Subtotal	7.45	8.21	110
Widows:			
Payments deferred to age 60	----	.47	----
Payments during period youngest child is under age 18	----	.09	----
Subtotal	----	.56	----
Total rates	7.45	8.77	118
Less rate payable by employees	5.00	6.00	120
Net rate payable by Government	2.45	.77	113

The Board then determined the total present value of the liabilities under the present plan and under the proposed act and the respective present values of the future normal contributions under the plans. Deducting the funds in hand and the present value of the future contributions from the total liability gives the accrued liability for each plan. The figures obtained from the valuation are shown on the following page.

TABLE 2.—*Comparative statement of assets and liabilities under the existing plan and of the corresponding assets and liabilities under H. R. 4127, as passed by the House of Representatives on July 21, 1947, prepared as of Sept. 30, 1947*

ASSETS (MILLIONS)

Item	Existing plan	H. R. 4127	Ratio of H. R. 4127 to existing plan
			Percent
Funds in hand	$2,707	$2,707	100
Service credit payments payable by members who wish to receive credit for past service	209	97	46
Present value of prospective contributions of employees	2,663	3,195	120
Present value of prospective contributions by Government:			
Normal	1,304	1,481	114
Accrued liability	2,866	4,616	161
Subtotal	4,170	6,097	146
Total assets	9,749	12,096	124

TABLE 2.—*Comparative statement of assets and liabilities under the existing plan and of the corresponding assets and liabilities under H. R. 4127, as passed by the House of Representatives on July 21, 1947, prepared as of Sept. 30, 1947*—Continued

LIABILITIES (MILLIONS)

Item	Existing plan	H. R. 4127	Ratio of H. R. 4127 to existing plan
			Percent
Value of voluntary deposits	6	6	100
Present value of annuities payable to retired annuitants as of the valuation date:			
Annuitants now on roll	963	1,187	123
Annuitants eligible for deferred annuities	369	437	118
Subtotal	1,332	1,624	122
Present value of prospective benefits payable to or on behalf of present active members:			
Retiring on account of age	6,011	7,221	120
Retiring on account of disability	804	868	108
Retiring on a discontinued service benefit:			
Voluntary separation	249	261	105
Involuntary separation	558	774	139
Withdrawing without a retirement benefit or dying	789	637	81
Subtotal	8,411	9,761	116
Present value of prospective benefits payable to widows of deceased members:			
Upon attainment of age 60 by widow	----	618	----
During period that youngest child is under age 18	----	87	----
Subtotal	----	705	----
Total liabilities	9,749	12,096	124

The normal cost figures combined with the accrued liability figures, as previously presented, may be expressed in terms of the annual appropriations needed to support the benefits, as shown in table 3:

TABLE 3.—*Annual contributions required to support the existing plan compared with corresponding contributions under H. R. 4127 as passed by the House of Representatives on July 21, 1947, prepared as of Sept. 30, 1947*

Contributions payable by—	Normal cost as—		Deficiency cost as—		Total cost as—	
	Percentage of pay roll	Annual amount as of Sept. 30, 1947 (millions)	Percentage of pay roll	Annual amount as of Sept. 30, 1947 (millions)	Percentage of pay roll	Annual amount as of Sept. 30, 1947 (millions)
EXISTING PLAN						
Total	7.45	$331	2.59	$115	10.04	$446
Employees	5.00	222	----	----	5.00	222
Government	2.45	109	2.59	115	5.04	224
H. R. 4127						
Total	8.77	389	4.17	185	12.94	574
Employees	6.00	266	----	----	6.00	266
Government	2.77	123	4.17	185	6.94	308
RATIO OF H. R. 4127 TO EXISTING PLAN	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*	*Percent*
Total	118	118	161	161	129	129
Employees	120	120	----	----	120	120
Government	113	113	161	161	138	138

We trust that the above figures and comments will give the committee such information as it needs in order to arrive at the relative difference in cost between the existing law and H. R. 4127 as passed by the House of Representatives on July 21, 1947.

Very truly yours,

GEORGE B. BUCK.
EDWARD B. FACKLER.
R. B. REACH.
JOHN D. PHENIX.
MAURICE S. BROWN.

Mr. TAFT. Mr. President, as we see from reading the letter, it shows that the cost of the Stevenson bill is approximately $84,000,000 a year. I may say that informally the same actuaries have estimated that the cost of the substitute will be approximately one-half of that cost, or $42,000,000 a year additional.

Mr. President, let me finish the general statement in regard to the bill: What the bill does, in the first place, is to increase the pensions of those who already have retired. The bill will increase their pensions by 25 percent, or $300, whichever is less. That amounts to an average increase in pensions of approximately 23 percent for those who already have retired. Of course, that is a straight gift. Their pensions accumulated under a certain plan; and, frankly, this would be a gift on the part of the Government, in order to increase their pensions somewhat. No one has suffered in the United States as much from the increase in the cost of living as the people who have been on fixed pensions. While I do not know that we can adopt any such policy for other employees, I think the Government, as an employer, can properly go back and make that increase.

Mr. ELLENDER. Mr. President, will the Senator inform us whether the additional amount to be given pensioners is to be borne entirely by the Federal Treasury, or will any of it come from the pension fund?

Mr. TAFT. It will be borne by the Federal Treasury. Obviously that is done in respect to those who are drawing the pensions to which their contributions entitle them, with the additional Government contribution. This is an additional Government contribution. It makes up about $24,000,000 of the additional cost of $42,000,000. It is the most expensive single item, but one which I think on any basis of fairness and justice is justified.

Mr. ELLENDER. Mr. President, will the Senator tell us what differences, if any, exist in his substitute to the pending bill, as to the age of retirement of employees?

Mr. TAFT. The age of retirement is left exactly as it is in the existing law. We eliminated entirely section 1 of both bills. It is left exactly as it is in the existing law. Some modification may be necessary, but that is one feature which was eliminated. Roughly speaking, a man may retire at 62 after 15 years' service; at age of 60, if he has had 30 years of service; or with 30 years' service, he may retire at 55, but in that case the pension is calculated as being of the same value as the pension he would have received at age 60.

Mr. ELLENDER. In any event the age of retirement is not affected by the

substitute; it remains as it is in the present law, does it not?

Mr. TAFT. Exactly.

Mr. ELLENDER. How about the payments to be made by the employees? What difference is there between the present law, the pending bill, and the Senator's substitute?

Mr. TAFT. The provision of the present law is 5 percent. All the bills, including the substitute, increase that to 6 percent.

Mr. ELLENDER. I thank the Senator.

Mr. COOPER. Mr. President will the Senator yield?

Mr. TAFT. I yield to the Senator from Kentucky.

Mr. COOPER. Relative to the matter of the payment of the additional $300 a year just discussed, is it not true that the Government must appropriate each year sums additional to those paid by employees to make payments to annuitants?

Mr. TAFT. Yes; obviously. In many private pension funds, the employer pays in half and the employee pays in half, but the Government has never paid in anything. Its payments are made on a current basis, as the pensions are paid, and about $223,000,000 is appropriated today by the Government as its share of the pensions. To that, of course, is added whatever the employee is entitled to, from what he has put into the fund.

Mr. COOPER. Then it will be necessary to increase appropriations to provide for the payment to each annuitant of the additional $300, will it not?

Mr. TAFT. The appropriation will be enlarged, as far as I can judge, by approximately $24,000,000 over the present payments to those who have already retired.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. TAFT. I yield to the Senator from Nebraska.

Mr. WHERRY. I wish the distinguished Senator from Ohio would explain what was in section 1 of Senate bill 637. It is cut out, and the amendment substituted.

Mr. TAFT. It raises a question as to whether a man may retire at 55 after 25 years of service. That provision expired in 1947. Whether it should now be renewed and made permanent is debatable. I mean, those matters are still in the House bill, and they may be discussed in conference, but in order to avoid furious controversies, as I thought, it seemed desirable to leave the law as it is. There is no objection that I can see to the present law, except that it makes a little more difficult the calculation of pensions on a reduced basis.

Mr. WHERRY. Does the Senate bill have this provision in it?

Mr. TAFT. The House and Senate bills adopted a special, arbitrary type of deduction, when one retired at 55 and got a pension at 55. This leaves it to be determined on an actuarial basis by the actuaries, and that is the provision of the present law.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. TAFT. I yield to the Senator from West Virginia.

Mr. REVERCOMB. First, I want to ask the Senator a question, so that we may be very clear on this point. The bill covers and applies, does it not, to employees of the Congress, the officers of both Houses of Congress, and the office employees of Senators, on their retirement?

Mr. TAFT. Yes. It applies to legislative employees.

Mr. REVERCOMB. I call the Senator's attention to page 3, section 4, line 8, of his substitute, in which it is provided that "1½ percent of the average annual basic salary, pay, or compensation received by the officer or employee during any five consecutive years" shall be the basis of the payments to annuitants. On page 4, subsection (d), it is provided as follows:

(d) The term "basic salary, pay, or compensation," wherever used in this act, shall be so construed as to exclude from the operation of the act all bonuses, allowances, overtime pay, or salary, pay, or compensation given in addition to the base pay of the position as fixed by law or regulation.

As I understand, the annuity is based and calculated upon what we call the base pay, but I am advised that the amount of the deductions is based upon the gross pay, including overtime payments. There seems to be a discrepancy between deductions based on gross pay and the payment of annuities figured on base pay, exclusive of overtime.

Mr. TAFT. I am informed that at least as far as legislative employees are concerned, the calculations are made on gross pay. It is so interpreted. Why it is so interpreted I cannot tell the Senator. The provision is in the existing law, and in all the other bills. I had not had it called to my attention, but I am informed that because of the way the legislative provision was drawn, it is based on gross pay. I imagine that is because the legislative salary is not stated as a bonus, but as pay calculated on statutory pay, plus certain additions and percentages.

Mr. REVERCOMB. But those additions and percentages were made in lieu of overtime payments, and were paid in some of the departments. Does not the Senator feel that it is rather inequitable, so far as the employees of the legislative branch may be concerned, to have deductions made upon gross pay, and annuities paid only upon base pay?

Mr. TAFT. No. I understand the annuity is based on gross pay, as far as legislative employees are concerned. I am so informed.

Mr. REVERCOMB. I did not have that information. If that is correct, then there is no inequity.

Mr. TAFT. The deductions are also made on gross pay, but the pension is figured on gross pay. I am so informed.

Mr. REVERCOMB. Then, I ask the Senator again, does the provision which states that the annuity shall be calculated upon base pay apply to legislative employees?

Mr. TAFT. Apparently it does not. Why it does not, I do not know. As I have said, this has been in all the bills, and my attention had not been called to it until the Senator brought it up. If the Senator finds the situation is otherwise and has an amendment to offer, we should certainly be glad to consider it.

Mr. REVERCOMB. I certainly feel, I may say to the able Senator, that, in order to be fair, deductions and calculations of annuities should be upon the same basis.

Mr. TAFT. Oh, they are on the same basis. There is no question about that.

Mr. REVERCOMB. If there is any question of the new bill affecting that or changing that in any way with respect to employees of any branch of the service, I think it ought to be taken care of.

Mr. TAFT. It does not change in any way the existing law. That much I can tell the Senator with certainty.

Mr. REVERCOMB. If it does not change the existing law, then it does not change the situation with respect to employees of the legislative branch, I take it.

Mr. JOHNSTON of South Carolina. Mr. President, will the Senator yield?

Mr. TAFT. I yield to the Senator from South Carolina.

Mr. JOHNSTON of South Carolina. I just wish to remark, in connection with what the Senator from Ohio has said, that in the committee it was our intention at all times to have the annuity fixed on the same basis with the deductions, so far as the retirement fund is concerned.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. TAFT. I yield to the Senator from Virginia.

Mr. BYRD. With respect to legislative employees, they were given a percentage increase in lieu of overtime. That is the reason why the total would not be included in the base pay.

Mr. TAFT. I suppose that the base pay for legal purposes is what we regard as the gross pay, and that what we refer to as base pay is just a basis of calculation to determine the legal base pay. I assume that is the reason for the ruling.

Mr. BYRD. An exception was made that an increase in salaries be provided for by giving to those in the legislative branch the percentage increase in lieu of overtime because it was impossible to calculate the overtime. I should like to know, as the Senator from West Virginia asked, whether this will include the percentage of overtime which was a part of the increase of the legislative branch. It was impossible to calculate the overtime.

Mr. TAFT. I understand the base pay includes that increase, and that the calculations of the pensions and deductions, in the case of legislative employees, are all based today on the gross pay. I am so informed, and I have every reason to believe that is the fact. In any event, it is exactly the same as the present law.

Mr. President, section 4 of the act is amended on page 3 of the substitute by changing the basis of calculating the annuity. It makes the procedure simpler. It will be, I think, very little more expensive than the present system, but it is much more easily understandable, and under it calculations can be made much more easily.

There are some differences between section 2 of my substitute and the Langer-Chavez bill. One has to do with

the 35-year limitation, which is the current law. Another is that the annuity shall in no case exceed an amount equal to 80 percent instead of 90 percent, which is the provision contained in the Langer-Chavez bill. That is the maximum. In other respects my substitute is very much the same as the present law.

Section 3 on page 4 of the substitute requires that 5 years of civilian service be rendered before any employee may be eligible to an annuity, rather than a combination of civilian and military service as provided in the present law. Under the present law we got into a situation where a man could serve in the Army, and then be brought into the civilian service. He could then take advantage of the years he had served in the Army, without paying any back money, and after a very short time begin to draw a pension after he retired, by receiving credit for his years of service in the Army. The substitute requires that an individual must have at any rate 5 years of civilian service before he is entitled to a pension under the civilian pension law.

Section 4 is not material. It will allow employees who are receiving hospital treatment an additional period to file claims for disability annuities. The provision will cover only a few meritorious cases. It will also eliminate the necessity for medical examination of disabled annuitants after they have reached the age of 60.

Section 5 on page 9 of the bill makes perhaps the most important change in the Langer law. Under the law, as amended, after 5 years of service, an individual may retire at any time. He may then receive the money he has paid into the pension fund, no matter how long he served, either less or more than 5 years. He may receive back the money he has paid in with interest at 4 percent, and 3 percent after December 31, 1947. Or he may take a deferred annuity beginning at age 62 which, of course, will only be equivalent to the number of years which he served. The amount involved may be very small. If he has served 5 years it would be a small amount, of course, but the amount is based on the number of years he has served.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. BYRD. In other words, an employee of the Government can receive back, whenever he desires it and terminates his service, any deposit he has made?

Mr. TAFT. That is correct. He may get back what he has paid in with interest.

Mr. BYRD. Regardless of how long he has served?

Mr. TAFT. Yes. Or he may receive a deferred annuity.

Mr. BYRD. When he does take the deposit he separates himself entirely from any annuity in the future?

Mr. TAFT. Yes.

Mr. BYRD. I am very much in favor of that provision.

Mr. TAFT. Not only that, but the measure provides further that if subsequently he returns to the service—and this is something which has produced some of the cases of serious abuse—if he subsequently returns to the service he cannot get back into the pension system except by placing in the fund the money he had previously drawn out. So if a man had served 4½ years, and retired, and draws out the money he has paid into the fund, and then later returns to the service and serves a half year more, and then makes a claim for a pension, he must return the money he previously drew from the fund if he again wants to come in under the law and receive a pension.

Mr. REVERCOMB. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. REVERCOMB. With respect to the question which I raised, and which was discussed a few moments ago, concerning the provision on page 4, subsection (d), I wish to say to the Senator from Ohio that the Federal Employees Pay Act of 1945 is very clear that the employees of the judiciary branch and of the legislative bodies shall have their deductions based on gross pay, and their annuities based on gross pay. There may be some question respecting the language of the pending measure, and I suggest that on page 4, line 19, in subsection (d), the word "the" be stricken, and that there be inserted in lieu thereof, "except as provided in sections 501 and 522 (b) of the Federal Employees Pay Act of 1945, as amended, the."

Then the language would continue "the term 'basic salary, pay or compensation'," and so forth.

Mr. TAFT. Mr. President, has the Senator the amendment in written form?

Mr. REVERCOMB. Yes.

Mr. TAFT. If the Senator would care to submit the amendment I shall be glad to accept it.

Mr. REVERCOMB. Mr. President, I offer the amendment which I send to the desk and ask to have stated.

The ACTING PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 4, line 19, it is proposed to strike out the word "the" and insert in lieu thereof the words, "except as provided in sections 501 and 522 (b) of the Federal Employees Pay Act of 1945, as amended, the."

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from West Virginia.

The amendment to the amendment was agreed to.

Mr. GEORGE. Mr. President, is there anything in the substitute which affects section 602, I believe it is, of the Reorganization Act of 1946, which gave to Members of the House and the Senate the benefits of the retirement system? Is there anything in the substitute which affects that section?

Mr. TAFT. No. I left out the provision respecting Senators and Representatives entirely.

It seemed to me that it was wise, if we were going to revise that section, to revise it at a separate time. There is one exception to that statement, however. The measure reduces the rate of interest after the 1st of January 1948 to 3 percent. Otherwise it makes no change in the existing pension for Representatives and Senators.

Mr. GEORGE. That is, in case deductions are withdrawn?

Mr. TAFT. Yes; and the rate of interest affects the size of the annuity to some extent in the future.

Mr. President, perhaps the thing which is most sought after by the employees, and to which I think they are most entitled, is survivorship payments. The measure provides for them. If a man dies, his wife will receive an annuity equal to 50 percent of the annuity which he would have received, from the time that she is 50 years of age. In that respect the bill is more liberal than the Langer bill. Under the Langer bill she would not become eligible until 60 years of age. The measure now before us provides that she can start receiving her pension at 50 years of age if she has not remarried by that time; that is, unless she has a minor child or children. There is then provided an annuity for minor children left by a man who dies in the service.

Most pension plans today provide for such survivorship benefits, and I think it is certainly only putting this system in line with other systems to provide that additional matter. I think I am correct in saying that the entire cost of those survivorship benefits is paid by increasing the payment from 5 percent to 6 percent. That is substantially what the increase in the deduction from the pay is for—to pay for the survivorship benefits. The other cost additions in the substitute are covered by the increased cost to the Government, which is approximately the same proportion as the increased cost to the employee.

Mr. COOPER. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. COOPER. Upon the question of survivorship, is there any particular reason, actuarial or otherwise, for providing that the benefit shall not be paid until the widow reaches the age of 50 years?

Mr. TAFT. The bill, after all, is a pension bill, to take care of people in the upper-age groups. It is not primarily life insurance. I cannot answer the Senator's question. I suppose it can be done anyway. But the bill as presented, I think both in the House and Senate, provided for the widow's pension to begin at age 60. If the man has retired, he may accept a reduced annuity in consideration of the fact that after his death his widow shall continue to receive a 50-percent pension. That is true, I think, no matter what her age may be, after the husband has retired, if he accepts a reduction in his own pension. He may provide his widow with a pension by accepting a reduction. But this provision is to cover cases of death in the service, and in most cases I suppose that the widow under 50 is presumably able to work. Most widows are unless they have minor children. If a widow has a minor child or children, then she may draw her pension.

Mr. COOPER. I note also on page 17 the substitute defines a widow as "a surviving wife of an individual who * * * shall have been married to such individual for at least 5 years immediately preceding his death."

Is there any particular reason for requiring as a condition of eligibility that a widow must have been married 5 years?

Mr. TAFT. I think that provision is contained in both measures, and I suppose it was placed in the substitute in order that a man on his deathbed might not marry for the purpose of giving a woman a pension. I think that is undoubtedly the reason for the language. Unless there were a time limit such a situation may be open to serious abuse.

Mr. COOPER. It seems to me that only in rare cases would a marriage occur for such a reason. There would be greater possibility that a deserving widow who had married within 5 years before the death of her husband would be deprived of the advantages of the survivorship provision.

Mr. TAFT. If she had a child, that provision would be waived, and she would receive the pension. If she had been married only a short time, and her husband died, presumably she would be just as well off as before she was married, just as able to work again, and possibly just as able to marry again.

Mr. COOPER. The Senator has placed this provision in his amendment to meet abuses which he assumes might occur. It seems to me that it is more likely the provision will work a hardship upon many surviving widows who need and deserve benefits and who did not marry for the purpose of securing benefits.

Mr. TAFT. Mr. President, I think I have covered the main features of the bill, as proposed to be amended by the substitute, except for the matter of the amendment which is now pending.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from North Dakota [Mr. LANGER] on behalf of the Senator from Ohio [Mr. TAFT].

Mr. TAFT. Mr. President, I wish to state the question involved in the amendment. When the bill was drafted I did not understand the exact issue raised in this amendment, so it is not in the bill which was introduced day before yesterday; but I favor the amendment.

The amendment provides, on page 12, that any person may make deposits for past service. That is the general purpose of section 9. A person may make deposits for past service at certain percentages of his salary plus interest, and thereby bring himself into the pension system and receive a full pension. However, the present law provides that a person who does not wish to make back payments may still receive a pension based upon the Government's contribution, or the contribution which the Government would have made if he had made such deposits. In other words, a man who comes into the system may pay his share, which is, let us say, half the cost of his pension, by making back payments. The Government then puts up approximately the same amount, and the pension which he receives is based upon those amounts.

Under the present law a man who does not wish to make the back payments—and a man who has been in the service for 20 years may not be able to make such payments—even though he does not make the payments, may receive that part of the pension which would have been contributed by the Government if he had made his payments. It does not cost the Government any more than if he made his deposits, except that without this amendment, in the case of a person who did not make the deposit, the Government would not put up anything.

Mr. BYRD. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. BYRD. Suppose an employee had not made a deposit for 10 years, and then made a deposit under this provision. This provision would give him an advantage, as contrasted with other employees by reason of the contribution by the Government.

Mr. TAFT. Anyone who has been able to come into the system and has not elected to come in, cannot get in now, as I understand.

Mr. BYRD. In previous years there was a smaller deposit, and in some previous years no deposit was required. As I understand, under this provision a person who did not make any deposit would get the benefit of the Government contribution, which would give him an unfair advantage over employees who made the deposit.

Mr. TAFT. I do not understand that a person who failed to elect to come in can come in at this time. The provision covers only cases of new employees.

Mr. BYRD. The language is:

> Notwithstanding the failure of an officer or employee to make such deposit, credit shall be allowed for the service rendered, but the annuity of such employee shall be reduced by an amount equal to the amount of annuity such deposit would purchase if made, unless the officer or employee shall elect to eliminate such service entirely from credit under this act.

Mr. TAFT. That is correct. It is exactly the same provision as that which applies to Senators and Representatives. Perhaps it is a disputable point, but any Senator or Representative who came in during the past 2 years may refuse to make a deposit, and yet receive in his pension a reflection of the contribution which the Government would make if he made the deposit. That has been the law for civil-service employees and for Senators and Representatives. I think it is a very liberal provision.

As I understand, this provision would not give any new right to any employee that he does not have under existing law.

Mr. BYRD. It must apply to a present employee, because a new employee would automatically come under the system.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. WILLIAMS. As I understand the amendment of the Senator from Ohio, it merely retains the provisions now contained in the act. Under those provisions it is possible for a man who has had 10 or 20 years' service to withdraw from the Government service and take all his money back. If he can obtain employment for 1 day with some Government agency, or on some Senator's staff, he can be fired, and will still be eligible for a pension. By resigning or being removed, either voluntarily or involuntarily, he can withdraw all his money; and by reinstatement for as little as 1 day he can become eligible for a pension based upon his entire length of service. That was one of my objections with respect to the bill in the beginning. That provision was eliminated in the original so-called Taft substitute, but this amendment now proposed would restore the provision. I think the Senator from Ohio will agree with me.

Mr. TAFT. Yes. Unless this provision goes into the bill we shall be changing the existing law.

I should like to have the Senator cite a case in which he thinks this provision would give a person an undue advantage over someone who has been in the system all along.

Mr. WILLIAMS. One case I shall cite is a case which was described in the Washington Daily News of December 10, 1947, in an article written by Mr. John Cramer. In that article he referred to the case of a Mr. Geoffrey May, a Government employee who had been working with the Bureau of the Budget for about 14 years. The article states—and this was later confirmed—that he had decided to leave the Government service. I understand that he is now employed by the Government in the Greek relief program. Mr. May, with the knowledge and consent of Mr. Flemming and Mr. Irons, of the Civil Service Commission, arranged a deal whereby he would be employed by the Federal Security Agency on a newly created job which was to last for 45 days, at the end of which the job was abolished as prearranged, making Mr. May eligible under the involuntary separation provision of the act. He thereby became eligible for a greatly increased annuity valued at about $9,000. He went to this job at a salary of $10,000 a year. He paid into the fund for 45 days. His contribution amounted to approximately $50 in that period. He thereby increased his annuity valuation $9,000 for a payment of approximately $50. I communicated with the Civil Service Retirement Division, and the story was confirmed. The job was started on May 15. It was abolished on June 30. No one seems to know what the man did, except that he set up his retirement privileges during the 45 days. I understand that the benefits which Mr. May received have since been taken away. I was also told that this was an isolated case, and that the same situation arose in very few cases. However, this is not true, as I find that it has happened 6,439 times in the past 12

months. That is confirmed in a letter under date of December 11, 1947, which I received, signed by Mr. Irons, of the Civil Service Commission, in which he stated that there had been 6,439 such cases during the past 12 months. I asked Mr. Irons to pull from their files for me copies of the first 50 cases of persons retired during the month of March, as well as 50 who retired under that provision during the month of October. I took those 2 months, and the first 50 names in each month, in order to obtain a cross-section. I have the names of those retired under that provision.

To illustrate some of the extreme cases, I have the name of Mr. George W. Bunce. The total amount of his contribution was $116.11 for his entire period of service. He is now on retirement at an annuity of $409.56. The total value of his annuity is $8,109.

Mr. TAFT. How long did he work for the Government?

Mr. WILLIAMS. Sixteen years and 10 months. His age is 55. He is retired under a reduced annuity. He was in the system only long enough to pay $116.11, based upon an average salary of $4,155. That means that he was in the system for only 2 or 3 months. He is now retired; and, according to the life-expectancy tables of the Civil Service Commission, there will be payments for nearly 20 years, amounting to a total of $8,109.

Another case is that of James M. Bedford, who worked for the Government for 12 years and 10 months. Mr. Bedford has $72.86 in the fund. He is on retirement, and at the age of 56 years and 11 months he has a paid-up retirement worth $4,640.24.

Another case is that of Mr. George J. Barber. Mr. Barber worked for 34 years and 2 months. He was blanketed into the system in 1942. Mr. Barber has paid a total of $138.18 into the fund.

Mr. TAFT. Let us take the case of a man who worked 34 years and 2 months and finally, for one reason or another, a law was passed placing him under the act and providing for compulsory deductions thereafter from his salary. The Government will add its share of his pension, covering 34 years. I do not know why it should not do so, even though he does not have the money to pay back a number of thousands of dollars which he might have paid year by year if he had been covered by a retirement plan at the beginning of the 34 years. This pension is an addition. The Government is saying, "If a man has worked for the Government for many years we will recognize that fact and give him a certain amount which will be in addition to his salary." To the extent that he himself has paid money into it it adds to the amount of this Government gift. It is true that various persons have been covered in. Sometimes they were not subject to the system. Of course no one was subject to it at one time. Groups of persons have been added in, and the Government took care of their past service also. There may be some abuses, but I think the principle of it is perfectly sound. Incidentally, if it is not sound, then it is clearly unsound with reference to Representatives and Senators who have been covered into the system. I do not know of any private company which establishes a pension system which does not base its pension at the beginning on a certain number of years' service to which neither the employee nor the employer contributes.

Mr. BYRD. Mr. President, there is no question at all that the Representatives and Senators have a special privilege given them in the law. I happened to be the one who offered an amendment to strike that out, and it received 20 votes out of 96.

Consider, for example, a man who has served 20 years in the legislative branch of the Congress, as a clerk to a committee, during which time there was no applicable retirement plan. There was no assessment made. That man can go to one of the departments of the Government and receive temporary employment and, by paying 5 percent of his salary for 1 year, can receive retirement pay for the rest of his life.

Mr. TAFT. I understand it has to be based upon permanent appointment, not temporary appointment.

Mr. BYRD. I happen to know of some appointments which were not permanent.

Mr. TAFT. That may have been the fact in the past. I do not think temporary appointments are covered by the plan at all.

Mr. BYRD. It is possible for a man to hold a position for 6 months or a year and pay in 5 percent of his salary and receive a life pension based on 20 years service in some other branch of the Government.

Mr. TAFT. Every pension system established today gives some credit for past service and contributes gradually a sum to bring up the necessary amount. Nearly every industry has done that. There is no particular reason why the Government should not add its share. It is not giving an employee any more than he would receive if he had paid up all of his deductions all those years. He receives the same amount which he would have received from the Government if he had paid those deductions. That is the only difference.

Mr. BYRD. Suppose the salary were $3,000. He would pay in 5 percent. That would amount to $150. He could then obtain a pension for his service, including all of his service in any other agency of the Government where there was no retirement system at that time. Consecutive service is one of the main factors in the determination of the amount of retirement.

Mr. TAFT. I suppose that any private employer is faced with the necessity of paying a man a pension, although that man contributes nothing. Every employer today thinks he has a moral obligation to take care of people who have worked for him a long time. I see nothing wrong with the theory that the Government contribute, out of the Government's pocket, if you please, a certain amount for pensions based on the number of years of service employees have had, in addition to the salaries paid at that time. The Government will not pay any more whether an employee pays or does not pay in his deductions. If he paid during that time he will receive a larger pension, and he receives the value of the money which he may deposit later. The Government does not pay any more. The Government simply recognizes the fact that a man who has worked for the Government for a certain number of years is entitled to a pension. There are some features of this system that are perhaps too liberal, but I do not think that principle is wrong. I think that when we begin a pension system and someone comes under its provisions because of the passage of a new law, it is fair that the Government should give a man a pension based on the number of years of his employment, whether or not he is able to pay up the back payments.

Mr. WILLIAMS. Mr. President, will the Senator yield?

Mr. TAFT. I yield.

Mr. WILLIAMS. The Senator from Ohio followed the particular case which I cited, that of a man who had 34 years of service. This particular gentleman, Mr. George J. Barber, who was the twenty-fifth man who retired during the month of March 1947, under the involuntary separation clause, held a position with the Government to the extent that he had been a substitute mail driver, I have been informed, for approximately 30 years, and also held an independent job with a private industry. He drove the mail only on occasions when the regular mail driver was absent. He was blanketed in and retired on an annuity, nothwithstanding the fact that for 30 years he had worked in private industry. The Senator from Ohio seems to think he was entitled to it. The value of the annuity to be received under the present law is $17,850.60, for a payment of only $138.18. The law passed in 1942 made that possible. The examples I have cited may be extreme cases, but there is not one of them in which the Government has not been "taken for a ride." The total amount of deductions from the salaries of these 100 employees sampled amounted to $69,394.96, and the amount of the accrued liability of the Government required to pay their retirement pensions for the duration of their lives is $501,607.33.

The Ramspeck Act was passed on the assumption that it would cost the Government very little. I have no objection to the Government's paying retirement benfits to employees based upon service, but I do not see any reason why we should pass a law providing for the payment of benefits for which the employees make no contribution.

According to the Department of Commerce there are 10,000,000 persons in this country over the age of 60 years. I do not see why we should give a special privilege just because a person is fortunate to have a Government job for as

short a time as 1 week. The Senator from Ohio says that we cannot give benefits under a temporary appointment. But the law says that a man can work as short a time as 1 week on the assumption that he has a permanent appointment, and then can separate from the service, and be eligible for such benefits.

I ask unanimous consent to have printed in the RECORD the list of the 100 cases to which I have referred, containing the figures which I have cited.

There being no objection, the list was ordered to be printed in the RECORD, as follows:

Analysis of 100 involuntary separation annuities

FIRST 50 AWARDED DURING MARCH 1947

Annuitant	Service		Age at commencing annuity		Average salary	Amount contributed to fund	Annuity awarded [1]	× Years of life expectancy	= Total of annuity to be received under present law	Present law annuity at 62 if voluntary separation [1]	H. R. 4127 annuity at 62 if voluntary separation [1]

[1] Annuity reduced according to outstanding deposits or redeposits, if any.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Ohio [Mr. TAFT].

Mr. WILLIAMS. Mr. President, I send to the desk at this time an amendment which I offer as a substitute to the Senator's amendment and ask that it be agreed to. This amendment provides that Members of Congress shall make contributions before becoming eligible to receive retirement benefits. I see no reason at all why a Member of Congress should expect a retirement benefit from the Government for services which he renders in Washington during any period in which he contributes nothing to the fund.

I ask that the amendment which I offer, making it mandatory that every Member of Congress, in order to receive the benefits of the fund, shall be required to pay contributions into it, be agreed to.

The ACTING PRESIDENT pro tempore. The Chair will advise the Senator from Delaware that the Chair has been informed that the amendment which the Senator wishes to offer at this time is not in order, for the reason that it is an amendment in the third degree to the amendment which has been offered by the Senator from Ohio, which must first be disposed of.

Mr. WILLIAMS. Would it be in order to move to substitute my amendment in place of the amendment offered by the Senator from Ohio?

The ACTING PRESIDENT pro tempore. The Chair is informed that the same objection would be applicable to the Senator's last request.

Mr. TAFT. Mr. President, I ask unanimous consent that the rule may be waived, and that the amendment of the Senator from Delaware may be offered as a substitute for the amendment to my amendment in the nature of a substitute.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. If the Senator from Delaware will send to the desk his amendment to the amendment of the Senator from Ohio to his amendment in the nature of a substitute, it will be read by the clerk.

Mr. WILLIAMS. Mr. President, I send my amendment to the desk and ask that it be stated.

The ACTING PRESIDENT pro tempore. The clerk will state the amendment offered by the Senator from Delaware to the amendment of the Senator from Ohio to his amendment in the nature of a substitute:

The CHIEF CLERK. On page 22, after the section number in line 21, it is proposed to insert "(a)."

On page 22, after the comma in line 22, insert the following: "and except as provided in this section."

On page 23, after line 3, insert a new subsection as follows:

(b) Paragraph (5) of section 3A of such act of May 29, 1930, as amended, is amended by adding at the end thereof a new sentence as follows: "In computing years of service for the purpose of this paragraph, there shall be excluded all periods of service for which no deductions have been made as provided in paragraph (2) and no deposit shall have been made as provided in section 9."

Mr. TAFT. Mr. President, I withdraw my amendment to my amendment in the nature of a substitute, in order that the Senator from Delaware may first offer his amendment to my amendment in the nature of a substitute.

The ACTING PRESIDENT pro tempore. Without objection, the amendment of the Senator from Ohio to his own amendment in the nature of a substitute is withdrawn.

The question now is on agreeing to the amendment of the Senator from Delaware to the so-called Taft amendment in the nature of a substitute.

Mr. WILLIAMS. Mr. President, this amendment merely provides that Members of Congress shall be treated in exactly the same manner as it is proposed that all other Government employees shall be treated under the so-called Taft substitute—for instance, employees making as little as $1,000, or $1,200 a year. In other words, all will pay into the fund, or else they will not participate. I ask that my amendment to the Taft amendment in the nature of a substitute be adopted.

Mr. TAFT. Mr. President, I should like to ask the Senator from Delaware a question. In the first place, is the amendment retroactive?

Mr. WILLIAMS. It is.

Mr. TAFT. That is to say, Representatives and Senators who have taken advantage of the option under which they pay nothing into the fund but simply come under the act and receive the benefit of the Government's payments for their past years of service, will have that option canceled, and hereafter they will have to make all payments for past years of service. Is that correct?

Mr. WILLIAMS. No, Mr. President. As I understand this amendment, it does not affect any Member of Congress who has retired during the past 12 months under the act as it was passed.

Mr. TAFT. But I have in mind Members who are now serving in the Congress.

Mr. WILLIAMS. It is my intention, if this amendment to the amendment in the nature of a substitute is adopted, that every Member of Congress now serving will pay into the fund in the same manner that all other Government employees are required to pay into the fund.

Mr. TAFT. I do not think the Senator from Delaware has so drafted his amendment. As I read it, I do not think it is retroactive. It seems to me that those now serving, who have already made the election, would not be affected.

Mr. WILLIAMS. I am advised that my amendment will apply to all Members of Congress who now are serving, and it will apply to all annuities which are computed after the date of the enactment of this measure.

Mr. TAFT. Mr. President, I myself feel that Representatives and Senators should be treated in exactly the same manner as other persons who have belatedly come under the Retirement Act for some particular reason. I myself believe that this amendment to the Taft amendment, in the nature of a substitute, should be rejected, and that my amendment to the Taft amendment should be adopted. If that is done, Members of Congress will be on the same basis as other Government employees.

Of course, the present congressional pension system provides that a Representative or Senator who has served for 30 years, let us say, may come into the system and may pay nothing, and yet he will receive from the Government its

contribution for those 30 years. Of course, he will receive a smaller pension in that way, as compared to the pension he would receive if he made the back payments on his part for the 30-year period.

As I have said before, when a pension fund is established and when someone who has not been subject to it and could not be subject to it and had no right to come into it is brought under it by law or in some other way, it seems to me to be a perfectly sound principle that he shall not have to make up all those back payments which he would have made if he had been a member of the fund. If he has had that length of service, it seems to me that the Government should be willing to contribute the same amount that it would contribute if he did make the back payments. In that way there will be no special advantage to him, except that he will be spared the very difficult job of making all past payments or deposits.

Mr. WILLIAMS. Mr. President, prior to the adoption of the retirement system for Members of Congress, there were no deductions, and they were not proposed. But when the bill was passed and went into effect, I could not find in the RECORD anything to show that any Member of Congress objected to having the Government make its portion of the payments for his past years of service.

The bill as now before us for discussion provides that every civilian employee of the Government shall make back payments into the fund. So I do not see why we Members of Congress should consider ourselves privileged officials to the extent that we do not have to pay for all retirement benefits we receive.

Mr. TAFT. Mr. President, I fully agree with the Senator from Delaware that Members of Congress should have no advantage over anyone else in Government service, and that is one reason why I presented my amendment, because apparently we were taking away from the ordinary civil-service employees the rights they had had, and which we had given to Members of Congress last year or the year before. I thought we should restore that right.

I see no reason why the Government, in setting up the pension system, should not assume a liability for all the years of service on the part of such a Government employee, regardless of whether he has made payments. Of course, if he has made the payments, he will receive a larger pension or annuity. If he has not made payments, under the amendment he would receive from the Government the same amount of Government contribution that he would have received if he had made payments on his own part and, to match them, had received payments by the Government on its part.

If we recognize the principle of having salaries based on the number of years of service, I do not see why we should not recognize that same principle as applied to pensions based on the number of years of service, regardless of whether the employee has made payments on his own part, at least insofar as payments by the Government are concerned.

So I think the amendment offered by the Senator from Delaware to the Taft substitute should be rejected, and that my amendment to my substitute should be adopted. Then all Government employees will be treated on the same basis.

The PRESIDENT pro tempore. The question is on agreeing to the amendment of the Senator from Delaware to the Taft amendment in the nature of a substitute.

Mr. CAIN. Mr. President, as I understood the reading of the amendment of the Senator from Delaware, it would serve the purpose of seeing to it that as of the present and in the future no person shall draw any retirement annuity benefits from the Government unless he has contributed his proportionate share of those benefits.

Mr. TAFT. Unless such Government employees had contributed for all their years of service, beginning with the date of the original employment, thus picking up payments which they could not have made prior thereto, during many years of service with the Government.

Mr. CAIN. That is not my interpretation of the intention of the amendment of the Senator from Delaware. I think we must clear up that point before we shall be able to know precisely what the amendment is intended to achieve. I should like to ask that question of the Senator from Delaware.

Mr. WILLIAMS. It is the purpose of my amendment to the Taft substitute to provide that any Member of Congress who in the future goes on retirement must first have paid into the retirement fund his deductions for all years which he wishes to have included in calculating the amount of his pension. In other words, if a Member of Congress served for 6 years in the Congress and during that time made payments into the fund, and if thereafter he served six other years for which he did not make payments into the fund, he would have to make his payments for the 6 years for which he had not made payments, or else he would not be able to receive credit under the retirement or pension fund, except for those years for which contributions had been made.

In other words, in my own case, if I served 6 years as a Senator and during that time did not make payments into the retirement fund, I would receive nothing. On the other hand, after serving those 6 years and making no payments, I perhaps could get a job in a Senator's office and could serve the Government in that way over a brief period of time, and during that time could make a few payments, and thus I would receive a pension for the rest of my life.

Mr. TAFT. Mr. President, I am not able to say whether the Senator from Delaware is accurate in that statement or not. But certainly I would not object to a provision that if a man had been able to make such payments, but elected not to join the fund, he could not later join the fund, even in some other capacity. To such a provision I would be entirely agreeable. But if that person had been in a position in which he was not eligible to join the fund, and under which he had no way of joining the fund, then it seems to me the principle I am advocating should apply. I had rather understood that was the objection at the present time.

Mr. WILLIAMS. As I understand the present law, every time a man accepts a new job with the Government, he is eligible to come under the retirement fund. In the legislative branch, if he does elect to go under the retirement system at that time, he is credited with all the years of his prior service with the Government, regardless of whether he made contributions to the fund during those years, although if he has not made such contributions he will be paid a pension under a reduced formula.

But I say that no one is entitled to a pension unless he has paid for it. If I come to the Congress and serve for a certain period of time and do not make payments to the retirement fund, certainly I am not thereafter entitled to receive a pension based on such service when I attain the age of 62. That is particularly true when it is proposed in the bill now before us to grant that exemption to Members of Congress only and not to extend it to the rest of the people. What will be done later on the Senator's amendment is a matter to be discussed, but the bill as now before the Senate proposes that everybody in the Government service except Members of Congress shall pay into the fund. I ask that my amendment be adopted.

Mr. TAFT. Mr. President, payment of this deduction on the part of employees is not optional except in the legislative branch. In other words, the question does not really arise, except that the Senator has pointed out one possible loophole. It is apparently true that if somebody in the legislative service who has the right to elect to go in or not to go in, a right not shared by others, should elect not to go in, then if he obtains a job in the civil service he apparently may, as the Senator points out, pay nothing in, pick up his past years' service, and go on with the pension. I should be perfectly willing to modify the bill to provide that anyone who has had the optional right to pay in or not to pay in, and who chooses not to go in, shall not thereafter have the right to go in, if he becomes an administrative employee. I think some such an amendment as that might be appropriate, but I think the general principle that a man who has not been able to pay because the law did not permit him to pay, should not be required to go back and pay at a future time in order to take advantage of the Government's share of his pension.

Mr. WILLIAMS. Mr. President, I differ with the Senator from Ohio to this extent: In my opinion, the Government has no obligation to Members of Congress dating back prior to the enactment of the retirement legislation, as incorporated in the Reorganization Act. That act provides that the Government give credit for the number of years which a Member of Congress has served, and pay into the fund the Government's share without requiring that Congressman pay anything for those years antedating the act. I say this is inequitable and unfair to the other employees who are denied

this advantage under the present proposal. I do not see why any man should stand up and argue for the right to participate in a retirement fund toward which he has made no contribution. I therefore ask that my amendment, which corrects this inequity, be adopted.

The PRESIDENT pro tempore. The question is on agreeing to the amendment submitted by the Senator from Delaware.

Mr. WILLIAMS. I ask for the yeas and nays.

The yeas and nays were not ordered.

The PRESIDENT pro tempore. The question is on agreeing to the amendment.

Mr. WILLIAMS. Mr. President, may we have a division?

On a division, the amendment to the amendment was rejected.

Mr. TAFT. Mr. President, I want to modify my amendment before I offer it again, and if there are other amendments to be offered, I would suggest that they be submitted, and that we then proceed with this amendment.

Mr. HOLLAND. Mr. President, will the Senator from Ohio yield for a question at this point?

Mr. TAFT. I yield.

Mr. HOLLAND. When the able Senator was discussing the features of his substitute bill, I was called from the Chamber. I was not present when he discussed the details of his substitute bill which have to do with present annuitants; that is, former Federal employees who have already been retired. I should like to get from the Senator, if I may, information with respect to provisions of the so-called Langer-Chavez bill, which allowed an increase, in the event of the enactment of that bill, of $300 a year to each of the present annuitants, and also additional privileges to the widows of present annuitants and to dependents, whether those provisions are altered or changed by the substitute bill offered by the Senator from Ohio.

Mr. LANGER. If I may answer the question, I will say to the distinguished Senator from Florida that they are all included in the substitute bill.

Mr. HOLLAND. Are the provisions of the substitute bill on this point identical with the provisions of the Langer-Chavez bill?

Mr. LANGER. Yes. As a matter of fact, they are more liberal, because the widow gets in at age 50 instead of 60.

Mr. HOLLAND. I am glad to hear that. I appreciate the information.

The PRESIDENT pro tempore. Are there any further amendments to the Taft substitute?

Mr. TAFT. Mr. President, I should like to take some time to amend the amendment along the lines suggested to the Senator from Delaware, before I offer it again.

The PRESIDENT pro tempore. The Chair has asked for other amendments. None seem to be available.

Mr. WHERRY. Mr. President, I ask that the Senate take a recess, subject to the call of the Chair.

The PRESIDENT pro tempore. Is there objection to the request of the Senator from Nebraska? The Chair hears none.

Thereupon (at 2 o'clock and 6 minutes p. m.) the Senate took a recess, subject to the call of the Chair.

The Senate reassembled at 2 o'clock and 12 minutes p. m., when called to order by the President pro tempore.

Mr. TAFT. Mr. President, I offer an amendment which is based on the amendment I offered previously. My amendment is on page 11, line 15, to strike out the word "may" and insert in lieu thereof "shall," and on page 12, beginning with the word "Unless" in line 10, strike out through the word "involved" in line 12, and insert in lieu thereof, "notwithstanding the failure of an officer or employee (other than an officer or employee who had an opportunity to elect to come within the provisions of this act and who failed to exercise such election) to make such deposit, credit shall be allowed for the service rendered, but the annuity of such employee shall be reduced by an amount equal to the amount of annuity such deposit would purchase if made, unless the officer or employee shall elect to eliminate such service entirely from credit under this act."

The PRESIDENT pro tempore. The question is on the amendment offered by the Senator from Ohio [Mr. TAFT] to the amendment in the nature of a substitute to the committee amendment.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The substitute amendment offered by the Senator from Ohio is open to further amendment.

Mr. COOPER. Mr. President, I offer an amendment which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 17, line 12, it is proposed to strike out the word "five" and insert in lieu thereof the word "two."

Mr. COOPER. Mr. President, I discussed this matter awhile ago with the Senator from Ohio. The purpose is simply to change that portion of the section defining a "widow," which reads, "a surviving wife of an individual, who * * * shall have been married to such individual for at least 5 years immediately preceding his death," to make it, "2 years immediately preceding his death," so as to read, "a surviving wife of an individual who shall have been married to such individual for at least 2 years immediately preceding his death."

I believe that with this change protection is maintained against abuses which the author fears, and at the same time the benefits of survivorship will be made available to a large class of widows who deserve benefits, and whom the husband would want to protect.

Mr. TAFT. Recognizing the typical courtesy of all Senators from Kentucky, I am glad to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment offered by the Senator from Kentucky to the amendment in the nature of a substitute offered by the Senator from Ohio.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. Are there further amendments to be proposed to the substitute amendment offered by the Senator from Ohio?

Mr. WILLIAMS. Mr. President, I send to the desk an amendment which I ask to have stated.

The PRESIDENT pro tempore. The amendment will be stated.

The CHIEF CLERK. On page 11, lines 7 and 8, it is proposed to strike out the words "as if this act had not been enacted", and insert in lieu thereof the words "as though this act had been in effect on the date of such separation."

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Delaware to the amendment in the nature of a substitute.

Mr. WILLIAMS. Mr. President, the amendment merely provides that in the cases of all of those who are now out of Government service, or have an accumulated equity in the retirement fund, such equity will be figured from the formula of the new act and not from the formula of the old act.

Mr. TAFT. Mr. President, will the Senator again please explain the purpose of the amendment?

Mr. WILLIAMS. The bill as it now reads states that—

> In case any officer or employee shall have been separated subsequent to January 23, 1942, and prior to effective date of this act, and have acquired title to annuity under section 7 of the act of May 29, 1930, as amended, beginning after such effective date, such annuity shall be computed as if this act had not been enacted.

What I am proposing to do is to say that in the case of those persons who had an equity under section 7, as the act now stands, their annuity must be computed under the new formula. That merely removes from those who have been separated from the service on an involuntary basis the privilege of being granted a 25-percent approximate increase to their pension due to the fact that they were involuntarily severed. I might say that there are 75,800 such annuitants who are now waiting, who left the service last year, and according to the Civil Service Commission they were eligible to receive an annuity under section 7 of the old act upon reaching retirement age. I merely propose under this amendment that those annuities shall be computed under the new formula.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Delaware to the amendment in the nature of a substitute.

Mr. TAFT. Mr. President, I am not perfectly certain of the effect of the amendment, but I am willing to have it placed in the bill and be taken to conference with the House conferees and there worked out.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment.

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. Are there further amendments to be presented to the substitute amendment?

Mr. BYRD. Mr. President, I call attention to the fact that there are 16 different pension systems in the Federal Government, and I express the hope that the Post Office and Civil Service Committee will conduct an investigation with respect to that situation and make a recommendation to the Congress. I will name the 16 retirement systems. They are as follows:

First, Civil-service; Panama Railroad.
Second. Canal Zone.
Third. Alaska Railroad.
Fourth. Foreign Service.
Fifth. Federal Reserve.
Sixth. Tennessee Valley Authority.
Seventh. Comptroller of the Currency.
Eighth. Civilian Teachers at Naval Academy.
Ninth. District of Columbia teachers.
Tenth. District of Columbia policemen and firemen.
Eleventh. Federal judiciary.
Twelfth. Judiciary of Federal Territories and possessions.
Thirteenth. Construction period workers, Panama Canal.
Fourteenth. Canal Zone employees, disabled.
Fifteenth. District of Columbia judges.
Sixteenth. Panama Railroad, disabled.

It seems to me that some study should be made so as to consolidate, if possible, the various retirement systems into the regular system.

Mr. LANGER. Mr. President, I might say to the distinguished Senator from Virginia that at the beginning of the drafting of the bill we did consider that subject, but the railroad men did not wish to come in. The result is we did not investigate any other systems, but decided to complete the bill. I can assure the Senator from Virginia that a full and complete investigation of the subject will be made at the present session of Congress.

Mr. BYRD. I thank the Senator from North Dakota.

Mr. LANGER. I am delighted that the Senator from Virginia has called the attention of the Senate and the country to the situation.

The PRESIDENT pro tempore. Are there any further amendments to be offered to the substitute amendment?

Mr. WILLIAMS. Mr. President, I offer an amendment which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. On page 10, after the colon in line 19, it is proposed to insert the following: *"Provided*, That no such increase shall (1) exceed an amount which, when added to the present annuity of any such officer or employee, exceeds the amount of annuity which such officer or employee would have received had the provisions of this act been in effect at the date of his retirement, or (2) be payable in any case in which the present annuity of any such officer or employee exceeds the amount of annuity which such officer or employee would have received had such provisions been in effect on such date."

Mr. WILLIAMS. Mr. President, this amendment merely proposes that any annuitant who is now on the rolls shall not be eligible for an increase if such increase brings his pension over and above that which would be allowed under the proposed act. It was recognized by some that there are bound to be inequities in the change-over under the new bill. The amendment merely irons out those inequities as they arise. In other words, a man who now receives an annuity will not be eligible except for that portion of the increase which would bring him up to the amount allowed under the new act.

Mr. TAFT. Mr. President, I do not think the amendment is necessary, but I am perfectly willing to have it inserted in the bill.

The PRESIDENT pro tempore. The question is on agreeing to the amendment to the amendment in the nature of a substitute.

The amendment to the amendment was agreed to.

Mr. WILLIAMS. Mr. President, I offer another amendment which I send to the desk and ask to have stated.

The PRESIDENT pro tempore. The amendment to the amendment will be stated.

The CHIEF CLERK. At the end of the bill it is proposed to insert a new section as follows:

SEC. —. (a) There is hereby created a joint committee to be composed of (1) three Members of the Senate, one from the Committee on Post Office and Civil Service, one from the Committee on Finance, and one from the Committee on Appropriations, to be appointed by the President of the Senate, and (2) three Members of the House of Representatives, one from the Committee on Post Office and Civil Service, one from the Committee on Ways and Means, and one from the Committee on Appropriations, to be appointed by the Speaker of the House of Representatives.

(b) It shall be the duty of the joint committee to make a full and complete study of all retirement systems applicable to officers and employees of the United States (including military and naval personnel), with a view to ascertaining the extent to which such systems should be revised or combined, and to report to the Senate and the House of Representatives at the earliest practicable date the results of such study, together with its recommendations.

(c) Vacancies in the membership of the joint committee shall not affect the power of the remaining members to execute the functions of the joint committee, and shall be filled in the same manner as in the case of the original selection. The joint committee shall select a chairman and a vice chairman from among its members.

(d) The joint committee, or any duly authorized subcommittee thereof, is authorized to hold such hearings, to sit and act at such places and times, to require, by subpena or otherwise, the attendance of such witnesses and the production of such books, papers, and documents, to administer such oaths, to take such testimony, to procure such printing and binding, and to make such expenditures as it deems advisable. The cost of stenographic services to report such hearings shall not be in excess of 25 cents per hundred words. The provisions of sections 102 to 104, inclusive, of the Revised Statutes shall apply in case of any failure of any witness to comply with a subpena or to testify when summoned under authority of this section.

(e) The joint committee is empowered to appoint and fix the compensation of such experts, consultants, technicians, and clerical and stenographic assistants as it deems necessary and advisable, but the compensation so fixed shall not exceed the compensation prescribed under the Classification Act of 1923, as amended, for comparable duties. The committee is authorized to utilize the services, information, facilities, and personnel of the departments and establishments of the Government.

Mr. TAFT. Mr. President, the amendment speaks for itself. I think the general spirit of the La Follette-Monroney Act was not to set up any more committees than were provided for by that act, and that if any committees were to be proposed the proposal should come to the Committee on Rules and Administration. Special committees have been provided for, and the procedure is to submit the matter to the Committee on Rules and Administration. The amendment makes a proposal for the establishment of a joint committee. The proposal has not gone to the Committee on Rules and Administration. It has never been submitted to the Post Office and Civil Service Committee. I should hesitate very much to set up on top of our existing committee structure another joint committee. It is true that probably a study of the matter involved should be made. The funds in question are quite numerous. However, altogether the whole 12 funds, I understand, cover only about 1½ percent of the employees, and the 98½ percent are under the general system we have been considering. It seems to me it is unnecessary to set up a new joint committee with a new joint staff, which would be expensive, and particularly without adequate consideration by the Committee on Rules and Administration or by any standing committee of the Senate.

Mr. WILLIAMS. Mr. President, generally speaking I would agree with the Senator from Ohio as to the objections to setting up a special committee, because I think it is true that perhaps many of these conditions could be worked out in the regular Senate committees and committees of the House. But the truth of the matter is that that has not been done. We have before us here a major change in the retirement legislation. We are trying to work it out on the floor when it should have been worked out in the committees. In order to show how this retirement legislation has been worked out in committees, and why there has been so much confusion regarding the cost of the particular provision in question, I wish to read from a letter which I hold in my hand.

This letter is dated March 13, 1947, signed by Mr. R. R. Reagh, the Government actuary of the Treasury Department, addressed to Mr. Riley, staff director of the Senate Committee on Post Office and Civil Service. In this letter Mr. Reagh points out a possible $200,000,000 cost for Senate bill 637.

Again, on May 9, 1947, in a letter from Mr. Arthur S. Flemming, Acting President of the Civil Service Commission, addressed to the Chairman of the Post Office and Civil Service Committee, he

estimated the cost as being negligible. I quote from the letter:

> The committee will appreciate, I am sure, that there is no current precise statistical data upon which to base a firm estimate of cost under this or any other proposal with regard to retirement; but with the facts available to us it is our judgment that the liberalized provisions are balanced by modifications elsewhere in the bill, plus, of course, increased contributions of 1 percent made by the Federal employees.

In other words, it was his opinion on May 9, 1947, that there would be no appreciable cost. The same error was repeated in the committee report.

Five days later, on May 14, 1947, a letter was written, signed by George Buck, the same Mr. Reagh and Mr. Edward Thacker, who were consulting actuaries for the Civil Service Commission. In this letter they stated that the cost would be $109,000,000. That was 5 days after the statement that the bill would not cost anything.

We ran into a little trouble on the question of the cost of the bill before the Senate. For that reason I objected to it and insisted upon realistic estimates before any further action. A month later, on June 9, 1947, there was another letter, written by one Harry B. Mitchell, President of the Civil Service Commission, addressed to the Senator from North Dakota [Mr. LANGER], in which the cost of the same retirement bill was estimated at $39,160,000.

On July 22, 1947, I asked the Bureau of the Budget if it could not straighten us out as to the cost of the bill. I have a letter signed by Mr. James E. Webb, Director of the Bureau of the Budget. This time he agreed with the actuaries that the cost of the bill would be $39,160,000. Those are the only two letters that agree.

Two days later, on July 24, 1947, I received another letter from the Civil Service Commission. Apparently in order to get the bill through the last session of Congress the estimate had been revised down to $15,000,000. Bear in mind that in the meantime no amendment to the bill had been submitted which could account for these discrepancies.

On January 16, of this year, in connection with the same bill, the Civil Service Commission made another estimate. This time its estimate was $84,000,000.

We are endeavoring on the floor of the Senate to pass a piece of legislation which the Senator from Ohio now says is supposed to cost us about $42,000,000, yet at the same time we are told that the cost of this bill is $60,000,000 cheaper than the cost of the bill which the Senate Post Office and Civil Service Committee had been claiming would not cost anything.

I think it is time for some committee to go to work on retirement legislation. It has been pointed out by the Senator from Virginia that we have 16 different retirement systems in the Federal Government. They are administered by 11 different agencies. I have a copy of every one of these retirement systems. We have some retirement systems with a complete organization to administer the affairs of as few as 175 Government employees. It is costing more to administer some of the funds than the annuitants are receiving from them. I think it is time for Congress to make a study of the problem. Such a study has not been made in our committee. We have been too much concerned with getting a piece of legislation which will not cost anything and at the same time materially increase present benefits.

I have reviewed most of the retirement legislation for the past 14 years, and I have yet to find a single piece of legislation which has been passed with respect to which it was stated that it would cost any appreciable amount. Notwithstanding that fact, on various occasions we have doubled and trebled the obligations of the Government. In 1945 we passed retirement benefits for Members of Congress. At that time it was stated that the system would not cost the Government any money; yet every Member of Congress in computing his pension, was given benefits for all the years he served in Congress. It was not going to cost the Government anything; and at the same time it was stated that a Member of Congress did not need to pay anything back.

Mr. President, I urge that my amendment be agreed to, and that a special committee be established to study the various retirement systems, perhaps with the thought of consolidating them into one system, to insure uniformity, to insure economy in administration, and to remove the remaining inequities not removed by the bill now under consideration. To do this the joint committee would secure experts on insurance and retirement from outside sources.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Delaware [Mr. WILLIAMS] to the Taft amendment in the nature of a substitute.

Mr. LANGER. Mr. President, I think it is due the Civil Service Commission and the United States Senate that I should make the statement that the Civil Service Commission has cooperated wholeheartedly with our committee. Time and time again Mr. Irons gave us estimates of cost. Over a period of several months we asked for various estimates. We asked for estimates based upon one and a half million employees, two million employees, and two and a half million employees. We asked for estimates based upon a retirement fund of 1 percent, 1½ percent, 1¼ percent, and 2 percent. So far as I know, all the letters which were received by our committee were honest expressions of the Civil Service Commission, and I wish to say publicly that I think the Commission is doing a fine job.

Mr. TAFT. Mr. President, I wish to point out one further reason why I think we should not create more joint committees than we already have. There are no rooms left in which any new committee could find space to live. We have reached the point where I do not believe we should create any new committees unless we abolish some of the old ones. Unless there is some very strong reason for it, I do not believe that we should create new committees.

Furthermore, this is largely a technical actuarial subject. If such a study as has been suggested is to be made, it ought to be made in the first instance by the executive department of the Government. If the Senator from Delaware will introduce a measure directing some existing Government bureau to make the study, or establishing some agency to do it, such a proposal might be proper. If he does not like the Civil Service Commission, he might propose that the Bureau of the Budget or some other agency make this study. Such a study would seem to me to be more within the scope of the ability of the executive department than that of Congress. However, I believe that we ought not to create another joint committee at this time.

Mr. WILLIAMS. Mr. President, I certainly will not sponsor a resolution creating another Government bureau.

A further example of the inefficient and biased advice we have received from the Civil Service Commission on all these proposals is revealed in the discussion to eliminate the so-called tontine payment, which is a deduction of $1 a month from the salary of all Government employees. All the testimony which was given before our committee by officials of the Commission was to the effect that its cancellation would not cost anything. This is another example of misleading testimony inexcusable in any competent Government official.

I read from a letter signed by Mr. Arthur S. Flemming, a member of the Civil Service Commission, under date of May 9. The letter is addressed to the chairman of the Senate Civil Service Committee, and in it Mr. Flemming states:

> This charge of $1 per month levied against each Federal employee has been an administrative problem ever since its inception. It is grossly unfair, in that the $1 per month is charged against the account of the low-salaried employee as well as the high-salaried employee. When full account is taken of the administrative handling charges, there is actually little net gain in income to the fund. Administration of the act by the agencies and by the Commission will be greatly simplified by the elimination of the tontine.

All the testimony which was given before the committee—and I think the chairman of the committee will agree with me—was to the effect that the elimination of the $1 a month so-called tontine charge would not change the cost of the bill, yet in another letter dated July 13, 1947, signed by Harry B. Mitchell, President of the Civil Service Commission—

> I was advised that the income from this tontine charge during the last year (1946) was $16,809,186.30.

Yet, Arthur Flemming, his associate member, says that it is a negligible amount, and that we can eliminate a $16,000,000 income without making any appreciable difference in the cost of the bill. My argument is that if we reduce that income, we must increase the appropriations to offset it. I agree that it would be much better and simpler to eliminate that charge and figure it in the percentage cost. I am not opposing the elimination of the tontine charge, but I do say that we should squarely recognize the cost. Yet prior to this letter representatives of the Civil Service Commission appeared before our committee, and the testimony was to the effect that such a provision would not cost anything.

The net income for the past 12 years has been more than $47,000,000. I have very little respect for the advice of any official in the Civil Service Commission who regards $47,000,000 as a negligible amount.

The Senator from North Dakota [Mr. LANGER] has spoken of the cooperation of Mr. Irons, the Chief of the Civil Service Commission retirement fund. Notwithstanding the fact that Mr. Irons appeared before our committee and testified that the bill would cost nothing, during the summer months he has been campaigning all over the country for this piece of legislation, a fact which I think should be called to the attention of the Department of Justice. I wish to read a part of one of his speeches. In speaking before a group on this retirement bill Mr. Irons said:

> It is not the most generous survivorship program that can be reasonably designed, but the important thing, I think, is to get that principle across in legislation, to get it a firm part of the Retirement Act. There are other years coming. There will be more generous Congresses in the future.

Apparently he is going to help see to it that more liberal-minded men come to Congress. It appears to me that it is a violation of law for any official of any Government executive agency to go about the country lobbying for a piece of legislation. That is particularly true when he has appeared before the committee and has given false testimony on the bill.

I think it is time to establish a special committee to study this subject.

The PRESIDENT pro tempore. The question is on agreeing to the amendment offered by the Senator from Delaware to the amendment in the nature of a substitute offered by the Senator from Ohio.

Mr. CHAVEZ. Mr. President, I should like to make one point clear. The bill is simple in its application and purpose. There are only two things involved in the entire picture.

Of necessity the bill had to be a technical bill; but the only two things involved are, first, whether we are willing to allow the Government employee, when he retires, to receive an extra $300 a year. That is a simple question.

The next point, which deals with a liberalization of the old law, is whether a widow should be allowed to collect what the husband, when he was an annuitant, would receive, and whether the dependent children would be involved.

The rest of the provisions relate to what class of employees will receive the benefits of the bill. They are technical provisions. Those are the principal things involved.

The PRESIDENT pro tempore. The question is on agreeing to the amendment submitted by the Senator from Delaware [Mr. WILLIAMS].

The amendment to the amendment was rejected.

The PRESIDENT pro tempore. The question is on agreeing to the amendment in the nature of a substitute submitted by the Senator from Ohio [Mr. TAFT].

The amendment to the amendment was agreed to.

The PRESIDENT pro tempore. The question is on agreeing to the committee amendment, as amended.

The committee amendment, as amended, was agreed to.

The PRESIDENT pro tempore. The Chair lays before the Senate a bill coming from the House of Representatives, which will be stated by title.

The CHIEF CLERK. A bill (H. R. 4127) to amend the Civil Service Retirement Act of May 29, 1930, as amended.

Mr. WHERRY. Mr. President, I move that the Senate proceed to consider the House bill.

The motion was agreed to, and the Senate proceeded to consider the bill.

Mr. WHERRY. I move to strike out all after the enacting clause of the bill, and in lieu thereof to insert the text of Senate bill 637, as amended.

The motion was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill (H. R. 4127) was read the third time and passed.

Mr. WHERRY. I move that the Senate insist on its amendment, request a conference with the House of Representatives thereon, and that the Chair appoint the conferees on the part of the Senate.

The motion was agreed to; and the President pro tempore appointed Mr. LANGER, Mr. BALDWIN, Mr. TAFT, Mr. CHAVEZ, and Mr. JOHNSTON of South Carolina conferees on the part of the Senate.

The PRESIDENT pro tempore. Without objection, Senate bill 637 is postponed indefinitely.

Mr. WHERRY. Mr. President, I ask unanimous consent that House bill 4127 be printed, showing the Senate amendment.

The PRESIDENT pro tempore. Is there objection? The Chair hears none, and it is so ordered.

BOARD OF VISITORS TO UNITED STATES NAVAL ACADEMY

The PRESIDENT pro tempore. Under the statute it is necessary to name four Members of the Senate to the Board of Visitors of the United States Naval Academy. On the recommendation of the chairman of the Committee on Armed Services, the Chair appoints the Senator from Wyoming [Mr. ROBERTSON], the Senator from Massachusetts [Mr. SALTONSTALL], the Senator from Maryland [Mr. TYDINGS], and the Senator from Virginia [Mr. BYRD].

THE ST. LAWRENCE SEAWAY

Mr. WHERRY. Mr. President, I ask unanimous consent that after the calendar is called on Monday next, Calendar No. 862, Senate Joint Resolution 111, approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin, be made the unfinished business.

The PRESIDENT pro tempore. Without objection, the order is made.

CONTROL OF WEAPONS OF MASS DESTRUCTION

Mr. McMAHON. Mr. President, I quote very briefly from an Associated Press story appearing in the last edition of the Washington Star under today's date:

> LONDON, January 23.—Winston Churchill declared today western Europe must unite quickly and demand a show-down with the Soviet Union before the Russians develop atomic weapons, possibly in a year or so.
>
> "Even an early show-down would not guarantee that war would not come," Churchill said, but:
>
> "I believe it would give the best chance of preventing it and, if it came, we would have the best chance of coming out of it alive.
>
> "I believe the best chance of preventing war is to bring matters to a head and come to a settlement with the Soviet Government before it is too late," Mr. Churchill told the House of Commons.
>
> "You may be sure the present situation cannot last. There are very grave dangers in letting everything run on and pile up until something happens and the matter passes all of a sudden out of your control."

Mr. President, I read these words with a deep sense of conviction that the former Prime Minister of Great Britain spoke words of prophecy when he made the statement which I have quoted.

Last May I addressed the Senate and pointed out, in connection with the problem of the peace, the importance of the control of weapons of mass destruction, and that unless and until complete and effective control of weapons of mass production was accomplished we were attacking the effects of the tragic situation in the world today and not the causes thereof.

I shall support aid for the stricken countries of Europe, but when I do so I shall be under no illusion that, successful though the program may be, we shall have accomplished the laying of a safe foundation of a peaceful society and a peaceful world as long as an atomic armament race is being engaged in by the two great powers of the earth.

I went on to point out last May, as the former Prime Minister of Great Britain points it out today, that unless we successfully conclude an arrangement for the control of weapons of mass destruction we are facing and proceeding straight to World War III. If, in engaging upon the Marshall program, so called, we are under any illusion that we are doing anything else except taking an important step toward the accomplishment of peace, and not striking at the hub of the matter, we shall be in error.

At a future time and on a future occasion I shall address the Senate on what I believe is necessary for the supplementation of the Marshall program, but I think it is well for the Senate and for the country and the Congress to have in mind now the basic fact which cannot be too much emphasized, that as long as this arms race proceeds, anything else we do to bring about the peace is preliminary.

EXECUTIVE SESSION

Mr. WHERRY. I move that the Senate proceed to the consideration of executive business.

The motion was agreed to; and the Senate proceeded to the consideration of executive business.

EXECUTIVE MESSAGES REFERRED

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

EXECUTIVE REPORT OF A COMMITTEE

The following favorable report of a nomination was submitted:

By Mr. BUCK, from the Committee on the District of Columbia:

Guy Mason, of the District of Columbia, to be a Commissioner of the District of Columbia for a term of 3 years, and until his successor is appointed and qualified.

The PRESIDENT pro tempore. If there be no further reports of committees, the clerk will proceed to state the nominations on the calendar.

THE ARMY

The legislative clerk proceeded to read sundry nominations in the Army.

Mr. GURNEY. I ask that the nominations be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations in the Army are confirmed en bloc.

THE NAVY

The legislative clerk proceeded to read sundry nominations in the Navy.

Mr. GURNEY. I ask that the nominations in the Navy be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations in the Navy are confirmed en bloc.

THE AIR FORCE

The legislative clerk proceeded to read sundry nominations in the Air Force.

Mr. GURNEY. I ask that the nominations in the Air Force be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations are confirmed en bloc.

THE MARINE CORPS

The legislative clerk proceeded to read sundry nominations in the Marine Corps.

Mr. GURNEY. I ask that the nominations be confirmed en bloc.

The PRESIDENT pro tempore. Without objection, the nominations in the Marine Corps are confirmed en bloc.

Mr. GURNEY. Mr. President, I ask that the President be immediately notified of the confirmation of these nominations.

The PRESIDENT pro tempore. Without objection, the President will be notified forthwith.

ORDER OF BUSINESS

Mr. GURNEY. Mr. President, I should like to direct a question to the senior Senator from Ohio. Our committee has been importuned to secure as rapid action as is possible on two small bills. I believe I previously notified the Senator of our interest in them. I understand the St. Lawrence seaway matter is going to be considered next week, and I wondered what chance there would be for consideration on Monday.

Mr. TAFT. I have no particular feeling about it. I think perhaps we ought to have a little notice, however, that the bills are coming up. That is my only reservation.

Mr. GURNEY. Then at this time I wish to mention the two bills which I should like to have called up on Monday. The first is the procurement bill. The other one would modify the provisions of the Vinson-Trammell Act in regard to the purchase of materials for the Navy and the Air Force.

Mr. WHERRY. Mr. President, prior to the suggestion made just now by the Senator from South Dakota, the St. Lawrence seaway joint resolution was made the unfinished business for Monday. Of course, the Senator from South Dakota has a perfect right to move that these other bills be brought up first on Monday, temporarily displacing the St. Lawrence seaway measure. But since the chairman of the Judiciary Committee is not in the Chamber at this time, I wonder whether the Senator from South Dakota will withhold his request until Monday.

Mr. GURNEY. I do not believe it is necessary to make a formal request in regard to these bills, but I simply give notice of a desire to have them taken up for consideration as soon as possible. They are Calendar No. 597 and Calendar No. 657.

Mr. AIKEN. Mr. President, a week ago I asked to have the procurement bill passed over, during the call of the calendar, because other departments of the Government, particularly the Treasury procurement service, felt they should have the right to make purchases in emergency conditions in the same way that the armed services might have. However, I understand that the Comptroller General objects to having the procurement service given that right, and really is not enthusiastic about having the armed services given it.

In view of that situation, and inasmuch as I am not able to spend the necessary time in endeavoring to work out amendments and have them adopted, or possibly rejected, I shall not object to having the procurement bill acted upon at any time the Senate sees fit to take action upon it.

Mr. TAFT. Mr. President, I suggest that possibly the St. Lawrence seaway legislation will not consume all Monday afternoon; so probably after the termination of the consideration of that legislation on Monday, there will be an hour or so during which it will be possible to consider the two bills mentioned by the Senator from South Dakota.

Also there is another bill, I believe.

Mr. WHERRY. Mr. President, I would prefer not to have other bills brought into the picture at this time, until we determine what we shall do in regard to the St. Lawrence seaway measure. I submit that the proper time to bring up other bills will be on Monday afternoon, after we begin to consider the unfinished business, the St. Lawrence seaway joint resolution.

Mr. REVERCOMB. Mr. President, did I correctly understand the Senator from Ohio to say that the St. Lawrence seaway legislation will not consume very much time?

Mr. TAFT. My understanding is that on the first day of the consideration of such measures, Senators very often run out of speeches at about 5 o'clock in the afternoon.

Mr. REVERCOMB. In other words, the Senator from Ohio does not think the Senate will take final action on the St. Lawrence seaway joint resolution on Monday?

Mr. TAFT. I do not.

THE UNTIMELY ENDS OF MY SENATOR FRIENDS—POEM BY HORACE C. CARLISLE

Mr. CAPPER. Mr. President, I send to the desk and ask unanimous consent that there be printed at this point in the RECORD, a poem by Horace C. Carlisle entitled "The Untimely Ends of My Senator Friends."

There being no objection, the poem was ordered to be printed in the RECORD, as follows:

THE UNTIMELY ENDS OF MY SENATOR FRIENDS

"The path of the just is as the shining light that shineth more and more unto the perfect day."

These dear Senators who have now passed from my view
Out into the great Unknown Beyond,
All of them loved this life, with its struggle and strife,
But when Death called they had to respond—
And, tho these have all gone, still the Senate runs on,
Little changed by the passing of years,
As they sweep swiftly by, to where past ages lie,
Undeterred by life's turmoils and tears.

In their faces, now gone, their sweet characters shone
With a beauty that can't be expressed,
As they toiled on and on, toward the eternal dawn,
Without taking time for needed rest.
All of these, whom I knew, bade the Senate adieu,
To re-live in the sweet by-and-by—
And they all I've enshrined in the heart of my mind,
There to stay till I meet them on high.

Underwood, Harrison, Blease, and Sheppard are gone—
I saw Fletcher and Trammell both pass—
I saw death still the tongue of Maloney and Long,
Johnson, Norris, McNary, and Glass—
And, from this life below, I saw Bailey, Bilbo,
Bankhead, and Andrews, too, slip away—
In the harness they died, by their works glorified,
And the Senate mourns them to this day.

—*Horace C. Carlisle.*

ADJOURNMENT TO MONDAY

Mr. WHERRY. Mr. President, I move that the Senate adjourn until 12 o'clock noon on Monday next.

The motion was agreed to; and (at 2 o'clock and 51 minutes p. m.) the Senate adjourned until Monday, January 26, 1948, at 12 o'clock meridian.

Maj. Gen. William P. T. Hill to be Quartermaster General of the Marine Corps with the rank of major general, for a period of 2 years from February 1, 1948.

Maj. Gen. Thomas E. Watson to have the grade, rank, pay, and allowances of lieutenant general in the Marine Corps while serving as commanding general, Fleet Marine Force, Pacific.

SENATE

MONDAY, JANUARY 26, 1948

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

O God our Father, we pray that the people of America, who have made such progress in material things, may now seek to grow in spiritual understanding.

For we have improved means, but not improved ends. We have better ways of getting there, but we have no better places to go. We can save more time, but are not making any better use of the time we save.

We need Thy help to do something about the world's true problems—the problem of lying, which is called propaganda; the problem of selfishness, which is called self-interest; the problem of greed, which is often called profit; the problem of license, disguising itself as liberty; the problem of lust, masquerading as love; the problem of materialism, the hook which is baited with security.

Hear our prayers, O Lord, for the spiritual understanding which is better than political wisdom, that we may see our problems for what they are. This we ask in Jesus' name. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 26, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. FORREST C. DONNELL, a Senator from the State of Missouri, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. DONNELL thereupon took the chair as Acting President pro tempore.

ATTENDANCE OF A SENATOR

GUY CORDON, a Senator from the State of Oregon, appeared in his seat today.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Friday, January 23, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT

Messages in writing from the President of the United States submitting nominations were communicated to the Senate by Mr. Miller, one of his secretaries.

MESSAGE FROM THE HOUSE—ENROLLED BILLS SIGNED

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the Speaker had affixed his signature to the following enrolled bills, and they were signed by the Acting President pro tempore:

S. 84. An act for the relief of Mrs. Clinton R. Sharp;

S. 99. An act for the relief of John T. Hollandsworth, Jr.;

S. 136. An act for the relief of Ioannis Stephanes;

S. 166. An act for the relief of Anna M. Kinat (Mrs. John P. Taylor);

S. 167. An act for the relief of Mrs. Yoneko Nakazawa;

S. 185. An act for the relief of Thomas Abadia;

S. 186. An act for the relief of Santiago Naveran;

S. 187. An act for the relief of Antonio Arguinzonis;

S. 189. An act for the relief of Simon Fermin Ibarra;

S. 190. An act for the relief of Pedro Ugalde;

S. 191. An act for the relief of Julian Uriarte;

S. 192. An act for the relief of Juan Llona;

S. 258. An act for the relief of Troy Charles Davis, Jr.;

S. 298. An act for the relief of certain Basque aliens;

S. 339. An act for the relief of Lucy Jefferson Weil;

S. 851. An act for the relief of Belmont Properties Corp.;

S. 929. An act to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564);

S. 944. An act for the relief of Oran Curry;

S. 957. An act for the relief of Col. William J. Kennard;

S. 1020. An act to amend the Philippine Rehabilitation Act of 1946, as amended;

S. 1039. An act for the relief of Ada B. Foss;

S. 1043. An act for the relief of Frank J. Shaughnessy, collector of internal revenue, Syracuse, N. Y.;

S. 1324. An act to amend the Civil Service Retirement Act so as to make such act applicable to the officers and employees of the National Library for the Blind; and

S. 1579. An act for the relief of Damian Gandiaga.

ORGANIZATION OF CONGRESS—COMMITTEE HEARINGS

Mr. AIKEN. Mr. President, I wish to announce that beginning next Monday, February 2, the Committee on Expenditures in the Executive Departments will hold hearings on the Legislative Reorganization Act. We are conducting these hearings in connection with the performance of the duty laid upon us by the act itself of "evaluating the effects of laws enacted to reorganize the legislative and executive branches of the Government."

We have scheduled meetings for this purpose for Monday morning, February 2, Tuesday morning and afternoon, and Wednesday morning, and have invited a number of witnesses to appear because of their known special interest in the act, or because of the congressional offices which they hold. I am sure that there are many others, both Members of Congress and private citizens, who have followed closely the operation of the act, and whose comments on its effectiveness to date and suggestions for further improving congressional organization and procedure would be of great value to the committee. I wish to take this opportunity of inviting all such persons to make known to the committee their interest in testifying at this series of hearings. Our schedule for the first 3 days is fairly full, but we shall certainly give everyone who expresses an interest an opportunity to be heard before the hearings are concluded.

PUBLIC HEARINGS BY SUBCOMMITTEE ON ROADS OF COMMITTEE ON PUBLIC WORKS ON S. 1954

Mr. COOPER. Mr. President, I wish to take this opportunity to announce that the Subcommittee on Roads of the Committee on Public Works will begin public hearings on Monday, February 2, 1948, at 10 a. m., on Senate bill 1954, "to amend and supplement the Federal-Aid Road Act, approved July 11, 1916, as amended and supplemented, and for other purposes." All interested parties will be afforded an opportunity to be heard on the provisions of the bill. Witnesses are requested to file with the committee written statements of their proposed testimony at least 1 day in advance of the hearings. The hearings will be held in the committee room of the Senate Committee on Public Works, 412 Senate Office Building.

MEETING OF SUBCOMMITTEE OF THE POST OFFICE AND CIVIL SERVICE COMMITTEE

Mr. LANGER. Mr. President, I ask unanimous consent that a subcommittee of the Post Office and Civil Service Committee may be permitted to meet this afternoon, because unexpectedly a number of individuals came down from New York to give testimony before the subcommittee.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

Training of Foreign Nationals

A letter from the Acting Secretary of State, transmitting a draft of proposed legislation to authorize the President to permit nationals of other nations to receive instruction and training in schools, training establishments, ships, units, and other installations maintained or administered by the Department of the Army, the Department of the Navy, the Department of the Air Force, or the United States Coast Guard (with an accompanying paper); to the Committee on Armed Services.

Report on Operations Under Synthetic Liquid Fuels Act

A letter from the Secretary of the Interior, transmitting, pursuant to law, his report on operations under the Synthetic Liquid Fuels Act, for the period January 1 to December 31, 1947 (with an accompanying report); to the Committee on Public Lands.

Report of Franklin D. Roosevelt Library

A letter from the Archivist of the United States, transmitting, pursuant to law, the eighth annual report on the Franklin D. Roosevelt Library for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Rules and Administration.

Report of National Archives Trust Fund Board

A letter from the Chairman of the National Archives Trust Fund Board, transmitting, pursuant to law, the annual report of that Board for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on Post Office and Civil Service.

Report of Operations of the Government of the District of Columbia

A letter from the President of the Board of Commissioners of the District of Columbia, transmitting, pursuant to law, a report of the operations of the government of the District of Columbia for the fiscal year ended June 30, 1947 (with an accompanying report); to the Committee on the District of Columbia.

Report of Federal Home Loan Bank Administration, Etc.

A letter from the Chairman of the Federal Home Loan Bank Administration, transmitting, pursuant to law, the fifteenth annual report of that Administration, covering reports of all its constituent units, the Federal Home Loan Bank System, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation, for the fiscal year 1947 (with an accompanying report); to the Committee on Banking and Currency.

PETITION

The ACTING PRESIDENT pro tempore laid before the Senate a resolution adopted by the State Water Resources Board of California, Sacramento, Calif., favoring an appropriation of $52,181,000 for construction of federally authorized flood-control projects in California, which was referred to the Committee on Public Works.

INDIAN RESERVATIONS—RESOLUTION OF ANCHORAGE CHAMBER OF COMMERCE

Mr. BUTLER. Mr. President, I present for appropriate reference, a resolution adopted by the directors of the Anchorage Chamber of Commerce, relating to Indian reservations, and I ask unanimous consent that it may be printed in the RECORD.

There being no objection, the resolution was referred to the Committee on Public Lands, and ordered to be printed in the RECORD, as follows:

Whereas Senators H. BUTLER (Nebraska) and ARTHUR V. WATKINS (Utah) on December 4, 1947, introduced in the Eightieth Congress, first session, Senate Joint Resolution 162, which, if enacted, would rescind the authority of the Secretary of the Interior to establish Indian reservations at Akutak, Karluk, Wales, Unalakleet, and Venetie, or any other Indian reservation in the Territory of Alaska, and would also rescind the authority of the Secretary of the Interior to make Indian reservations in the future;

Whereas this resolution would settle, once and for all, the question of aboriginal titles in Alaska;

Whereas documents pertaining to the transfer of Alaska from Russia to the United States, and actions of the United States Government throughout the 80 years of American ownership of Alaska, have not and do not recognize the rights of natives based on the use and occupancy of lands in Alaska;

Whereas the development of Alaska has been and is now deterred and impeded in that no private interests will now risk the financing of any enterprise so long as Alaskan lands remain in their present uncertain condition of turmoil and confusion: Therefore be it

Resolved by the directors of the Anchorage Chamber of Commerce, acting for and in behalf of their members, That Senate joint resolution be endorsed and approved and the authors congratulated on their recognition of one of the foremost problems of the Territory and for their action in initiating legislation which should eliminate it.

———, *President.*

C. J. ABEL, *Secretary.*

BILLS AND JOINT RESOLUTION INTRODUCED

Bills and a joint resolution were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. MAYBANK:

S. 2061. A bill for the relief of Mrs. Goldie Weiner; to the Committee on the Judiciary.

(Mr. THOMAS of Utah (for himself, Mr. PEPPER, Mr. CHAVEZ, Mr. GREEN, Mr. MAGNUSON, Mr. MCGRATH, Mr. MURRAY, Mr. MYERS, Mr. TAYLOR, and Mr. WAGNER) introduced Senate bill 2062, to provide for the amendment of the Fair Labor Standards Act of 1938, and for other purposes, which was referred to the Committee on Labor and Public Welfare, and appears under a separate heading.)

By Mr. CAIN:

S. 2063. A bill to authorize the construction, operation, and maintenance, under Federal reclamation laws, of the Kennewick division of the Yakima project, Washington; to the Committee on Public Lands.

By Mr. McCARTHY:

S. 2064. A bill to authorize the attendance of the United States Marine Corps Band at the national assembly of the Marine Corps League to be held at Milwaukee, Wis., September 22 to 25, inclusive, 1948; to the Committee on Armed Services.

S. 2065. A bill to provide for the payment of national service life insurance benefits in the case of John J. Garot; to the Committee on Finance.

S. 2066. A bill for the relief of Pasch Bros.; and

S. 2067. A bill for the relief of John F. McKenney; to the Committee on the Judiciary.

By Mr. CAPPER:

S. 2068. A bill for the relief of Dr. Benea Sih; to the Committee on the Judiciary.

By Mr. SMITH:

S. 2069. A bill for the relief of Elmer Beller; and

S. 2070. A bill to amend the Judicial Code in respect to the original jurisdiction of the district courts of the United States in certain cases, and for other purposes; to the Committee on the Judiciary.

By Mr. WILSON:

S. 2071. A bill for the relief of Frank F. Miles; to the Committee on the Judiciary.

By Mr. BRIDGES:

S. 2072. A bill to amend the act entitled "An act to codify and enact into positive law title 17 of the United States Code entitled 'Copyrights,'" approved July 30, 1947; to the Committee on the Judiciary.

S. 2073. A bill to provide for a temporary embargo on petroleum and petroleum products; to the Committee on Interstate and Foreign Commerce.

By Mr. VANDENBERG:

S. J. Res. 177. Joint resolution providing for participation by the Government of the United States in the Pan American Railway Congress, and authorizing an appropriation therefor; to the Committee on Foreign Relations.

AMENDMENT TO FAIR LABOR STANDARDS ACT RELATING TO MINIMUM WAGE

Mr. THOMAS of Utah. Mr. President, on behalf of myself, the Senator from Florida [Mr. PEPPER], the Senator from New Mexico [Mr. CHAVEZ], the senior Senator from Rhode Island [Mr. GREEN], the Senator from Washington [Mr. MAGNUSON], the junior Senator from Rhode Island [Mr. McGRATH], the Senator from Montana [Mr. MURRAY], the Senator from Pennsylvania [Mr. MYERS], the Senator from Idaho [Mr. TAYLOR], and the Senator from New York [Mr. WAGNER], I introduce for appropriate reference a bill dealing with the subject of the minimum wage, and I ask unanimous consent that I may make a brief explanatory statement of the bill.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred, and, without objection, the Senator may proceed.

The bill (S. 2062) to provide for the amendment of the Fair Labor Standards Act of 1938, and for other purposes, introduced by Mr. THOMAS of Utah (for himself, Mr. PEPPER, Mr. CHAVEZ, Mr. GREEN, Mr. MAGNUSON, Mr. McGRATH, Mr. MURRAY, Mr. MYERS, Mr. TAYLOR, and Mr. WAGNER), was received, read twice by its title, and referred to the Committee on Labor and Public Welfare.

Mr. THOMAS of Utah. Mr. President, in introducing this bill to amend the Fair Labor Standards Act, I am not merely carrying out a routine legislative function. The Fair Labor Standards Act is a cornerstone of the social legislation for which Americans have fought for generations, and it occupies a special place in our history.

The principle behind the wage-hour law was stated by President Franklin D. Roosevelt in his message to the Congress on May 24, 1937. He said:

> A self-supporting and self-respecting democracy can plead no justification for the existence of child labor, no economic reason for chiseling workers' wages, or stretching workers' hours.

When, Congress, almost 10 years ago, enacted the Fair Labor Standards Act, the representatives of all the people agreed for the first time in our history that there would be at least a bare minimum which a man must be paid for his work. They defined a general maximum working week and provided that work in excess of that maximum receive special compensation.

Today, the act is still on the books, but its purpose has been to a great degree negated. The passage of years, a war, and resulting inflation have combined to render the 40-cent minimum completely meaningless. Those 40 cents today will buy barely half as much food as they did when the law was passed. And over half of our working population is still excluded from the benefits of the act.

The time is long overdue for action to change this law from a historical landmark to a living reality. Wage-hour legislation was originally conceived as a continuous and expanding process. Standards set up were to be extended and improved to match the growth of the Nation. President Roosevelt said, and the Congress then agreed, that we must "take further action to extend the frontiers of social progress" for the benefit of those "who toil in factory and on farm." And it was recognized that the rudimentary standards set up in the act were but a first step.

We have hesitated and we have allowed the minimum wage to be slashed by inflation. To maintain the wage-hour law we must again make it meaningful. In the amendments I am introducing, I have sought to take the next steps in the continuous process by which we will approach not merely bare minimum standards but fair standards.

The bill I am proposing would amend the Fair Labor Standards Act in a number of principal respects:

First. It would raise the minimum wage to 75 cents an hour 120 days after its enactment. It would again put into operation the procedure of the original act whereby industry committees composed of industry, labor, and the public may raise the wage to $1 an hour where this is found feasible. The special procedure for determining wages in Puerto Rico and the Virgin Islands are not changed.

Second. It would broaden the coverage of the minimum wage and overtime provisions by extending these provisions to workers engaged in any activity affecting interstate or foreign commerce. The exemption for employees in retail selling and servicing enterprises is narrowed so that it would not apply to employees in chain stores or department stores. Seamen are granted protection under both the wage and hour provisions. Industries processing agricultural or horticultural commodities or fish are covered by the minimum wage and overtime provisions. Both the seasonal industry exemption and the unworkable area-of-production exemption provisions have been deleted. Employees of motor carriers are covered by the overtime-pay provisions, unless, at the time the work was performed, the Interstate Commerce Commission had set qualifications and maximum hours of service for the covered occupation. The newspaper exemption is the same as in the present act. The telephone-operator exemption is removed so that switchboard operators of all exchanges will be covered by the minimum-wage and overtime provisions. The agriculture exemption is narrowed so that workers on large, industrialized farms—those regularly employing eight or more, not including the children of the farmer—will have the protection of the wage provisions of the act.

Third. It would abolish the exploitation of children in industry and industrialized agriculture. It would do this by directly prohibiting the employment of children in commerce or in the production of goods for commerce and by narrowing the agricultural exemption to the child-labor provisions so that this exemption would not apply to children in industrialized agriculture; that is, to children employed on farms with more than eight employees. I deem it a matter of national shame that we have for so long permitted the narrow coverage of section 12 in the present act to limit the so-called prohibition of child labor to service performed in and about plants producing goods for interstate commerce. By interpretation this has been held to exclude from protection of the act thousands of minors who need and are entitled to such protection. Now the weakest and most necessitous wage earners will be given protection equivalent to the protection which has, for 10 years, been given adults under this act.

Fourth. The definition of "wage" in section 3 (m) is changed to exclude the cost of food and lodging in the calculation of minimum wages for seamen and dining-car employees. This amendment is necessary in order to assure an adequate minimum wage for a group of employees who have no choice in the acceptance of certain subsistence facilities.

I recommend these amendments with the same pride and spirit which I felt when I came before this body years ago in recommending the original Fair Labor Standards Act. It is with a full understanding and thankfulness for the good that has come for the thousands and thousands of people who have benefited by this act that I urge this body to give serious consideration to these proposals which would take us another step toward assuring a secure and full life for our millions of working people.

REDUCTION IN INCOME-TAX PAYMENTS—AMENDMENT

Mr. MAYBANK. Mr. President, I submit an amendment intended to be proposed by me to the bill (H. R. 4790) to reduce individual income-tax payments, and for other purposes. The language of the amendment I am submitting is the same as that used by me in an amendment I submitted to the tax bill in 1944.

The ACTING PRESIDENT pro tempore. The amendment will be received, referred to the Committee on Finance, and printed.

CIVIL SERVICE RETIREMENT BENEFITS—RESIGNATION OF MR. TAFT AS CONFEREE

Mr. TAFT. Mr. President, it has been called to my attention that it appears in the RECORD of the 23d instant that I was appointed a conferee on the part of the Senate on House bill 4127, to amend the Civil Service Retirement Act of May 29, 1930, as amended. I ask unanimous consent that I be relieved from service on the conference committee. I am not a member of the Committee on Post Office and Civil Service, and I do not think it is a wise precedent to go outside the membership of committees sponsoring bills in the appointment of conferees.

The ACTING PRESIDENT pro tempore. The Senator's resignation is noted.

Subsequently, Mr. FLANDERS was appointed a conferee on the part of the Senate on the bill (H. R. 4127) to amend the Civil Service Retirement Act of May 29, 1930, as amended, in place of Mr. TAFT, resigned.

TIVOLI BREWING CO.—INDEFINITE POSTPONEMENT OF A BILL

Mr. WILEY. Mr. President, during a previous call of the calendar I moved for the indefinite postponement of Senate bill 551, a bill for the relief of the Tivoli Brewing Co. It is my information from the clerk of the Committee on the Judiciary that the subject matter of the bill has been settled by a Government department, and the Senator from Michigan is agreeable to having it indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, the bill is indefinitely postponed.

ABBOT LOW MOFFAT—INDEFINITE POSTPONEMENT OF A BILL

Mr. IVES. Mr. President, I ask unanimous consent that the Committee on the Judiciary be discharged from the further consideration of Senate bill 1336 for the relief of Abbot Low Moffat, introduced by me on May 26, 1947, and that it be indefinitely postponed.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

DAYLIGHT SAVING FOR THE DISTRICT OF COLUMBIA

Mr. McGRATH. Mr. President, I should like to give notice that at an appropriate time, either today or as soon after today as it may be in order, I shall move to have the Senate proceed to the consideration of Senate bill 1481, Calendar No. 485, to authorize the Board of Commissioners of the District of Columbia to establish daylight-saving time in the District.

ENROLLED BILLS PRESENTED

The Secretary of the Senate reported that on today, January 26, 1948, he presented to the President of the United States the following enrolled bills:

S. 84. An act for the relief of Mrs. Clinton R. Sharp;

S. 99. An act for the relief of John T. Hollandsworth, Jr.;

S. 136. An act for the relief of Ioannis Stephanes;

S. 166. An act for the relief of Anna M. Kinat (Mrs. John P. Taylor);

S. 167. An act for the relief of Mrs. Yoneko Nakazawa;

S. 185. An act for the relief of Thomas Abadia;

S. 186. An act for the relief of Santiago Naveran;

S. 187. An act for the relief of Antonio Arguinzonis;

S. 189. An act for the relief of Simon Fermin Ibarra;

S. 190. An act for the relief of Pedro Ugalde;

S. 191. An act for the relief of Julian Uriarte;

S. 192. An act for the relief of Juan Llona;

S. 258. An act for the relief of Troy Charles Davis, Jr.;

S. 298. An act for the relief of certain Basque aliens;

S. 339. An act for the relief of Lucy Jefferson Weil;

S. 851. An act for the relief of Belmont Properties Corp.;

S. 929. An act to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564);

S. 944. An act for the relief of Oran Curry;

S. 957. An act for the relief of Col. William J. Kennard;

S. 1020. An act to amend the Philippine Rehabilitation Act of 1946, as amended;

S. 1039. An act for the relief of Ada B. Foss;

S. 1043. An act for the relief of Frank J. Shaughnessy, collector of internal revenue, Syracuse, N. Y.;

S. 1324. An act to amend the Civil Service Retirement Act so as to make such act applicable to the officers and employees of the National Library for the Blind; and

S. 1579. An act for the relief of Damian Gandiaga.

PEACE ON EARTH—ADDRESS BY ARTHUR GAETH

[Mr. TAYLOR asked and obtained leave to have printed in the RECORD an address on the subject, Peace on Earth, broadcast December 24, 1947, by Mr. Arthur Gaeth, which appears in the Appendix.]

APPOINTMENT AND INSTALLATION OF ARCHBISHOP O'BOYLE

[Mr. O'CONOR asked and obtained leave to have printed in the RECORD a statement by Archbishop O'Boyle to the people and an excerpt from his installation address, as reported in the Catholic Review, which appear in the Appendix.]

EUROPEAN AID PROGRAM—EDITORIAL FROM JOPLIN (MO.) GLOBE

[Mr. KEM asked and obtained leave to have printed in the RECORD an editorial entitled "Would You Vote the Bonds?", published in the Joplin (Mo.) Globe of January 22, 1948, which appears in the Appendix.]

THE HOME OWNERS' LOAN CORPORATION—EDITORIAL FROM THE PAWTUCKET TIMES

[Mr. GREEN asked and obtained leave to have printed in the RECORD an editorial entitled "HOLC Report," published in the Pawtucket (R. I.) Times of January 23, 1948, which appears in the Appendix.]

CONGRESS' MAJOR SURGERY FOR TRUMAN'S BLOATED BUDGET—EDITORIAL FROM THE SAN ANTONIO EXPRESS

[Mr. TAFT asked and obtained leave to have printed in the RECORD an editorial entitled "Congress' Major Surgery for Truman's Bloated Budget," from the San Antonio (Tex.) Express of January 14, 1948, which appears in the Appendix.]

The ACTING PRESIDENT pro tempore. The morning business is closed.

THE CALENDAR

The ACTING PRESIDENT pro tempore. Under the order of the Senate previously entered, it is provided, that on Monday, January 26, 1948, at the conclusion of morning business, the Senate shall proceed to the consideration of bills on the calendar to which there is no objection, beginning with Order No. 863. The clerk will state in order the bills on the calendar.

Mr. WHERRY. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Hickenlooper	O'Mahoney
Baldwin	Hill	Overton
Barkley	Hoey	Pepper
Brewster	Holland	Reed
Bridges	Ives	Revercomb
Brooks	Jenner	Robertson, Va.
Buck	Johnson, Colo.	Russell
Bushfield	Johnston, S. C.	Saltonstall
Butler	Kem	Smith
Byrd	Kilgore	Sparkman
Cain	Knowland	Stennis
Capper	Langer	Stewart
Chavez	Lodge	Taft
Connally	Lucas	Taylor
Cooper	McCarran	Thomas, Okla.
Cordon	McCarthy	Thomas, Utah
Donnell	McFarland	Thye
Downey	McGrath	Tobey
Dworshak	McKellar	Tydings
Ecton	McMahon	Vandenberg
Ellender	Magnuson	Watkins
Ferguson	Maybank	Wherry
Fulbright	Millikin	Wiley
George	Moore	Williams
Green	Morse	Wilson
Gurney	Murray	Young
Hatch	O'Conor	
Hayden	O'Daniel	

Mr. WHERRY. I announce that the Senator from Minnesota [Mr. BALL] is absent on official State business.

The Senator from Indiana [Mr. CAPEHART], the Senator from Vermont [Mr. FLANDERS], and the Senator from Pennsylvania [Mr. MARTIN] are absent by leave of the Senate.

The Senator from Ohio [Mr. BRICKER], and the Senator from New Jersey [Mr. HAWKES] are necessarily absent.

The Senator from Nevada [Mr. MALONE] is unavoidably detained.

The Senator from Wyoming [Mr. ROBERTSON] is absent on official business.

Mr. LUCAS. I announce that the Senator from Mississippi [Mr. EASTLAND], the Senator from Arkansas [Mr. McCLELLAN], and the Senator from Pennsyl-

vania [Mr. MYERS] are absent on public business.

The Senator from North Carolina [Mr. UMSTED] and the Senator from New York [Mr. WAGNER] are necessarily absent.

The ACTING PRESIDENT pro tempore. Eighty-two Senators having answered to their names, a quorum is present.

THE PROPOSED RESUMPTION OF MEAT RATIONING AND PRICE CONTROLS

Mr. CAPPER. Mr. President, I ask unanimous consent to make a short statement on the subject of meat rationing and price controls.

The ACTING PRESIDENT pro tempore. Is there objection? The Chair hears none, and the Senator from Kansas may proceed.

Mr. CAPPER. Mr. President, I ask unanimous consent to have placed in the RECORD a letter I have received from Fred W. Heine, president, and Will J. Miller, secretary-treasurer of the Kansas Livestock Association, protesting against reimposition of meat rationing and price controls.

While I have the floor, Mr. President, I want to say that I am in thorough agreement with the protest against meat rationing and price controls.

Both these things amount to deceiving the people as to actual facts in the food situation.

Price controls, which sooner or later again would require Government subsidies to secure needed production, deceive consumers as to the actual cost of the goods they buy.

Unless price controls are established all along the line, from prices on the raw materials to the finished product, they cannot be really effective.

Also, unless producers, handlers, and consumers cooperate in observing the controls, the real price of goods will be set in black markets operating more closely to the law of supply and demand. During the war emergency, the patriotic urge to help win the war helped price controls to work after a fashion. But everyone knows that toward the end of wartime controls, black markets set the prices in many lines.

Rationing of meat while other foods are left in a free market will tend to reduce still more the supply of meats available, when what is needed is more production, not less.

Incidentally, rationing can only be justified as an emergency measure when there is a real scarcity of the rationed article, and when only by rationing can such scarce article be made available to consumers in the markets.

Consumers this year, according to all reliable estimates, will have 20 pounds more meat per capita the coming 12 months than they had in the 5-year period before the war, and only about 10 pounds less than last year.

High prices are the effect of continued Government spending, continued high-dollar incomes, and the export of goods not in surplus supply. Price controls and rationing will simply add to and continue the inflation with a resultant worse collapse when the break does come.

I am opposed to programs calling for price controls and rationing, and wish to join especially in the protest of the Kansas Livestock Association against reimposition of meat rationing. I ask that the letter from officers of the Kansas Livestock Association be printed in the RECORD at this point, as part of my remarks.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

KANSAS LIVESTOCK ASSOCIATION,
Topeka, Kans., January 20, 1948.

Hon. ARTHUR CAPPER,
United States Senate,
Washington, D. C.

DEAR SENATOR CAPPER: Press and radio reports indicate that meat rationing and price controls are being seriously considered in Washington.

The Kansas livestock interests are violently opposed to any action by Congress or Executive order by the President which would reestablish such regulations.

Department of Agriculture estimates indicate that our livestock production for 1948 will make 145 pounds of meat available per capita for the Nation's 143,000,000 consumers. This will be approximately 20 pounds more per person annually that was available for the period 1935–39.

The anticipated meat supply for 1948, given an opportunity to flow through regular channels without restriction will reach consumers on an equitable basis.

Meat rationing and price controls did not work under wartime regulations and certainly will not work now.

In the past they were responsible for black-market unequal distribution, meat shortages, and exorbitant prices to the public at large in practically every city and hamlet of the Nation.

Meat rationing and price controls, if forced upon the American people, will not only be responsible for decreasing the meat supply in 1948 and 1949, but will result in the loss of many animal byproducts used by the medical profession for the protection of the Nation's health; and, furthermore, will mean the destruction of a significant percentage of the Nation's meat supply because of improper processing and handling of meat by black-market operators.

We further know that consumers in the lower-income brackets, because of unequal distribution and exorbitant meat prices, would suffer the most severely under such restrictions and regulations as may be imposed.

We respectfully request that you use your influence to avoid the initiation of rationing or price controls now under consideration in Washington.

Cordially yours,

FRED W. HEINE,
President.
WILL J. MILLER,
Secretary-Treasurer.

THE CALENDAR

The ACTING PRESIDENT pro tempore. Under the order entered on Monday, January 19, the call of the calendar is in order, beginning with Calendar No. 863, Senate bill 1485. The bill will be stated by title.

SALE OF ALBUQUERQUE INDIAN SCHOOL LANDS

The bill (S. 1485) to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, New Mexico, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Interior is hereby authorized, in his discretion and subject to such terms and conditions as he may prescribe, to sell or exchange all or any part of those certain areas heretofore acquired for the Albuquerque Indian School, New Mexico, situated within tracts Nos. 97a, 97b, and 98 as shown on the Middle Rio Grande Conservancy District map, comprising approximately thirty and seventy-five one-hundredths acres. In effecting any sale or exchange hereunder the Secretary of the Interior is authorized to execute such deeds or other instruments as may be necessary to transfer the title to any land so sold or exchanged. Any exchanges of land effected pursuant to this act shall be on an equal-value basis.

SEC. 2. That the proceeds derived from any sale made under authority of this act shall be deposited in the Treasury of the United States as school revenues, pursuant to the act of May 27, 1926 (44 Stat. 560), and shall be available in the discretion of the Secretary of the Interior for the purchase of other lands and improvements or interests therein for the use of said Albuquerque Indian School.

PAYMENTS TO SEMINOLE INDIANS, OKLAHOMA

The bill (S. 1733) to authorize payment to certain enrolled members of the Seminole Tribe of Indians under act of July 2, 1942 (Public, No. 645, 77th Cong.) was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That in making the payment to the enrolled members of the Seminole Tribe of Indians of Oklahoma or their heirs, authorized in section 1 of the act of July 2, 1942 (Public, No. 645, 77th Cong.), the regulations promulgated by the Secretary of the Interior under date of October 14, 1942, shall be followed in ascertaining the heirs of the enrolled members entitled to share in the funds of said tribe as to those persons who died prior to the act of December 24, 1942 (Public, No. 833, 77th Cong.), and payment shall be made accordingly.

CERTIFICATES OF COMPETENCY TO OSAGE INDIANS, OKLAHOMA

The Senate proceeded to consider the bill (H. R. 3326) to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes.

Mr. BUTLER. Mr. President, the bill should be passed, but the Committee on Public Lands has received a suggestion from the Osage Tribal Council of Oklahoma proposing an amendment, which is recommended by the committee and also by the Department. I propose such an amendment. On page 1, line 3, the amendment would strike out the words "upon request of the Indian."

The ACTING PRESIDENT pro tempore. The amendment offered by the Senator from Nebraska will be stated.

The CHIEF CLERK. On page 1, line 3, after the name "Interior", it is proposed to strike out "upon request of the Indian."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

REPEAL OF INDIAN LIQUOR LAWS IN CERTAIN PARTS OF MINNESOTA

The Senate proceeded to consider the bill (H. R. 1049) to repeal certain acts of Congress, known as Indian liquor laws, in certain parts of Minnesota.

Mr. JOHNSTON of South Carolina. Mr. President, may we have an explanation of the bill?

Mr. BUTLER. Mr. President, in the absence of the chairman of the Subcommittee on Indian Affairs, I will give the explanation.

This bill removes the restrictions of the Indian liquor laws as applied to Indians in the State of Minnesota away from the Indian reservation.

Many decades ago, laws were passed commonly known as the Indian liquor laws, designed to prevent Indians from securing liquor. It was felt at that time that use of liquor by the Indians led to debauchery and enabled the white man to exploit the Indian. Now conditions have changed, and many Indians feel keenly their inability to buy any type of liquor even when outside the Indian reservation. In practice, the Indian liquor laws are not enforceable when the Indians are away from the reservation, because in many cases bartenders do not know whether their customers are Indians or not, and are not familiar with the laws. This bill would simply repeal all such restrictions in Minnesota against purchase of liquor by Indians away from the Indian reservation.

Mr. THYE. Mr. President, the Legislature of Minnesota, at its last legislative session, amended the laws of the State of Minnesota relating to Indians, so as to permit Indians to buy liquor away from the reservation. This bill would permit Indians to buy liquor off the reservation in the same manner that you or I might buy it. The bill would conform to the laws already enacted in the State of Minnesota.

Mr. JOHNSTON of South Carolina. In view of the explanation, I will leave it to the State of Minnesota.

The ACTING PRESIDENT pro tempore. The question is on the third reading of the bill.

The bill was ordered to a third reading, read the third time, and passed.

Mr. HATCH. Mr. President, I desire to ask the Senator from Minnesota a question about the bill. I did not quite hear the explanation which was made, because of the confusion in the Chamber.

Mr. THYE. Mr. President, the old statute forbade the sale of liquor to Indians, particularly as related to States where there are Indian reservations. The State of Minnesota, at the last session of the legislature, in 1947, amended the statute so as to permit the Indians to buy liquor in public liquor places, just as any other citizen would buy it.

One of the reasons why the State found itself in favor of such an amendment was that returning World War II veterans, as well as World War I veterans, would enter liquor establishments anywhere in the State, and they would be confronted with the fact that they would be denied the right to purchase liquor, even though they had but a fraction of Indian blood in them. That was the law. So the State amended its law. The purpose of the pending bill is more or less to conform to the type of correction which we have attempted to make in that State.

Mr. HATCH. There are Indians on reservations in Minnesota, are there not?

Mr. THYE. In any liquor establishment in the State, if it were known to the keeper that a man had Indian blood in him, he would be denied the right to sell liquor to him. The correction is to permit him to buy liquor in the same manner that any other citizen would be privileged to buy it.

Mr. HATCH. The law to which the Senator refers is one of general application throughout the United States in States where there are Indian reservations. What the bill proposes is to make a separate provision for Minnesota.

Mr. THYE. The title of the bill is "An act to repeal certain acts of Congress, known as Indian liquor laws, in certain parts of Minnesota."

Mr. HATCH. Then it does not relate to the entire State of Minnesota, but only to certain parts of the State.

Mr. THYE. Of course, it could not and would not relate to the reservations, but it relates to territory off the reservations. If an Indian came to Minneapolis, St. Paul, or any other town off the reservation, the bartender could not legally sell him liquor. This bill would amend the law so as to permit such sales.

Mr. HATCH. I shall not object at this time. However, after I examine the bill and the report further, I may ask for reconsideration of the vote by which the bill was passed, because I think it establishes a rather dangerous precedent by making a certain act of Congress not effective in one section of the country, but effective in all other parts of the country where similar conditions prevail. I doubt the wisdom of such procedure, making separate provisions for the State of Minnesota. I shall not object at this time. However, I shall look into the question.

Mr. O'DANIEL subsequently said: Mr. President, I ask unanimous consent that the Senate revert to the consideration of House bill 1049, Calendar No. 866.

The ACTING PRESIDENT pro tempore. Is there objection?

Mr. WHERRY. The bill was passed during the call of the calendar today, was it not?

Mr. O'DANIEL. Yes.

Mr. WHERRY. Then I assume there is no objection to the Senator's request.

The ACTING PRESIDENT pro tempore. Is there objection to the request for the reconsideration of the vote by which House bill 1049 was passed?

Mr. THYE. I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

RIGHTS-OF-WAY THROUGH OSAGE INDIAN LAND

The Senate proceeded to consider the bill (H. R. 3322) to facilitate rights-of-way through restricted Osage Indian land, which had been reported from the Committee on Public Lands with an amendment, to strike out all after the enacting clause and insert:

That the Secretary of the Interior be, and he is hereby, empowered to grant rights-of-way for all purposes, subject to such conditions as he may prescribe, over and across any lands now or hereafter held in trust by the United States for individual Indians or Indian tribes, communities, bands, or nations, or any lands now or hereafter owned, subject to restrictions against alienation, by individual Indians or Indian tribes, communities, bands, or nations, including the lands belonging to the Pueblo Indians in New Mexico, and any other lands heretofore or hereafter acquired or set aside for the use and benefit of the Indians.

SEC. 2. No grant of a right-of-way over and across any lands belonging to a tribe organized under the act of June 18, 1934 (48 Stat. 984), as amended; the act of May 1, 1936 (49 Stat. 1250); or the act of June 26, 1936 (49 Stat. 1967), shall be made without the consent of the proper tribal officials. Rights-of-way over and across lands of individual Indians may be granted without the consent of the individual Indian owners if (1) the land is owned by more than one person, and the owners or owner of a majority of the interests therein consent to the grant; (2) the whereabouts of the owner of the land or an interest therein are unknown, and the owners or owner of any interests therein whose whereabouts are known, or a majority thereof, consent to the grant; (3) the heirs or devisees of a deceased owner of the land or an interest therein have not been determined, and the Secretary of the Interior finds that the grant will cause no substantial injury to the land or any owner thereof; or (4) the owners of interests in the land are so numerous that the Secretary finds it would be impracticable to obtain their consent, and also finds that the grant will cause no substantial injury to the land or any owner thereof.

SEC. 3. No grant of a right-of-way shall be made without the payment of such compensation as the Secretary of the Interior shall determine to be just. The compensation received on behalf of the Indian owners shall be disposed of under rules and regulations to be prescribed by the Secretary of the Interior.

SEC. 4. This act shall not in any manner amend or repeal the provisions of the Federal Water Power Act of June 10, 1920 (41 Stat. 1063), as amended by the act of August 26, 1935 (49 Stat. 838), nor shall any existing statutory authority empowering the Secretary of the Interior to grant rights-of-way over Indian lands be repealed hereby.

SEC. 5. Rights-of-way for the use of the United States may be granted under this act upon application by the department or agency having jurisdiction over the activity for which the right-of-way is to be used.

SEC. 6. The Secretary of the Interior is hereby authorized to prescribe any necessary regulations for the purpose of administering the provisions of this act.

SEC. 7. This act shall not become operative until 30 days after its approval.

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

The title was amended so as to read: "An act to empower the Secretary of the Interior to grant rights-of-way for various purposes across lands of individual Indians or Indian tribes, communities, bands, or nations."

TITLE TO CERTAIN LANDS ADJACENT TO MUNCIE, IND.

The Senate proceeded to consider the bill (H. R. 2361) to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818, which had been

reported from the Committee on Public Lands, with an amendment, on page 3, line 8, after the words "September 1", to strike out "1947" and insert in lieu thereof "1948"; and at the end of line 13, to strike out "1947" and insert in lieu thereof "1948."

The amendment was agreed to.

The amendment was ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

DISPOSAL OF SUBMARGINAL LANDS IN MONTANA, NORTH DAKOTA, AND SOUTH DAKOTA

The Senate proceeded to consider the bill (H. R. 3153) to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota, which had been reported from the Committee on Public Lands with amendments.

The first amendment of the Committee on Public Lands was, in section 7, on page 2, line 18, after the word "county", to insert "in which the major portion of the Indian reservation lies."

The amendment was agreed to.

The next amendment was, in section 3, on page 3, line 12, after the word "units", to insert "for experimental purposes."

The amendment was agreed to.

The next amendment was, on page 4, after line 2, to strike out:

The title to any lands remaining unsold or otherwise undisposed of after 2 years from the date of approval of this act are hereby declared to be in the United States in trust for the Indians of the reservation for whose use and benefit the lands were assigned by Executive order.

The amendment was agreed to.

The next amendment was, on page 4, line 9, after the word "be", to strike out "divided as follows: (a) One-fourth shall be paid to the county in which the lands are located; (b) one-fourth shall be credited to miscellaneous receipts in the Treasury of the United States; (c) one-half shall be deposited in the Treasury of the United States to the credit of the tribe of the reservation for whose use and benefit the tract concerned was assigned by Executive order" and insert "covered into the Treasury of the United States for credit to miscellaneous receipts."

The amendment was agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

PATENT IN FEE TO MRS. MARY E. LEAF

The Senate proceeded to consider the bill (S. 773) authorizing the issuance of a patent in fee to Mrs. Mary E. Leaf, which had been reported from the Committee on Public Lands with an amendment, on page 1, line 3, after the word "That", to insert "upon application in writing", so as to make the bill read:

Be it enacted, etc., That upon application in writing, the Secretary of the Interior is authorized and directed to issue to Mrs. Mary E. Leaf, of McIntosh, S. Dak., a patent in fee to the following-described lands allotted to her in Corson County, State of South Dakota: The west half of section 20, township 22 north, range 21 east, of the Black Hills meridian.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

DISPOSITION OF ELECTRIC ENERGY GENERATED AT FORT PECK RESERVATION

The bill (S. 1591) to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, in aid of the administration of the Fort Peck project, there is hereby granted to the United States, for use by the Bureau of Reclamation, Department of the Interior (hereinafter referred to as the "Bureau"), in the discharge of its duties pursuant to the act of May 18, 1938 (52 Stat. 403), the electric-transmission lines, substations, rights-of-way, and other property described in section 7 of that certain permit and memorandum of understanding, dated November 2, 1945, between the Bureau and the Office of Indian Affairs, Department of the Interior (hereinafter referred to as the "Indian Office"): *Provided, however*, That the Bureau shall continue to furnish electric service for the uses and purposes of the Indian Office on the Fort Peck Indian Reservation, pursuant to the terms and conditions of said permit and memorandum of understanding, except as the same may be modified by the Secretary of the Interior.

SEC. 2. That the amount of money to be paid for said property shall be $58,577.52, or so much thereof as the Secretary of the Interior shall determine to be needed pursuant to the provisions of said permit and memorandum of understanding. Such sum shall be paid, from funds now or hereafter made available to the Department of the Interior for the construction of transmission lines and substations of the Fort Peck project, to the Commissioner of Indian Affairs, who shall deposit such sum in the Treasury of the United States as a credit on expenditures made for irrigation and power construction on the Fort Peck Indian irrigation project.

SEC. 3. The Secretary of the Interior is authorized to perform any and all acts as may be deemed necessary to carry out the provisions of this act.

PATENT IN FEE TO MABEL TOWNSEND PRETTY ON TOP

The Senate proceeded to consider the bill (S. 400) authorizing the issuance of a patent in fee to Mabel Townsend Pretty On Top, which had been reported from the Committee on Public Lands with an amendment on page 1, line 3, after the word "That", to insert "upon application in writing", so as to make the bill read:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to Mabel Townsend Pretty On Top, of Lodge Grass, Mont., a patent in fee to the following-described lands situated in the State of Montana: The southwest quarter of section 13 and the southeast quarter of section 14, township 7 south, range 37 east, Montana principal meridian.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PATENT IN FEE TO CLARENCE M. SCOTT

The Senate proceeded to consider the bill (S. 401) authorizing the Secretary of the Interior to issue a patent in fee to Clarence M. Scott, which had been reported from the Committee on Public Lands with an amendment, to strike out all after the enacting clause and insert:

That the Secretary of the Interior is hereby authorized, upon the filing of a written application by the Indian owner named in this act, to issue to Clarence M. Scott, of Billings, Mont., a patent in fee to the following-described lands, including homestead lands allotted to him on the Crow Indian Reservation, Mont.: The south half of section 16, and the north half of the northwest quarter and the northwest quarter of the northeast quarter of section 21, township 6 south, range 32 east, Montana principal meridian.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

JAMES PERRY DOYLE

The bill (S. 1517) authorizing the issuance to James Perry Doyle of a patent in fee to certain lands in Big Horn County, Mont., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized and directed to issue to James Perry Doyle, a Crow Indian allottee No. 1661, of Sheridan, Wyo., a patent in fee to the following-described lands situated in Big Horn County, Mont.: Southeast quarter of section 17, township 8 south, range 37 east; the northwest quarter and the north half of the north half of the southwest quarter, section 21, township 8 south, range 37 east; the east half of the east half of the northwest quarter, the northeast quarter and the north half of the southeast quarter of section 20, township 7 south, range 37 east, Montana principal meridian, containing 640 acres.

ROBERT E. DOYLE

The Senate proceeded to consider the bill (S. 1407) authorizing the issuance of a patent in fee to Robert E. Doyle, which had been reported from the Committee on Public Lands, with an amendment on page 1, line 4, after the word "authorized" to strike out the words "and directed" and insert "in his discretion"; on page 1, line 9, after the words "half of the", to strike out "northeast quarter, the southwest quarter of the northeast quarter, the southwest quarter, and the east half of the southeast quarter, section 29; township 8 south, range 36 east", and to insert "northwest quarter, the southeast quarter of the northwest quarter, and the southwest quarter, section 28; the north half of the northeast quarter, the southwest quarter of the northeast quarter, the southeast quarter, and the east half of the east half of the west half, section 29; township 8 south, range 37 east", so as to make the bill read:

Be it enacted, etc., That, upon application in writing, the Secretary of the Interior is authorized in his discretion to issue to Robert E. Doyle a patent in fee to the following-described lands situated in Big Horn County, Mont.: The north half of the northwest

quarter, the southeast quarter of the northwest quarter, and the southwest quarter, section 28; the north half of the northwest quarter, the southeast quarter of the northwest quarter, and the southwest quarter, section 28; the north half of the northeast quarter, the southwest quarter of the northeast quarter, the southeast quarter, and the east half of the east half of the west half, section 29; township 8 south, range 37 east, Montana principal meridian, containing 640 acres.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

MISSISSIPPI RIVER BRIDGE, MINNESOTA

The bill (S. 1611) to extend the time for completing the construction of a bridge across the Mississippi River at or near Sauk Rapids, Minn., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the time for completing the construction of a bridge across the Mississippi River, at or near Sauk Rapids, Minn., authorized to be built by the Minnesota Department of Highways and the counties of Benton and Stearns in Minnesota, by an act of Congress approved October 9, 1940, heretofore extended by an act of Congress approved June 1, 1944, is hereby extended 3 years from October 9, 1946.

SEC. 2. The right to alter, amend, or repeal this act is hereby expressly reserved.

PUBLIC CONSTRUCTION NEAR YORKTOWN, VA.

The Senate proceeded to consider the bill (S. 1545) to authorize a bridge, roads and approaches, supports and bents, or other structures, across, over, or upon lands of the United States within the limits of the Colonial National Historical Park at or near Yorktown, Va., which had been reported from the Committee on Public Works with amendments, on page 1, line 5, to insert after the word "him" the words "and to the Secretary of the Navy"; on page 2, beginning in line 2, to insert after the word "bridge" the words "the level and design of which shall be subject to the approval of the Secretary of the Interior and the Secretary of the Navy, such bridge"; to strike out on page 2, line 24, the words "The value of park lands involved shall be determined by a committee of three appraisers, one to be chosen by the Governor of Virginia, one to be chosen by the Secretary of the Interior, and the third to be chosen by these two", and to insert the following:

The value of the park lands to be conveyed to the Commonwealth of Virginia as herein provided shall be determined by a committee of three appraisers, one each to be selected by the Governor of Virginia and the Secretary of the Interior, with the third appraiser to be mutually satisfactory to them. The Secretary may, in his discretion, approve the value agreed upon by a majority of the appraisers or he may require a new appraisal to be made in a similar manner. The decision of the Secretary shall be final and conclusive as to the value of the easement lands conveyed pursuant to the provisions of this act.

Nothing in this act or in any grant of right-of-way or other easement issued pursuant to this act shall be construed to affect the provisions of the General Bridge Act of 1946 (60 Stat. 847).

So as to make the bill read:

Be it enacted, etc., That the Secretary of the Interior, upon such terms and conditions as to location, type, or design of the structure or otherwise as to him and to the Secretary of the Navy may appear proper to protect the interests of the United States, is authorized to grant to the Commonwealth of Virginia or to its agency the Highway Commission of said Commonwealth right-of-way or other easement as may be proper to enable a highway bridge the level and design of which shall be subject to the approval of the Secretary of the Interior and the Secretary of the Navy, such bridge to be erected, operated, and maintained across the York River in the State of Virginia at or near Yorktown, Va., and for the purpose of permitting such portions of said bridge, the roads and approaches thereto, together with any necessary structures connected therewith as may be necessary for the construction, maintenance, and operation of said bridge, and for safe, reasonable, and proper ingress thereto or egress therefrom, to be located and erected across, over, or upon the property of the United States forming a part of the Colonial National Historical Park.

The Secretary of the Interior is directed and authorized to secure and accept payment in cash or by land exchange as compensation to the United States for any lands used for such right-of-way and any moneys received may in turn be used by the Secretary of the Interior for the purchase of other privately owned historical lands within the boundaries of Colonial National Historical Park. Any lands so received or so purchased shall become part of Colonial National Historical Park.

The value of the park lands to be conveyed to the Commonwealth of Virginia as herein provided shall be determined by a committee of three appraisers, one each to be selected by the Governor of Virginia and the Secretary of the Interior, with the third appraiser to be mutually satisfactory to them. The Secretary may, in his discretion, approve the value agreed upon by a majority of the appraisers or he may require a new appraisal to be made in a similar manner. The decision of the Secretary shall be final and conclusive as to the value of the easement lands conveyed pursuant to the provisions of this act.

Nothing in this act or in any grant of right-of-way or other easement issued pursuant to this act shall be construed to affect the provisions of the General Bridge Act of 1946 (60 Stat. 847).

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

TRAINING OF OFFICERS FOR THE NAVAL SERVICE

The Senate proceeded to consider the bill (S. 1214) to amend the act entitled "An act to provide for the training of officers for the naval service, and for other purposes," approved August 13, 1946, which had been reported from the Committee on Armed Services with amendments.

The amendments were, on page 1, line 5, after the parenthesis to insert "as amended"; on line 6, after the word "hereby", to insert the word "further"; on page 2, line 6, after the words "pursuant to", to strike out the word "part" and insert "paragraph"; on page 2, line 13, after the words "pursuant to", to strike out "subsection 2 of section 6 (a)" and insert "paragraph 2 of subsection (a) of section 6"; on page 3, line 11, after the words "pursuant to", to strike out "subsection 2 of section 6 (a)" and insert "paragraph 2 of subsection (a) of section 6"; on page 3, line 17, after the word "terminated", to strike out "at the end of his period of accrued leave which shall commence"; on page 3, line 23, after the word "terminated", to strike out "at the end of his period of accrued leave which shall commence"; on page 4, line 14, after the words "pursuant to", to strike out "subsection 1 of section 6 (a)" and insert "paragraph 1 of subsection (a) of section 6"; on line 15, after the words "pursuant to", to strike out "section 6 (b)" and insert "subsection (b) of section 6"; on line 20, after the word "terminated", to strike out "at the end of his period of accrued leave which shall commence"; on page 5, line 2, after the word "terminated", to strike out "at the end of his period of accrued leave which shall commence"; on line 9, after the words "with the", to strike out the word "rank" and insert "grade"; on line 10, after the words "junior grade" in parentheses, to strike out "in the grade appropriate to that rank", so as to make the bill read:

Be it enacted, etc., That the act entitled "An act to provide for the training of officers for the naval service, and for other purposes," approved August 13, 1946 (60 Stat. 1057), as amended, is hereby further amended as follows:

(a) In clause (b) of section 2 after the word "Navy" insert the following: ", or his designated representative."

(b) Amend the first sentence of the first proviso of section 4 to read as follows: "*Provided*, That such benefits and retainer pay shall commence to accrue on the day each midshipman or apprentice seaman commences his first term of college work under the provisions of this act and that such benefits and retainer pay may be received by midshipmen appointed pursuant to paragraph (a) of section 3 for a period not exceeding four academic years."

(c) Amend section 8 to read as follows:

"SEC. 8. The Secretary of the Navy shall during the second quarter of each calendar year cause to be examined (a) the records of all ensigns of the line of the Navy and second lieutenants of the Marine Corps commissioned pursuant to paragraph 2 of subsection (a) of section 6 who apply prior to April 1 of that calendar year or prior to the first anniversary of the acceptance of their commissions, whichever is earlier, for retention in the Regular service as permanent officers and who in the then current calendar year will reach the first anniversary of the date of acceptance of their appointment as ensigns in the Navy or second lieutenants in the Marine Corps, selecting from among such officers the number he may determine necessary for retention, and (b) the records of all other officers appointed pursuant to this act who apply prior to April 1 of the third calendar year following that in which they accepted their commissions or prior to the third anniversary of the acceptance of their commissions, whichever is earlier, for retention in the Regular service as permanent officers and who in the then current calendar year will reach the third anniversary of the date of acceptance of their appointment as ensigns in the Navy or second lieutenants in the Marine Corps, selecting from among such officers the number that he may determine necessary for retention."

(d) Amend section 9 to read as follows:

"SEC. 9. (a) The commission of each officer commissioned pursuant to paragraph 2 of subsection (a) of section 6 who, prior to April 1 of the calendar year following that in which he accepted his commission or

prior to the first anniversary of the acceptance of his commission, whichever is earlier, shall not have applied for retention in the Regular service, shall be terminated not later than the first anniversary of his acceptance of his commission, and the commission of each such officer who applies for retention as a permanent officer within the time limits prescribed by this subsection, but who is not selected for retention under clause (a) of section 8 shall be terminated not later than June 30 of the appropriate calendar year or the first anniversary of his acceptance of his commission, whichever is the later date. Upon termination of commission, each such officer who thereupon accepts appointment to commissioned rank in the Naval or Marine Corps Reserve may apply for and receive retainer pay at the rate of $100 for each calendar month or part thereof during which, while an officer of the Naval or Marine Corps Reserve, he pursues full-times instruction in an accredited college or university but not to exceed a total of $2,000, such instruction to commence not later than a date to be determined by the Secretary of the Navy; in addition, each such officer shall be entitled to the benefits provided for him by section 10 of this act.

"(b) The commission of each officer commissioned pursuant to paragraph 1 of subsection (a) of section 6 and pursuant to subsection (b) of section 6 who, prior to April 1 of the third calendar year following that in which he accepted his commission or prior to the third anniversary of the acceptance of his commission, whichever is earlier, shall not have applied for retention in the Regular service, shall be terminated not later than the third anniversary of his acceptance of his commission, and the commission of each such officer who applies for retention as a permanent officer within the time limits prescribed by this subsection, but who is not selected for retention under clause (b) of section 8 shall be terminated not later than June 30 of the appropriate calendar year or the third anniversary of his acceptance of his commission, whichever is the later date. Upon termination of commission, each such officer may be commissioned in the Naval or Marine Corps Reserve in the grade of lieutenant (junior grade) or first lieutenant, as the case may be (if in a staff corps, with the grade of lieutenant (junior grade)), and to rank from a date 3 years after the date of rank stated in his original commission in the Regular Navy or Regular Marine Corps."

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to amend the act entitled 'An act to provide for the training of officers for the naval service, and for other purposes', approved August 13, 1946, as amended."

RETENTION IN SERVICE OF CERTAIN DISABLED ARMY PERSONNEL

The Senate proceeded to consider the bill (S. 1783) to provide for retention in the service of certain disabled Army personnel, and for other purposes, which had been reported from the Committee on Armed Services, with an amendment, on page 1, beginning in line 5, after the word "Army", to insert the words "and the Air Force", so as to make the bill read:

Be it enacted, etc., That, notwithstanding any other provision of law, the President is authorized and directed to retain in service disabled officers, warrant officers, and flight officers of the Army and the Air Force of the United States until their treatment for physical reconstruction has reached a point where they will not be further benefited by retention in a military hospital or in the military service.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read: "A bill to provide for retention in the service of certain disabled Army and Air Force personnel, and for other purposes."

EXEMPTION OF NAVY OR COAST GUARD VESSELS FROM CERTAIN REQUIREMENTS

The bill (S. 1961) to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from requirements as to the number, position, range, or arc of visibility of lights, and for other purposes was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 3 of the act of December 3, 1945 (59 Stat. 590), is hereby repealed.

JAMES Y. PARKER

The bill (S. 1673) to authorize the promotion of James Y. Parker, Army serial No. O20712 as major, Army of the United States, as of March 1, 1942, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the President is authorized and requested to appoint James Y. Parker, Army serial No. O20712, to the temporary grade of major in the Army of the United States under the act of February 16, 1942 (56 Stat. 94), with date of rank as of March 1, 1942. The Secretary of War is authorized and directed to carry such officer upon such appointment on the records of the War Department and of the Army as having served in the grade of major from March 1, 1942, to the date of his subsequent appointment to the temporary grade of lieutenant colonel in the Army of the United States.

SEC. 2. Nothing herein contained shall be construed as authorizing additional pay and allowances to the aforesaid James Y. Parker: *Provided*, That all payments of moneys heretofore made to such officer on the assumption of a previous legal appointment to the grade of major are hereby validated.

MEDAL OF HONOR TO UNKNOWN AMERICAN

The bill (S. 1802) to authorize the President to award the Medal of Honor to the unknown American who lost his life while serving overseas in the armed forces of the United States during the Second World War, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the President is hereby authorized and directed to award, in the name of the Congress, a Medal of Honor to the unknown American who lost his life while serving overseas in the armed forces of the United States during the Second World War, and who will lie buried in the Memorial Amphitheater of the National Cemetery at Arlington, Va., as authorized by the act of June 24, 1946, Public Law 429, Seventy-ninth Congress.

CARE AND TREATMENT OF MEMBERS OF NATIONAL GUARD, ORGANIZED RESERVES, ETC.

The Senate proceeded to consider the bill (S. 1470) to amend the act entitled "An act to make provisions for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers Training Corps, and Citizens Military Training Camps who are injured, which had been reported from the Committee on Armed Services, with amendments, on page 2, section 2, line 12, to strike out the word "section" and to insert a new section, as follows:

SEC. 3. The foregoing amendment shall be applicable to the Department of the Air Force to the same extent as if enacted prior to the passage of the National Security Act of 1947.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the act entitled "An act to make provision for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers' Training Corps, and Citizens' Military Training Camps who are injured or contract disease while engaged in military training, and for other purposes," approved June 15, 1936 (49 Stat. 1507), as amended (act July 15, 1939, 53 Stat. 1042; sec. 5, act Oct. 14, 1940, 54 Stat. 1137; 32 U. S. C. 164d; 10 U. S. C. 455e), is amended by adding at the end thereof the following new section:

"SEC. 2. As used in this act, the term 'in time of peace' shall include that period after September 2, 1945 (the date of formal surrender by Japan), which is prior to the first day on which the United States is, by action of the Congress, or the President, or both, no longer engaged in any war in which the United States is engaged on the date of enactment of this section.

"SEC. 3. The foregoing amendment shall be applicable to the Department of the Air Force to the same extent as if enacted prior to the passage of the National Security Act of 1947."

The title was amended so as to read: "A bill to amend the act entitled 'An act to make provision for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers' Training Corps, and Citizens' Military Training Camps who are injured or contract diseases while engaged in military training, and for other purposes', approved June 15, 1936, as amended, and for other purposes."

SCIENTIFIC AND TECHNICAL EMPLOYEES OF THE ARMED SERVICES

The Senate proceeded to consider the bill (S. 1521) to authorize the Secretary of War and the Secretary of the Navy to detail scientific and technical employees of the War Department or the Army and the Naval Establishment to duty in privately owned plants and laboratories, which had been reported from the Committee on Armed Services, with amendments, on page 1, to strike out all after the enacting clause and to insert:

Be it enacted, etc., That the Secretary of Defense (with respect to personnel of the National Military Establishment, any department or agency thereof, or any field activity of such establishment, department, or agency), or the Secretary of the Army, the

Secretary of the Navy, the Secretary of the Air Force (each with respect to his respective department or any field activity thereof), or the Secretary of the Treasury (with respect to the United States Coast Guard or any field activity thereof), is authorized to detail to duty, by contract or other agreement, in privately owned plants or laboratories, any scientific or technical employee of any establishment, department, agency, service, or field activity administered by such Secretary when, in the opinion of the Secretary concerned, such detail will materially increase the value of such employee to such establishment, department, agency, service, or field activity: *Provided*, That no such employee shall be detailed in any plant or laboratory for a continued period of duty in excess of 6 months: *Provided further*, That no provision of this act shall be construed in such manner as to authorize the expenditure of Federal funds by such Secretary to pay any privately owned plant or laboratory for the privilege of detailing an employee or employees to duty therein.

SEC. 2. Any employee selected for detail to duty in accordance with the provisions of this act shall, before being so detailed, make a definite statement in writing that he will, unless involuntarily separated, remain in the employ of the establishment, department, agency, service, or field activity from which detailed for a period of not less than 18 months after completion of such detail or reimburse the establishment, department, agency, service, or activity concerned for any expenses incurred in effectuating said detail.

SEC. 3. Any detail to duty provided for by this act shall be effected only after the plant or laboratory concerned in the arrangements for such detail signifies in writing to the Secretary of the establishment or department concerned its concurrence with said arrangements.

SEC. 4. Each such Secretary is authorized to establish and administer such rules, regulations, and procedures as he may deem necessary to effectuate the provisions of this act, or he may, should it be deemed necessary or advisable, delegate the authority to administer said rules, regulations, and procedures, in whole or in part, to such official or officials of his respective establishment, department, agency, service, or field activity as he shall designate.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended to read: "A bill to authorize the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, and the Secretary of the Treasury to detail certain scientific and technical personnel employed by or within the National Military Establishment or the United States Coast Guard to duty in privately owned plants and laboratories."

Mr. WHERRY. Mr. President, does that mean a complete substitution, or only a substitution for one section?

The ACTING PRESIDENT pro tempore. It is a complete substitution, striking out all after the enacting clause.

Mr. WHERRY. I think we should have a word of explanation from the chairman of the committee.

Mr. GURNEY. Mr. President, the substitution is merely to bring the bill into line with the unification bill, and to expand it to include the Air Corps.

Mr. WHERRY. I have no objection.

TRANSFER OF LANDS AT CAMP PHILLIPS, KANS.

The Senate proceeded to consider the bill (S. 1791) to transfer certain lands at Camp Phillips, Kans., to the War Department, which had been reported from the Committee on Armed Services, with an amendment, on page 2, line 2, to strike out the words "War Department" and insert "Department of the Army."

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That all land owned by the United States in section 7, township 15 south, range 3 west of the sixth principal base and meridian, containing approximately 640 acres, together with the buildings, improvements, and facilities located thereon, which comprised the hospital area at Camp Phillips, Kans., and now under the control and jurisdiction of the Veterans' Administration, is hereby transferred, without reimbursement of funds, to the jurisdiction of the Department of the Army.

The title was amended so as to read: "A bill to transfer certain lands at Camp Phillips, Kans., to the Department of the Army."

VALIDATION OF CERTAIN PAYMENTS MADE BY DISBURSING OFFICERS OF THE UNITED STATES GOVERNMENT

The Senate proceeded to consider the bill (S. 1298) to invalidate payments heretofore made by disbursing officers of the United States Government covering cost of shipment of household effects of civilian employees and for other purposes, which had been reported from the Committee on Armed Services, with an amendment, to insert at the end of the bill sections 2 and 3, so as to make the bill read:

Be it enacted, etc., That payments heretofore made by disbursing officers covering the cost of shipment of household effects of civilian employees of the Government of the United States made under orders directing permanent change of station of said employees where such shipments were made from the last permanent-duty station of said employees or from some other place, to some place other than the new permanent-duty station of such employees, are hereby validated, if otherwise proper, and such employees shall be relieved of indebtedness to the United States on account of such shipments to the extent that such payments do not exceed the cost which would have been properly borne by the United States for such shipments under laws and regulations in effect at the time of such shipments, had such shipments been made from the old to the new permanent-duty station of such employees: *Provided*, That in any case where a civilian employee has made refundment to the United States on account of payments herein validated, reimbursement of the amount so refunded is hereby authorized to be made to such employee on the presentation of a claim therefor to the General Accounting Office: *Provided further*, That employees who paid the carriers the amount due covering the shipment of their household effects shall be entitled to reimbursement of so much of the amount expended, if otherwise proper, as does not exceed the cost of such shipment from the old to the new permanent-duty station upon presentation of a claim therefor to the General Accounting Office: *And provided further*, That amounts due deceased persons or persons determined to be mentally incompetent shall be paid to the extent herein provided upon presentation of a claim therefor to the General Accounting Office by their heirs or personal representatives.

SEC. 2. The Comptroller General of the United States is authorized and directed to allow credit in the settlement of accounts of disbursing officers of the Government of the United States covering payments for the shipment of household effects of civilian employees which are, and to the extent that such payments are, validated by section 1 hereof.

SEC. 3. Such appropriations as may be required for the settlement of claims under the provision of this act are hereby authorized.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

PRESERVATION OF THE FRIGATE "CONSTELLATION"

The Senate proceeded to consider the bill (S. 1796) to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes, which had been reported from the Committee on Armed Services with an amendment, after line 7, page 1, to insert:

All costs of repairing, equipping, and restoring such frigate, other than pay and allowances of naval officers and enlisted men engaged in such work, shall be defrayed from a fund consisting of such donations or contributions and the net proceeds of the sales made pursuant to section 2 of this act.

So as to make the bill read:

Be it enacted, etc., That the Secretary of the Navy is hereby authorized to repair, equip, and restore the frigate *Constellation*, as far as may be practicable, to her original condition, but not for active service, and to accept and use any donations or contributions which may be offered for the aforesaid purpose. All costs of repairing, equipping, and restoring such frigate, other than the pay and allowances of naval officers and enlisted men engaged in such work, shall be defrayed from a fund consisting of such donations or contributions and the net proceeds of the sales made pursuant to section 2 of this act.

SEC. 2. The Secretary of the Navy is hereby further authorized to give or to sell, under such regulations as he may prescribe, such parts or pieces, including rigging, of the frigate *Constellation*, as are suitable for use as relics, souvenirs, or mementos, and which cannot profitably or advantageously be used in restoring this vessel to original condition, to clubs, associations, or individuals making donations or contributions for the restoration of the frigate *Constellation*. The cost of converting the aforesaid material into relics, souvenirs, or mementos shall be charged against, and the proceeds of such sales shall be added to, the fund created by authority of this act.

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

CONSTRUCTION OF REFLECTING POOL AT UNITED STATES NAVAL HOSPITAL, HOUSTON, TEX.

The bill (S. 1794) to authorize the Houston Council, Navy League of the United States, to construct a reflecting pool at the United States Naval Hospital, Houston, Tex., was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That the Secretary of the Navy be, and he is hereby, authorized to permit the Houston Council, Navy League of the United States, to construct a reflecting

pool on the grounds of the United States Naval Hospital, at Houston, Tex.

SEC. 2. The site of the reflecting pool and its design and construction shall be subject to the approval of the Secretary of the Navy. The design and construction of the reflecting pool shall be without cost to the United States.

SEC. 3. Upon completion of the construction of the reflecting pool, the Secretary of the Navy is authorized to accept it as an unconditional gift to the United States from the Houston Council, Navy League of the United States.

USE OF CRYPT AND WINDOW SPACES OF THE UNITED STATES NAVAL ACADEMY CHAPEL

The Senate proceeded to consider the bill (S. 1800) relating to the restrictions on the use of crypt and window spaces of the United States Naval Academy Chapel, which was read as follows:

Be it enacted, etc., That the final paragraph under the subheading "Contingent, Naval Academy" under the heading "Naval Academy" of the act of March 3, 1909 (34 U. S. C. 1111), as it appears on page 773 of volume 35 of the United States Statutes at Large, is hereby amended to read as follows:

"The crypt and window spaces of the United States Naval Academy chapel are to be used only for memorials to United States naval officers who have successfully commanded a fleet or force in battle, or who have received or may receive the thanks of the Congress of the United States for conspicuously distinguished services in time of war, and no memorial shall be accepted for or installed in said crypt or window spaces until at least 2 years after the death of the officer in question; the Secretary of the Navy is authorized to appoint a board which shall recommend to the Secretary of the Navy the names of officers whose service is considered to qualify them to be so memorialized: *Provided*, That nothing in this provision shall be considered as invalidating any agreement made by the present or any former Superintendent of the Naval Academy, authorizing a memorial window in the old Naval Academy chapel to be transferred to the new Naval Academy chapel."

Mr. GREEN. Mr. President, I ask for an explanation of this bill and the one which immediately follows.

Mr. GURNEY. Mr. President, the report is very brief. The existing law is sought to be changed only to a slight degree in reference to the windows in the chapel. The present language refers to naval officers who have successfully commanded a fleet or squadron in battle. The term "squadron" is changed to bring it into line with the modern organization of the Navy. The second change reduces the waiting period after the death of the officer concerned from 5 to 2 years. That is the gist of the bill.

Mr. GREEN. I am also interested in having an explanation of the following bill. I thought it would save time to have it now.

Mr. WHERRY. I call for the regular order.

The ACTING PRESIDENT pro tempore. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading, was read the third time, and passed.

BILL PASSED OVER

The ACTING PRESIDENT pro tempore. The next measure on the calendar will be stated.

The bill (S. 1528) to authorize the Secretary of War and the Secretary of the Navy to accept and use gifts, devises, and requests for schools, hospitals, libraries, museums, cemeteries and other institutions, was announced as next in order.

Mr. GREEN. I should like to have an explanation.

Mr. GURNEY. This bill would authorize the Secretary of National Defense and the Secretaries of the Army, Navy and Air Force to accept gifts for museums, libraries, and so forth.

Mr. GREEN. I wish to know whether that means unconditional gifts, or whether there might be conditions which the Government would be obligated to carry out.

Mr. GURNEY. Does the Senator mean conditions in regard to the upkeep of the gifts, and so forth, after they are accepted?

Mr. GREEN. I mean any conditions which might be imposed.

Mr. GURNEY. They have to be approved by the Secretary before the gifts are accepted.

Mr. GREEN. That would give the Secretary absolute discretion to undertake the carrying out of any conditions which might be attached; is that correct?

Mr. GURNEY. The bill provides that he cannot accept a gift unless the conditions are satisfactory to the Government.

Mr. GREEN. No, unless they are satisfactory to him.

Mr. GURNEY. I presume that would follow.

Mr. GREEN. There have been cases in which the conditions which were attached proved to be very onerous. If the officer who has the discretionary power has a friendly disposition, he may accept the gifts under almost any conditions. I think there should be some restrictions in regard to this matter.

Mr. GURNEY. I understand that where such things as ship models are offered to the Academy, frequently a sum is provided for their upkeep, although it is not a large sum.

Mr. GREEN. But sometimes the condition is that the gift must be placed in a certain conspicuous position or in a certain building, or something of that sort; and sometimes such conditions prove to be very onerous.

Mr. GURNEY. Mr. President, I shall be glad to have the bill passed over until the Senator is satisfied about this matter.

The PRESIDENT pro tempore. The bill will be passed over.

The clerk will state the next measure on the calendar.

DISPOSITION OF CONDEMNED MATERIAL

The Senate proceeded to consider the bill (H. R. 774) to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective Departments, which had been reported from the Committee on Armed Services, with amendments, on page 1, in line 8, after the words "Secretary of", to strike out "War and" and insert "the Army, the Secretary of the Air Force"; on page 2, in line 20, after the word "Secretary of", to strike out "War" and insert "the Army, the Secretary of the Air Force."

The amendments were agreed to.

The amendments were ordered to be engrossed and the bill to be read a third time.

The bill was read the third time and passed.

EXCHANGE OF CERTAIN PROPERTIES WITHIN GETTYSBURG NATIONAL MILITARY PARK

The bill (H. R. 3645) relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes, was considered, ordered to a third reading, read the third time, and passed.

UNLAWFUL WEARING OF UNIFORMS IN CANAL ZONE, GUAM, AMERICAN SAMOA, AND THE VIRGIN ISLANDS

The bill (S. 1799) to amend the act of June 3, 1916, as amended, to make it applicable to the Canal Zone, Guam, American Samoa, and the Virgin Islands, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted, etc., That section 125 of the act of June 3, 1916 (39 Stat. 216; 10 U. S. C. 1393), as amended, is hereby further amended by inserting between the first and second paragraphs thereof the following new paragraph:

"The provisions of this section shall apply to the Canal Zone, Guam, American Samoa, and the Virgin Islands, as well as to all other places within the jurisdiction of the United States."

BILL PASSED OVER

The bill (H. R. 2239) to amend section 13 (a) of the Surplus Property Act of 1944, as amended, was announced as next in order.

Mr. BYRD. Mr. President, may we have an explanation?

Mr. REVERCOMB. Mr. President, reserving the right to object, I should like to point out that this bill has a very far-reaching effect in regard to the Surplus Property Act. I believe that Senators would like to consider the bill further. I have spoken to the Senator from Michigan [Mr. FERGUSON], who reported the bill, and he understands that I object to its present consideration. Therefore I ask that the bill be passed over.

The ACTING PRESIDENT pro tempore. Objection being heard, the bill will be passed over.

That completes the calendar.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Swanson, one of its reading clerks, announced that the House had disagreed to the amendment of the Senate to the bill (H. R. 4127) to amend the Civil Service Retirement Act of May 29, 1930, as amended; agreed to the conference asked by the Senate on the disagreeing votes of the two Houses thereon, and that Mr. REES, Mr. STEVENSON, Mr. BUTLER, Mr. MURRAY of Tennessee, and Mr. LYLE were appointed managers on the part of the House at the conference.

LEGISLATIVE PROGRAM

Mr. WILEY obtained the floor.

Mr. BALDWIN. Mr. President, I desire to ask unanimous consent to have the Senate take up at this time two bills which have been passed over during the call of the calendar.

Mr. WHERRY. For the benefit of the distinguished Senator from Connecticut, I should like to state that a week ago it was announced that the calendar would be called today, beginning with Calendar No. 863, the point at which the call of the calendar was concluded on January 12. Let me also state that it is the intention, if it meets with the approval of the Senate, to have the calendar called regularly each Monday. For that reason, I shall be forced to object to any request to have the Senate consider at this time bills prior to No. 863 on the calendar, because there are those who have been informed that that is the procedure which we shall pursue relative to the calling of the calendar.

I should also like to say that if the Senator from Connecticut desires to do so, of course, he can bring up the bills by motion, but in that event I think notice should be given, so that all Members of the Senate can be advised.

Mr. BALDWIN. Mr. President, the bills to which I have reference were called during the previous call of the calendar, but at that time there was some objection to their consideration. However, I understand that objection has been withdrawn. I refer to Senate bill 357, Calendar No. 702, providing for the incorporation of the Catholic War Veterans of the United States of America, and Senate bill 1375, Calendar No. 704, providing for the incorporation of the Jewish War Veterans of the United States of America. But if the Senator from Nebraska objects to the consideration of those bills at this time, in view of the order which has been entered, of course I do not press the request. I understand the calendar will be called next Monday.

Mr. WHERRY. That is correct.

Mr. BALDWIN. I further understand that these bills will be included in that calling of the calendar.

Mr. WHERRY. That is correct.

Mr. BALDWIN. Under the circumstances, I withdraw my request.

Mr. LODGE. Let me inquire whether the call of the calendar at that time will include the bill providing for the incorporation of the Franco-American War Veterans.

Mr. WHERRY. Yes; the calendar which will be called then will include all bills on the calendar.

DAYLIGHT SAVING

Mr. OVERTON. Mr. President, I understand the junior Senator from Rhode Island [Mr. McGRATH] requested that at some opportune time he be permitted to bring up the daylight-saving bill. That is a rather indefinite request, and I should like something specific about it. I should like to know when it is coming up.

The ACTING PRESIDENT pro tempore. If the Chair may respectfully state the situation to the Senator, no request was made. A simple notice was given that at some appropriate time in the near future the Senator would present the matter to which the Senator from Louisiana refers.

Mr. OVERTON. I hope, and I am sure, the Senator from Rhode Island will give me due notice of his intention.

Mr. McGRATH. Mr. President, I have no desire to interfere with the orderly processes laid out by the leadership, but it is imperative, if we are to get action on the measure at this session, so that it will be in effect by the time the rest of the country goes on daylight-saving time, that we have some time fixed within the next week or two when the matter can be brought up. I have been consulting and conferring with the distinguished Senator from Louisiana about an appropriate time. We were not able to agree on a particular time, so in order to protect whatever rights we may have in the situation, I give notice, and I have given notice, that at an appropriate time I shall move that the bill referred to be taken up. It would be most agreeable to me if the leadership on both sides of the aisle could agree upon a time and a day certain, when consideration could be given to the matter. I realize that it is an inconvenience to the Senator from Louisiana to have to remain here during all the sessions, awaiting the time when I may call up the bill. It is just as inconvenient to me to have to be here to carry out what I regard as my responsibility in the matter. Probably the distinguished leader of the majority could agree with us on a time when we could know definitely that the matter could be taken up for consideration.

Mr. WHERRY. Mr. President, if the Senator will yield for an observation, I shall be glad at any time to consider any measure any Senator would like to have taken up. I should like to say, however, that in the orderly process of debate the pending business is the St. Lawrence seaway, and I hope, if other matters are to be taken up, Senators will confer with the leadership, so that we can work out an orderly program, but at the same time preserve the continuity of debate, and bring the pending business to a conclusion. I assure the Senator from Rhode Island we shall be glad to take it up with him and see if something can be worked out that will be satisfactory to those who are interested in the legislation.

Mr. McGRATH. Mr. President, that is more than satisfactory to me, and I assure the Senator from Louisiana that until an agreement is reached with the leader of the majority by the Senator from Louisiana and myself, I shall not press the motion concerning which I have given notice.

Mr. OVERTON. I wished to make an additional observation, that I do not desire to interpose any objection to taking up the bill at any time. The Senator from Rhode Island has been very courteous to me, and I am very glad to reciprocate. I shall be perfectly willing to have the bill taken up at any time. The only suggestion I make is I should like to have some definite time fixed. If I can have adequate notice, any time will be satisfactory.

Mr. WHERRY. Ample notice will be given.

Mr. OVERTON. I thank the Senator.

PROCUREMENT OF SUPPLIES AND SERVICES BY THE ARMED SERVICES

Mr. WHERRY. Mr. President, it is our purpose to call the calendar, as I have stated before, beginning where the call was concluded on January 12, and then to carry out the further order of the day. Last Friday, however, the distinguished Senator from South Dakota was about to request consideration of two bills, which I asked him to withhold until today. I asked that he give notice of his desire that the bills be taken up today.

At this time I ask unanimous consent that the consideration of Calendar No. 597, House bill 1366, to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes, be resumed.

The Senate will recall that when the bill came up there were several amendments that were considered and agreed to, and at the request of the distinguished junior Senator from Oregon to have them printed for the benefit of Senators, the bill went over. The Senator in charge of the bill, the distinguished Senator from Virginia [Mr. BYRD] is now present. I think this matter can be disposed of within a few moments. Should it provoke any lengthy discussion, I shall call for the regular order, because I feel that the time has arrived when we should proceed to the consideration of the St. Lawrence seaway bill, and the distinguished senior Senator from Wisconsin [Mr. WILEY] is prepared to address the Senate.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Nebraska?

Mr. WILEY. With the understanding stated, I have no objection.

There being no objection, the Senate resumed the consideration of the bill (H. R. 1366) to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the committee amendment, as amended.

Mr. BYRD. Mr. President, the bill is for the purpose of improving the method of purchasing supplies by the Army, Navy, and Air Force. One of the reasons why it is necessary is because of the unification of the services. The matter was very carefully considered by the committee, and the bill has the approval of the Comptroller General, of the Budget Director, and of the interested agencies of the Government. I shall be glad to make any further explanation that may be desired.

The ACTING PRESIDENT pro tempore. The committee amendment is open to amendment. If there be no further amendments, the question is on agreeing to the committee amendment as amended.

Mr. GURNEY. Mr. President, I have just received word that during the consideration of this particular bill, the in-

sertion of the words "the Secretary of the Air Force" was inadvertently omitted from one of the amendments. I therefore ask the Senate to agree to a committee amendment on page 31, line 25, of the bill as it was amended January 12, after the word "Army," to insert "and the Secretary of the Air Force."

The ACTING PRESIDENT pro tempore. The question is on the amendment to the amendment.

The amendment to the amendment was agreed to.

The ACTING PRESIDENT pro tempore. The question is on agreeing to the committee amendment as amended.

The amendment as amended was agreed to.

The ACTING PRESIDENT pro tempore. The question is on the engrossment of the amendment, and the third reading of the bill.

The amendment was ordered to be engrossed and the bill to be read the third time.

The bill H. R. 1366 was read the third time and passed, as follows:

Be it enacted, etc., That this act may be cited as the "Armed Services Procurement Act of 1947."

SEC. 2. (a) The provisions of this act shall be applicable to all purchases and contracts for supplies or services made by the Department of the Army, the Department of the Navy, the Department of the Air Force, the United States Coast Guard, and the National Advisory Committee for Aeronautics (each being hereinafter called the agency), for the use of any such agency or otherwise, and to be paid for from appropriated funds.

(b) It is the declared policy of the Congress that a fair proportion of the total purchases and contracts for supplies and services for the Government shall be placed with small business concerns. Whenever it is proposed to make a contract or purchase in excess of $10,000 by negotiation and without advertising, pursuant to the authority of paragraph (7) or (8) of section 2 (c) of this act, suitable advance publicity, as determined by the agency head with due regard to the type of supplies involved and other relevant considerations, shall be given for a period of at least 15 days, wherever practicable, as determined by the agency head.

(c) All purchases and contracts for supplies and services shall be made by advertising, as provided in section 3, except that such purchases and contracts may be negotiated by the agency head without advertising if—

(1) determined to be necessary in the public interest during the period of a national emergency declared by the President or by the Congress;

(2) the public exigency will not admit of the delay incident to advertising;

(3) the aggregate amount involved does not exceed $1,000;

(4) for personal or professional services;

(5) for any service to be rendered by any university, college, or other educational institution;

(6) the supplies or services are to be procured and used outside the limits of the United States and its possessions;

(7) for medicines or medical supplies;

(8) for supplies purchased for authorized resale;

(9) for perishable subsistence supplies;

(10) for supplies or services for which it is impracticable to secure competition;

(11) the agency head determines that the purchase or contract is for experimental, developmental, or research work, or for the manufacture or furnishing of supplies for experimentation, development, research, or test: *Provided*, That beginning 6 months after the effective date of this act and at the end of each 6-month period thereafter, there shall be furnished to the Congress a report setting forth the name of each contractor with whom a contract has been entered into pursuant to this subsection (11) since the date of the last such report, the amount of the contract, and, with due consideration given to the national security, a description of the work required to be performed thereunder;

(12) for supplies or services as to which the agency head determines that the character, ingredients, or components thereof are such that the purchase or contract should not be publicly disclosed;

(13) for equipment which the agency head determines to be technical equipment, and as to which he determines that the procurement thereof without advertising is necessary in order to assure standardization of equipment and interchangeability of parts and that such standardization and interchangeability is necessary in the public interest;

(14) for supplies of a technical or specialized nature requiring a substantial initial investment or an extended period of preparation for manufacture, as determined by the agency head, when he determines that advertising and competitive bidding may require duplication of investment or preparation already made, or will unduly delay procurement of such supplies;

(15) for supplies or services as to which the agency head determines that the bid prices after advertising therefor are not reasonable or have not been independently arrived at in open competition: *Provided*, That no negotiated purchase or contract may be entered into under this paragraph after the rejection of all bids received unless (A) notification of the intention to negotiate and reasonable opportunity to negotiate shall have been given by the agency head to each responsible bidder, (B) the negotiated price is lower than the lowest rejected bid price of a responsible bidder, as determined by the agency head, and (C) such negotiated price is the lowest negotiated price offered by any responsible supplier;

(16) the agency head determines that it is in the interest of the national defense that any plant, mine, or facility or any producer, manufacturer, or other supplier be made or kept available for furnishing supplies or services in the event of a national emergency, or that the interest either of industrial mobilization in case of such an emergency, or of the national defense in maintaining active engineering, research, and development, are otherwise subserved: *Provided*, That beginning 6 months after the effective date of this act and at the end of each 6-month period thereafter, there shall be furnished to the Congress a report setting forth the name of each contractor with whom a contract has been entered into pursuant to this subsection (16) since the date of the last such report, the amount of the contract, and, with due consideration given to the national security, a description of the work required to be performed thereunder; or

(17) otherwise authorized by law.

(d) If in the opinion of the agency head bids received after advertising evidence any violation of the antitrust laws he shall refer such bids to the Attorney General for appropriate action.

(e) This section shall not be construed to (A) authorize the erection, repair, or furnishing of any public building or public improvement, but such authorization shall be required in the same manner as heretofore, or (B) permit any contract for the construction or repair of buildings, roads, sidewalks, sewers, mains, or similar items to be negotiated without advertising as required by section 3, unless such contract is to be performed outside the continental United States or unless negotiation of such contract is authorized by the provisions of paragraphs (1), (2), (3), (10), (11), (12), or (15) of subsection (c) of this section.

SEC. 3. Whenever advertising is required—

(a) The advertisement for bids shall be a sufficient time previous to the purchase or contract, and specifications and invitations for bids shall permit such full and free competition as is consistent with the procurement of types of supplies and services necessary to meet the requirements of the agency concerned.

(b) All bids shall be publicly opened at the time and place stated in the advertisement. Award shall be made with reasonable promptness by written notice to that responsible bidder whose bid, conforming to the invitation for bids, will be most advantageous to the Government, price and other factors considered: *Provided*, That all bids may be rejected when the agency head determines that it is in the public interest so to do.

SEC. 4. (a) Except as provided in subsection (b) of this section, contracts negotiated pursuant to section 2 (c) may be of any type which in the opinion of the agency head will promote the best interests of the Government. Every contract negotiated pursuant to section 2 (c) shall contain a suitable warranty, as determined by the agency head, by the contractor that no person or selling agency has been employed or retained to solicit or secure such contract upon an agreement or understanding for a commission, percentage, brokerage or contingent fee, excepting bona fide employees or bona fide established commercial or selling agencies maintained by the contractor for the purpose of securing business, for the breach or violation of which warranty the Government shall have the right to annul such contract without liability or in its discretion to deduct from the contract price or consideration the full amount of such commission, percentage, brokerage, or contingent fee.

(b) The cost-plus-a-percentage-of-cost system of contracting shall not be used, and in the case of a cost-plus-a-fixed-fee contract the fee shall not exceed 10 percent of the estimated cost of the contract, exclusive of the fee, as determined by the agency head at the time of entering into such contract (except that a fee not in excess of 15 percent of such estimated cost is authorized in any such contract for experimental, developmental, or research work and that a fee inclusive of the contractor's cost and not in excess of 6 percent of the estimated cost, exclusive of fees, as determined by the agency head at the time of entering into the contract, of the project to which such fee is applicable is authorized in contracts for architectural or engineering services relating to any public works or utility project). Neither a cost nor a cost-plus-a-fixed-fee contract nor an incentive-type contract shall be used unless the agency head determines that such method of contracting is likely to be less costly than other methods or that it is impracticable to secure supplies or services of the kind or quality required without the use of a cost or cost-plus-a-fixed-fee contract or an incentive-type contract. All cost and cost-plus-a-fixed-fee contracts shall provide for advance notification by the contractor to the procuring agency of any subcontract thereunder on a cost-plus-a-fixed-fee basis and of any fixed-price subcontract or purchase order which exceeds in dollar amount either $25,000 or 5 percent of the total estimated cost of the prime contract; and a procuring agency, through any authorized representative thereof, shall have the right to inspect the plants and to audit the books and records of any prime contractor or subcontractor engaged in the performance of a cost or cost-plus-a-fixed-fee contract.

SEC. 5. (a) The agency head may make advance payments under negotiated contracts heretofore or hereafter executed in any amount not exceeding the contract price upon such terms as the parties shall agree:

Provided, That advance payments shall be made only upon adequate security and if the agency head determines that provision for such advance payments is in the public interest or in the interest of the national defense and is necessary and appropriate in order to procure required supplies or services under the contract.

(b) The terms governing advance payments may include as security provision for, and upon inclusion of such provision there shall thereby be created, a lien in favor of the Government, paramount to all other liens, upon the supplies contracted for, upon the credit balance in any special account in which such payments may be deposited and upon such of the material and other property acquired for performance of the contract as the parties shall agree.

SEC. 6. Whenever any contract made on behalf of the Government by the agency head or by officers authorized by him so to do includes a provision for liquidated damages for delay, the Comptroller General on the recommendation of the agency head is authorized and empowered to remit the whole or any part of such damages as in his discretion may be just and equitable.

SEC. 7. (a) The determinations and decisions provided in this act to be made by the agency head may be made with respect to individual purchases and contracts or with respect to classes of purchases or contracts, and shall be final. Except as provided in subsection (b) of this section, the agency head is authorized to delegate his powers provided by this act, including the making of such determinations and decisions, in his discretion and subject to his direction, to any other officer or officers or officials of the agency.

(b) The power of the agency head to make the determinations or decisions specified in paragraphs (12), (13), (14), (15), and (16) of section 2 (c) and in section 5 (a) shall not be delegable, and the power to make the determinations or decisions specified in paragraph (11) of section 2 (c) shall be delegable only to a chief officer responsible for procurement and only with respect to contracts which will not require the expenditure of more than $25,000.

(c) Each determination or decision required by paragraphs (11), (12), (13), (14), (15), or (16) of section 2 (c), by section 4 or by section 5 (a) shall be based upon written findings made by the official making such determination, which findings shall be final and shall be available within the agency for a period of at least 6 years following the date of the determination. A copy of the findings shall be submitted to the General Accounting Office with the contract.

(d) In any case where any purchase or contract is negotiated pursuant to the provisions of section 2 (c), except in a case covered by paragraphs (2), (3), (4), (5), or (6) thereof, the data with respect to the negotiation shall be preserved in the files of the agency for a period of 6 years following final payment on such contract.

SEC. 8. No purchase or contract shall be exempt from the act of June 30, 1936, as amended (49 Stat. 2036), as amended by the act of June 28, 1940, 54 Stat. 681, and by the act of May 13, 1942, 56 Stat. 277; U. S. C., title 41, secs. 35 to 45) or from the act of March 3, 1931, as amended (46 Stat. 1494, as amended by the act of August 30, 1935, 49 Stat. 1011, and by the act of June 15, 1940, 54 Stat. 399; U. S. C., title 40, secs. 276a to 276a–6), solely by reason of having been entered into pursuant to section 2 (c) hereof without advertising, and the provisions of said acts and of the act of June 19, 1912, as amended (37 Stat. 137, as amended by the act of September 9, 1940, 54 Stat. 884; U. S. C., title 40, secs. 324 and 325a), if otherwise applicable, shall apply to such purchases and contracts.

SEC. 9. As used herein—

(a) The term "agency head" shall mean the Secretary, Under Secretary (if any), or any Assistant Secretary of the Army, of the Navy, or of the Air Force; the Commandant, United States Coast Guard, Treasury Department; and the executive secretary, National Advisory Committee for Aeronautics, respectively.

(b) The term "supplies" shall mean all property except land, and shall include, by way of description and without limitation, public works, buildings, facilities, ships, floating equipment, and vessels of every character, type and description, aircraft, parts, accessories, equipment, machine tools and alteration or installation thereof.

SEC. 10. In order to facilitate the procurement of supplies and services by each agency for others and the joint procurement of supplies and services required by such agencies, subject to the limitations contained in section 7 of this act, each agency head may make such assignments and delegations of procurement responsibilities within his agency as he may deem necessary or desirable, and the agency heads or any of them by mutual agreement may make such assignments and delegations of procurement responsibilities from one agency to any other or to officers or civilian employees of any such agency, and may create such joint or combined offices to exercise such procurement responsibilities, as they may deem necessary or desirable. Appropriations available to any such agency shall be available for obligation for procurement as provided for in such appropriations by any other agency through administrative allotments in such amount as may be authorized by the head of the allotting agency without transfer of funds on the books of the Treasury Department. Disbursing officers of the allotting agency may make disbursements chargeable to such allotments upon vouchers certified by officers or civilian employees of the procuring agency.

SEC. 11. (a) The following acts are hereby repealed:

Revised Statutes, section 3716 (U. S. C., title 10, sec. 1202);

Revised Statutes, section 3717 (U. S. C., title 41, sec. 9);

Revised Statutes, section 3718 (U. S. C., title 34, sec. 561);

Revised Statutes, section 3719 (U. S. C., title 34, sec. 562);

Revised Statutes, section 3720 (U. S. C., title 34, sec. 563);

Revised Statutes, section 3721, as amended (U. S. C., title 34, secs. 569–570);

Revised Statutes, section 3722 (U. S. C., title 34, sec. 572);

Revised Statutes, section 3723 (U. S. C., title 34, sec. 573);

Revised Statutes, section 3724 (U. S. C., title 34, sec. 574);

Revised Statutes, section 3726 (U. S. C., title 34, sec. 577);

Revised Statutes, section 3727 (U. S. C., title 34, sec. 578);

Revised Statutes, section 3729 (U. S. C., title 34, sec. 579);

Act of June 14, 1878, No. 30 (20 Stat. 253; U. S. C., title 34, sec. 565);

Act of March 3, 1893 (ch. 212, sec. 1, 27 Stat. 732; U. S. C., title 34, sec. 566);

Act of March 2, 1907 (ch. 2512, 34 Stat. 1193; U. S. C., title 34, sec. 571);

Act of March 4, 1913 (ch. 148, 37 Stat. 904; U. S. C., title 34, sec. 575);

Act of June 30, 1914 (ch. 130, 38 Stat. 393; U. S. C., title 34, sec. 567);

Act of May 15, 1936 (ch. 400, 49 Stat. 1277; U. S. C., title 10, sec. 1199 (a));

Act of July 13, 1939 (ch. 265, 53 Stat. 1000; U. S. C., title 10, sec. 313);

(b) The following acts shall not apply to the procurement of supplies or services by the Department of the Army, the Department of the Navy, the Department of the Air Force, the United States Coast Guard, Treasury Department, or the National Advisory Committee for Aeronautics:

Revised Statutes, section 3709, as amended (U. S. C., title 41, sec. 5);

Revised Statutes, section 3735 (U. S. C., title 41, sec. 13);

Act of October 10, 1940, ch. 851, sec. 1, 54 Stat. 1109, as amended (U. S. C., title 41, secs. 6 and 6a).

(c) The following parts of acts are hereby repealed:

(1) That portion of the act making appropriations for fortifications, approved February 24, 1891 (26 Stat. 769), relating to "Armament of fortifications," which reads as follows: "*Provided*, That no contract for the expenditure of any portion of the money herein provided, or that may be hereafter provided, for the purchase of steel shall be made until the same shall have been submitted to public competition by the Department by advertisement."

(2) Those portions of the Army Appropriation Acts approved March 2, 1901 (ch. 803, 31 Stat. 905; U. S. C., title 10, sec. 1201); and June 30, 1902 (32 Stat. 514), relating to "Quartermaster's Department, Regular Supplies," which read as follows: "*Provided further*, That hereafter, except in cases of emergency or where it is impracticable to secure competition, the purchase of all supplies for the use of the various departments and posts of the Army and of the branches of the Army service shall only be made after advertisement, and shall be purchased where the same can be purchased the cheapest, quality and cost of transportation and the interests of the Government considered."

(3) That portion of the Army Appropriation Act approved June 12, 1906 (ch. 3078, 34 Stat. 258; U. S. C., title 10, sec. 1205), relating to "Ordnance Department," which reads as follows: "Hereafter the purchase of supplies and the procurement of services for all branches of the Army service may be made in open market, in the manner common among businessmen, when the aggregate of the amount required does not exceed $500; but every such purchase exceeding $100 shall be promptly reported to the Secretary of War for approval, under such regulations as he may prescribe."

(4) That portion of the Army Appropriation Act, approved May 11, 1908 (ch. 163, 35 Stat. 125; U. S. C., title 10, sec. 1199), relating to "Ordnance Department," which reads as follows: "Whenever proposals are invited for the furnishing of articles of ordnance property, the character of which or the ingredients thereof are of such a nature that the interests of the public service would be injured by publicly divulging them, the Chief of Ordnance is authorized to purchase such articles in such manner as he may deem most economical and efficient."

(5) That portion of the War Department Appropriation Act, approved May 15, 1936 (49 Stat. 1299), relating to "arms, uniforms, equipment, and so forth, for field service, National Guard," which reads as follows: "*Provided*, That specifications for motor vehicles, which shall be so drawn as to admit of competition, shall to the extent otherwise practicable conform with the requirements of the National Guard."

(d) All other laws and parts of laws to the extent that they are inconsistent with this act are hereby repealed.

SEC. 12. The Secretary of the Navy shall have the same authority with respect to contracts of the Department of the Navy as the Secretary of the Army has with respect to contracts for the Department of the Army under the act of April 10, 1878, as amended (20 Stat. 36, as amended by the act of March 3, 1883, 22 Stat. 487; U. S. C., title 5, sec. 218). The Secretary of the Army and the Secretary of the Air Force shall have the same authority with respect to emergency purchases of war material abroad as the Secretary of the Navy has with respect to such purchases under the act of June 30, 1914 (38 Stat. 399; U. S. C., title 34, sec 568).

SEC. 13. This act shall become effective 90 days after the date of enactment.

THE ST. LAWRENCE SEAWAY

The ACTING PRESIDENT pro tempore. The Senate will recall that it has hitherto been ordered that upon conclusion of the call of the calendar on today, January 26, 1948, the Senate proceed to the consideration of Senate Joint Resolution 111, a joint resolution approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

The Senate proceeded to consider the joint resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof, which had been reported from the Committee on Foreign Relations with amendments.

The amendments of the Committee on Foreign Relations were, in section 1, on page 2, line 16, after the words "on the", to strike out "Saint Lawrence River" and insert "Great Lakes-Saint Lawrence System"; in section 3, page 3, line 25, after "(4)", to insert "that tolls may also be charged for passengers but that in no event shall the total charges exceed the equivalent of $1.50 per passenger; (5)", so as to make the joint resolution read:

Resolved, etc., That, as provided by article XIII of the Boundary Waters Treaty of 1909 between the United States and Great Britain, the agreement made by and between the Governments of the United States and Canada, dated March 19, 1941, published in House Document No. 153, Seventy-seventh Congress, first session, is hereby approved, with the exception of article VII, article VIII, paragraph (c), and article IX thereof, and the President is hereby authorized and empowered to fulfill the undertakings made on behalf of the United States in said agreement, with the exception of article VII, article VIII, paragraph (c), and article IX, upon the receipt by him of satisfactory evidence of the approval of said agreement with the exceptions provided above, by reciprocal or concurrent legislation of Canada: *Provided*, That the President, before said agreement enters into force, obtains satisfactory assurances, by exchange of notes or otherwise, that the Government of Canada agrees to the principle of making the new deep-water navigation works on the Great Lakes–St. Lawrence system herein authorized self-liquidating by charging reasonable tolls, this principle to be implemented through the conclusion of arrangements satisfactory to both Governments pursuant to section 3 of this joint resolution.

SEC. 2. It is the sense of the Congress that it would be desirable for the President to negotiate with Canada a treaty or treaties with reference to the matters provided for in articles VII and IX of the agreement of March 19, 1941, including provisions with respect to perpetual navigation rights on the Great Lakes, on the connecting channels and canals and in the wholly Canadian sections of the St. Lawrence River, and the provisions for the amendment of the Boundary Waters Treaty of 1909 with respect to diversion of waters at Niagara River; and to submit such treaty or treaties for the advice and consent of the Senate of the United States.

SEC. 3. (a) During the period of construction the President is authorized and directed to negotiate a further agreement with the Government of Canada, under the provisions of the Boundary Waters Treaty of 1909, defining the rates of charges or tolls to be levied for the use of the new deep-water navigation facilities on the St. Lawrence River, authorized in this joint resolution: *Provided*, That (1) the total charges shall be fair and equitable and shall give due consideration to encouragement of increased utilization of the navigation facilities, and to the special character of bulk agricultural, mineral, and other raw materials; (2) that tolls shall vary for ships in ballast and according to the character of cargo with the view that each classification of cargo will so far as practicable derive relative benefits from the use of these facilities; (3) that in no event shall the total charges exceed the equivalent of $1.25 per short ton of laden cargo, and may be less, depending on character of cargo; (4) that tolls may also be charged for passengers but that in no event shall the total charges exceed the equivalent of $1.50 per passenger; (5) that tolls shall apply only on traffic utilizing the new deep-water navigation works on the St. Lawrence River, with such exception of local or way or Government traffic as may be agreed upon by the two countries: *Provided further*, That such agreement shall become effective only after approval by the Congress of the United States and the Parliament of Canada.

(b) The President may, at his discretion, appoint a St. Lawrence Advisory Commission, to cooperate with similar representatives of the Government of Canada, for the purpose of studying and, after public hearings, making recommendations to their respective Governments on the administrative, technical, and economic aspects of a toll system on the proposed 27-foot St. Lawrence Canals, as a basis for the agreement on tolls proposed in this section.

SEC. 4. (a) There are hereby authorized to be appropriated, out of any money in the Treasury not otherwise appropriated, such sums as may be required to carry out the provisions of this joint resolution and to enable the United States to carry out the undertakings hereby authorized.

(b) Unless Congress by law authorizes such action, no amendment of the agreement, and no exchange of notes under article I, section 4 thereof, shall impose additional financial or other obligations on the United States.

SEC. 5. The President is hereby authorized and directed to negotiate an arrangement with the government of the State of New York for the transfer to the appropriate agency of that State of the power facilities on the United States side of the International Rapids constructed pursuant to this joint resolution, the cost to be determined in accordance with the method of allocation included in the joint recommendation of the Corps of Engineers, United States Army, and the Power Authority of the State of New York, dated February 7, 1933, presented at public hearings of the Committee on Foreign Relations February 10, 1933, Seventy-second Congress, second session: *Provided*, That such arrangement is consistent with the laws of the United States and protects the interests of the United States and of other States: *And provided further*, That such arrangement will be effective only after approval by the Congress of the United States and the Legislature of the State of New York.

Mr. WILEY. Mr. President, it is a privilege as well as an honor for me to speak in favor of the passage of so vital a piece of legislation as the St. Lawrence seaway, vital not only to 50,000,000 people in the Great Lakes and St. Lawrence Basin, but vital to 145,000,000 people who are citizens of this country, vital to another twelve to fifteen million people dwelling in Canada, and vital to those who are to come hereafter, affecting in all from two hundred to two hundred and fifty million people.

Mr. President, prior to the time that Stephen A. Douglas, of Illinois, became a candidate for the Senate of the United States, he occupied an office in the legislative branch of Illinois, and one of the challenging problems that came before the people of Illinois was whether or not they would permit bonds issued by the State of Illinois to go to default. There was a great deal of discussion. Finally, Mr. Douglas crystallized the matter by means of a simple resolution, reading:

Resolved, That Illinois be honest.

That resolution was adopted, and Illinois made good on the bonds she had issued.

Mr. President, in facing the issue of the St. Lawrence waterway I have no question in my mind respecting the honesty and integrity and the good judgment of every Member of the Senate. I have been associating with the Members of the Senate for 9 years. But I also know that we are all only human, and I know that many times we are creatures of emotion, fear, doubt, and frustration when we ought to be creatures of logic. So, prefacing my remarks, I say, let us use that God-given judgment in this case, bearing in mind the world in which we are living, a world contracted by man's inventions and man's ingenuity. Let us try to see in all its implications the project we are undertaking to discuss and understand.

Mr. President, I need not say that the Congress of the United States has before it, and will begin consideration within the next few weeks, the question of whether or not we shall appropriate four or five or six or seven billion dollars for foreign aid. Let us be honest and realize that a great problem exists nearer home.

I hope to make of these remarks merely a summary of the principal arguments advanced for the seaway. May I ask of my colleagues their kind indulgence so that I may complete my statement without interruption. I shall then be happy to answer any questions which they may care to submit.

Following my presentation, I understand that a number of my colleagues will give to the Senate the benefit of their judgment on behalf of this vital project. The proponents include the Senate President pro tempore, the Senator from Michigan [Mr. VANDENBERG], the worthy minority leader, the Senator from Kentucky [Mr. BARKLEY], who introduced the seaway joint resolution in the Senate during the Seventy-ninth Congress; the senior Senator from Vermont [Mr. AIKEN], who has ably championed the project since his coming to this great body; the worthy Senator from New Mexico [Mr. HATCH], who headed up the subcommittee which extensively explored the seaway measure in 1946 and favorably reported it, the senior and junior Senators from North Dakota [Mr. LANGER and Mr. YOUNG], and other Senators.

LITERATURE ON SEAWAY

I ask that during the next few days my colleagues try to find time to consult some of the literature on this subject. I invite their particular attention to the following:

First. The majority report on the seaway, Senate Report No. 810, part 1, which includes the 1946 majority report.

Second. The booklet of questions and answers on the seaway, prepared by the Commerce Department.

Third. The summary by the Library of Congress, giving the historic background of the seaway.

Fourth. The digest of hearings before my own foreign relations subcommittee on the seaway.

If Senators have sufficient time they might try to glance through the hearings held in 1947 and perhaps the more voluminous hearings held in 1946. I believe that even with the limited time which they can reserve for this matter amidst all their other responsibilities, they will be impressively convinced, as I am, of the need of this Nation—of all its sections—for the seaway now and in the period to come.

PROCEDURE WHICH I SHALL FOLLOW

It will be my aim, in the course of my remarks, to present the arguments as I see them on behalf of this long-deferred project. I do not intend to indulge in personalities, nor do I intend to make a large number of references to some of the organizations which oppose the seaway. I shall, however, cite some of them and endeavor objectively to disprove their arguments. I may say, however, that I recognize and respect the able character and that I treasure the friendship of many of my colleagues in this body who are unfortunately opposed to this valuable project, as well as many private individuals who also are opposed to it. But my personal deep feelings for them do not and will not change my unalterable desire to see the joint resolution passed by the Senate and House during the Eightieth Congress.

PREVIOUS SUPPORTERS OF SEAWAY

We are not alone here today, Mr. President, as we begin the debate on this historic project. The generations of men who have nobly contributed toward the advancing of this great idea and its fulfillment, as well as the 50,000,000 men and women of the Midwest and the Great Lakes area whose welfare depends on this project, are with us in spirit today. They are looking to us for statesmanship, for the national view, the larger perspective. They are hoping that we will serve them and the generations of Americans who are to follow.

The Halls of the United States Senate have been graced by countless statesmen who have worked nobly for the objective of the bill which we are taking up today.

I could not, of course, undertake to cite all the names of my illustrious predecessors who have worked for this objective. No list would, however, be complete without the names of Senator William Edgar Borah, of Idaho, Senator Key Pittman, of Nevada, Senators Robert M. La Follette, Sr., and Robert M. La Follette, Jr., Senator Irving Lenroot, Senator Burton K. Wheeler, and countless other Senators—some now with us, some now departed, but all of them great servants of the Republic.

NATIONAL VERSUS SECTIONAL VIEW

These great statesmen recognized that although the Midwest would be the primary area which would feel the favorable impact of this mighty waterway, it would benefit all sections of the land, and we are concerned here today with the national welfare, with the public interest of 143,000,000 Americans and countless millions yet unborn.

I recall the words spoken in the United States Senate in 1848 by Henry Clay, who stated:

> I have heard something said about allegiance to the South. I know no South, no North, no East, no West, to which I owe any allegiance. * * * The gentleman speaks of Virginia being my country. The Union, sir, is my country.

America is our country—not Wisconsin, not Massachusetts, not Pennsylvania, but the 48 States and all the people within it, who will be benefited by the completion of the St. Lawrence seaway project.

SUPPORT BY UNITED STATES PRESIDENTS

No introduction to this resolution could be adequate without reference to the great Chief Executives of America in recent history who have unanimously endorsed this project. Although history may not have yet given a final evaluation to their life endeavors, nevertheless their stature and importance are uncontested. Let the opponents of the seaway bear in mind that when they oppose this project they put their views in contrast alongside the resounding statements of these American Presidents.

FORMER PRESIDENTS HOOVER'S AND ROOSEVELT'S ENDORSEMENTS

One former Chief Executive of our land testified for the seaway. A great engineer, a great organizer of foreign relief, a selfless servant of this Nation, the Honorable Herbert Hoover, stated:

> The signing of the Great Lakes-St. Lawrence waterway treaty marks another step forward in this, the greatest internal improvement yet undertaken on the North American Continent. * * * Its completion will have a profoundly favorable effect upon the development of agriculture and industry throughout the Midwest. The large byproduct of power will benefit the Northeast. * * *

Mr. Hoover has consistently supported the seaway for over two decades.

Mr. Hoover's successor in the White House, Franklin Delano Roosevelt, also took his stand forthrightly on behalf of the seaway. He remarked:

> I subscribe to the definite belief that the completion of the seaway will greatly serve the economic and transportation needs of a vast area of the United States and should, therefore, be considered solely from the national point of view.

Franklin D. Roosevelt stated also that he was convinced that the St. Lawrence seaway would not "injure the railroads or throw their employees out of work," nor would it "interfere with the proper use of the Mississippi River or the Missouri River for navigation." It is this American President who stated in words that rang throughout a then panic-stricken Nation, "the only thing we have to fear is fear itself." So today, the only thing we have to fear about this project is fear over the most minute details, and fear that it may, if only temporarily, hurt the interests of this or that small segment of our country.

Fear did not build America. Fear did not see us through every one of our wars. Fear will not answer the needs of America in this atomic age. Rather it is faith which moves mountains; faith in the words, for example, of these great men. You and I know that lesser men have always followed the great stars on the horizon—the great statesmen like those whom I have mentioned, who serve as guides to a nation in doubt.

HARDING, COOLIDGE AND LA GUARDIA ENDORSED SEAWAY

I could cite the names of other great Americans. Warren G. Harding, for example, stated:

> The feasibility of the project is unquestioned; and its cost, compared with some other great engineering works, would be small.

Calvin Coolidge, in commenting about projects such as this, said that their completion:

> Is not incompatible with economy—

Get that, Senators—

> for their nature does not require so much a public expenditure as a capital investment which will be reproductive, as evinced by the marked increase in revenue from the Panama Canal. Upon these projects depends much future industrial and agricultural progress.

I could cite the testimony of so forthright a figure as the late Mayor LaGuardia, of the great metropolis of New York City, who, testifying in 1946, remarked:

> I am from the greatest port in the whole world. I have confidence in my port. * * * It is not the St. Lawrence seaway that I fear.

I could cite the testimony of great builders of American railroads who have testified for the seaway. Yet, to be sure, there are other and lesser railroad men who have opposed projects such as this, just as the purchase of Alaska was opposed. There were those who ridiculed the Panama Canal, who jeered at the possibilities of Duluth Harbor; fearists who opposed the purchase of Louisiana, doubting Thomases and others who have always opposed the expansion of this Nation. But fortunately their counsel was not heeded; and I trust and believe that the counsel of the seaway's opponents will not be heeded in our day.

This is a revenue-producing, self-sustaining project which will not drain the Treasury, but on the contrary will increase the material wealth of the American people and will retire its own investment.

FOUR-F OPPOSITION

The grounds for opposition to the seaway seem strictly four-F in their basis—fear, fancy, folly, and frustration—fear of progress, fancy in relying on questionable statements rather than facts, folly because of lack of vision, and frustration because this great Nation will frustrate the ambitions of a few selfish interests. I am not referring to any of my colleagues in this statement, but rather to the general grounds on which most of the opposition seems based.

INITIAL SUMMARY OF ARGUMENTS FOR SEAWAY

Mr. President, the purpose of Senate Joint Resolution 111 is to authorize the construction of the St. Lawrence seaway and power project. The reasons for the affirmative recommendation by an overwhelming majority of the Foreign Relations Committee are spread in the volu-

minous records of the committee, which held extensive hearings on this subject in 1933, 1946, and 1947.

Before this debate is concluded, the following facts will be amply proved:

First. The St. Lawrence seaway is a needed navigation facility which will relieve recurrent shortages of transportation and eliminate the economic wastage that results from the inability of the railroads to carry the peak traffic of the summer months.

Second. The St. Lawrence seaway will reduce transportation costs in an area which contains more than 50,000,000 people, an area which has become not only the arsenal of democracy for war but also the hope of the world in the revitalization of human and material welfare in food production and in manufactured and mineral products.

Third. The St. Lawrence power project, which is a byproduct of this undertaking, will supply 2,200,000 horsepower of electricity to Canada and the United States in an area which has been suffering from the beginning of World War II with recurrent power shortages. This power is cheaper than any alternative source now available or hereafter to be available in the northeastern part of the United States.

Fourth. The St. Lawrence project as herein presented will be an addition to our national defense potential by virtue of the additional and much-needed navigation and power facilities which it will make available for necessary industrial mobilization in a time of emergency.

Fifth. The St. Lawrence project will be self-liquidating, returning to the Government and the people, the taxpayers of this Nation, the capital investment and interest upon that investment, as well as all operating costs. It will be self-liquidating in its navigation aspects as well as in the sale of power.

Sixth. It will be amply demonstrated that the opposition to the St. Lawrence project seems mainly centered in certain small economic and financial groups in the East who seem anxious to maintain their hold on transportation from the Middle West to the seacoast and their hold upon the power supply for the northeastern area.

It will be demonstrated that no economic harm is actually threatened to those interests, but that their position seems motivated principally by their desire to maintain their hold upon the future growth of this whole territory.

These facts will be proved by documentation in these proceedings.

I ask my colleagues to suspend judgment until they have heard the full case, not only my statement but also the statements which will be given by other proponents of this resolution, as well as the statements of the opponents.

HISTORY OF THIS LEGISLATION

This and similar resolutions have been considered by the Senate Foreign Relations Committee at various times during the past 3 years. My colleagues will recall that Senate Joint Resolution 104 of the Seventy-ninth Congress was the subject of extensive hearings and a favorable report by the full Senate Foreign Relations Committee by a vote of 14 to 8. Being reported near the end of the congressional session, Senate Joint Resolution 104 was not acted upon by the Senate.

Early in the Eightieth Congress, Senate Joint Resolution 111 was submitted by the chairman of the Senate Foreign Relations Committee on behalf of himself and 15 other Senators. On May 14, 1947, the chairman of the Senate Foreign Relations Committee appointed a subcommittee consisting of myself as chairman, the Senator from New Jersey [Mr. SMITH], the Senator from Iowa [Mr. HICKENLOOPER], the Senator from Utah [Mr. THOMAS], and the Senator from New Mexico [Mr. HATCH]. The Senator from New Mexico had previously served as chairman of a subcommittee in the Seventy-ninth Congress on Senate Joint Resolution 104, thereby establishing a continuity in the deliberations of the present subcommittee.

WHY 1947 HEARINGS WERE LIMITED

In view of the voluminous record accumulated over a period of 3 weeks by the subcommittee on Senate Joint Resolution 104 in 1946, the record of which extends through 1,383 pages, the present subcommittee confined the scope of the hearings to the two main subjects of immediate importance, namely, the extent to which national defense interests were involved in the St. Lawrence seaway and power project, and means of making the St. Lawrence seaway self-liquidating. Although major emphasis was placed upon these two subjects, no testimony was excluded on other phases of the project and there was considerable repetition, particularly by opponents of the project, of the arguments previously presented on the economic phases of the subject.

Our subcommittee held hearings during 6 days, and the record of hearings, in spite of the abbreviated scope of the inquiry, consists of 603 pages. All who sought to be heard were heard by our subcommittee.

In deliberating on the subject, the committee had before it the hearings as well as the majority report of its predecessor subcommittee in the Seventy-ninth Congress. The majority report which I presented on January 7 does not repeat the substantive facts and arguments of the report on Senate Joint Resolution 104, but accepts them as an integral part of this report, except for costs and self-liquidation, which are on a new basis and are thoroughly discussed in the present report.

In view of the fact that the subcommittee which considered Senate Joint Resolution 104 of the Seventy-ninth Congress—of which subcommittee the distinguished Senator from New Mexico [Mr. HATCH] was chairman—held most exhaustive hearings, and prepared a report which covers every aspect of this project thoroughly, it has been deemed helpful to the Senate to append this previous report to the present majority report, as well as the minority views of the senior Senator from Maine [Mr. WHITE]. Thus the Senate has before it a most comprehensive and fair record.

Our subcommittee of five Senators voted unanimously to report the resolution to the full committee, and the committee on July 18 voted 9 to 4 to report to the Senate, with the proviso that the minority would be accorded the courtesy of ample time to prepare its report. A minority report has been filed by the junior Senator from Massachusetts [Mr. LODGE] and is available in printed form.

CONSTITUTIONALITY OF RESOLUTION

The distinguished chairman of the Senate Foreign Relations Committee will present in due course a detailed statement on the evolution of Senate Joint Resolution 111 and the constitutional aspects of the form of this legislation. He has taken the lead, over the past 3 years, in cooperation with the State Department and through them with the Canadian authorities, in redrafting the legislation into its present form in order to meet objections raised by several Senators in 1944.

Without elaborating on the issue of contitutionality of the procedure herein recommended, I will say briefly that the basic authority of Congress to legislate as proposed rests in the constitutional power "to regulate commerce with foreign nations and among the several States"—Constitution of the United States, article I, section 8.

The Supreme Court has, on numerous occasions, held that this clause vests in the Congress power to authorize the construction of navigation and power works in river basins. In addition to this constitutional authority, article 13 of the Boundary Waters Treaty of 1909 with Canada establishes a procedure whereby special agreements may be entered into between the parties for the development of boundary waters, which agreements, or any mutual arrangements, are subject to approval by concurrent or reciprocal legislation on the part of the Congress and the Parliament of the Dominion of Canada. This is exactly the procedure herein adopted as this agreement is subject to a majority vote by both Houses of Congress and after that by the Parliament of Canada. It does not go into effect until such approval is obtained.

The pending proposal thus adequately meets all legitimate questions regarding constitutionality. On this subject, pending a full discussion of the subject by the chairman of the Foreign Relations Committee, the distinguished senior Senator from Michigan, I commend the attention of Senators to the memorandum of the Department of State on the constitutionality of the St. Lawrence legislation, which is available as a committee print, and the conclusions of the majority of the Foreign Relations Committee embodied in the report on Senate Joint Resolution 104, Seventy-ninth Congress.

The Senator from New Mexico [Mr. HATCH] and his committee performed a herculean task, and I am sure that anyone who is vitally interested in the constitutional question will find all the answers there.

Mr. President, I wish to give a brief explanation of the provisions of the bill. As I said some time ago, most of us in Congress have to follow leaders. We are very busy in our own committee work, we have our individual problems, so that matters outside of our committee jurisdiction necessarily do not come to us, and we therefore look to men of judgment,

men who have given study and who have had time to contribute deliberation to the subject.

DESCRIPTION OF BILL'S PROVISIONS

Suffice it to say that section 1 of Senate Joint Resolution 111 authorizes the President to carry out the provisions of the agreement of March 19, 1941, with Canada, with the proviso that the President shall obtain, prior to such undertaking, assurances that the Government of Canada agrees to the principle of making the St. Lawrence seaway self-liquidating. This measure, in effect, authorizes the President to contract for our share of the joint undertaking at the international section of the river. The actual appropriations would still await congressional action, of course.

Section 2 authorizes the President to negotiate certain treaties with Canada to expand provisions of existing navigation rights between the two countries and to authorize additional diversion of water at Niagara.

Section 3 authorizes the President to enter into a new agreement with Canada to define the conditions and rates of charges for making the seaway self-liquidating.

Section 4 authorizes the necessary appropriations but limits the powers of the President so that the financial commitments of this Government may not be altered by executive action or exchange of notes between the two governments.

Section 5 authorizes the President to enter into an agreement with the government of the State of New York, to transfer the power facilities authorized by the agreement to the State in consideration of a price equal to the cost of the power project and one-half of the joint costs allocated to the United States.

FUTURE SENATE APPROVAL OF TREATIES

It must be made clear that the treaties to be negotiated pursuant to section 2, the agreement concerning tolls on the seaway, and the agreement for the transfer of the power project to New York State are all subject to approval by the Congress according to appropriate procedure applicable in each case. The Congress, therefore, will have full opportunity to express itself on the conditions of operation of both the seaway and the power project.

The effect of this resolution, therefore, I repeat, is simply to authorize the construction of the St. Lawrence seaway and power project, subject to similar approval by the Canadian Parliament, insuring at the same time that both the navigation and power aspects of the project will be self-liquidating. In short, the Congress is called upon to make an investment in this project, which will be returned ultimately with interest on the investment.

DESCRIPTION OF PROJECT

The St. Lawrence project now before Congress has two purposes: First, it will make it possible for oceangoing, deep-draft vessels to travel directly from the Atlantic Ocean into the Great Lakes. It will make seaports of such great cities as Buffalo, Cleveland, Toledo, Detroit, Chicago, Milwaukee, and Duluth. It will bring the great agricultural and industrial productive capacity of the Middle West into direct communication by cheap water transportation with the rest of the world and with the Atlantic, Gulf, and Pacific coasts of the United States.

As a navigation project, it is as important to our country as the Suez Canal is to Europe, as the Dardanelles is to Russia, as the Panama Canal is to the east and west coasts of the Western Hemisphere.

In building the necessary dams and canals on the St. Lawrence River, there will be a large byproduct of cheap hydroelectric power in northern New York. The capacity of this single powerhouse will be 2,200,000 horsepower, the largest power capacity of a single project with the exception of Grand Coulee. This will be three times as large as the Dneiper Dam, the pride of Russia. The annual output of electricity will be larger than all the power produced by the Tennessee Valley Authority in 1944. It is cheap power, costing one and two-thirds mills per kilowatt-hour of average output at the station, one-quarter as expensive as the cheapest source of steam power in that area.

The power will be divided equally with Canada. The American share will be available for distribution as far south as New York City, and throughout the New England States. Cheap water power in that area of 20,000,000 people means lower monthly electric bills, more industries, more jobs, greater sales of electric appliances, more farms electrified.

PREVIOUS CONSTRUCTION

This is not a new project, but a bid for final completion of a waterway that has been in process of construction for 40 years. The Great Lakes now provide deep-water navigation throughout their length and breadth.

We start at Duluth and swing up to the Soo. I call attention to the fact that through the Soo locks in 1946 there were carried 120,000,000 tons of freight, most of it one way, and through the MacArthur Lock approximately 50,000,000 tons at the Soo alone.

The MacArthur Lock at the Soo, built by the Army engineers in 1943 as a war project, connects Lake Superior and Lake Huron. That part of the seaway, as originally proposed, is now completed.

Eight locks of the Welland Canal, completed by Canada in 1932, scale the difference in the levels of Lake Erie and Lake Ontario, 324 feet. Except for a little dredging operation, that part of the seaway is completed too, and deep-draft ships can now proceed from Duluth at the head of Lake Superior for 1,200 miles to Ogdensburg, N. Y., on the upper St. Lawrence River.

The eastern end of the St. Lawrence River is navigable for ocean ships for a thousand miles from the Atlantic Ocean to Montreal, Canada. This city, on the St. Lawrence River, is the second largest seaport in North America, next only to New York City.

We have, therefore, deep-sea navigation for a thousand miles inland from the Atlantic on the lower St. Lawrence River to Montreal. We have deep-sea navigation for 1,200 miles in the Great Lakes and the upper St. Lawrence to Ogdensburg, N. Y.

The only impediment that prevents through navigation is the presence of some rapids in the St. Lawrence River between Ogdensburg, on the upper St. Lawrence, and Montreal on the lower St. Lawrence. Over this distance of 119 miles, the water level drops some 223 feet in three series of rapids. The project now before Congress contemplates the construction of the necessary dams, canals and locks by Canada and the United States to complete this work, with a huge byproduct of cheap water power. We can join the Great Lakes and the Atlantic together for ocean navigation by helping to knock away the rocks in the St. Lawrence rapids through congressional approval of Senate Joint Resolution 111.

ARMY ENGINEERS' COST ESTIMATE

What will this work cost? Everyone is rightly interested in this subject and there is unfortunately much misrepresentation of the facts. Lt. Gen. R. A. Wheeler, Chief of the United States Army engineers, during his testimony before the subcommittee submitted a table showing the total cost of the St. Lawrence seaway and power project, and the cost to complete the project, based on May 1947 price levels. The subcommittee accepted the Army engineers basic cost figures as they relate to the United States portion of the works. It has, however, found it desirable from the standpoint of appraising the feasibility of self-liquidation to bring the Canadian cost figures up to date. The Army engineers table showed all Canadian costs with the exception of those in the international rapids section at 1941 levels. The subcommittee therefore added 54 percent to put them upon a basis uniform with the American costs. This results in an overstatement, since Canadian construction costs have not advanced as much, but it has the advantage of making our estimates conservative.

TOTAL COST OF PROJECT—LOCKS AND POWER FACILITIES—SEVEN HUNDRED AND TWENTY MILLIONS

The cost to complete the project on this basis is in round figures $720,000,000, of which the Canadian cost is approximately $230,000,000 and the United States cost $490,000,000. This $720,000,000 figure is the one adopted by the subcommittee as the starting point for determining the amount to be liquidated. The resolution provides for the self-liquidation of new works and the subcommittee considers that it properly excludes from self-liquidation the cost of work done in the past. The construction already completed—chiefly the Welland Canal by Canada and the MacArthur lock and past dredging of channels in the Detroit and St. Clair Rivers by the United States—will form an integral part of the Great Lakes-St. Lawrence system, but they also have served and will continue to serve Great Lakes shipping which will not be subject to tolls.

FIRST COST OF SEAWAY, THREE HUNDRED AND NINETY-EIGHT MILLIONS

As already indicated, the subcommittee considers that all expenditures for

new work should be liquidated. Accordingly, the actual payments by the State of New York to the United States Government under the provisions of section 5 of the resolution, and the payments by the Province of Ontario to the Dominion Government for the power facilities, must be taken as the total cost of the power project, and must be deducted from the total cost of $720,000,000. In this way, we arrive at the out-of-pocket contributions by the Federal Governments of Canada and the United States for navigation to be liquidated by charges on tolls. The cost of the power projects thus to be deducted is estimated at $322,000,000 leaving as the first cost of the seaway $398,000,000.

TOTAL SEAWAY NET INVESTMENT, FOUR HUNDRED AND TWENTY-EIGHT MILLIONS

Using the interest rate of 2½ percent, which is closer to the actual rate—2.06 percent—at which the United States Government borrows money today, the total net investment would be about $428,000,000. This is the total cost of the seaway to the two Governments. I am dealing with total cost figures because, if the seaway is to be self-liquidating, and the users will pay for it, then the economic and financial calculations must be made on a total basis, for the traffic going through the St. Lawrence deep seaway must pay for both Canadian and American costs.

ANNUAL COST OF SEAWAY, SEVENTEEN AND ONE-HALF MILLIONS

We now have the total cost, including interest during construction, namely, $428,000,000. What is the annual cost that must be met by annual revenues? The annual cost must consider interest, amortization, and operation and maintenance. Taking $428,000,000 as the investment and applying an interest rate of 2½ percent, which more closely approximates actual borrowing rates, and using a sinking fund of 1 percent at 2½ percent compound interest, which would retire the investment in 53 years, and maintenance and operation at $2,460,000, the total annual charges would be $17,450,000.

ALTERNATIVE POLICIES FOR SELF-LIQUIDATION

The committee is cognizant of the fact that there are several alternative financial and accounting policies that may be adopted in bringing about a sound administration of this project on a self-liquidating basis. There are choices to be made in the matter of interest rates, in the matter of amortization policy—whether straight or sinking-fund or a depreciation policy—and in the period over which the retirement of investment should be effectuated. Any one of these alternatives would be sound and acceptable, and they have been used both by private industry and by Government. The exact details may not be established by unilateral action of the United States Government alone, but must be settled through negotiation and agreement with the Canadians. The committee has applied these available alternatives to the St. Lawrence seaway project, and finds that the results show annual cost of figures that vary between fifteen million and twenty-one million dollars. Mr. President, I ask Senators to note that amount. That is the annual overhead, on this basis, for maintenance, depreciation, and so forth.

Any one of these alternatives would be a sound policy. If the accounting system used on the Panama Canal by the War Department is used on the St. Lawrence seaway, the lower figure of $15,000,000 a year would be obtained. If the system recommended by the opponents is used, the figure is $21,000,000.

RAILROADS' PADDED COST ESTIMATES

Before proceeding to consider traffic and revenue potentials, let me briefly dwell upon some of the accounting legerdemain that the opponents employ in order to pad and exaggerate cost figures.

In the course of the hearings on this joint resolution it became abundantly clear that the principal opponents of this proposition are certain groups who seem afraid of the effect of the competition of this waterway upon their businesses. Of these, the Association of American Railroads is apparently in the forefront.

MAGNIFICENT RECORD OF UNITED STATES RAILROADS

Let me first state that as I take issue with the association's attitude on this proposition, I am not without appreciation of the splendid work the association has done and the railroads have done, both during the war and since, in carrying the Nation's military and civilian traffic. The railroads reached great heights of accomplishment under terrific handicaps; in fact, they have carried the enormous traffic of our wartime and postwar economy with equipment which, both in capacity and age, dates back to the First World War. In spite of the superhuman efforts of the operating officials of our railroads, there have inevitably developed, during each peak season, shortages of transportation which have caused wastage of production in many parts of our land. All of us are aware of that. It has become a common and perennial experience, one that we have come to expect every summer, that staple foods, such as grains, stored in the open fields because of lack of elevator capacity and lack of boxcars, and perishable foods in California, Texas, Florida, and many other States are wasted because the railroads are unable to render the service, upon demand, which their franchise requires them to do.

INADEQUACY OF RAILROAD FACILITIES

I am not criticizing or blaming anyone for this condition. I am merely pointing out a fact, namely, that we are trying to run a $200,000,000,000 economy with transportation equipment that was designed and constructed and expected to serve a sixty- or seventy-billion-dollar economy 25 or 30 years ago.

Any effort on the part of rail transportation interests to put impediments in the way of expanding transportation services will result in putting the economy of this country into a straitjacket, and such a procedure is directly contrary to public interest. I make that definite statement. It is possible that if I were not in the Senate of the United States, I might, as an attorney, be on the opposite side of this issue, having served in my time, in a local way, two railroads. But, fortunately, I am in the Senate, and I must take the national view. My own judgment is, with that background, that not in the long run, but in the short run, if this St. Lawrence waterway is constructed, it will ultimately improve not only the business of the railroads, but the business of everyone in America. Perhaps I shall have something more to say about that later on.

SEAWAY WILL MEET FUTURE UNITED STATES NEEDS

In discussing the St. Lawrence seaway project, we must conceive of it as a facility that is designed to meet transportation requirements not this year, not next year, not in 1950 or 1951, but 10, 20, and 30 years from now. Under peacetime conditions of construction this project will take 6 years to complete. If approved this year, we cannot expect the seaway to be utilized until 1954 or 1955, or perhaps even later.

It must be obvious to everyone that in the light of the experience of the last 7 years, with the growth of population and the working force of this country, with greater efficiency and productivity of workers, with greater utilization of mechanical devices and of electric power, and with increased productivity per man-hour, this country will experience over the next 10 or 20 years a growth in total national production and the standard of living which will necessitate enormous expansion in transportation facilities. So the St. Lawrence seaway must be considered as a part of the additional new facilities the country needs.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. IVES in the chair). Does the Senator from Wisconsin yield to the Senator from Maryland?

Mr. WILEY. I have asked not to be interrupted during the presentation of this part of my remarks; but if the Senator from Maryland has a specific question, I am willing to be interrupted for that purpose.

Mr. TYDINGS. I shall be glad to defer to the Senator's request. I do not wish to take issue with him on any particular matter, but I wish to ask whether he has any data, to be presented during the course of his address, which tend to show the purported volume of business likely to be carried over this canal in 5, 10, 15, or 20 years, if it is constructed.

Mr. WILEY. Of course, we have the judgment of the best men available, and they have considered the future situation. I refer to men of about as high integrity as we can find, men of high position in Government, men like former President Hoover and others who have given their judgment; and all that information is to be found in the hearings. If I do not refer to all of it during my remarks, I shall be happy to refer the distinguished Senator from Maryland to the evidence set forth in the hearings, where he can read what they have said about it.

In response to the Senator's question, I wish to say that the expressed fear that there will not be sufficient tonnage to carry the load of $15,000,000, or even $21,000,000, is to my mind the usual fear that has been expressed throughout the history of mankind in regard to such projects. A similar fear was expressed,

for example, in regard to the Panama Canal. The same interests opposed the building of the Panama Canal. The fear was that America would remain static, would not grow. However, in the case of the Panama Canal, subsequent events indicated, as I shall show, a tonnage growth to a point where it is a good business proposition, even from the standpoint of dollars and cents; and the same is true of the other large canals of the earth. I do not wish to be diverted into a discussion of that point at this time, but I shall come to it later.

At this time I simply wish to say to my distinguished friend the Senator from Maryland that all of us should refer to the map and see what this seaway project will mean—a route of 1,200 miles from Duluth, on Lake Superior, through the Great Lakes to Ogdensburg, N. Y., where there are rapids for a short distance—approximately 116 miles—which will be avoided by the building of locks, and where at the same time great quantities of electrical energy will be developed. New York is short of such energy, the East generally is short of it, and if we ever encounter another emergency, we shall be able to use that power, transmitting it as far west as Chicago.

The whole picture is one that simply calls upon us to get rid of the fear that the completion of the project is going to hurt this locality or that locality. We see that men like Secretary Harriman, a railroad man, Dewey, of New York, Roosevelt, of New York, LaGuardia, of New York, and numerous others, were returned by their constituents time and time again, by increasingly large majorities. They were men who stood for the project. They were not limited to the local view, but had the over-all view that by improving part of the Nation we improve the whole Nation. We had in the picture the railroads, as I will show, who said they would not oppose the project if it were put on a liquidation basis. It is put on a liquidation basis. They now question repeatedly all the estimated items. Of course, it is necessary to estimate futures, but we Americans have been rather good at that. There was testimony by the engineer, Mr. Wheeler. Figures will be placed in the RECORD showing that the Army engineers through the years have done such a tremendously accurate job of estimating that it is almost miraculous, comparing the estimated costs with the actual costs.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. I should like to refer the Senator from Maryland to the Industry Report on Domestic Transportation, which came off the press just a little over a month ago. It is a study made by the United States Department of Commerce on the very subject about which the Senator from Maryland was inquiring. The summary of the report does not appear in either the report of the committee or the minority views on the St. Lawrence seaway joint resolution, because the study was not completed until late last fall, whereas the hearings were concluded last spring. I am sure if the Senator from Maryland will get this industry report, which is available at the Department of Commerce, he will find just what the estimated amount of tonnage may be, and what the estimated amount of receipts and tolls may be. Of course, no one can tell to the ton or to the dollar just what either will be.

Mr. TYDINGS. Mr. President, will the Senator yield?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Maryland?

Mr. TYDINGS. I again thank the Senator from Wisconsin and apologize for violating his request, which I had no intention of doing when I arose.

Mr. WILEY. There is no need to apologize. I should like to have any Senator interrupt, but it does not make for continuity, that is all.

Mr. TYDINGS. What I should like to have is evidently the data suggested by the able Senator from Vermont. I should also like to have for my own consideration the data as to what traffic would likely be diverted, and from where, to make up the volume which he has suggested.

Mr. WILEY. I think there will be found testimony on that subject by men like Harriman, who testified there might be a little diversion. One might find testimony by my distinguished friend from Massachusetts, who fears there will be a great diversion, but I think by and large the testimony overwhelmingly shows that the traffic is going to be in the nature of the shipment of grains and heavy materials out-bound, with various materials in-bound. I shall go into that later in my remarks. The coastwise traffic was estimated in one place at from 1 to 3 percent, possibly, to begin with, but I think it will be found in the over-all picture that will all be caught up, with the Midwest economically healthy, which it may not be unless they get the St. Lawrence seaway, which I hope the Senator will note as I develop that subject. With the Midwest healthy, there is no question that, as we grow in population and in economic health, the tonnage in the East ports and in New Orleans will be increased rather than decreased.

Mr TYDINGS and Mr. SALTONSTALL addressed the Chair.

The PRESIDING OFFICER. Does the Senator from Wisconsin yield; and if so, to whom?

Mr. WILEY. I will finish first with the Senator from Maryland.

Mr. TYDINGS. Mr. President, I think the Senator's primary premise is a sound one, that anything that benefits part of the country benefits the whole of the country. I think the converse is also true, that anything that hurts a part of the country hurts the whole country. My point was that if the seaway were not built, the traffic would move by other routes. If the seaway is built, some of the traffic that would not flow on it, of course, if it were not built, will be taken from other transportation routes and diverted to the St. Lawrence seaway. I want to know, and I am hoping someone who has been on the committee will tell me, where the traffic that would normally be carried by the existing routes is to come from if the St. Lawrence waterway is built.

Mr. WILEY. We will see that the Senator receives that break-down. Most of the information will be found right in the RECORD, but in the report referred to by the Senator from Vermont [Mr. AIKEN] there will be found additional testimony. I shall develop that point later on, when I present the picture of what the Middle West is facing in relation to its economic life. There is no buncombe about that conclusion.

Mr. TYDINGS. I am going to take my seat, but before I do so I should like to state to the Senator that he can understand the primary motive for my asking the question. The city of Baltimore is the second port in exports and imports in the United States. The port of Baltimore was first in exports for 5 months of 1947. I want to help any other section of the country to improve, but it would be asking a good bit, if the building of the St. Lawrence seaway would cripple the great investments in the facilities that have already been installed in Baltimore to handle the freight received there. I do not want to approach the question on a narrow or provincial basis, but certainly that would be one of the great questions that ought to be considered not only by me but by the entire Senate in arriving at the feasibility of the project.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. SALTONSTALL. I understood the Senator did not want to be interrupted, so I did not interrupt him before, but on this point I should like to ask a question, or make a statement. The Senator from Vermont referred to the industry report of the Department of Commerce, headed by Mr. Harriman. I read that report, and if my memory is accurate—and I should like the Senator from Vermont to check it—the three principal commodities which the report says will be carried, and which will make up the most of the toll, are iron ore from Labrador and from Brazil, which will make up approximately fifteen million of twenty-one million estimated, or possibly twenty-seven million estimated, the balance being grain and coal shipped up the canal. In other words, if my understanding is correct, the report indicates that most of the revenue will come from iron ore shipped up to the Great Lakes ports, rather than from iron ore which is now in the Duluth section of Lake Superior, and which is used for the steel mills of the Middle West, and in the rest of the country.

Mr. OVERTON. Mr. President, will the Senator yield?

Mr. WILEY. I should like to continue, but if it be a matter of courtesy, I yield.

Mr. OVERTON. It would be along the line that is now being discussed. The Senator has been courteous to other Senators. I thought he might yield to me.

Mr. WILEY. I yield.

Mr. OVERTON. The Senator will recall that I had inserted in the RECORD during the closing days of the last session letters addressed to the late Senator Josiah W. Bailey, of North Carolina, then chairman of the Senate Committee on Commerce, from all the principal

ship lines operating under the American flag. They stated, with one exception, that they did not propose to use the St. Lawrence seaway, and they gave their reasons for not doing so. It is a very voluminous record. Has the Senator any evidence to the contrary, indicating that American shipping would be benefited by the construction of the St. Lawrence seaway?

Mr. WILEY. Yes; there is plenty of evidence, I am sure, but I do not care to go into the subject, except to say that that is one of the arguments made. Of course, first, there is a fear that the tonnage will be taken away from them, and then the argument is made that there will not be any tonnage taken away, that there will not be any ships to carry it. That is just one of the arguments that is used continually.

Mr. VANDENBERG rose.

Mr. WILEY. I want to place in the RECORD at this time the Harriman report. I shall then be glad to yield to the Senator from Michigan. I am sorry the distinguished Senator from Maryland has gone. The report, on page 73, indicates roughly the possible range of toll charges and toll revenues. The estimate is from thirty to thirty-seven and one-half million tons of ore, which would yield from $15,000,000 to $18,750,000 of revenue; grain, six and one-half to eleven and one-half million tons, that would yield $1,625,000 to $4,025,000; coal, 4,000,000 tons, which would yield from $1,000,000 to $1,400,000; and ballast, nineteen and one-half to twenty-two million tons, which would yield from $3,300,000 to $2,925,000, depending upon the toll. The toll ranges from 50 cents down to 15 cents. That is the Harriman report on the potential tonnage, totaling, as may be seen, in the neighborhood of fifty-odd million tons.

Now I am glad to yield to the Senator from Michigan.

Mr. VANDENBERG. Mr. President, I do not care to interrupt the Senator, as I know he will reach all the related matters in good time. But I do not like to have the Senator from Maryland left even in temporary suspense regarding an overriding fundamental fact in connection with this contemplated traffic. The Senator from Massachusetts [Mr. SALTONSTALL] has referred to it. I think he was very gracious in providing us with an exhibit, which thus substantially destroys his own position in connection with the issue.

The fact is that by far the major portion of the traffic contemplated is a brand-new traffic in iron ore moving in to the steel production of the Middle West, something which has not occurred in hardly any degree heretofore. The truth of the matter is that we have exhausted our inland iron ore reserves, under war pressure, to such an extent that there certainly is no fooling about the proposition that we confront a crisis in respect to raw ore materials if the steel production of the Middle West is to continue.

All that traffic, as the able Senator from Massachusetts has so graciously indicated, is brand new traffic which is not being taken away from the port of Baltimore or the port of Boston or any other port, because it has not existed heretofore, and it would have to exist on a water-borne basis. It could not possibly be shipped cheaply enough in any other manner because of the tremendous bulk and weight of the product.

We could not have developed the steel industry in the Middle West, even during the past years—and without it I do not know how we could have won the war—with rail transportation, because the ore does not lend itself to rail transportation. It has to be water-borne, and, if possible, without breaking cargo.

That is the chief source of contemplated revenue. And I respectfully submit to the Senator that he need have no fears that that sort of traffic is going to reduce any existing traffic, either in his great port of Baltimore or anywhere else on the Atlantic seaboard, because it is new traffic.

Mr. TYDINGS. Mr. President, will the Senator from Wisconsin yield?

Mr. WILEY. I yield.

Mr. TYDINGS. I should like to ask one question. I see on the sheet the Senator from Wisconsin has handed me the item "Grain, 11,500,000 tons." Is that new traffic?

Mr. VANDENBERG. Well, probably not. I am not undertaking to give the Senator, I ask the Senator please to understand, a complete answer, because I do not want to intrude on the able Senator from Wisconsin, and I know he is going to reach this point in the course of his address. I simply wanted to underscore immediately the fact that there is a tremendous traffic involved here, which is entirely new traffic.

Mr. TYDINGS. I hand back to the Senator from Wisconsin the sheet which he permitted me to examine. I am very glad the Senator from Michigan has been fair enough to say that two of the items on the list, which are to be new traffic, and which he did not enumerate in his remarks, are not new traffic at all, they are old traffic, traffic that will be diverted from existing lines to this new line. Perhaps some of the old lines—it is not certain—possibly might go into bankruptcy. What I do not want to do is to hurt one part of the country while I am very anxious to help another part.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. SALTONSTALL. I appreciate the gracious remarks of the Senator from Michigan, because they give me the opportunity to make myself, to use his term, crystal clear. As I understand, this iron ore which provides $15,000,000 of the $21,000,000 of prospective toll is to come from Labrador. The extent of the reserves of the prospective mines there have not even been tabulated. A 325-mile railroad has to be built before the ore can be brought to a port where it can be placed on boats. The question of the building of the railroad, the grades, and so on, the cost of building the road and the cost of operating it, are matters which are yet utterly unknown. I said what I did say to the Senator from Michigan, and I reply to him equally as graciously as he did to me, in an effort to point out that these tolls are illusory and in the future rather than of today or tomorrow.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. I should like to say that opposition to the development of the St. Lawrence seaway has been centered in a few ports, and among those ports have been the ports of Baltimore and Boston. Let me say that the development of the seaway will not take business from those ports. It will probably add greatly to the business of those ports. But there are in both Boston and Baltimore a few persons who have dreams of the days when the high-grade iron ore of the Midwest will be exhausted, and the steel industry will have to be forced to move to the Atlantic coast in order to get the low-cost foreign ore.

Mr. WILEY. Mr. President, the Senator from Vermont is stealing part of my argument.

Mr. AIKEN. Oh, am I? Perhaps Members of the Senate do not know that the Sparrows Point steel plant of Baltimore used Chilean ore all through the war. They would stand for an expansion of that business in Baltimore if they could blot out the steel industry of the Midwest States. That would mean also that the Pennsylvania Railroad and possibly other lines would reap a harvest in hauling the finished products from Baltimore and possibly other eastern ports to the midwest. But the farmers, and others living in the midwest, would pay that cost. It would not be good for our country to destroy one of the greatest industries we ever had, which is the midwest steel industry.

Mr. WILEY. I thank the distinguished Senator.

RAILROADS ACCEPT SELF-LIQUIDATION IN THEORY

It must be said to the credit of the Association of Railroads that they do not oppose—at least in their public statements—waterway facilities which are self-liquidating. Although the spokesman of the association was unable to recall any waterway which they had supported, still as a matter of principle it is clear that they do not oppose waterways, including the St. Lawrence seaway, if they are self-liquidating. This is what Dr. Julius H. Parmelee, vice president of the Association of Railroads said before the committee under cross-examination by me:

Senator WILEY. We understand now that this association that you represent has reached the conclusion that if it could be demonstrated with reasonable certainty that this could be a 100 percent liquidating project, a self-liquidating project, you would not be against it.

Dr. PARMELEE. That is correct, Mr. Chairman. We take that position, and it is a position we have held for many years. There has been no change in that position.

We have taken them at their word and are sincerely trying to make this project self-liquidating. We have no crystal ball. We cannot look into the future, but we will not sell America short, as some of the opponents of the seaway have. We have watched the progress of this Nation for 60 years, and we have seen that during every decade the level of the economic life of the Nation has risen, the standard of living of the Nation has increased, until today

we have a national income of $220,000,000,000. We have balanced our budget, and we are paying off on our debt. We are contemplating building works in Europe like the one now under consideration, and yet we hesitate to build such works at home.

Since Dr. Parmelee made the statement I just read, however, the association of railroads has shown increasing activity in opposing the legislation in spite of its provisions for self-liquidation. Now they try to point out that the project cannot be made self-liquidating. A careful reading of their thesis, published in a pamphlet entitled "The Great Delusion," shows, however, that having conceded the primary principle that they favor the development of waterways on a self-liquidating basis, they are now driven to quibbling on facts and figures—a transparent strategem.

OPPONENTS AND PROPONENTS AGREE ON FIRST COSTS

A careful study of their figures indicates there is not much difference between the proponents and opponents of the waterway on the initial costs. The association accepts the cost estimates of the Corps of Engineers which, for the total project, including both the seaway and power, amounts to $720,000,000. Eliminating the cost of the power project which Ontario and New York will pay, some $322,000,000, this leaves $398,000,000 for the first cost of the seaway, including both Canadian and American expenditures. From here on, there are divergences between the opponents and the proponents.

WHY ADD INTEREST AND PRINCIPAL OF POWER COST TO SEAWAY COST?

The Association of American Railroads prefers to charge 3 percent interest during construction instead of 2½ percent, and to pad the account further, adds the interest on construction of the power project to the cost of the seaway—an amount of nearly $29,000,000. By this device the association of railroads reaches a figure of $464,000,000 for the cost of the seaway, with interest during construction at 3 percent, including interest on the power project. Why the seaway should pay the cost of interest on the power project is not explained. This is one example of the manner in which the association pads the figures. However, if we take the $398,000,000 and add interest at 3 percent we would get $435,000,000 for the cost of the seaway. At 2½ percent interest, a more reasonable and realistic figure, the cost of the seaway would be $428,000,000. That is, take the cost of $398,000,000, add the interest at the rate of 2½ percent during the period of construction, and we will have what the seaway will cost.

SPURIOUS RETIREMENT POLICY PROPOSED BY RAILROADS

The Association of Railroads again pads the account when considering the annual costs of the project. The annual costs consist of interest, amortization, and operating expenses. The Association of Railroads prefers to retire the entire investment of the seaway in 40 years, which requires an annual charge of 1.33 percent on the cost of the project on a sinking-fund basis.

I know of no project of the nature and magnitude of the St. Lawrence, either in private or public hands, in which the total investment is retired in 40 years. Power companies apply at least a 50-year period of retirement for the dams and structures in water-power plants; railroads practically never retire their fixed investments, and one often wonders if they have any provision for retirement of their rolling stock, in view of the antiquated equipment used for passengers and freight.

The Congress only now has begun to develop a policy for the retirement of public works and reclamation projects which require at least a 50-year period of amortization.

In the case of the Panama Canal, which, by the word of every witness who appeared before our committee is a successful business enterprise, because it has paid all of its expenses—2½ percent interest and a small profit above that from the beginning up to 1940—there is no provision for retirement of the investment. However, improvements and upkeep are met out of current revenues, and a depreciation reserve is set aside for contingencies. Here is a successful enterprise run by the War Department which does not have a retirement system, but a system of depreciation applied only to depreciable property.

The Association of Railroads insists upon applying onerous conditions to the retirement of the proposed investment in the St. Lawrence in order to show that it is uneconomical. When asked whether they would be satisfied if we applied the same depreciation policy as the railroads applied to their own business, Dr. Parmelee said, Oh, no, he did not think that those principles would be applicable.

I can well understand his reaction, because if we applied railroad policies toward amortization of this project, the cost of the seaway would be even lower than the committee estimates.

RETIREMENT POLICY RECOMMENDED BY COMMITTEE

The committee, in its majority report, recommends a 53-year amortization period, which will require a 1 percent sinking fund annual charge. This will retire the total investment in the seaway, including interest during construction, in 53 years. This includes not only the locks and lock gates, dams, and spillways, which are the only depreciable items, but also the canals and the excavation work, which are of more permanent nature.

I personally would prefer the application of the Panama Canal principle to the St. Lawrence, whereby a depreciation reserve is set up to take care of depreciable property, but in deference to my colleagues on the committee, particularly the senior Senator from New Jersey [Mr. SMITH], who feels that the total investment should be retired within a reasonable time, I am willing to endorse the principle of total retirement in a period of 53 years.

Mr. WHERRY. Mr. President, will the Senator yield for a question?

Mr. WILEY. I yield.

Mr. WHERRY. I am seeking light. The Senator cites the example of the investment in the Panama Canal. Is the amortization of the St. Lawrence seaway figured on the basis of the tonnage which will go through during the period when it will be navigable? If so, is that a direct analogy for a comparison? The Panama Canal operates 12 months in the year. As I understand, the seaway will operate during only a part of the year.

Mr. WILEY. Seven months.

Mr. WHERRY. Does the Senator feel that the operation of the Panama Canal on a 12-month basis affords a proper example for comparison of earnings and investment with the St. Lawrence seaway, in view of the fact that it will operate only 7 months in the year?

Mr. AIKEN. Eight months.

Mr. WHERRY. Whatever the number of months may be. I am only seeking light.

Mr. WILEY. I am very happy that the Senator has asked the question. We have shown, and will show further in the debate, that the estimated income will run between $15,000,000 and $21,000,000 on a 7-month basis. It will probably be more than that. That is more than ample to take care of depreciation.

In connection with the estimate of tonnage which will pass through that canal, when we take into consideration the fact that through one lock, the MacArthur Lock, in 1946 more than 50,000,000 tons passed, in the down-passage alone, we can see the possibilities of earnings of this canal. I believe that within the lifetime of some of the younger Members of the Senate the population of that area will be possibly 100,000,000. There is the upper basin of Canada, with all its fertility. There are the States of Minnesota, North and South Dakota, Montana, and Nebraska, and other States in the Senator's section. The Senator has some idea what the population will be, and what the load on transportation will be. I am sure that if the Senator will look at the tables in the books which are available, he will understand very clearly that the estimates are made on a business basis.

Mr. WHERRY. As I understand, the amortization is based upon the actual tonnage which has gone through, and estimates of what the tonnage might be in the event certain locks were built.

Mr. WILEY. It is based upon the best opinion of men like former President Hoover, Secretary Harriman, and others who testified, including witnesses from New York and New England.

Mr. WHERRY. Where do they get their figures? I am trying to learn the facts as to the present tonnage, and what the estimate is.

Mr. WILEY. That information is all contained in the Department of Commerce report.

Mr. WHERRY. Upon whom does the Department of Commerce rely? Upon what basis is the survey made?

Mr. WILEY. Is the Senator speaking now about the estimate of tonnage?

Mr. WHERRY. Yes.

Mr. WILEY. I would prefer to have the Senator consult the record and see what it is. It is set forth in detail, showing who testified.

Mr. SALTONSTALL. Mr. President, will the Senator yield on the point raised by the Senator from Nebraska?

The PRESIDING OFFICER. Does the Senator from Wisconsin yield to the Senator from Massachusetts?

Mr. WILEY. I yield. I prefer to carry on with my argument, because there is no continuity when there are interruptions such as this. Many of the questions which are asked will be answered later by the argument. However, I am glad to yield.

Mr. SALTONSTALL. I think it is fair to say to the Senator from Nebraska that there is now a 14-foot canal which goes down the St. Lawrence. It is my understanding that the traffic which goes through the Welland Canal and down the 14-foot canal is not to pay any of the proposed tolls. The tolls are to be charged only on ships going up or down the new seaway. So when we estimate tonnage, and particularly when we use the figure of 50,000,000 tons going through the MacArthur locks in the past, we must remember that much of that tonnage would not pay tolls when it gets down into the seaway.

Mr. WILEY. Mr. President, the opposition reflected in such arguments has its mind pinned on Boston, New York, and a few other cities. It fails to take into consideration the dramatic statement of the Senator from Michigan [Mr. VANDENBERG], which is the testimony of every great American.

We of Wisconsin have given of our timber. Wisconsin, Michigan, and Minnesota have given of their iron ore. We have given 2,000,000,000 tons of it to build cities, railroads, and skyscrapers. Now the iron ore is being exhausted. There are 500,000,000 tons left. It is being taken out at the rate of 100,000,000 tons a year. The businessmen of the East are planning and scheming deliberately to transport the iron industry of the Middle West into the East. They want to cut the throat of the Middle West. If they do, what do Senators suppose the ports of the East will get? There are fifty million or sixty million of us living out there, building an economy upon iron. We have given of the lifeblood of our economy. In this war we gave 100,000,000 tons a year. Now all we ask is that there be opened up a stretch of 113 miles in the St. Lawrence River. The businessmen of the East say, "No; you are going to hurt us." If the heart of any man is hurt, I would not give much for his limbs. If we hurt the heart of an industry like the United States of America, we know what will happen to what is outside.

We lived through the prewar period, when the farms of America were being foreclosed. Before the war, insurance companies and banks were taking over farms, and industry was being centralized on the east coast. Some of us had to open the eyes of the people. We finally got them to the point where they saw the need of keeping the great Mississippi Valley industrially and economically sound.

We have given of our iron. We have given of our timber. All we ask is that we be given an opportunity, that the rapids of 113 miles may generate the electric power needed for the lifeblood of industry in the East, and that we may have an opportunity to transport our surplus wheat rather than let it rot on the farms of the Dakotas and Montana.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. SALTONSTALL. The Senator has said that I am opposing him on sectional grounds. I simply point out that I oppose the joint resolution in its present form, and at the present time. I have never said, and I do not now say, that I will oppose the joint resolution ultimately, if I believe it is practicable.

The Senator was discussing with the Senator from Nebraska the question of making the seaway self-liquidating through tolls. I simply pointed out to him—and I reiterate and point out to him again—that much of the traffic which goes through the Great Lakes, the Welland Canal, and the MacArthur locks, will not pay any tolls on this seaway.

There will be some traffic, of course, which will pay tolls, and I think it is fair to point it out. It is not, in my humble judgment, a sectional argument; it goes to the question of whether this seaway will be practically a self-liquidating project.

Mr. WILEY. Mr. President, everyone knows that under this resolution and under the treaties we have with Canada the Lakes are open. When we put in 113 miles of channel, cutting out the rock in the rapids, we are asking that the ships which pass up and down those lakes pay toll. Travel from Superior and Duluth down to Ogdensburg is free to the boats of Canada and of the United States. We are not interfering with that traffic. We are saying what former President Hoover said, that if we had had this canal built during World War II it would have been a great help. Miiltary men have said the same thing. Former President Hoover said, further, that if we had a canal we could attend to the job of feeding Europe and getting wheat over there. We are now limited to a capacity of approximately a million bushels a month for export.

The whole fear is built upon a straw man—that this great America of ours has not the iron in her system to come through. The argument which is advanced at this time was advanced when it was stated that we should have built the canal years ago. There was procrastination, there were Fabian tactics and delay. If we fail to pass this resolution we will be called upon—mark my words—to spend billions in making taconite practical as an iron base.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. I should like to say, first, that the traffic to which the Senator from Massachusetts [Mr. SALTONSTALL] refers as going through a 14-foot canal at the present time, and which would not pay toll, is largely traffic in grain from the Great Lakes ports to the port of Montreal, which would not be expected to pay tolls under the proposed St. Lawrence development.

I think now is the time to say this. I am a loyal New Englander, but my country comes first, last, and all the time, and I am mortified and ashamed at the smallness of a little group of selfish businessmen in Boston.

Not long ago I heard Mr. Laurence F. Whittemore, secretary of the New England Council, and the president of the Federal Reserve Bank of Boston, who was an official of the Boston & Maine Railroad, speaking to a group of New England businessmen and telling them to consider the effect of the impact of the St. Lawrence seaway upon them, and hinting to them that with the development of ore in Labrador the steel industry would expand tremendously and New England could become a great steel center. He was misleading the people of New England, just as much as he was misleading the people to whom he was speaking, because he did not tell them that ore was already available to them, that they had to have hundreds of thousands of tons of coal to operate the steel industry, and that there is no coal within hundreds of miles of New England. I think he was imposing upon the businessmen of New England and upon the people of New England who now pay outrageous prices for their electricity. When anyone talks of taking the steel industry away from the Midwest, centering it on the Atlantic coast, and giving our railroads an opportunity to make outrageous profits in transporting iron and steel, farm machinery, and other things that are made from iron or steel, it should be remembered that the additional cost comes right out of the pockets of the farmers and the businessmen of the Midwest who would then have to depend upon their high-cost steel from the central part of the continent, or else take the low-cost steel on either coast and pay transportation charges to get it inland.

That is my sentiment as a New Englander.

Mr. WILEY. I will say, Mr. President, that the sentiment which the Senator has just expressed was also expressed by a great man from Massachusetts, who was regarded as America's greatest forensic speaker, Daniel Webster. He said:

> Let our object be our country, our whole country, and nothing but our country.

On another occasion he said:

> There are those in each party who are more concerned for their State than for national politics. Their objects are small and their views are narrow.

Daniel Webster, "Black Dan," gave leadership to the Nation.

I said a few moments ago that prior to our getting into the war, when we were in the prewar days, I spoke on the floor of the Senate and stated that if my little city of Chippewa Falls, a town of 10,000 people, could have a pay roll equal to that of the people who were taken out of that little town and lived in Washington it would be economically healthy. Those were the days when grass was growing in the streets. That was simply because there was a taking of pay rolls from those communities that needed them, taking men and hiring them and paying them here. Then started that centralization. Thank God, they woke up. We did build in the

Middle West war plants. But how would it be now if into this eastern area the conspiracy of some of these folks is effectuated so that the plants that have built up Cleveland, Chicago, Detroit, Milwaukee, and other places, because they could not meet competition in the East, should migrate. How much traffic will the railroads lose?

All we are asking is a loan of $700,000,000 for the building of great productive institutions, a seaway, an electric energy producing plant. We are not asking that Congress do for us what it did for TVA. TVA seems to be panning out. We are asking that the money be loaned to ourselves. There has been no hesitation in sending into Europe between $5,000,000,000 and $7,000,000,000, but there is an unwillingness to take a little risk of our own.

I shall go on now with debunking the proposed padded interest rate.

The opponents insist on padding annual expenses in addition by insisting on a 3 percent interest rate as an annual charge. As stated before, the cost of money to the Federal Government is around 2 percent. Any revenue that yields beyond that amount brings a profit to the Federal Government. It seemed to the committee that a 2½ percent interest rate is reasonable and adequate. It is a fact also that in the case of power projects built and operated by the Reclamation Bureau, the Government has accepted a 2½ percent interest rate as adequate.

The Corps of Engineers of the United States Army, in proposing a draft agreement with the State of New York for the transfer of power facilities on the St. Lawrence River, recommended a 2½ percent interest rate. There would seem to be no logical reason whereby the Corps of Engineers should recommend a 2½ percent interest on the St. Lawrence power facilities and a different rate on the seaway. A 2½ percent interest will meet all the costs of money to the Federal Government and show a profit besides.

SEVENTEEN MILLION FOUR HUNDRED THOUSAND DOLLARS ANNUAL SEAWAY COST

The committee therefore calculates that on the basis of 2½ percent interest, and 1 percent sinking fund amortization which will retire the total investment in 53 years, and, in addition, a $2,400,000 annual operating expense, the St. Lawrence seaway will cost annually $17,400,000. This is the toal cost, to both Canada and the United States.

The Association of Railroads, by using 3 percent interest and 40 years amortization, arrive at an annual figure of $21,600,000. The difference between the padded figures of the opponents and the reasonable calculations of the committee is a matter of $4,000,000 a year.

Under these conditions, after having conceded the desirability and acceptability of the St. Lawrence seaway on a self-liquidating basis, I find, with all due respect to our learned adversaries, no logic or legitimate reason to justify the continued opposition of the Association of American Railroads. I requested counsel for the association to submit his recommendations in a constructive spirit on this legislation for the purposes of improving it and making it acceptable, but to this day I have, unfortunately, heard no word.

Instead, we have, regrettably, only had evidences of oblique opposition, such as I have described. Such an attitude on the part of so distinguished an organization is really disturbing to me.

TRAFFIC POTENTIALS

It is my belief that the traffic that will utilize the St. Lawrence seaway during the succeeding decades will be able to meet not only the reasonable cost estimated by the committee, but even the inflated cost figures of the opponents.

The essential character of the St. Lawrence seaway is that it connects by cheap water transportation the greatest concentration of agricultural and industrial products in the Middle West with all the ports of the world. The traffic and the need for transportation are there. Given the facilities, the traffic will grow decade by decade, until the works now authorized will appear inadequate.

PANAMA CANAL QUICKLY EXCEEDED TRAFFIC ESTIMATES

In the case of the Panama Canal, the initial estimates of traffic, conducted under the auspices of the Isthmian Canal Commission, were not realized during the first year of operation; but within 10 years, by 1924, the Canal carried 27,000,000 tons of traffic—10,000,000 tons above the earlier estimates; and since then it has brought in revenues of as high as $27,000,000 a year. A similar experience can be confidently expected for the St. Lawrence seaway project.

I have dwelt extensively on the position of the opponents on cost because they have conceded their agreement to the construction of the St. Lawrence project on a self-liquidating basis and because they now base their opposition upon what I regard as indefensible annual cost accounting principles which have no basis in fact or theory.

RAILROADS FEAR CHEAP SEAWAY TRANSPORTATION COST

Mr. President, the continued opposition of the Association of American Railroads, and also of the port interests in Boston, New York, Baltimore, and New Orleans, seems predicated on the belief that even with all reasonable charges added to the cost of constructing and operating the St. Lawrence seaway, it still will provide cheap transportation. These interests are concerned with possible diversion of traffic from the established rail lines and ports to the more economical route. This concern cannot be general with all the railroads, but is specifically applicable to the eastern trunk lines connecting Chicago with the eastern seaboard. Their influence goes into New England.

I, of course, have no objection to having the New York Central, the Pennsylvania Railroad, and the Baltimore & Ohio Railroad come forward in their own name and in their own right to express their opposition to this project because they feel it will impinge on the future traffic potentials of their lines. They have a right to do that. They have a right to take the position, as the case seems to them, that even with all charges paid through tolls, the St. Lawrence seaway would still be competing with the future business of the territory they serve. The Senate, of course, will have to decide whether the economic interests of the 50,000,000 people that live in the whole area of the Great Lakes and the national defense interests of the country as a whole are primary or secondary to the desire of those lines to have a hold on all future growth of traffic in that territory. The testimony of former President Herbert Hoover and Secretary of Commerce Harriman indicated that there might be some temporary inconvenience to the eastern trunk lines, but that future growth in traffic would smooth things out.

My own personal feeling is that the St. Lawrence seaway will be utilized primarily for the transportation of bulk commerce in grain, coal, iron ore, petroleum, bauxite, and many other products as to which water carriage is the most convenient and economical means of transportation, and that without the St. Lawrence seaway such traffic would be strangled, for the railroads could not economically carry the quantities of this traffic that the country will need.

Mr. President, I do not have to tell the Senate right now, with the oil situation in the Middle West what it is at the present time, and with people there freezing—and I just came from there this morning—that the trouble is transportation; and I do not have to assert that the St. Lawrence seaway will be utilized to provide fuel for the Middle West and fuel storage along the Great Lakes, so that people in that great industrial area will not freeze.

Mr. President, on the basis of the testimony presented to the committee by former President Hoover, Secretary Harriman, the Department of the Interior, the American Farm Bureau, and the National Grange, as well as by other business and technical witnesses, the committee estimated an annual traffic of from 30,000,000 to 40,000,000 tons, bringing revenues of from $20,000,000 to $30,000,000. The opponents questioned these figures, principally on the premise that no recent studies were made, and that Secretary Harriman's figures were preliminary. I was very much surprised to see that statement in the minority views.

REPORT OF COMMERCE DEPARTMENT

Mr. President, those figures are no longer preliminary. The minority views must have been written before November, while most of us were in Europe, for early in November the Secretary of Commerce made public an exhaustive report entitled "An Economic Appraisal of the St. Lawrence Seaway Project." There is no reference in the minority views to this work, although there is repeated reference to the preliminary nature of the Secretary's testimony. This report is thorough and definitive; and I suggest to the Senator from Nebraska, particularly in view of his questions, that he read the report. It reveals that three commodities alone—grain, iron ore, and coal—would supply 40,000,000 or more tons of traffic, with revenues of between twenty million and twenty-seven million dollars. The report also states that if the United States oil reserves are dimin-

ished off-shore imports of oil would amount to between 15,000,000 and 20,000,000 tons of cargo.

These figures do not include such other important traffic items as newsprint and wood pulp, iron and steel, machinery and vehicles, sugar and coffee, bauxite and chrome ore, and many other products.

NARROW VERSUS NATIONAL VIEW

No, Mr. President, the opponents may not be concerned about the taxpayers' interest. They know full well that there is enough traffic to and from the great industrial empire of the Middle West to utilize the capacity of the seaway and to pay for it. The few interests who benefit from the toll gates of commerce in Boston, New York, Baltimore, and New Orleans are apparently afraid they will lose their financial grip. But that is a narrow and limited view, limited even in perspective as to their own interests.

This country will continue to grow, and by the time the seaway is fully utilized there will be such large transportation requirements and improvement in industry and employment in the country that their children and grandchildren will look upon the present opposition to the seaway with the same amusement with which we view the efforts of the stagecoach interests 100 years ago to stop railroads from having terminals inside city limits. The stagecoach interests did just that, Mr. President.

RAILROAD OPPOSITION TO PREVIOUS COMMERCE PROJECTS

The real possibilities of the seaway probably will not be realized until 10 years after its completion, which will take us into 1965. This means that we are not now considering primarily the present fate of the longshoreman in New York or Boston or the ticket collector on the Long Island railroad who is about to reach his retirement age. We are considering the needs and welfare of their children and of the Nation in an expanding world of economic opportunities 15, 20, or 30 years from now.

I might reiterate, in passing, that I have the deepest respect, generally speaking, for the Association of American Railroads, which in countless instances has rendered magnificent service to American industry and the American Nation, particularly in our war effort. I have high esteem and personal friendship for the association's distinguished president, Mr. William T. Faricy, and for his fellow officers. I have always had, too, real admiration for the railroad brotherhoods and for their membership. That does not, however, alter my appraisal of the objective facts in this situation.

Mr. President, I contend that the common railroad man is in favor of the St. Lawrence seaway, and I say that the letters from the railroad brotherhoods and from others who pretend to speak for the railroad employees, and who say that the railroad employees generally are opposed to construction of the St. Lawrence seaway, are mere buncombe. I have talked to the railroad employees. I talked to some of them only yesterday, as I was on my way to Washington on the Baltimore & Ohio Railroad. I have talked to them in my own section of the country. These people, the common people, of whom Abraham Lincoln said, "God Almighty must have loved them, for He made so many of them"—have a vision of what the St. Lawrence seaway means in the building of America.

What is the situation as to the leadership of the railroad employees, Mr. President?

When this subject first arose, the presidents of many of those railroads—as we shall show from the record—endorsed this project. The president of the Baltimore & Ohio Railroad, the president of the New York Central Railroad, and the presidents of the western railroads were independent souls then; but somehow or other they got into the Association of American Railroads, for which only one man speaks. But he does not speak for the common laboring men. As one man in my own State said to me, "Why, we are for anything that will build America. We know that the railroads have to get busy. They are not serving the interests of the people as they should. It took a lot of the truckers to wake them up and to give the country part of the equipment that was needed. The railroads have to wake up some more, for we are growing faster than our transportation system is growing."

Mr. President, that man spoke with wisdom and with vision.

It is well known that the railroads opposed the construction of the Panama Canal on the theory that it would take traffic away from the transcontinental railroads. Let us read the debates of those days. Today those same railroads are enjoying the fruits of the expanding empire of the West, largely stimulated by the Panama Canal; and not one railroad man will deny now that the Panama Canal has been a boon to this Nation. I asked that question of Mr. Parmelee when he appeared before us. He said, "Yes, now we agree. Now we agree the Panama Canal was a good thing."

WHY THE COAL INTERESTS OPPOSE SEAWAY

The National Coal Association and John L. Lewis, of the United Mine Workers, are opposed to the St. Lawrence project, both as a power-generating facility and as a means of transportation. Why? Just stop and think of it. Why? He averred that if the canal were built, foreign countries would be shipping in coal and taking away our market in this country. Ever since his appearance before the House Committee on Rivers and Harbors, in 1941, John L. Lewis and his representatives have taken the position that the St. Lawrence seaway will open up the whole Great Lakes area for the invasion of imports of cheap coal from abroad, principally from England and Russia, and that both the domestic as well as the Canadian market will thereby be threatened. John L. Lewis went as far as to state that the 96,000,000-ton market for coal in the Great Lakes region may be taken away from the American producers if the seaway is opened.

Since then we have had the unusual experience of exporting 40,000,000 tons of coal last year, and the only limit upon further exportation is lack of transportation and dollars with which other countries can buy from us. John L. Lewis, himself, in many statements and articles has said that no foreign country can compete with us in the production of coal. Extensive studies by British working parties on coal indicate that one miner in the United States produces 4 or 5 tons of coal a day, as compared with 1 ton a day in England, and 1½ tons a day on the Continent of Europe.

Of course, our wage rates are high in view of the high productivity of our miners. In spite of low wages in Europe they cannot compete with us either in the American or the Canadian market on a price basis. The proof of that is in the fact that even before the war our greatest markets for coal have been open to imports without hindrance. Yes, these various cities, New York, Boston, Baltimore, and New Orleans, have been open to the import of coal. Did they import it? They did, in an infinitesimal amount. Nothing but small dribbles of imports are to be found in all the statistics of the Corps of Engineers and the Department of Commerce. Yet the bugaboo has been used repeatedly on Members of this body to show that John L. Lewis and his miners are against the project, they being afraid that European coal could come in and steal their market.

Since the facts John L. Lewis presented in 1941—and I may say that the coal operators repeat his contentions—are unsound, what is the reason for their continued opposition? Why do they mislead the thousands of upright American working men in West Virginia, Pennsylvania, Ohio, Illinois, and Kentucky with these untrue statistics? The answer is clear. They seem to be responding with enthusiasm and loyalty to the interests of their first customers, namely, the railroads. Yet the strange situation is that those very interests for whom coal miners and operators raise the hue and cry against the St. Lawrence seaway are the ones who are now running out on them, for it is obvious that the railroad industry is converting rapidly from the use of coal to the use of oil.

CONVERSION OF RAILROADS TO DIESEL ENGINES

If the coal interests have any delusions that they have a primary interest in keeping all traffic on rails, the recent statistics showing orders for locomotives must disabuse them. Time magazine of December 2 reported that of the 1,176 locomotives on order on December 1, only 33 were for steam. The rest were Diesels.

The New York Central, which is spearheading the opposition to the St. Lawrence seaway, recently placed a $21,000,000 order for 111 locomotives and all of them are for Diesels. The coal interests are misdirecting their efforts in fighting the seaway. They ought to keep their eye on the revolution taking place in railroads' motive power. Paradoxically, John L. Lewis, with his capricious strikes, is himself mainly responsible for the loss of the principal coal market, and not the St. Lawrence project.

The opposition of the coal interests to the St. Lawrence seaway has no justified basis in fact. Insofar as it is a "secondary boycott" on behalf of the railroads, it is just as intelligent as locking the barn door after the horse is stolen.

I come now to a second major element of my case: The value of the seaway for national security.

NATIONAL DEFENSE

In their heedless and headstrong desire to defend their interests, opponents have presumed to take on the responsibility of deprecating the recommendations of the President, the Joint Chiefs of Staff, the heads of the armed services, and the present Secretary of State who was, during the war, chief of staff. We have sent our boys to die upon the battlefields of the world at the command of anyone of these people who have the responsibility of the defense of the Nation, but when it comes to putting mortar, steel, and stone together for the harnessing of natural resources, the opponents—the railroads, the eastern ports would have us believe that these officials' words are not to be trusted.

JOINT CHIEFS OF STAFF ENDORSE PROJECT

The Joint Chiefs of Staff's report on the St. Lawrence project carried the signature of Admiral Leahy, Chief of Staff of the President, Admiral Nimitz, General Eisenhower, and General Eaker. It was transmitted to the Senate Foreign Relations Committee on February 16, 1946, with the expressed concurrence in the conclusions of the Secretary of the Navy, now Secretary of National Defense, James Forrestal. It must be remembered that this report was prepared and transmitted to the Senate many months after the general public knowledge of the destructive potentials of the atomic bomb and certainly after many more months of private and secret knowledge of not only this, the most fearful instrument of war, but also of many other secret devices yet unknown even to the opponents of this project. In spite of that knowledge of the latest devices of destruction, the Joint Chiefs of Staff in February 1946 recommended strongly construction of this project. The grounds upon which they based their recommendations are as follows:

First. The St. Lawrence seaway will provide an alternate- and protected-transportation route in case of a national emergency.

Second. The St. Lawrence project will provide a large block of power in an area which was a power-deficit area in World War II.

Third. The St. Lawrence seaway project will make it possible to construct larger ships within the protection of the Great Lakes area where resources of steel and manpower are abundantly available.

The fundamental thesis of the Joint Chiefs of Staff is that total war requires the complete mobilization of the resources of the country, and the St. Lawrence project will materially help in such mobilization in another emergency. Basically, it comes down to the fact that the St. Lawrence is going to save manpower, materials, and transportation facilities which in effect will increase the industrial capacity of the country in times of peace and in war.

In his appearance before our committee, former President Hoover stated definitely that the St. Lawrence project would have been of immeasurable value in World War II and that if it had been available in this last war, it would have paid for itself several times over. Secretary Marshall, in addition to reiterating recommendations for the Joint Chiefs of Staff on the basis of his knowledge as Secretary of State as well as former Chief of Staff, stated that he considered it important to the defense of the North American Continent. To this effect, he presented to the committee the conclusions of the Canadian-American Joint Defense Board which is charged with planning and coordinating the common defense interests of the two countries which recommended strongly this project as necessary to the joint defense of Canada and the United States.

OPPOSITION OF MINORITY REPORT TO DEFENSE STATEMENT

Such is the evidence upon which the majority base their recommendations for the completion of this project as a contribution to national defense. Yet the junior Senator from Massachusetts, in the minority report which he has prepared, undertakes diligently to obliterate the recommendations of those to whom this Nation has entrusted our security and defense. What is the basis of his skepticism?

It is the opinion of two retired officers, one of the Army and one of the Navy, who were hurriedly brought before our committee, having studied the subject of the St. Lawrence project only in a matter of days and not having read any of the extensive documentary evidence which was easily available to them. These two retired officers may have been, I assume, retained by those who are motivated less by national consideration than by their own peculiar situation.

THE SO-CALLED INDEFENSIBILITY ARGUMENT

One of these retired officers, Maj. Gen. Follett Bradley—I emphasize, this is Follett, not Omar, Bradley—stated that that part of the St. Lawrence now in operation—the Soo locks—and the Welland Canal are not defensible against air attack. Here was a man who was entrusted with the air defenses of our east-coast shipping, who says that the two most vital waterways in our continent are not defensible. Just think what would have happened in World War II if the Soo locks were really attacked, and according to this man, were put out of commission. Members of the Senate must realize that, actually, our whole industrial and agricultural economy depend upon the Soo locks. Eighty percent of all the steel in the United States is made of the iron ore that passes through the Soo locks. Gen. Follett Bradley says that those locks are not defensible. I say to General Bradley, if they are not defensible, then I say the steel industry is not defensible; Chicago and Detroit, Cleveland and Pittsburgh, are not defensible; power plants at Niagara, Montreal Harbor—yes, Washington and Boston—are not defensible.

MINORITY DOES NOT QUESTION DEFENSIBILITY OF POWER PROJECT

The opponents would have us believe that the major part of our industrial civilization of North America is not defensible and that therefore we should not add any new works in that part of our country. Yet the minority, which makes much ado about the vulnerability of the seaway, is careful to distinguish between the seaway, which they oppose, and the power project which they say they do not oppose. The seaway must be considered vulnerable but not the power project, apparently. The seaway project and the power project are all one. They are all built together in this 113-mile stretch. In other words, we should stop growing; we should not build any weapons of defense or provide for the future development of this country, because we are liable to be destroyed by an atomic bomb. Of course, after our experience in Japan we know well that nothing is safe from the atomic bomb, but that is no reason why we are going to stop building and growing and hoping that we shall find a defense against an atomic attack. That is the business of our great generals and admirals, the commanders of our Army, Navy, and Air Force.

The main dams and power plants are the major part of the works involved in this undertaking and if anything is not defensible in that area, dams and the powerhouse will be the most vulnerable, more so certainly than the locks and canals. Obviously the opponents cannot argue against any power plant because they know that if this project is not constructed, some equally vulnerable steam power project must be constructed in the same general area. Yes, Senators representing the East know that steam plants must be constructed in the East, plants which are just as vulnerable, if not more so, than the ones in question.

One is entitled to question the consistency of their argument that the seaway is vulnerable when they exclude the power plants from their arguments.

In New England, it seems unpopular these days to talk against cheap additional power, because they have an acute shortage, and industry is moving away. The logic of the opponents must lead them to the conclusion that the country must stop adding new works to increase industrial potential because whatever is built above ground is vulnerable to bombing.

I have yet to hear of a constructive suggestion from the opponents as to what to do to protect Grand Coulee, the Soo locks, the cities of Chicago, Detroit, Cleveland and Pittsburgh, Boston and New York. If any enemy ever reaches these shores with atomic bombs, I can assure Senators that the first target would be New York and Washington, and not some canal on the St. Lawrence. Mr. President, this vulnerability thesis is the most transparent smoke screen. Those who raise that issue seriously do not do credit to the intelligence of this body.

SHALL WE DEVELOP POWER ABROAD BUT NOT AT HOME?

I note that the junior Senator from Massachusetts, after his brief trip to Europe, has recommended to the people of the country enactment of some form of the Marshall plan with all its costs and with all its works in western Europe. If my distinguished colleague from the Bay State has read and studied the reports of the European Coordinating Committee on the Marshall plan, he must know that a good deal of the resources required will go into the very type of works which he opposes in our own country. The program developed for western Europe for the next 4 years calls for in-

creased capacity of electric power plants of 25,000,000 kilowatts, a 60 percent increase over what they had before the war. It calls for rehabilitation of railroads and canals, and increase in their capacity. It seems unlikely that we will get back any of that investment.

The Senate will be interested to know that one of those projects is international in nature, a hydroelectric project of the TVA type, straddling Italy, France, and Germany, a truly international project even more complex than the St. Lawrence waterway between Canada and the United States. We are going to be called upon to finance such projects as these in western Europe, and I assume my colleague, the junior Senator from Massachusetts, is all in favor of it.

VULNERABILITY OF EUROPEAN PROJECTS

I do not wish to raise the issue of consistency of such a position in view of his opposition to the St. Lawrence seaway. I merely wish to analyze the military security of works in western Europe as against our own project here. The idea is that the project now proposed to be built on this continent can be destroyed. How about the projects proposed to be built in Europe in the construction of which we shall participate? How much more vulnerable will these works in western Europe be to any potential enemy of democracy that may decide to launch an atomic attack by air without warning. We will be called upon to increase production potentials of democracy in an area in Europe which is much more vulnerable to attack by a continental power, while complacently and blindly the opponents of this program oppose a development of our own resources certainly at a much safer distance from a potential enemy.

We who are called upon to give moral encouragement and material assistance to the other democracies of the world would be making a poor showing of strategic thinking by such an inconsistent position. What a fine example we will set for the world. What fine geographical strategy to prevent developments in this country while we pour cur substance into the more vulnerable areas of western Europe.

LACK OF BACKGROUND OF ANTISEAWAY "EXPERTS"

What, I repeat, is the "informed opinion" upon which the opponents of the St. Lawrence project base their case? Vice Adm. Russell Willson, retired, appeared on behalf of the opponents by arrangement of the National St. Lawrence Projects Conference, which has its offices in the Transportation Building in Washington. This is, unfortunately, the extent of the admiral's knowledge of the St. Lawrence project:

Senator WILEY. Have you studied the voluminous documentary background on this project?

Admiral WILLSON. No, sir.

Senator WILEY. The International Joint-Commission's hearings of 1920?

Admiral WILLSON. No, sir.

Senator WILEY. The report of the Joint Board of Engineers in 1926?

Admiral WILLSON. No, sir.

Senator WILEY. The Hoover report of 1927?

Admiral WILLSON. No, sir.

Senator WILEY. The interdepartmental report of 1934?

Admiral WILLSON. No, sir.

Senator WILEY. The congressional hearings of '32–'33, '41, and '46?

Admiral WILLSON. I have seen some of the documents, sir. I have the great advantage of approaching the subject with an open mind, sir.

Senator WILEY. I have no question about that.

Here is the other witness whom the opponents bring against Admiral Leahy, General Eisenhower, Admiral Nimitz, and other heads of our armed forces. He is Maj. Gen. Follett—not Omar—Bradley, retired.

Senator WILEY. Have you read the various reports. Have you studied the reports that have been given on this project heretofore?

General BRADLEY. No. The only report that I studied, and I have not studied that, I read it through hurriedly, was dated 1941, I think, prepared by the then Secretary of Commerce, and I do not remember the title of it. It is a gray volume, and one of several volumes.

Senator WILEY. When did you first get interested in studying this report?

General BRADLEY. About 10 days ago.

It is a despairing case, indeed, when at the last moment the counsel for the defense, knowing that he has lost the case on its merits, rushes to bring in witnesses with little knowledge of the subject matter to bolster an indefensible position.

SUMMARY OF CONFLICTING ARGUMENTS OF SEAWAY FOES

Let me summarize briefly the conflicting and confused arguments made by the minority to disqualify the St. Lawrence project.

They said, without due proof, that all works from Grand Coulee Dam to Sault Ste. Marie and all the works, establishments and cities around the Great Lakes are indefensible to air attack; therefore the St. Lawrence would be equally vulnerable and should not be constructed.

However, they do not express any opinion on the St. Lawrence power project which is located in the same spot. Apparently they object only to the seaway which, for that matter, is much more defensible than the main dam and the power plants.

They claim that the locks on the St. Lawrence would be just as vulnerable as the Panama Canal; in fact, Admiral Willson stated that he almost damaged one of the gates of the Panama Locks when he was guiding a destroyer through the canal. Hence one must conclude, according to the opponents, that the St. Lawrence would also be subject to damage. On the same theory, we should not have built the Panama Canal because some future Admiral Willson might by mistake damage the gates.

They say the St. Lawrence would not give relief to transportation in time of war because its carrying capacity would be small. To the contrary, however, they claim that the waterway would seriously damage the rails and the eastern ports.

They claim that the season of navigation is only 7 months of the year and will necessarily limit the usefulness of the St. Lawrence as a national defense asset. This argument, of course, does not apply to the power project, which will operate 12 months of the year. As far as the seaway is concerned, exactly the same argument can be made against the Great Lakes, upon which our whole western industry is based, including our steel industry, the key to national defense. It would be just as logical to argue that the Mesabi iron range, the Harbor of Duluth, the Soo locks, the Great Lakes, are all of limited use to national defense because they, too, have a 7-month navigation period.

NEED FOR NATIONAL PERSPECTIVE

Mr. President, we must come back to first principles in determining the value of an undertaking such as the St. Lawrence for national defense. As before, I grant the right of any economic group, of any transportation agency and of any port authority to come forward and express their views and particularly what they mistakenly regard as their own interests in relation to any given piece of legislation. I grant sincerely and sympathetically the right of any Senator to represent, as best he can, what he construes to be the interests of his constituents. But to go beyond that in defense of these interests and to try to cast out the judgment of the leaders of our national defense establishments, from the Commander in Chief through the military heads of our Armed Forces, is a serious responsibility and should not be undertaken lightly upon such flimsy conclusions and with such witnesses as the opponents have brought forward.

NATURAL RESOURCES

Mr. President, there is one further phase of the St. Lawrence seaway project of paramount national interest and which deserves thorough discussion in these proceedings. I refer to the need of natural resources, particularly iron ore, copper, and petroleum and the role that the St. Lawrence seaway project will play in the future stability of industry in these United States. It requires no proof that the welfare of this country in peace and war and its ability to withstand contingencies and dangers in succeeding generations will depend upon the availability of energy resources, food, and industrial raw materials such as iron, steel, and copper. It is because the St. Lawrence seaway makes a direct contribution to these factors of national strength that the majority of the Senate Foreign Relations Committee urges the adoption of the present agreement with Canada.

STRATEGY OF FOOD AID FOR OVERSEAS

We have come to realize now more than ever before that food is one of the vital weapons of warfare and one of the essential weapons of democratic strategy. Yet, the food-producing districts of the United States and Canada are the only areas in the world removed from cheap water transportation on the high seas by a thousand miles or more. It is only because we have had the Great Lakes and the St. Lawrence canals and the Mississippi River system that that area has been able to develop as a major source of foodstuffs for the world.

But now we realize that those facilities are inadequate for the production and transportation of enough supplies to meet world demand, and they will continue to remain inadequate until, learning by the lessons of experience, we undertake through this project to bring deep-draft vessels into the Great Lakes,

or to allow the Lake carriers to proceed down the St. Lawrence to Montreal without expensive transfer of cargo. In that way, the immense productive capacity of our farms and fields can be easily and quickly made available to our friends in this and any future times of crisis. There can be no economic nor strategic excuses and defense for a program as presented by the opponents which would make it difficult and expensive to bring this food to the needy millions of the world.

The St. Lawrence project, under present conditions of high transportation costs, would save as much as 10 cents a bushel. Even if only half of our 500,000,000-bushel exports came down the lakes, this would mean a direct saving of $25,000,000 to the taxpayers, where the exports are subsidized, or that much more income to the farmer if sold on a commercial basis.

Mr. WHERRY. Mr. President, will the Senator yield?

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Nebraska?

Mr. WILEY. I yield.

Mr. WHERRY. We now ship grain from Omaha via New Orleans to London, do we not?

Mr. WILEY. I so understand.

Mr. WHERRY. What will be the difference in freight rate, if any, in shipping from Omaha to London via New Orleans, as compared with shipping from Omaha to Chicago, and via the St. Lawrence to London?

Mr. WILEY. I would have to consult the freight schedules. Of course, that rate has not been determined, so far as shipment north is concerned. In that case, of course, there would not be continuous passage.

Mr. WHERRY. What is the distance? I can see that possibly the freight rate cannot be established until after the seaway is built. However, the point upon which I should like information is this: A wheat producer in Colorado, Wyoming, or Nebraska may ship his grain either to Omaha or Chicago, and have it transported via the Mississippi and New Orleans to London. Some products, of course, might require deeper draft vessels; but such shipments of grain are certainly being made now.

Mr. WILEY. Before we are through I shall try to get the figures. If some of that grain moves to Chicago, it must be transported to Ogdensburg; and under present conditions it must be reloaded into smaller vessels, and transported in smaller vessels until it reaches Montreal. Then it must be reloaded again into ocean-going vessels. However, we can easily ascertain what the present cost is. It has been estimated that there would be a saving of 10 cents a bushel.

Mr. WHERRY. I have been so informed. The estimate has ranged all the way from 3 to 10 cents a bushel, representing the saving to be made by the wheat producer. I have not yet placed my hands upon any study which has been made which shows what the wheat farmer will save, if anything, by transporting wheat from Omaha by way the proposed St. Lawrence seaway to London, as compared with shipping it by barge to New Orleans and then to London by ocean freight.

Mr. CONNALLY. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. CONNALLY. Is it not true that if the grain were shipped to Chicago from Omaha it would be necessary to pay a rail rate?

Mr. WHERRY. If it were shipped from Omaha to Chicago; but we have water transportation from Omaha down the Missouri and Mississippi to New Orleans.

Mr. CONNALLY. I understand that.

Mr. WHERRY. Also there is a waterway from Chicago to New Orleans and by way of the ocean. I think we should have the facts, because it is of vital interest to the wheat producers to know what saving will be possible in connection with wheat originating at Omaha. We know what the freight rate is now if the wheat is loaded on a barge and transported down the Missouri and Mississippi to New Orleans, and then shipped by ocean from New Orleans to London. What we do not know is what the freight rate would be if the wheat were shipped from Omaha by rail to the nearest port on the St. Lawrence seaway, and then shipped by water down the St. Lawrence seaway and across the ocean to London.

Mr. CONNALLY. The point I wish to make is that in that sort of a transaction there would be two changes. The grain would have to be shipped to Chicago by rail. When it reached Ogdensburg it would have to be placed in light vessels. Then there would be another operation in getting it off the light vessels and into larger vessels. So there would really be three operations.

Mr. WILEY. Under present conditions.

Mr. CONNALLY. I understand. Also, the grain would be placed on a line which would involve payment of a toll, which would not be operative in the case of shipment by New Orleans. From Omaha to New Orleans there would be only one operation. The grain would be taken to New Orleans and placed on ocean-going vessels. The seas are pretty free.

Mr. WHERRY. That is the point I am raising.

Mr. WILEY. Is Omaha south of St. Louis?

Mr. WHERRY. No; it is north.

Mr. WILEY. The answer would be this: Suppose the grain is transported by water. There is probably not more than a 9-foot channel in the Missouri River.

Mr. WHERRY. A 9-foot channel is what we have.

Mr. WILEY. It is transported in small boats, which do not carry large loads. One would have to figure what the costs would be under those circumstances in the case of shipment to New Orleans. The grain would be reloaded at New Orleans, and it would be necessary to add the tariff from New Orleans to London.

Mr. WHERRY. Is there any testimony anywhere in the hearings on that subject?

Mr. WILEY. No. It would be necessary to have a tariff board figure the costs.

Mr. WHERRY. Such information would certainly be informative. Those of us in the Great Plains area ought to have the information. If a purported saving of from 3 to 10 cents a bushel on grain is to be effectuated, we should know how it is to be done, as compared with our present-day costs. I should like to have the information.

Mr. WILEY. I shall try to obtain the information for the Senator. This question takes us back to the field of the individual interest of the individual Senator in an individual State. We are asking Senators to raise their visors and see the larger perspective.

Mr. WHERRY. I wish the Senator would not judge how far I am looking. I am very open-minded on this question.

Mr. WILEY. I assume the Senator is, or he would not have asked the question.

Mr. WHERRY. The reason why I am suggesting the question to the distinguished Senator is that we are appropriating large sums of money to develop navigation on the Missouri River with the idea of bringing the ocean close to Omaha, Nebr. However, other States and cities are interested. There are 9 or 10 States in all which have an interest in this question. A number of cities receive wheat from the producing areas. Wheat is one of our large transportation items in that section of the country.

Let us be brutally frank. If there is a saving, I want to be convinced of it. My reason for asking for the production of the records is that I have not seen them. I should like to know where I can place my hands on any testimony bearing upon the purported saving of from 3 to 10 cents a bushel on grain.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. The great Wheat Belt of this country is divided into two sections. Wheat from one section naturally gravitates toward the port of New Orleans or the port of Galveston for shipment. Wheat from the northern States naturally gravitates toward Duluth or Chicago for shipment by way of the Great Lakes or by rail. I do not believe that the construction of the St. Lawrence seaway would change the amount going either way to any great extent. Shipments destined for Mexico and South America, which are large export markets, would probably continue to come from the Midwest. Nebraska and Kansas are approximately in the center of that belt. Wheat from that section could be shipped either way almost equally well.

Shipments destined to South America would go out by way of New Orleans, thus saving a couple of thousand miles distance. Shipments destined for northern Europe, France, and England would go out by way of the Great Lakes, saving a couple of thousand miles as compared with shipment from New Orleans. In other words, there would be two alternate routes.

Of course, a great deal of that grain must be placed on railroad cars to get to

Omaha, Kansas City, or wherever it is shipped from. It must go by rail either to one of those river ports or to Duluth or Chicago. If it went to Duluth or Chicago, then, with the seaway completed, it would be loaded on ships destined for Rome, Oslo, Liverpool, Berlin, or some other European port, and would go through directly.

Heretofore it has been estimated that there would be a saving of 5 or 6 cents a bushel in the shipment of wheat to northern European ports if the St. Lawrence seaway were completed. There would be a saving in the cost of unloading the grain at Buffalo and transshipping it to New York or Baltimore—mostly to New York—and reloading it on the vessels. However, the cost of labor has gone up, and rail transportation costs have risen, so that now Mr. Julius Barnes, who is one of the great wheat shippers of the country, estimates that the saving, even with the payment of the tolls, would amount to approximately 10 cents a bushel.

If we can save 10 cents a bushel in the export of wheat to the world market, or to the Atlantic coast cities such as Boston, New York, and Philadelphia, it will mean either that the consumers in the world market will save money or that the western wheat grower will have an additional few cents a bushel to put in his pocket.

However, I do not believe that we can force the farmers of the North Central States to ship down a 9-foot channel to New Orleans if they want to ship to northern Europe, and I do not believe that we should try to force the farmers of Nebraska and the surrounding area to the south, who are supplying the Mexican and South American markets, to ship their grain by way of the Great Lakes. I think it would be bad for the economy. I hope to see alternate routes provided so that they can ship their wheat and get the most they possibly can get for it.

Something was said about shipping from Chicago south to New Orleans by way of the canal. I believe it is a 9-foot canal at present. It may be a 12-foot canal some of the distance. I visited that canal approximately 2 years ago and found 75 to 80 percent of the Illinois Canal traffic was moving north-bound, not south-bound.

Mr. WILEY. I want to say, Mr. President, that it seems to me that the junior Senator from Nebraska might well consider——

Mr. LUCAS. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. LUCAS. In answer to what the Senator from Vermont said regarding the traffic on the Illinois Canal going north, I think that is primarily due to arrangements which the railroad companies have with the present utilities commission in Chicago, whereby they ship coal from the little town of Taylorville, Ill., to my home city of Havana, Ill. When the coal reaches that city it is placed on barges and shipped on to Chicago. That is a tremendous operation. Of course all of that goes north. That is not the only traffic we have that goes north, but there are thousands of tons of coal coming out of the coal fields at Taylorville, Ill., to Havana which then is transferred some 175 miles.

Mr. BUTLER. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. BUTLER. Of course it is only natural for a producer of grain in the West to want to get his product to the ultimate market at the lowest possible over-all transportation cost. But I should like to direct the attention of the distinguished Senator from Wisconsin to the fact that the opening of the St. Lawrence seaway, so-called, would perhaps be an outlet for Canadian wheat rather than for grain produced in the United States. The Grain Belt of the United States now has a water outlet down the Missouri and Mississippi Rivers up to the Minneapolis market. That is almost to our northern border. It has been moving down for many years at a low water rate to New Orleans, and sent by ocean transport to foreign markets—South American markets as well as European markets. So I should like to have the distinguished Senator bear in mind perhaps the inequitable division of the costs on the proposed seaway as between Canada and the United States. I should also like to have the point developed as to whether the project will bring grain to the markets of the United States for a less cost, in greater or less quantity, than it will take the Canadian grain to market.

Mr. WILEY. I assume from the statement of the distinguished Senator that he is interested in developing the Missouri River waterway system. If this country is to be regarded as a Great Lakes-St. Lawrence system, or a Missouri River system, a western system, or eastern system, instead of being one Nation, we shall find ourselves blocked.

Mr. THYE. Mr. President, I wonder if the Senator would yield for my own personal observation as to the St. Lawrence seaway and its benefits to this great Nation.

Mr. WILEY. I yield.

Mr. THYE. As I have read the testimony of various persons who appeared before the committee to testify in behalf of the St. Lawrence seaway, the most significant of the benefits is in the low-cost hydroelectric development that is possible if the project is permitted. That would be one of the greatest benefits. If this Nation is ever again confronted by such a world situation as World War II we shall need all the generating capacity of which the St. Lawrence seaway project can be capable in order to furnish us the power for the various installations necessary to conduct the warfare with which we would be confronted.

As I read the testimony I found that the anticipated rate for generating electricity under the St. Lawrence seaway project would be one of the lowest in the world, and that we would have in the flow of water the greatest potential generating capacity that can be found anywhere in the world. It would be the most uniform and steady flow of water for generating purposes of any project in the world.

If we want to look back into the past 5 years and consider the demand for hydroelectric power and the installations necessary for the production of electric current, and realize what the demand would be if we are ever confronted again with any such armament program as that to which we were subjected, we would need the electric current itself a great deal more than we would need any other phase of the entire project.

As to whether the rate down the St. Lawrence seaway would be a benefit to Omaha, Nebr., or Southwest producers, I think there is no question that it would be a benefit. Every year we in the Northwest are confronted with the fact that we cannot move our wheat. It lies in piles all over that part of the country because we have not the facilities to move it East. That has been a constant problem every year, and it will continue to be a problem. So the St. Lawrence seaway has so many benefits that we have merely scratched the surface in enumerating what it can do for us.

Insofar as the taconite deposits in Minnesota are concerned, they are lying there waiting for the St. Lawrence seaway development. The time will come when the high-grade ores will be depleted. When that time comes, we should be able to utilize that which this project has in store for us.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. I think the best answer as to whether the St. Lawrence seaway would benefit the farmers of Nebraska and other Western States lies in the fact that every major farm organization having members in those States is already on record as favoring the project. That would include the Grange, the Farmers' Union, the American Farm Bureau Federation, and the National Association of Milk Producers' Cooperatives. The National Council of Farmer Cooperatives has not endorsed the development of the St. Lawrence River specifically, but it has endorsed the development of all our major river systems collectively.

It may be said that every major farm organization and also the National Association of Rural Electric Cooperatives has unanimously at annual conventions endorsed the development of this great river.

Mr. WILEY. I thank both of the Senators for their contributions.

I want now to get back to the question of the Missouri River.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. WHERRY. I am interested in the freight rates from Omaha.

Mr. WILEY. When I yielded to the Senator from Illinois I had started to say that it seemed to me that, as stated by the distinguished Senator from Minnesota, the development of the St. Lawrence waterway could not help being of material assistance to the farmers of the northern two tiers of States.

We have before us a map showing Minnesota, Iowa, the Dakotas, and Nebraska. The statement was made that if we wanted to develop the Missouri Valley, we could put the wheat in small barges on a 9-foot channel and it could be carried down to New Orleans. There is no

objection to that. But I think the testimony shows, as was stated by the Senator from Vermont [Mr. AIKEN], that there is a territory in this country, particularly Texas, Oklahoma, and Louisiana, that feeds as a matter of course into the Mississippi River. But they are not great wheat-producing States.

Mr. O'DANIEL. Mr. President, will the Senator yield at this point?

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield to the Senator from Texas?

Mr. WILEY. I yield.

Mr. O'DANIEL. To correct the RECORD, let me point out that Texas is a great wheat-producing State, and we have seven ports of our own on the Gulf coast. So our wheat does not necessarily flow into the New Orleans or the Mississippi outlet.

Mr. WILEY. I am glad to have that correction, because I do not have in mind at the present time the statistics State by State.

But in the north central section of the United States, including my own State of Wisconsin, where a great deal of grain is grown, and Iowa, Missouri, Kansas, Nebraska, the Dakotas, and Minnesota, great quantities of wheat are produced. The point is that certainly no harm can come to the farmers of Nebraska or the other States I have mentioned by the construction of the St. Lawrence seaway. If the seaway does not result in giving them a cheaper transportation rate, then they can use other transportation facilities; but at least a choice will be available to them.

At the present time a great many of the products of the farm move from the central area of our country by train, but the trains are inadequate to carry the total load. As Mr. Hoover has said, they have not been able to carry it.

Mr. President, I wish to return to a discussion of the situation in the Midwest, a situation which I think is tremendously significant. I now hold before me a map which shows the development of hydroelectric power. I wish the Senator from Nebraska [Mr. WHERRY] particularly to note this point. The map shows the major State, Federal, and municipal hydroelectric power developments, either authorized or under construction. Just consider that situation. There are no such developments in Wisconsin, Minnesota, Iowa, Illinois, Michigan, Indiana, or Ohio. But see how many such developments there are in the other States. The Government has subsidized them and in many instances has, in conjunction with the States, paid the bill.

In the case of the St. Lawrence seaway we are not asking that that be done, but we are asking that the Government put up the money and see to it that this great project is developed between two great Nations.

DEPLETION OF MESABI ORE

Mr. President, I was discussing the subject of food. Even more important than the strategy of food is that of materials. It is generally known and accepted today that the iron ore deposits of the Mesabi range have a life expectancy of from possibly 5 to 10 years. A few years ago the estimate was 12 to 20 years; but in view of the rapidity with which we are depleting those deposits of high-grade ore, it is now estimated that they will be exhausted in between 5 and 10 years. That testimony comes from such reliable sources as President C. M. White, of the Republic Steel Corp., and President R. C. Allen, of the Reserve Mining Co. The latter authority appeared before the predecessor committee in opposition to the St. Lawrence seaway project, but he admitted that the iron ore resources in the Great Lakes region were diminishing rapidly. Mr. Oscar Chapman, Under Secretary of the Interior, and the Department of Commerce in a recent report on the St. Lawrence seaway project affirm the same condition.

SEARCH FOR FOREIGN ORES

In fact, the steel companies are so concerned about this situation that they are now engaged in exploring new sources of iron ore. The Oliver Mining Co., a subsidiary of United States Steel, the Reserve Mining Co., which represents the consolidated interest of Cleveland Cliffs Iron Co., American Rolling Mills, and others, are engaged in experimentation for the development of concentrated low-grade taconite iron ore which must be put through expensive processes in order to obtain merchantable iron ores. Hanna & Co., in conjunction with some Canadian interests, are heavily engaged in iron-ore exploration in Labrador. The Republic Steel Co. is developing magnetite ores in the Adirondack area of New York, as well as exploring new deposits in Mexico. The United States Steel Co. and the Bethlehem Steel Corp., are exploring the Orinoco Basin of Venezuela for the same vital product.

DEPENDENCE OF NATION ON MESABI ORE

These activities and these expenses are not taken in vain. They are undertaken because of the certainty that the life of the Mesabi range is limited. Over 80 percent of the iron and steel produced in the United States has depended on iron ore shipped from Mesabi through the Soo, and down the Great Lakes to the mills of the lower lake States. Our whole industrial structure is based on the happy conjuncture of cheap surface ores, such as those the Mesabi Range furnishes, cheaper water transporation down the lakes, and easily accessible coal resources in Pennsylvania, West Virginia, Ohio, and Illinois. If the ores in the Mesabi Range are exhausted, a terrible blow will be dealt to the stability and security of this whole Nation.

FUTURE USE OF LOW-GRADE ORES

To meet this situation we must plan on a national basis to make certain that adequate ore resources will be available to sustain and expand our productive capacity in the Middle West, and to do this the St. Lawrence seaway is a necessity. True, some portion of the future requirements will come from low-grade ores, but for them $15 per ton of annual output is required in plant investment. To obtain an adequate capacity of, let us say, 80,000,000 tons a year, this Nation would have to spend $1,200,000,000 in beneficiating plants. There is even some doubt that technically this can be accomplished, let alone the enormous expense of capital investment, plus the expensive operation of such an undertaking.

It is estimated that even if technically possible, iron ores obtained from such sources would cost about $3 more per ton and the price of steel would increase $6 per ton for this one reason alone. Fifty or sixty million tons of steel from this new source would cost the consumers of this Nation $300,000,000 or $360,000,000 more a year.

To the extent that there will be foreign sources of ore on the east coast and the Gulf coast of the United States, it is to be doubted that the steel industry in the Middle West could sustain the competitive pull and dislocation of the cheaper sources of ore that could be brought into the eastern harbors by deep-water transportation. Regardless of whether it will be technically feasible to develop taconite ores, the higher cost will in itself bring pressure upon many units of the steel industry to move to tidewater areas.

POSSIBLE RELOCATION OF MIDWEST INDUSTRY

Mr. President, I now wish to call particular attention to what is involved in the St. Lawrence seaway development. There is evidence that the opponents of the St. Lawrence seaway realize the implications of the iron-ore situation. Disregarding the tremendous cost to the Nation and the dislocation of industry and communities and peoples that this situation will create in the established industrial areas of the Middle West, they may still feel that such a dislocation may redound to their advantage. This is a serious thought, and I would not state it but for the fact that it is a matter of record.

I have in my possession an article written by Mr. Bowditch, president of the New England Council, which appeared in the New England Newsletter of September 1947. Mr. Bowditch and the New England Council are opponents of the St. Lawrence seaway project, but they combine their opposition to the St. Lawrence seaway project with a plea that the council make every effort to invite units of the steel industry to establish themselves in New England.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. AIKEN. I wish to say that Mr. Dudley Harmon, executive vice president of the New England Council, advised me on Friday afternoon that the New England Council is now taking no position in regard to the St. Lawrence seaway, but is leaving it to each member of that council to determine his position for himself.

Furthermore, I wish to say that the New England Council never took a vote of its membership in regard to the St. Lawrence seaway, but proceeded on the basis of a vote of the board of directors, and it depended on the advice of Mr. Bowditch; Mr. Ned French, president of the Association of New England Railroads; and Mr. C. L. Campbell, president of the Association of Electric Power Companies of New England.

Mr. WILEY. I am glad to have that information.

As I have said, when Mr. Bowditch wrote the letter to which I have referred, he suggested that they make every effort to invite units of the steel industry to establish themselves in New England.

Mr. AIKEN. That is true. Let me ask when the letter was written.

Mr. WILEY. It was written in September 1947. I have the exact date on file in my office. It was a news letter issued at that time.

Mr. AIKEN. I am sure the view there expressed is not shared by a large part of the membership of the New England Council.

Mr. WILEY. I am glad to hear that, and I am glad to say in that connection that it is not shared by the common people of even the great State of New York and the great city of New York. Senators are familiar with the polls which have been taken.

Mr. AIKEN. That is correct.

Mr. WILEY. They clearly indicate that in Boston and other cities that are so ably represented in this body by Senators of distinction, the people voted in favor of the St. Lawrence seaway—over 57 percent in one city, for instance, voted in favor of the seaway—recognizing the over-all national demand and necessity for it.

Mr. AIKEN. I think the RECORD should show that Mr. Bowditch is a director of the Boston and Maine Railroad, of which the largest stockholders are the New York, New Haven and Hartford Railroad and the Pennsylvania Railroad.

Mr. WILEY. I may say that Mr. Bowditch, in cooperation with the railroads of New England, is trying to channel public opinion in Massachusetts, for instance, against the St. Lawrence seaway project. There is no doubt at all about that.

Mr. AIKEN. Yes; there is no doubt at all.

Mr. WILEY. Yet at the same time they are making plans to receive the benefits of all the sorry dislocations which will result from the migration of the steel industry when the Mesabi range is exhausted. Certainly that migration and those tremendous dislocations will occur if we cannot open up the St. Lawrence, and thus make it possible for high-grade ores to reach the great steel region of the Midwest.

Mr. President, in this situation the responsibility rests on the Members of the Senate. I have been a Member of this body for 9 years, and during that time I have never, I think, in any endeavor, except when seeking to get reasonable prices for milk products, been provincial in my thinking. I respond to the present challenge by stating, echoing the sentiments of Daniel Webster, that I am an American. In the case of this great project, I do not think one can decide the issue on the basis of whether the development will or will not help his particular State. The question is, Will it help America?

In this article, to which reference has been made, Mr. Bowditch proposes that in the light of the exhaustion of middle-western ore resources and the proximity to Boston of Labrador ore, they make every effort to invite the steel industry to settle in New England. I have not heard from my friend the junior Senator from Massachusetts whether in the interest of national defense he considers a steel plant in Massachusetts a more secure target than one in Pittsburgh or Cleveland or Chicago, or whether there would be particular gain to national security and stability by such a shift—a movement to the east coast, which at present is already overcentralized, I believe, to a suicidal degree in the event of a national emergency.

The Canadian mining authorities, as well as the Department of Commerce and the Department of the Interior of the United States, agree that the opening of the St. Lawrence seaway project is a guaranty of stability of the Middle West steel industry, and that it will in time become a necessity if we are to prevent the industrial dislocation of this Nation in the next 5 or 10 years.

MOVEMENT OF OIL TO MIDWEST

The same situation exists concerning copper, oil, and many other mineral projects. It is expected that in the foreseeable future, this country will become a direct importer of these products, particularly of petroleum which is so essentially a source of energy. When the great Southwestern oil fields give out, the Middle West again will be at the mercy of shortages and higher costs, and the St. Lawrence seaway project would be needed to bring some South American or near eastern oil, which the industrial empire of the Middle West will need in large quantities.

Perhaps some of my friends in Texas or Oklahoma are afraid that the St. Lawrence Seaway if authorized now would threaten the market for their present oil wells. They need not have this fear, for as long as reserves are available in the southwestern fields, the pipe lines will continue to carry those supplies to the Middle West. It is against the contingency of their exhaustion that we must protect ourselves. So again I invite my friends from the Southwest of our country to think of this project in the terms of the next 10 to 20 years rather than as a threat to their present production.

UNITED STATES INDUSTRIAL PROGRESS AND EXPANSION VITAL TO WORLD

No one can foretell, Mr. President, what the future holds for us or for the world. All we can do today is to prepare within the limits of our own judgment and knowledge for all possible contingencies which we can foresee. Basic to the survival of nations is their ability to be strong in the spirit and physical condition of its human resources, and in the material wealth that they create. We are a country of only 145,000,000 people. We are called upon to pour out our labor and resources to those who are friendly to us.

In the ultimate analysis, however, the survival of our own life and institutions will depend on our capacity to keep ahead of the world in development of resources and technology. A project like the St. Lawrence seaway, when presented on a businesslike basis, as a self-liquidating project, must be considered by us sympathetically, because such projects are designed to increase the productive capacity of our manpower, to replace mineral resources, such as copper, iron ore, oil, and bauxite, and to help carry products over distances with economy in regard to labor, money, and materials. It is by these devices that we can increase our national productivity. It is by these means we must continue to grow in strength and vitality.

These are some of the considerations, Mr. President, which lead me and the majority of the Committee on Foreign Relations to advocate and urge speedy passage of Senate Joint Resolution 111.

Mr. President, I ask that there be printed in the RECORD at this point in my remarks some pertinent questions and answers on the St. Lawrence seaway and power project prepared by the Transportation Division, Office of Domestic Commerce, Department of Commerce, dated January 1948.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the questions and answers were ordered to be printed in the RECORD, as follows:

SOME PERTINENT QUESTIONS AND ANSWERS ON THE ST. LAWRENCE SEAWAY AND POWER PROJECT

1. WHAT IS THE ST. LAWRENCE SEAWAY AND POWER PROJECT?

The purpose of the St. Lawrence seaway and power project is (a) to remove the remaining obstructions to deep-water navigation between the Great Lakes and the lower St. Lawrence River, permitting the passage of deep-draft ocean vessels from the Atlantic Ocean to Great Lakes ports and the pasage of large lake freighters from Lake ports to ports on the lower St. Lawrence River; and (b) to provide power facilities with a total installation of 2,200,000 horsepower, divided equally between the United States and Canada.

Navigation between the Great Lakes and the lower St. Lawrence River is now restricted to small vessels because of the 14-foot maximum draft of the canal system maintained by Canada around the rapids on the St. Lawrence River. This canal system will continue in operation even after completition of the seaway. The completed waterway will establish a minimum depth of 27 feet over the entire 2,347-mile route from Duluth on Lake Superior to the Gulf of St. Lawrence. Of the 18 large locks required to overcome the 600-foot difference in waterlevel between Lake Superior and the ocean, nine (the MacArthur lock at the Sault Ste. Marie, connecting Lakes Superior and Huron and eight locks at the Welland Canal connecting Lakes Erie and Ontario) are completed.

2. WHAT IS THE LEGISLATIVE BACKGROUND OF THE PROJECT?

Several attempts have been made to obtain legislative approval of the project, first in the form of treaty ratification and then in the form of approval of an executive agreement between Canada and the United States. In February 1933, the Senate Foreign Relations Committee reported favorably upon ratification of a treaty authorizing the project. The resolution on ratification received a majority in the Senate in 1934, but, requiring a two-thirds vote, failed of Senate approval. In 1941, an executive agreement was signed with Canada to promote the project. A resolution approving the agreement was favorably reported by the House Rivers and Harbors Committee in November 1941 but was deferred as a result of the attack on

Pearl Harbor in December. Efforts were renewed in 1943, 1944, and 1946 to obtain legislative approval, but for various reasons final approval was not obtained.

3. WHAT IS THE NATURE OF THE PENDING LEGISLATION?

The current legislation authorizing the project was introduced in the Senate in 1947 by Senator ARTHUR H. VANDENBERG with the cosponsorship of a bipartisan group of 15 Senators (S. J. Res. 111) and in the House by Representative GEORGE A. DONDERO (H. J. Res. 192). The two resolutions, which are companion measures, are generaly similar to previous resolutions authorizing the executive agreement, with one significant point of departure. The new resolutions, as distinct from earlier proposals, contemplate converting the navigation venture from a public-works project into a project which would be self-supporting and self-liquidating by means of toll charges on traffic and passengers utilizing the deep-water facilities on the St. Lawrence River. Self-liquidation of the cost of the power works to the National Government is provided for by authorizing the sale of the power facilities on the United States side of the river to the State of New York.

4. WHAT HAPPENS AFTER SENATE JOINT RESOLUTION 111 AND HOUSE JOINT RESOLUTION 192 ARE APPROVED?

The Canadian Parliament is awaiting adoption of the pending legislation in the United States Congress before actively undertaking consideration of the project. Following approval by both legislatures, the two governments will establish a joint Great Lakes-St. Lawrence Basin Commission which will supervise actual construction of works in the International Rapids section of the St. Lawrence River. Engineering plans for the section are complete and actual construction may be undertaken whenever the Commission so decides.

With respect to navigation tolls, the President of the United States is authorized and directed under the terms of Senate Joint Resolution 111 and House Joint Resolution 192 to negotiate a further agreement with Canada during the period of construction defining the rates of toll charges to be levied for use of the new deep-water navigation facilities in accordance with certain specific standards set in the resolutions under consideration. The tolls agreement will not become effective until approved by the legislatures of the two countries.

With respect to power, the President is authorized and directed to negotiate an arrangement with the State of New York for transfer of the power facilities on the United States side of the river, the cost to be determined in accordance with the method of allocation jointly recommended in 1933 by the United States Army Corps of Engineers and the Power Authority of the State of New York, provided that such arrangement is consistent with the laws of the United States and protects the interests of the United States and of other States. This arrangement will also not become effective until approval by the Congress of the United States and the legislature of the State of New York.

5. HOW MUCH WILL THE PROJECT COST?

The most recent authoritative estimate of cost is printed in the report of the Senate Foreign Relations Committee favorably reporting Senator VANDENBERG'S resolution, Senate Joint Resolution 111. This estimate is based on data supplied by Lieutenant General Wheeler, Chief of the Army Engineers, with certain adjustments to bring Canadian costs up to date. The Senate committee's estimate of total cost of the project, including expenditures to date and based on May 1947 construction cost levels, amounts to $884,000,000, of which the United States share would be $523,000,000 and the Canadian share $361,000,000. Inasmuch as Canada has already spent $133,000,000 and the United States $32,000,000 on existing works comprising integral parts of the project, the cost to complete the project is estimated at $720,000,000, of which the United States share would be $492,000,000 and the Canadian share $228,000,000.

In the event that construction costs drop below May 1947 levels before actual construction of the project is initiated, then, of course, cost of the project will be less than the estimates indicated.

6. HOW IS COST OF THE PROJECT TO BE DIVIDED BETWEEN POWER AND NAVIGATION FOR PURPOSE OF SELF-LIQUIDATION?

The pending United States legislation excludes from self-liquidation the cost of work done in the past on the grounds that these expenditures have served and will continue to serve Great Lakes shipping, even though the works will form an integral part of the Great Lakes-St. Lawrence system. The cost to be liquidated, therefore, is the cost of the new work only.

On this basis, the actual payments for the power facilities by the State of New York to the United States Government and by the Province of Ontario to the Dominion Government would represent the proportion of total cost liquidated by power and the remainder would constitute the proportion to be liquidated by charges against navigation. The payments for power are estimated by the Senate Foreign Relations Committee at roughly $161,000,000 each for New York State and the Province of Ontario. Accordingly, the costs chargeable to navigation for the purpose of self-liquidation would be the total cost of new work ($720,000,000) minus the payments for power ($322,000,000), or $398,000,000, of which the United States share would be $330,000,000 and the Canadian share $68,000,000.

7. WHAT AMOUNT OF TOLL REVENUE WOULD BE REQUIRED ANNUALLY TO COVER THE NAVIGATION COSTS?

The Army engineers calculate annual navigation charges for the project by adding interest during construction at 3 percent for 3 years to the first cost of the navigation works. By following this procedure, the Senate Foreign Relations Committee calculated the net investment in navigation at $434,000,000. Applying to the net investment the Army engineers' formula of interest and amortization at 4.33 percent and annual maintenance and operating costs of $2,460,000 yields total annual charges against navigation of $21,260,000, of which the United States share would be $16,840,000 and Canada's $4,420,000. This is the amount of annual toll revenue required to make the navigation works self-sustaining and self-liquidating.

In addition to the above estimate, the Senate Foreign Relations Committee established a low range of annual charges by using an interest rate of 2½ percent, which is closer to the actual rate at which the United States Government borrows money today, and a sinking fund of 1 percent and 2½ percent compound interest. This results in reducing annual charges to $17,448,000, of which the United States' share would be $13,677,000 and Canada's $3,771,000.

8. WHAT ARE THE BENEFITS OF THE PROJECT?

The benefits divide into three main categories: National security, navigation, power.

The benefits will be discussed in the following questions.

9. WHAT ARE THE BENEFITS OF NATIONAL SECURITY?

Supporters of the project as a factor in national defense include President Truman, former President Hoover, the late President Roosevelt, General Marshall, the Joint Chiefs of Staff, the Permanent Joint Board on Defense for the United States and Canada, and Kenneth C. Royall. These authorities advance four principal advantages of the project to national security:

First, the establishment of a new and vital line of water communication directly into the heart of the continent;

Second, provision for the construction and repair of ocean-going vessels in the relatively secure area of the Great Lakes;

Third, the development of a tremendous source of electric power in an area containing no developments comparable to the TVA or Columbia and Colorado River projects;

Fourth, the over-all economic and industrial advantage accruing from the development of one of the world's greatest waterways.

10. WHAT ARE THE NAVIGATION BENEFITS?

The seaway will result in substantial reductions in the cost of transportation between the Middle West and foreign ports. Likewise it will permit large vessels to operate between Great Lakes points and United States seaports. Transportation savings will result from the fact that the seaway will eliminate the cost of the rail haul or, in some cases, the water haul in small high-cost carriers, between Midwest points tributary to the Great Lakes and Atlantic coast ports, as well as the transshipment charges involved.

At the hearings before a subcommittee of the Senate Committee on Foreign Relations, in June 1947, Secretary of Commerce Harriman estimated potential seaway traffic at thirty-eight to fifty-two million tons annually, based upon a preliminary analysis of the advantages of the waterway in the light of current conditions and the proposal for navigation toll charges. Of the total estimate, iron ore made up twenty to thirty million tons, general merchandise six to ten million tons, grain 5,000,000 tons, coal 4,000,000 tons, wood pulp, pulp wood, and newsprint 1,000,000 tons, manganese, chrome, and bauxite ores 1,000,000 tons, and immediate traffic in petroleum and gasoline 1,000,000 tons. In summarizing the benefits, the Secretary stated:

"By making less costly the importation of foreign ores and raw materials the seaway will ease the drain on our dwindling natural resources. By furnishing alternate sources of supply to the great steel industry located in the Lakes area, the seaway will bring an added degree of economic stability to the Lake industries. Finally, the seaway will enable the great midwestern area to receive more fully the benefits of international trade and to make a greater contribution to international trade, so essential to world economic and political stability."

A detailed and carefully prepared study, published by the Transportation Division of the Department of Commerce in November 1947 (Industry Report, Domestic Transportation, August–November 1947, Transportation Division, An Economic Appraisal of the St. Lawrence Seaway Project), defines the Department's estimates of potential traffic for certain bulk commodities, which, it is anticipated, will furnish the major share of the traffic. In this study, potential traffic in iron ore, grain, and coal is estimated at forty and one-half to fifty-three million tons, shortly after completion of the seaway. Long-range potential traffic in petroleum is estimated at fifteen to twenty million tons.

11. WHAT ARE THE POWER BENEFITS?

The power facilities will have a total capacity of 2,200,000 horsepower, with an annual average output of over 13,000,000,000 kilowatt-hours of electricity, or almost as much as was produced in all of the United States in 1914. The development will be the second largest single-dam project in the world, being exceeded only by Grand Coulee. Total production will be shared equally by Canada and the United States. The power market area within feasible transmission distance includes the States of New York, Vermont, New Hampshire, Massachusetts, Rhode Is-

land, Connecticut, northeastern Pennsylvania, and northern New Jersey. The emergency range could be extended as far as Chicago and Washington, D. C. The St. Lawrence market is a power-deficit area. As a matter of fact, the War Production Board had what amounted to an informal embargo on the expansion of war production in that area due to the unavailability of adequate power. Power requirements in the area in 1946 were greater than at any time during the war and were cutting deeply into reserve capacity needed to assure dependable service. The Federal Power Commission estimates, on the basis of loads that may be reasonably expected, that the full United States share of St. Lawrence output could be utilized within a relatively short period of time—as short, under certain conditions, as 1 year after the power becomes available.

According to the Federal Power Commission, delivered cost of St. Lawrence power at current high construction costs would be 3.1 mills per kilowatt-hour, or less than the bare operating cost, exclusive of fixed charges, of generating steam electric power in the most efficient steam stations in the area. The latter costs range from just over 3 mills to 5.5 mills per kilowatt-hour. The delivered cost of 3.1 mills of St. Lawrence power represents only 50 percent of average cost in the St. Lawrence market area of producing equivalent output at alternative new private steam plants, including fixed charges and operating expenses, where cost is as follows: New England, 7.2 mills for kilowatt-hour; New York City and Long Island, 7.1 mills per kilowatt-hour; rest of New York, 6.8 mills per kilowatt-hour.

12. WHAT ARE THE PRINCIPAL OBJECTIONS TO THE PROJECT?

The principal objections fall in the categories of denying the benefits of the project to national security and to transportation and power. The project is assailed (by some groups) as a waste of money. Others claim that the project would result in great damage to the railroads, eastern ports, railroad labor, power companies, and other interests. Most of the specific objections are included in the following questions.

13. IN VIEW OF THE VULNERABILITY OF THE GREAT LAKES AREA TO AIR ATTACK VIA THE NORTHERN POLAR REGION, COULDN'T A FEW WELL-PLACED BOMBS COMPLETELY CRIPPLE THE POWER WORKS AND THE SEAWAY?

The Lakes area is already a major center of United States and Canadian production, and would, in any event, require protection from every attack. The locks and powerhouse of the St. Lawrence project are no more vulnerable than any other defense asset in the area. They are no more vulnerable than the Soo Locks, the cities of Duluth, Milwaukee, Chicago, Gary, Detroit, Toledo, Cleveland, Pittsburgh, Buffalo, and Rochester, the Niagara power plants, as well as Canadian cities and production facilities. All of these centers are vitally strategic and require an adequate system of defense. The problem of defending the St. Lawrence powerhouses and locks against air attack is not strategically different nor does it appear to create substantially larger commitments on the part of the armed forces of the two countries than those now confronting them in the defense of the centers above named.

14. HOW CAN THE SEAWAY HELP NATIONAL SECURITY BY PERMITTING THE IMPORTATION OF IRON ORE WHEN ONE OF THE GREATEST DANGERS TO NATIONAL SECURITY IS INCREASED RELIANCE ON FOREIGN SOURCES FOR THIS IMPORTANT RAW MATERIAL?

Secretary Harriman indicated the national security benefits of seaway-routed ore imports, as follows:

"All of the estimates with respect to the Superior ore deposits indicate that in the foreseeable future the maintenance of an adequate supply of ore will become a serious problem to the operation of the great steel industry centered around the Lake region. Construction of the seaway serves as a sort of national insurance by making it possible to bring into the Lake region great amounts of foreign ore. The high-grade ores of Labrador are particularly significant from the standpoint of national security. If, because of a shortage of upper Lake ore, we are obliged to go on an increased import basis, ore from Labrador in time of national emergency could move to the Lake area from the Gulf of St. Lawrence via a relatively sheltered route as compared with the hazardous open-ocean route of ore from present sources such as Chile or Cuba."

Assistant Secretary Warne, of the Department of the Interior, testified:

"Now we are confronted by the cold, stark fact that our beds of richer ores at the head of the Great Lakes are approaching exhaustion. Although we still have large deposits of inferior- and low-grade ores, we are confronted by a serious economic problem of utilizing them, in view of the costs of concentrating and refining them into suitable ore for industrial use. We are having to import more and more high-grade ore from abroad, and we can expect that trend to continue at an accelerated rate in proportion to the decline of our domestic supplies. Without doubt, this will affect the stability of the iron and steel industry very materially and speed up the trend of steel production migration which is already in process.

"The St. Lawrence seaway, by providing an avenue for ocean traffic into the heart of the existing Great Lakes steel industry, no doubt would be of benefit to those companies which no longer will have access to adequate quantities of high-grade ores from domestic sources."

15. HOW CAN A WATERWAY WHICH WILL BE OPEN ONLY 240 DAYS OF THE YEAR JUSTIFY SUCH VAST EXPENDITURE OF PUBLIC FUNDS?

The seasonality of navigation is no handicap to extensive commercial utilization of the seaway. The St. Mary's Canal at Sault Ste. Marie, Mich., connecting Lakes Superior, Huron, and Michigan, is also icebound for 4 months every winter. Yet, it can hardly be said that this canal is uneconomic when the tonnage moving through it during an 8-month season exceeds the combined tonnage of the Panama and Suez Canals during a 12-month season. The Great Lakes, which are also closed for the same period, carry two-thirds as much traffic in 8 months as all United States Atlantic, Gulf, and Pacific coast ports combined.

The navigation season on the St. Lawrence River is roughly the same as on the Lakes. Despite the limited season, the port of Montreal, which lies on the St. Lawrence River 1,000 miles inland from the Atlantic Ocean, is the second largest exporting port on the North American continent, being exceeded only by New York.

16. HOW CAN OCEAN VESSELS OPERATE ECONOMICALLY OVER THE FOGGY, CIRCUITOUS, AND HAZARDOUS SEAWAY, WHICH PERMITS VESSELS TO TRAVEL AT ONLY VERY SLOW SPEEDS?

Records of the Canadian Department of Railways and Canals show that fog conditions on the Great Lakes and St. Lawrence River during the navigation season are much more favorable than those at New York. Montreal, for example, had 4 days of fog per year as compared with 44 days for New York Harbor.

The best indication of the hazardousness of navigation is the accident record on the St. Lawrence, which compares favorably with that of the Panama Canal. During the 5-year period, 1935-39, a total of 116 accidents was reported, of which 65 resulted in damages, amounting to $419,000, 34 involved no damages at all, and in 17 cases the amount of damage was unknown. This record should be viewed in relation to the number of vessel passages over the St. Lawrence River during the same period, which was roughly 50,000 and involved the movement of 40,000,000 short tons of cargo. Accordingly, the accident rate was less than ¼ of 1 percent, which would not indicate a very great hazard to navigation. New radar devices, which have already been successfully employed on a number of Great Lakes vessels, should reduce the accident rate even further.

With respect to the speed of navigation over the seaway, the actual over-all reduction as compared with ocean travel for an average vessel with normal operating speed of 12 miles an hour would be only 14 percent. Reduced speed on the 2,347 mile route would be required only in the 75 miles of canals and restricted channels and the 18 seaway locks. This would lengthen travel time for a round trip between Duluth and Montreal by 1½ days. In view of the heavy volume of traffic moving over the existing shallow canals and through 31 locks, it seems reasonable that oceangoing vessels will not find this small increase in travel time an obstacle militating against their economical use of the seaway.

17. WHY SHOULD THE UNITED STATES BEAR A DISPROPORTIONATE SHARE OF THE TOTAL COST OF THE NEW NAVIGATION WORKS ($330,000,000 OUT OF $398,000,000)?

When the 1932 treaty was negotiated, the division of total cost, including past expenditures, was practically equal for the United States and Canada. The reason for the changed cost relationship today is that past expenditures were primarily Canadian and were made at a time when construction costs were comparatively low. Canada has already expended 133 million dollars on navigation works which are integral parts of the seaway as compared with 32 million for the United States. Future expenditures, on the other hand, for the most part cover works assigned to the United States and have been estimated on the basis of the higher construction costs now obtaining. In any event, the pending legislation provides for self-liquidation of the new navigation works, so that the proportion of cost borne by each country is not a primary factor in evaluating the project. The users will pay for the new navigation works.

18. WHY SHOULD THE UNITED STATES COMMIT ITSELF TO EXPENDITURE OF VAST SUMS OF MONEY WHEN OUR PERPETUAL NAVIGATION RIGHTS ON THE GREAT LAKES, THE CONNECTING CHANNELS AND CANALS AND IN THE WHOLLY CANADIAN SECTION OF THE ST. LAWRENCE HAVE NOT YET BEEN ESTABLISHED?

Treaties between the United States and Great Britain have vested in the United States reciprocal rights to navigation in boundary waters and in those waters of the Great Lakes-St. Lawrence system which are wholly located in Canadian territory. These rights have been secured by the Treaty of Amity, Commerce and Navigation of 1794, the Reciprocity Treaty of 1854, the Treaty of Washington of 1871, and the Boundary Waters Treaty of 1909. The protection afforded the United States under these treaties is indicated by the fact that no insoluble disputes have arisen over United States navigation rights on the Great Lakes or the St. Lawrence River during their lifetime, nor has either party to the treaties in all the years that the treaties have been in force indicated any desire to renounce them.

On the other hand, since the treaties are terminable by either party after due notice, it would certainly be desirable to establish the perpetual navigation rights of the United States. The original 1932 treaty on the St. Lawrence project sought to accomplish this objective by including a provision on perpetual navigation rights. When the treaty failed of ratification because of lack of a two-thirds majority, the same provision was incorporated in article VII of the Executive Agreement of 1941. Opponents of the

project opposed the provision on the grounds that it had no place in the Executive agreement but required a treaty with Canada. The pending legislation, Senate Joint Resolution 111 and House Joint Resolution 192, as well as resolutions authorizing the project, have accordingly excepted from approval article VII of the Executive agreement and have expressed the sense of Congress that it would be desirable for the President to negotiate a treaty with Canada on perpetual navigation rights and certain other matters.

19. WHY SHOULD THE PROJECT BE APPROVED BEFORE THE MATTERS RELATING TO TOLLS, WHICH ARE SUBJECT TO FURTHER NEGOTIATIONS WITH CANADA, ARE SETTLED?

Both the United States and Canadian Governments have agreed in principle that the seaway be made self-liquidating through a system of toll charges.

Section 3 of Senate Joint Resolution 111 and House Joint Resolution 192 authorizes and directs the President to negotiate, during the period of construction of the project, a further agreement with Canada defining the rates of tolls to be levied on the seaway, subject to approval by the legislative bodies of both countries. Reversal of the procedure in order to reach agreement on the tolls system before approval of the project might be justified if the fear were well founded that the two Governments may not be able to reach agreement. It appears inconceivable, however, that the two Governments would agree to enter into a venture of such magnitude, commit themselves to the expenditure of such large sums of money, accept the principle of self-liquidation of the project and then fail to agree on implementation of the principle. The two countries have an equally strong interest in self-liquidation. Both have large national debts and high rates of taxation. Neither would wish to add to these debts or taxation levels. There is no sound reason to doubt that details of a satisfactory system of tolls can be worked out during the period of construction. It is instructive that this procedure was followed in connection with the Panama Canal and was worked out satisfactorily.

20. HOW CAN TOLL REVENUE ADEQUATE TO MAKE THE SEAWAY SELF-LIQUIDATING BE REALIZED WHEN THE TOTAL CAPACITY OF THE SEAWAY IS ESTIMATED BY THE UNITED STATES ARMY CORPS OF ENGINEERS AT 25,000,000 TONS ANNUALLY?

The 25,000,000-ton estimate, prepared in 1934 by the Army engineers, was an estimate of practical as distinguished from theoretical capacity and apparently was based on the assumption that the traffic pattern on the seaway would resemble that prevailing on the Great Lakes. This assumption involved an exceptionally unbalanced cargo movement with 80 percent of the traffic moving down-bound and only 20 percent up-bound. On this basis, the Army engineers arrived at an average tonnage per vessel passage through the locks of only 3,800 tons. This relatively small tonnage per vessel multiplied by 7,230 vessel passages produced a maximum tonnage of 27,473,000 tons, which was then reduced to 25,000,000 tons.

Theoretical capacity of the St. Lawrence project represents the total traffic which could be moved through the seaway during a normal 240-day navigation season if the locks were constantly operated at top speed and if every vessel passing through the locks in each direction were fully loaded. The Canadian Government has estimated that the limiting lock of the seaway, lock No. 2 on the Welland Canal, has an effective capacity of 28 single lockages per day with the largest bulk freighters on the Lakes. Assuming that each vessel passing through the locks carried 10,000 tons of freight, the Canadian authorities arrived at a capacity figure of 67,200,000 tons for 6,720 vessel passages.

The Department of Commerce points out that if vessels such as the new lake ore freighters, which can carry more than 15,000 tons each, comprised the entire seaway traffic and were fully loaded in both directions, the theoretical capacity of the project would be in the neighborhood of 100,000,000 tons annually. The Department also points out that the MacArthur lock, which is of the same general dimensions as the limiting lock on the Welland Canal, actually handled 42,000,000 tons of traffic in 1945, despite the fact that most of the tonnage moved in one direction.

In its recent industry report on the seaway project, the Department of Commerce estimates potential seaway traffic in three major bulk commodities at forty and one-half to fifty-three million tons annually, composed of thirty to thirty-seven and one-half million tons of up-bound iron ore, six and one-half to eleven and one-half million tons of down-bound grain and 4,000,000 tons of down-bound bituminous coal. Because they will be able to quote lower rates than other vessels, the Department anticipates that the ships which carry ore up-bound will carry most, if not all, of the down-bound grain and coal traffic. Accordingly, the number of lockages required to handle the maximum traffic of 53,000,000 tons for the three commodities will be the same as that required for handling the ore boats, or an estimated 5,000 lockages per season of navigation. Theoretical capacity of the locks for large vessels is estimated by the Canadian Government at about 6,720 per season of navigation.

21. IT MAY WELL BE TRUE THAT THEORETICAL CAPACITY OF THE LIMITING LOCK OF THE SEAWAY (LOCK NO. 2 OF THE WELLAND CANAL) RANGES UPWARD FROM 68,000,000 TONS ANNUALLY, BUT HOW CAN A CAPACITY OF OVER 20,000,000 TONS BE REALIZED WHEN ABOUT 70 PERCENT OF LOCKAGE CAPACITY OF THE WELLAND CANAL IS NOW ABSORBED BY VESSELS ENGAGED IN PURELY INTERLAKE TRAFFIC BETWEEN LAKE ONTARIO AND THE UPPER LAKES?

The Industry Report of the Department of Commerce carefully considers this question and arrives at the conclusion that interlake traffic through the Welland Canal should not seriously restrict the canal's capacity for seaway traffic. Over 90 percent of total traffic through the Welland Canal in 1945, it is observed, was down-bound. The down-bound traffic was made up almost exclusively of bulk items, such as grain, iron ore, coal, petroleum, and gasoline. Before they can seriously affect the capacity of the Welland Canal, the down-bound ore and petroleum and gasoline movements will probably be reduced to insignificant volume or eliminated entirely as a result of growing shortages in the United States, which furnishes this traffic. The down-bound traffic in grain and coal will be handled at very low rates by the vessels carrying ore up-bound since they would otherwise make the down-bound trip in ballast. It is not anticipated that the small vessels now carrying most of the Welland Canal traffic can compete successfully against large lake or ocean bulk carriers for this traffic and accordingly virtually the entire capacity of the Welland Canal will be available for the large vessels.

22. WHAT PROOF IS THERE THAT, WITH THE IMPOSITION OF TOLLS, IT WILL BE MORE ECONOMICAL FOR TRAFFIC TO USE DEEP-DRAFT VESSELS OVER THE SEAWAY RATHER THAN SMALLER VESSELS OVER THE TOLL-FREE ST. LAWRENCE CANALS OR VIA WHATEVER OTHER MODE OF TRANSPORTATION IS CURRENTLY USED

The transportation savings in using deep-draft vessels over the seaway rather than smaller vessels via the toll-free St. Lawrence canals are unquestionable. The principal cargo carried by the small canallers is grain. The president of Canada Steamship Lines, Ltd., which operates the largest fleet of small canallers, is quoted in the Commerce Department's recent industry report as stating:

"When the seaway is in operation, it will mean that the large lake freighters and ocean vessels will navigate between the head of the Lakes and Montreal, and so far as upper Lake freighters are concerned, their cost of carrying grain will be applicable to the entire route, instead of only a portion of it. The cost of carrying grain on upper lakers is less than one-third of the cost of carrying grain in small canallers, and, therefore, under the proposed conditions the canaller cannot compete."

The Commerce Department estimates that the seaway rate on export grain in large Lake freighters from Duluth to Montreal, at current high operating costs, would be from 4.90 to 7.40 cents per bushel less than the actual 1946 rate to Montreal via Port Colborne in small canallers. This compares with a suggested toll charge of slightly more than 1 cent a bushel on seaway grain.

Since the small canaller rate on export grain is cheaper than rates via existing competing routes, it is clear that use of the seaway by deep-draft vessels, especially the large Lake freighters, will be considerably more economical, despite toll charges, than any existing mode of transportation. A similar conclusion is drawn by the Department in its study of comparative transportation costs for seaway traffic in coal, iron ore, and petroleum.

23. WHAT PROOF IS THERE THAT TRAFFIC WILL MOVE VIA THE SEAWAY IN SUCH VOLUME AS TO YIELD TOLL REVENUE SUFFICIENT TO MAKE THE PROJECT SELF-LIQUIDATING?

In its recent Industry Report, the Department of Commerce estimates annual toll revenue from 3 bulk commodities which it anticipates will furnish the major volume of seaway traffic at from 21 to 27 million dollars per year.

Possible range of toll charges and toll revenue

Commodity	Potential traffic (million tons)	Per ton toll charge (cents)	Total revenue
Ore	30 -37½	50	$15,000,000-$18,750,000
Grain	6½-11½	25-35	1,625,000- 4,025,000
Coal	4	25-35	1,000,000- 1,400,000
Ballast	[1] 19½-22	15	3,300,000- 2,925,000
Total			20,925,000- 27,100,000

[1] Dead-weight tonnage.

This compares with total annual charges against navigation, estimated by the Senate subcommittee of the Committee on Foreign Relations, of from $17,500,000 to $21,250,000.

Inasmuch as the estimate of annual charges is based on current high construction costs, while the traffic estimates are not only conservative in volume, but do not include all potential traffic and are based on modest toll charges. it would appear that traffic will move in sufficient volume to make the seaway self-liquidating.

24. WILL NOT SUCH TRAFFIC AS DOES MOVE VIA THE SEAWAY MERELY REPRESENT A DIVERSION FROM THE RAILROADS AND ATLANTIC AND GULF PORTS?

Carrier opponents of the project argue contradictorily that the seaway is a waste of taxpayers' money because it will not be used and that it will be used to such an extent as to damage seriously their interests by diversion of traffic. Both extremes appear to lack foundation.

Some diversion of traffic to the seaway will occur, particularly in grain, as the recent Industry Report of the Department of Commerce points out. But the principal item via the seaway will be new traffic in iron ore (30,000,000 to 37,500,000 tons) which will not represent diversion from any existing mode of transport. Indeed, in-bound ore traffic, by

permitting continued location of the major section of the steel industry in the Midwest, will retain as traffic for the rail lines serving the industry a large volume of ore, coal, and iron and steel products which otherwise might be lost by removal of sections of the industry to the Atlantic coast.

It is axiomatic that benefits to any region of the United States almost always redound to the benefit of the entire country. The transportation savings of the seaway will be of great benefit to Midwest industry and agriculture. The entire Nation will eventually share in these benefits.

25. WILL THE SEAWAY ACT AS A STRONG DETERRENT TO THE COMMERCIAL DEVELOPMENT OF DOMESTIC TACONITE?

The charge that the seaway will act as a deterrent on commercial production of taconite implies the admission by the domestic ore industry that taconite, at the present stage of technological development, cannot compete with low-cost foreign ore. From this standpoint, it is true that the seaway will inhibit production of high-cost ore from taconite. On the other hand, the real deterrent is not the seaway but the high cost of taconite-ore production. Whether the seaway is built or not, taconite ore will still face competition from foreign ore, because of the former's high cost of production.

Without the seaway, many experts predict a substantial migration of sections of the Midwest steel industry to the coast in order to take advantage of low-cost foreign ore. If taconite ore cannot compete with foreign ore via the seaway in the Midwest, it most certainly could not compete with foreign ore at the coast where it would suffer the further disadvantage of a costly rail haul from the Lakes area.

Finally, it might be pointed out, the seaway capacity limits the amount of foreign ore to less than half of the peak requirements of the Midwest steel industry. Remaining requirements can be met by ore from taconite, if low-cost methods of production are developed.

26. WILL NOT THE SEAWAY ADVERSELY AFFECT THE AMERICAN MERCHANT MARINE BY DIVERTING TRAFFIC TO FOREIGN VESSELS?

The competitive advantage of foreign vessels in terms of lower shipbuilding and ship-operating costs has long been recognized by the United States Government. It would be no different on the seaway than elsewhere. In meeting competition of foreign carriers, our Government has authorized subsidies to United States vessels on essential lines, routes, or services in the foreign commerce of the United States. American-flag vessels utilizing the seaway would be eligible for such subsidies.

Furthermore, the recent Industry Report of the Department of Commerce indicates that the principal vessel movement over the seaway between the head of the Lakes and Montreal will be large lake freighter rather than ocean carrier, with transfer to and from ocean vessels at Montreal. Such a movement is predicated on the economies afforded by the large bulk lake freighters which can carry 15,000 to 20,000 tons of cargo over the seaway as compared with 8,000 to 10,000 tons for the ocean vessels capable of navigating the seaway. As is well known, the lake fleet, particularly in the large bulk carriers, is predominantly composed of American-flag vessels.

27. IS THE 27-FOOT WATERWAY DEEP ENOUGH TO ACCOMMODATE MOST OCEANGOING VESSELS?

The engineering plans of the seaway call for a minimum depth of 27 feet and ultimate depth of 30 feet through additional dredging when necessary. The 27-foot channel would have a normal depth of 27 feet but would be deeper in the rockier or more dangerous spots and will permit vessels of maximum loaded draft of 25 feet to pass through the seaway fully loaded. The 30-foot channel will permit vessels of 27½ maximum loaded draft to navigate fully loaded.

The most recent authoritative statement on the share of the world and United States fleets that could traverse the seaway at the initial depth of 27 feet was made by Edward Macauley, Acting Chairman of the United States Maritime Commission in 1946:

"What share of the United States Fleet and of the world fleets could traverse the proposed 27-foot channel? Whereas vessels having a maximum loaded draft of 25 feet would be able to carry full dead-weight capacity through the waterway, vessels having a maximum loaded draft of more than 25 feet would have to proceed on less than full draft. For the latter vessels an allowance has been made. It has been estimated that the preponderance of vessels transiting the Panama Canal normally have been composed of vessels loaded only to two-thirds of capacity. With an allowance of an additional 8 or 9 percent of the total dead-weight capacity for fuel, water, and supplies, a load of 75 percent of dead-weight capacity would appear to be typical of vessels which would transit such waterways as the St. Lawrence seaway. Of the ships of greater than 27-foot draft, the Victory and Liberty are of special interest. Victorys could go through the canal loaded to 79 percent, and the Liberty to 85 percent of total dead-weight carrying capacity.

"With these considerations in mind, it becomes apparent that there are many vessels in the United States Fleet and in the world fleets that are capable of navigating the proposed waterway.

"An analysis of the fleets of 30 of the principal countries of the world (and the British colonies), as of September 30, 1945, shows that, including vessels of 1,600 gross tons and over, there were 3,354 vessels within the 25-foot draft range and 5,191 vessels within the 27-foot draft range. The aggregate gross tonnages of these vessels were 12,283,972 and 24,592,103 tons, respectively. Freighters predominated, but there were also substantial representations of tankers and combination passenger and cargo vessels. If there are added Libertys and Victorys, which have drafts of 27 feet 9¼ inches and 28 feet 6¾ inches, respectively, the number reaches 8,015 and the gross tonnage 45,031,682.

"A somewhat corresponding situation is revealed by an analysis of the United States fleet of similar vessels. This shows that as of the same date there were 763 vessels within the 25-foot draft range and 1,173 vessels within the 27-foot range, have aggregate gross tonnages of 3,490,770 and 6,232,356, respectively. As in the case of the world fleet, the United States vessels consisted largely of freighters but with some tankers and combination passenger and cargo ships. If there are added Libertys and Victorys which have drafts of 27 feet 9¼ inches, and 28 feet 6¾ inches, respectively, the number reaches 3,997 and the tonnage 26,671,935."

28. WILL NOT THE SEAWAY PERMIT CHEAP FOREIGN COAL TO GLUT THE UNITED STATES MARKET AND REPLACE UNITED STATES COAL?

If foreign coal could compete with United States coal in the Midwest, it would first have to be able to compete on the Atlantic coast. Yet foreign coal has never succeeded in undercutting United States coal in coastal markets. In spite of availability of foreign shipping and the absence of an import duty, average annual United States imports of coal during the 10 years 1929–38 were at the relatively insignificant rate of 669,000 tons or a tiny fraction of 1 percent of United States production during the same period.

The fear of foreign competition in coal has little merit today when the United States is exporting over 60,000,000 tons of coal annually to a coal-hungry world.

Far from facing any danger from foreign competition, the recent industry report of the Commerce Department estimates that the seaway will facilitate an annual export movement of 4,000,000 tons of United States bituminous coal to the Canadian Province of Quebec and an undetermined quantity abroad.

29. DOES NOT THE POWER PROJECT DUPLICATE PRESENT FACILITIES WHICH ARE ADEQUATE FOR DEMAND?

Far from duplicating existing facilities, the Federal Power Commission estimates that, on the basis of present loads, the entire United States share of the power project (5,000,000,000 kilowatt-hours per year of firm energy) would be absorbed by about 1950.

Availability of low-cost power creates its own market. In our modern age, industries, particularly electro-chemical industries, are looking for cheap power. Wherever cheap power may be found within the limits of transportation of materials, it is fairly a certainty that it will be used. The Niagara-St. Lawrence frontier has abundantly indicated the willingness of industry to go to that area and take advantage of any cheap power which is available. The same phenomena may be observed in the Northwest and TVA areas, as well as in Canada.

30. HOW WILL NEW ENGLAND BENEFIT FROM THE POWER PROJECT WHEN THE LAW OF NEW YORK STATE PROHIBITS SALE OF ELECTRIC ENERGY PRODUCED IN THE STATE TO ANY CONSUMER OUTSIDE THE STATE BOUNDARIES?

Senate Joint Resolution 111 and House Joint Resolution 192 stipulate in section 5 that arrangement for transfer of the power facilities must be consistent with the laws of the United States and must protect the "interests of the United States and of other States" and that such arrangement will be effective only after approval by the Congress and the legislature of the State of New York.

It is assumed that Congress will take care of the interests of the New England States in the preparation of the above-mentioned legislation.

In the hearings on Senate Joint Resolution 111, representatives of the New York Power Authority stated that they were already on record as ready to recommend to the State legislature that the State law be amended to permit sale of power outside the State, if such an amendment were necessary to clarify the State law.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. SALTONSTALL. I should like to ask the Senator a question, which I think is a fair one. I should like to ask the Senator whether he has figured, or whether the committee has figured, as a part of the costs of the seaway, the costs of deepening the harbors and the approaches to the harbors in the various ports of the Great Lakes. I ask that because I understand that Canada is deepening the canal from Quebec to Montreal, I think, from 30 feet to either 32 or 35 feet, the latter, I believe. I also understand that this seaway is to be 27 feet, which the proponents say will take a vessel of 25½-foot draft. I am informed that there is no harbor in the Great Lakes that will take a ship of 25½-foot draft, with the exception of Detroit. That includes Buffalo, Cleveland, Chicago, Duluth, and several other harbors. Has the committee figured in the costs of deepening the channels up to those harbors, and the cost of building the new docks that will make it possible for an oceangoing vessel to turn around quickly and return to sea?

Mr. WILEY. I am frank to say the committee has not. There was some

testimony on that subject, some by the mayor of Milwaukee. There was testimony in the record. I must say that in hurrying to the Senate Chamber I forgot certain cards which I had prepared for use in giving answers to the numerous questions which I expected would be forthcoming.

Let me read a card I have before me:

NUMBER OF SHIPS WHICH CAN USE CHANNEL

Analysis of fleets of 30 principal countries as of September 30, 1945, including vessels of 1,600 gross tons and over. There were 3,354 within 25-foot-draft range and 5,191 within 27-foot-draft range. Aggregate tonnage 12,283,972 and 24,592,103 tons, respectively. If we add Liberty's and Victory's which have drafts of 27 feet 9¼ inches and 28 feet 6¾ inches, respectively, the number reaches 8,015 and the gross tonnage 45,031,682.

I realize that does not answer the question. I have a statement to the effect that most of the cities themselves would do the work the Senator suggests as necessary, and the estimated cost I think was $8,000,000. I have that information. I intended to carry over my address until Wednesday, at which time I had expected to subject myself to questions. I shall have that information available.

Mr. SALTONSTALL. I wish the Senator would furnish that, because my information is to the effect that instead of $8,000,000 it is something around $250,000,000. At the docks, as well as in the channels and the harbor facilities themselves, there will have to be very substantial dredging, and in one or two of the harbors, particularly at Cleveland, a great deal of the bottom is ledge, so that it will not only have to be dredged, it will have to be dynamited in order to increase the depth of the water sufficiently to make it deep enough for a seagoing vessel.

The Senator read various amounts of tonnage. Is it not true that the report of the Committee on Merchant Marine stated that the one dry-cargo ship that is practical should be 32 feet in draft and a tanker 35 feet in draft? Is it not also true that at the present time only 9.4 percent of the United States dry-cargo tonnage, and I think a little less than that of the tanker tonnage, could get within a 25½-foot draft?

Mr. WILEY. The Senator has asked several questions.

Mr. SALTONSTALL. There are two questions.

Mr. WILEY. First, I want to put in the RECORD the answer to the claim that the harbors will have to be dredged. I merely wish to call the attention of the Senate to the fact, at this time, as a preliminary to answering the question, that some of the greatest harbors in the world do not qualify to accommodate ships with ocean-going draft. Of the ports with less than 27-foot draft, I may cite the following:

	Feet
Stettin, Germany	26
Seville, Spain	18–21
Vera Cruz, Mexico	27
Bangkok, Siam	14
Nassau, Bermuda	24
Canton, China	16
Guayaquil, Ecuador	26
Hypong, Indochina	21
Rosario, Argentina	22
Basra, Iraq	27

I shall try to provide answers to the questions, though I realize that one is supposed to know a great deal about this subject that I do not know. If one looks at the map of the Great Lakes hanging on the wall here, he realizes that through this one little port at the Soo pass 120,000,000 tons down-traffic practically in one season of 7 months, and he gets an idea of the commerce on the Lakes. I, who have been living close to the Lakes, though I live in the western part of Wisconsin, have seen man's ingenuity in developing boats to such an extent that, whereas formerly the boats had a capacity of 1,000 to 2,000 bushels of wheat, the shippers will now transport in the boats 10,000 tons. The development in the building of boats is such that all the bugaboo as to what can be done will, I think, disappear in the mist, when it is realized that here is an area served by the St. Lawrence Canal, with 50,000,000 souls, who are doing more business in tonnage than is handled in three-fourths of all the ports of the Pacific and Atlantic together.

Mr. SALTONSTALL. Mr. President, will the Senator yield for a question?

Mr. WILEY. Yes.

Mr. SALTONSTALL. If all this business is done in the area referred to, and I assume it is, as the Senator from Wisconsin says it is——

Mr. WILEY. I will secure the exact figures and place them in the RECORD on Wednesday.

Mr. SALTONSTALL. What I am getting at is that we want to build a seaway which is practical for oceangoing steamers, and if the President's own committee states that only 9.4 of our dry-cargo ships, and fewer of our tankers—I think it is 5-point something—can go up a 27-foot channel, then if we are going to build it we ought to build it deeper, ought we not?

Mr. WILEY. I am willing to take the judgment of those who have studied the matter. I am not one of those who are building blocks in the road for others to stumble over. First it is contended there will be no traffic for the canal. Then it is contended that the canal will not provide proper facilities to handle the traffic. Then it is contended that the canal should be deeper, which would entail more and more expense. Now I say, let us build it. Let us make an outlet to the sea so that we can take care of the vast dynamo which is operating in the central portion of our country, which is generating power, and wealth, and doing the job which is building up the Nation. Do not keep us hemmed in any longer.

On that very point, Mr. President, I will secure the exact figures involved, and will present them for the RECORD Wednesday. I previously stated I returned from Wisconsin just this morning.

Mr. SALTONSTALL. Mr. President, may I ask another question?

Mr. WILEY. Yes.

Mr. SALTONSTALL. The United States' share of the costs of the power is estimated at $160,795,000, and the same for the Canadian share. There is also a figure estimated by General Wheeler—and I am reading from page 14 of the committee report marked "Calendar No. 862"—of $91,000,000 as one-half of the item common to power and navigation.

As I understand, that $91,000,000 is going to be chargeable to navigation. Now if it is a power cost common to both power and navigation, why should tolls be required to pay and liquidate that $91,000,000, half of which is chargeable to power? I want to say to the Senator from Wisconsin that I am in favor of the power project. I believe it should be built in due course. But I believe it should be built entirely apart from the navigational features of the seaway, and I think it could be done and a very substantial amount of money saved. Why should this $91,000,000 be chargeable to tolls if half of it is common to power and to navigation?

Mr. WILEY. I think the answer is very simple. I assure the Senator he does not have to assure me that he is in favor of power and against the navigation project. I have known that for some time. I appreciate his strenuous efforts to block navigation. But I cannot see the consistency in saying "Give us all this power. We of the East need that. And we want to keep you of the Middle West locked in."

Mr. SALTONSTALL. Mr. President, will the Senator yield to me at that point?

Mr. WILEY. Let me finish one question at a time. The question of $91,000,000 is simply a matter for the Army engineers in determining what is the appropriate cost. First, it will be understood that under the Constitution the Federal Government regulates navigation, and so forth, on our streams. If Senators will look at the chart which hangs on the wall they will see why it is not reasonable to say that it is only an electric project or only a navigation project. We will have a large map placed on the wall to show the situation in detail. The electric development is made at the point I indicate. At this other point on the chart is where the ships come through. It is a combination of power and navigation. The engineers who apportion the cost to flood control, to navigation, and the cost of erecting these structures took the figure the Senator has referred to and they felt it was a reasonable figure. I must say that I understand this is the first time that question has been raised.

Mr. AIKEN and Mr. SALTONSTALL addressed the Chair.

Mr. WILEY. I think some are trying to confuse the larger issue before us.

Mr. SALTONSTALL. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. SALTONSTALL. The Senator has stated that I was attempting in every way to block the navigational features. I respectfully say to the Senator that I want to see the navigational features made practical, to see them made useful, so that they will surely be self-liquidating. I am not blocking them. I am opposing the joint resolution at this time because I do not believe that the joint resolution in its present form provides for a practical seaway for modern ocean-going vessels developed by the war since 1945 and onward.

Mr. WILEY. I appreciate fully the position of the Senator from Massachusetts, and I probably was a little harsh with him, but I nevertheless have to restate the position that every argument the Senator from Massachusetts has made was made time and time again in relation to the Panama Canal, and every argument he has made has been made against every progressive advance the Nation has made. It is always a question of something not being quite practical. It is said that there has not been demonstrated to the *n*th degree the certainty that the proposal will be self-liquidating. It is contended that it has not been demonstrated that the people in my section as against the people in other sections are going to get their full 100 percent of value out of it. Such arguments have been constantly used, and if it were not for the common sense of the jury which has to decide the question—and in this case we are the jury—this matter would be blocked interminably. But I cannot conceive for one moment that such things as insinuating that ocean-going ships will not use the canal are going to decide the matter.

There are five countries using the waterway now and sending small ships which are traveling to the Lake ports. Two of the countries are Sweden and Holland. I will place the names of the other three in the RECORD on Wednesday. They are sending through the waterway such ships as Liberty ships and Victory ships loaded approximately 80 percent. All such ships, and there are thousands of them plying the seas, can go through the canal.

Mr. President, we know what is meant by the draft line on a ship. When the ship gets down to the draft line it is full. We know that, if that ship is full of feathers, as distinguished from iron ore, the draft line will be about at the point which I indicate on this sheet of paper which I am using as an illustration, 10 or 15 feet above the line at which the ship would be in the water if it were loaded with iron ore. Suppose automobiles are shipped from Detroit, as distinguished from wheat, which is shipped in bulk. A ship such as a Victory ship or a Liberty ship can be loaded up to its full capacity with automobiles, but the ship will not go down in the water to the draft line. Why? Because automobiles do not have the solid weight that wheat or iron ore shipped in bulk have. That is the answer.

Mr. President, when the Senate reconvenes on Wednesday next I shall place in the RECORD a statement of the number of vessels using the seaway. I will demonstrate to the Senate that the seaway canal, as outlined by the best military and business brains, and by every President since President Harding, is practicable and will do the job. But up comes this objection and that objection. Some will say, "The construction of the canal is going to hurt my baby." But those who say so cannot demonstrate that it will hurt their baby. When such talk is begun it is well to ask a few questions as to how their baby is going to be deprived of any milk. We have many babies in the Midwest. I say to the Senate again that it will be a sorry day if the Congress loses its vision and turns down the project.

Mr. President, I have an understanding with the Senator from Massachusetts [Mr. LODGE] that he is to speak on Wednesday, with the understanding that my statement begun today will be continued over to Wednesday, and that I will occupy some of the time on Wednesday for questions and answers. Then the Senator from Massachusetts is to speak.

Mr. LODGE. Mr. President, my understanding was that I was to begin when the Senate convened on Wednesday. That was the understanding I had with the Senator from Wisconsin.

Mr. WILEY. I am sorry, but I understood that if I had not completed my statement I would continue, of course, on Wednesday.

Mr. LODGE. Will the Senator continue now?

Mr. WILEY. No; I would prefer not to. I do not want to take much time on Wednesday. The Senator from Massachusetts can have most of the time then. I want to answer some of the questions that have been put to me today and place certain things in the RECORD.

Mr. LODGE. My understanding with the Senator was that he was to begin today, but I was to begin on Wednesday.

Mr. WILEY. The Senator will begin on Wednesday, but after I am through.

Mr. LODGE. That will be 3 or 4 o'clock in the afternoon?

Mr. WILEY. No.

Mr. LODGE. That is not satisfactory to me, and that is not my understanding of the agreement we had.

Mr. WILEY. Then the Senator from Massachusetts and I disagree in that respect. I certainly do not want any misunderstanding. Will the Senator from Massachusetts agree that I shall have an hour on Wednesday?

Mr. LODGE. So far as I am concerned, the Senator can take all day Wednesday, and then I will try to take the floor on Friday.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. WILEY. I yield.

Mr. WHERRY. An understanding can be worked out between the two Senators, and between the opponents and proponents of the measure. An understanding obviously cannot be reached on the Senate floor. I suggest that Senators get together during the recess and endeavor to reach an understanding.

Mr. WILEY. Mr. President, I am very happy to follow the suggestion of the Senator from Nebraska. I do not wish to have any misunderstanding with the Senator from Massachusetts. I stated my understanding. He has another understanding. I shall waive my understanding in his interest if he does not think I am entitled, under these circumstances, to at least an hour to reply to the questions which have been asked and to present the material which I know I have, but which I have not had time to assemble because of absence from the city. If he is insistent that his understanding is correct, and that he is to proceed at 12 o'clock on Wednesday, I waive any rights which I may have. Of course, we shall expect to take the floor after he has concluded.

The PRESIDENT pro tempore. Does the Senator from Wisconsin yield the floor.

Mr. WILEY. I yield the floor.

Mr. BRIDGES. Mr. President, I ask unanimous consent that there be printed in the RECORD at this point an article entitled "Fraser Challenges Wiley's Statement on Seaway Plan," from the Cedar Rapids, Iowa, Gazette for January 23, 1948.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

FRASER CHALLENGES WILEY'S STATEMENT ON SEAWAY PLAN

Harry W. Fraser, chairman of the Railway Labor Executives' Association and president of the Order of Railway Conductors of America, locked words Friday afternoon with Senator ALEXANDER WILEY, of Wisconsin, on rail labor's stand on the St. Lawrence seaway and power project.

From Washington Senator WILEY was quoted earlier in the day as telling the Associated Press that he "is convinced that the overwhelming rank and file of American railway labor knows that the development of the St. Lawrence seaway and power project will inevitably involve a vast expansion of railroads."

The Wisconsin Senator was also quoted as describing resistance to the seaway as "the most reactionary effort conceivable."

Fraser's answer is as follows:

"Senator ALEXANDER WILEY, of Wisconsin, boosting for the St. Lawrence seaway and power project, presumes to speak for railroad labor and to tell both railroad management and the workers what is good for them and what their attitude should be on this highly visionary project. Senator WILEY asserts that the rank and file of railroad labor knows that the development of the St. Lawrence seaway and power project will inevitably involve a vast expansion of railroads. He declares that our transportation system is good for a $70,000,000,000 economy, but is hopelessly inadequate for a $210,000,000,000 economy of the future.

"Has he forgotten the job done by the rail carriers and their employees under all of the shortages and stresses and strains of war? It would be interesting to know how Senator WILEY expects the diversion of millions of tons of shipping from the railroads to the seaway to bring about an expansion of rail facilities. The seaway, if developed, would be navigable for 7 months out of the year and frozen over during the other 5 months, during which the traffic would necessarily be moved by the rail transportation systems. Is this expansion?

"What about the power and equipment, and the personnel which the railroads would be obliged to maintain on a stand-by basis during the 7 months the seaway was navigable? And in addition to these disastrous elements, the development of the seaway project would impose upon the people of the United States indebtedness of multiplied millions of dollars over and above the load they now carry and must carry until the job of world reconstruction is accomplished.

"Senator WILEY finally asserts that railway labor is serving as a dupe for a few selfish interests which have always fought the workers. I suggest that the Senator could profitably study the relationships of management and labor in the railroad industry and reexamine the source of his information on this subject. Let me say finally that our job is to face the realities and to strengthen and support our basic industries. This is no time to waste either money or effort in the furtherance of experimental dreams."

The PRESIDENT pro tempore. The Chair lays before the Senate a letter from the President of the United States, which the clerk will read.

The Chief Clerk read as follows:

THE WHITE HOUSE,
Washington, January 26, 1948.

Hon. ARTHUR H. VANDENBURG,
President of the Senate pro tempore,
United States Senate,
Washington, D. C.

MY DEAR MR. PRESIDENT: I should like to express again the hope that Congress will soon enact legislation approving the agreement of March 19, 1941, between the United States and Canada for the development of the Great Lakes-St Lawrence seaway and power project.

This great engineering enterprise will develop one of the richest natural resources of the continent for the benefit of the whole United States. It will make deep draft ocean transportation available to the most highly industrialized area of North America. It will develop the largest potential hydroelectric power site of the Nation. It will strengthen and expand our industry, our agriculture, our domestic commerce, and our foreign trade. That is why every President during the past 25 years has given it his strong support. That is why it has been a measure strongly supported by both parties.

This momentous project will confer correspondingly great benefits on our friend and neighbor, Canada. That is why every Canadian administration during the past 25 years has also strongly supported it.

Plans for this great international undertaking are now based upon the principle of making the new deep draft navigation features self-liquidating by a levy of reasonable tolls on shipping. The Government will also be reimbursed for the new power facilities. The application of the principle of self-liquidation to the navigational features as well as to the power phases of the seaway should remove objections concerning the economic soundness of the enterprise.

The St. Lawrence project is an important measure of national defense in both its navigation and power phases. Our security rests in large measure on the development of our natural resources and our industrial potential. The transportation system and the power facilities which the St. Lawrence offers—if only we are willing to develop them—will generally strengthen our national economy and provide in particular cheap water power and water transportation facilities needed in peace as well as in a time of emergency. Our security depends also upon a vigorous and prosperous Canada, our ally in both World Wars. The St. Lawrence project will strengthen the economy and the defenses of Canada as it will our own.

I am convinced that the great majority of Americans realize that the St. Lawrence seaway must be developed if we as a Nation are to continue to receive the fullest benefits from our natural resources. I am personally convinced of the need for this project, both from the standpoint of our common economic welfare and of our national security. I therefore strongly recommend that the Congress enact legislation authorizing this great undertaking.

Very sincerely yours,

HARRY S. TRUMAN.

The PRESIDENT pro tempore. The letter will lie on the table.

Mr. LODGE. Mr. President, I ask unanimous consent that at the next meeting of the Senate, which I understand is to be on Wednesday, I be recognized at the outset of the session.

The PRESIDENT pro tempore. Without objection, the order is made.

Mr. LODGE. Let me say for the information of the Senate that I intend to state the reasons which actuate me in opposing this project. They are not the reasons which the able Senator from Wisconsin has attributed to me.

THE FUEL OIL SHORTAGE

Mr. TOBEY. Mr. President, several weeks ago, the oil situation being very acute, and suffering and privation impending in the Eastern Atlantic States, particularly, and to some extent all over the Nation, in connection with fuel supplies and oil for this winter's use, the Committee on Interstate and Foreign Commerce of the Senate appointed a subcommittee of five, of which I was appointed chairman, to consider the problem.

The steps taken were to call together a group of approximately 200 in the Banking and Currency Committee room. The group consisted of oil producers, representatives of shipping interests, tank experts, and railroad officials. There was an all-day discussion of the question. At the conclusion I appointed a committee of seven oil men in the Eastern Atlantic States to consider the problem and to report adequate remedies—not suggestions—for the trouble impending. That committee has held several meetings, and will make a report to us tomorrow. I shall place in the RECORD the substance of its report.

Meanwhile, in response to many inquiries, I should like to place in the RECORD at this point a list of the coordinators appointed by the governors of the various States at my request—27 already having been appointed. They are now at work with organizations in each State. I also wish to place in the RECORD letters to and replies received from the Reconstruction Finance Corporation, the Interior Department, the Maritime Commission, the Department of the Air Force, the State Department, the Navy Department, the Office of Defense Transportation, and the Association of American Railroads, in an effort to cooperate with the committee in the solution of the problem of oil shortage.

I ask unanimous consent to have these documents printed in the RECORD at this point as a part of my remarks.

There being no objection, the list and letters were ordered to be printed in the RECORD, as follows:

STATE, GOVERNOR, AND FUEL COORDINATOR APPOINTED

Connecticut: James L. McConaughy; Charles N. Mitchell, Hartford, Conn.

Delaware: Walter W. Bacon; Leon Walker, 827 Market Street, Wilmington, Del.

District of Columbia: Board of Commissioners; Thomas J. Kennedy, East Administration Building, Washington, D. C.

Georgia: Melvin E. Thompson; Frank Arnold, Atlanta, Ga.

Illinois: Dwight H. Green; Carl Johnswold, Forest Park, Ill.

Indiana: Ralph F. Gates; A. W. Groves, attorney, State Conservation Department, State Library Building, Indianapolis, Ind.

Iowa: Robert D. Blue; no fuel coordinator appointed.

Kentucky: Earle C. Clements; Joseph Hutchinson, 1202 South Third Street, Frankfort, Ky.

Maine: Horace Hildreth; Harold W. Nicholson, 561 Preble Street, South Portland, Me.

Minnesota: Luther W. Youngdahl; J. W. Clark, Business Research and Development, St. Paul, Minn.

Maryland: William P. Lane, Jr.; no fuel coordinator appointed.

Massachusetts: Robert F. Bradford; George H. Rockwell, 989 Memorial Drive, Cambridge, Mass.

Michigan: Kim Digler; Donald Leonard, East Lansing, Mich.

Missouri: Phil M. Donnelly; Bert Cooper, director, Department of Business and Administration, Jefferson City, Mo.

Nebraska: Val. Peterson; Rufus M. Howard, Department of Agriculture, Lincoln, Nebr.

New Jersey: Alfred E. Driscoll; Joseph L. McLaughlin, 107 West State Street, Trenton, N. J.

New York: Thomas E. Dewey; Charles Sell, Albany, N. Y.

North Carolina: R. Gregg Cherry; W. Z. Betts, department of purchase and control, Raleigh, N. C.

North Dakota: Fred G. Aandahl; no fuel coordinator appointed.

New Hampshire: Charles M. Dale; John E. Holden, Newington, N. H.

Ohio: Thomas J. Herbert; Eric V. Weber, Cincinnati, Ohio.

Oklahoma: Roy J. Turner; no fuel coordinator appointed.

Pennsylvania: James H. Duff; Brenton G. Wallace, 764 Mount Pleasant Road, Byrn Mawr, Pa.

Rhode Island: John O. Pastore; Fletcher Burton, Providence, R. I.

South Carolina: J. Strom Thurmond; E. H. Talbert, Columbia, S. C.

South Dakota: George T. Mickelson; C. F. Overton, natural resources commission, Pierre, S. Dak.

Tennessee: Jim N. McCord; Hilton Butler, Adjutant General, Nashville, Tenn.

Vermont: Ernest W. Gibson; M. A. Campbell, adjutant general of Vermont.

Virginia: William M. Tuck; C. F. Joyner, Jr., Twelfth and Main Streets, Richmond, Va.

West Virginia: Clarence W. Meadows; no fuel coordinator appointed.

Wisconsin: Oscar Rennebohm; Anthony E. Modler, department of agriculture, Madison, Wis.

Maryland: William P. Lane, Jr.; Judge Emory H. Niles, Court House, Baltimore, Md.

RECONSTRUCTION FINANCE CORPORATION,
OFFICE OF RUBBER RESERVE,
January 8, 1948.

Hon. CHARLES W. TOBEY,
United States Senate,
Washington, D. C.

DEAR SENATOR TOBEY: Reference is made to your telephone call requesting information with respect to pressure tank cars owned by RFC Office of Rubber Reserve, and the present use position of these cars in the rubber program.

The Office of Rubber Reserve owns 450 type 104–A pressure cars which were constructed for its use during the war period for the transport of materials which are utilized in the production of synthetic rubber. The actual requirements for tank cars in the program are not fixed, but increase and decrease as the conditions surrounding individual plant operations necessitate in relation to the quantity of synthetic rubber produced. Present requirements are approximately 350 cars, which is the reason some of the cars that we have released for other uses are being recalled for our service.

Inventories of GR–S in the hands of Government and the rubber fabricating industry are too low to meet manufacturing requirements. There are some 800 rubber-fabricating companies in the United States which are presently using synthetic rubber, employing from as many as 60,000 people to as few as 10. These companies are now receiving from 10 to 30 percent less GR–S than they request for their operations, and many of them have

indicated to this office that further cuts would necessitate closing their plants.

The pressure cars which are owned by Rubber Reserve are managed under a contract with the Union Tank Car Co., and when cars are not needed in the Rubber Reserve operations, the Office of Defense Transportation is notified, which in turn advises the Union Tank Car Co. to whom the cars are to be leased. In the event Rubber Reserve finds it necessary to recall any cars from lessees, the Office of Defense Transportation is again notified and informed of the number of cars required, and in turn advises the Union Tank Car Co. from whom the cars are to be recalled. It will be noted, therefore, that the Office of Defense Transportation has complete control over the allocation of pressure tank cars for essential uses.

I hope the foregoing will give you adequate information with respect to the subject of your inquiry, but if it does not, I shall be most pleased to furnish such further information as you may desire.

Sincerely yours,

G. B. HADLOCK,
Executive Director.

DEPARTMENT OF THE INTERIOR,
OIL AND GAS DIVISION,
January 17, 1948.

Hon. CHARLES W. TOBEY,
United States Senate.

MY DEAR SENATOR TOBEY: Your suggestion of a meeting of State fuel oil coordinators proved its value beyond question at the meeting held day before yesterday.

The meeting was attended by representatives of 23 States and the District of Columbia, by representatives of the National Petroleum Council's Committee on voluntary programs under the Anti-Inflation Act, and by representatives of other Government agencies. The registered attendance was as follows:

State representatives and their advisers	65
Congressional:	
Senators	1
Representatives	2
Representatives of Senators and Representatives	7
Total	10
Representatives of 24 executive agencies	54
Representatives of National Petroleum Council and its committee	16
Association of American Railroads	1
Council of State Governments	1
Representatives of the press	20
Total registered attendance	167

A list of those who attended and were registered in is attached. A few who attended may have been missed in the registration.

I suspect that one or two State coordinators, who apparently came expecting that the meeting might in some fashion point the way to additional supplies for their States, were disappointed to learn that the problem is basically one of supply and that no one could out-of-hand allocate them additional supplies. The great majority, however, had correctly anticipated the purpose and scope of the meeting, as set out in the carefully worded invitation, and were anything but disappointed.

All of the State representatives, to judge from their expressions from the floor and from private conversations, felt that they had benefited from the comprehensive review of the petroleum situation that was given them and from the discussions by the various State coordinators, particularly those who have been functioning longest, of the problems encountered in their respective States and the methods devised to meet them. The benefit was greatest, no doubt, to those most recently appointed, but coordinators who have been in office for weeks or months were equally emphatic in their commendation of the meeting.

A number of the industry representatives present have said that they derived much benefit from the discussion of the problems and methods of the State coordinators, and I know that my associates and I did.

As you doubtless know, Secretary Krug lent force to the oil-conservation aspect of the meeting by issuing, coincident with it, an appeal to the public to conserve fuel oil, gas, and gasoline. I enclose a copy. As you suggested, copies of his letter of January 10 to you were given to the State representatives and their advisers.

I feel that the meeting was successful and will have fruitful and long-lasting consequences, and I am deeply grateful to you for suggesting that it be held.

Sincerely,

MAX W. BALL.
Director.

UNITED STATES MARITIME COMMISSION,
Washington, January 12, 1948.

The Honorable CHARLES W. TOBEY,
United States Senate,
Washington, D. C.

DEAR SENATOR TOBEY: Reference is had to your letter of December 20, 1947, transmitting copy of the report made by an industry committee which you appointed after a hearing of your subcommittee on December 9 concerning fuel shortages in various areas, particularly the North Atlantic States. You refer specifically to those sections of the industry-committee report dealing with the shortage of tanker transportation facilities and request our comments thereon.

This Commission has spent a large part of its time of late on matters pertaining to the oil- and tanker-shortage problems and has endeavored in every way possible to expedite the getting into operation of laid-up tankers and to assure the most efficient use of the vessels which it still directly operates, in meeting domestic needs, particularly those of the Atlantic Seaboard States.

Between November 1 and January 1, 74 T-2 and Liberty-type tankers were moved from Reserve fleet sites for repair and reconditioning for operation, which number includes the 50 T-2 vessels to be operated directly by the Navy. In the week from January 1 to 8, 10 more vessels of these types were withdrawn from lay-up. As of January 9 there remained 45 such tankers still tied up, but these are being moved out day by day, and every effort is being made to expedite the process. As you are aware, all of these vessels have been allocated for sale, and purchasers who have shown indications of being dilatory in completing the sales arrangements, with a consequent delay in breaking the vessels out of lay-up for repair, have been warned that they must promptly comply with our requirements in this respect.

Highest priority has been given to concluding purchase arrangements and physical delivery of all tankers in the laid-up fleet. In this connection the Commission has appointed the Chief of its Bureau of Operations as Coordinator for the purpose of speeding up administrative work incident to such deliveries from lay-up. Second highest priority has been given in the case of citizen buyers of operating tankers who give assurances that the vessels will be used exclusively in domestic service during the balance of the winter and the early spring months.

Every practicable measure is being taken to shorten the sales and delivery processes, to the end that no vessel will be unnecessarily delayed in entering upon or continuing operation.

The Commission and its staff has been in daily contact with purchasers of tankers, with oil companies seeking the use of the tankers which we still operate, and with Members of the Congress and State and city officials seeking to meet the tanker transportation needs of various areas along the eastern seaboard. On January 7 we held a meeting with 15 of the larger oil companies serving United States Gulf- and east-coast States, for the purpose of determining the extent to which those companies have been and are using the American registered tankers which they themselves own in meeting our domestic needs. We are pleased to advise that the information adduced at that hearing indicates that virtually all of the 236 tankers owned by these particular companies are now being used in the United States coastwise and import trades. The Commission has requested these companies immediately to endeavor to divert to our import trade additional tankers under foreign registry which they own or control directly or through subsidiary or affiliated companies.

Vessels recently withdrawn from the Reserve fleets for repairs and refitting are now beginning to enter operation, and we estimate that by the end of this month between 40 or 50 such vessels will be in active operating status. This, coupled with the many additional vessels which will enter operation in the early days of February, should greatly relieve the present difficult situation by the end of that month.

You may be assured that the Commission is keenly aware of this acute situation and will continue to exert its best efforts to assist.

Sincerely yours,

W. W. SMITH,
Chairman.

DEPARTMENT OF THE AIR FORCE,
Washington, January 14, 1948.

Hon. CHARLES W. TOBEY,
United States Senate, Washington, D. C.

DEAR SENATOR TOBEY: Mr. Symington has referred to me, for study and action, your letter of December 20, 1947, bearing on the impending fuel-oil shortage. The report of the problem transmitted by your letter is excellent and the recommendations contained therein appear to be a sound approach to the ultimate resolution of current fuel-oil difficulties.

The only petroleum products being purchased by the Air Force consist of aviation gasoline, aviation lubricants, and jet fuel. Heating fuels for our installations are purchased by the Quartermaster Corps and the Treasury Department.

Our purchases of petroleum products are handled throughout the United States on a current requirement basis so that there is no program for maintaining reserve stocks of these products. In recent months requirements have not been fully met at certain installations for short periods of time, but aviation fuels available for the remainder of the fiscal year are estimated to be sufficient for our minimum requirements.

Further, in conjunction with the Federal Works Agency a survey is being made of Air Force installations east of the Rocky Mountains for the purpose of determining the practicability of conversion from oil to coal heating.

Please be assured that the United States Air Force will cooperate fully in holding requirements to the minimum during this critical period.

Sincerely yours,

A. S. BARROWS,
Under Secretary of the Air Forces.

DEPARTMENT OF STATE,
Washington, January 9, 1948.

MY DEAR SENATOR TOBEY: I have your letter of December 20, 1947, with regard to

the threatened shortage of fuel oil in the New England and Atlantic seaboard areas this winter, and to the recommendations made by the industry committee appointed by you to study this problem. I also have the report of the industry committee and its letter of December 17, 1947 transmitting this report to you, both of which were included as enclosures to your letter.

In your letter you asked that the Secretary inform you of his reaction to the report and its recommendations. As the report is primarily concerned with aspects of the problem regarding which other agencies of the Government can better advise your committee, it is hoped that it will be satisfactory if my comments are confined to the recommendations relating to the responsibilities of the Department of State. I believe two such recommendations are touched upon in the industry committee report and in your letter. One of these is the recommendation that negotiations be inaugurated at once with foreign governments who are parties to the international load line agreement for the purpose of securing their agreement to the increasing of the load limit on tankers during the present shortage period. The other recommendation relating to the responsibilities of the Department of State is that exports of petroleum products be restricted during the next 2 or 3 months to the minimum quantities necessary to maintain the economies of certain foreign nations.

In order to assist in relief of the fuel-oil shortage this winter, the practicability of securing a temporary suspension of the International Load Line Convention, 1930, has been given consideration by the Department of State. This question also has been taken up with the British Government. The preliminary discussions with the British indicate certain complexities which would be involved in securing a suspension of the convention. The British wartime defense regulations to permit deeper loading of tankers have been revoked, and the Department has been advised informally that these regulations cannot be reissued without new legislation. It is doubtful that parliamentary approval could be secured within a sufficiently short period for such action to be helpful in the current emergency. The possible saving of United Kingdom tankers, it is estimated, would be equivalent to not more than six such vessels in continuous employment. If deeper loading were permitted in the older tankers, there appears to be doubt that there would be any saving because of increased repair time due to greater strain and damage to the vessels caused by high seas.

Even if the necessary British legislation were secured, deeper loading would necessitate obtaining prior acquiescence of all convention countries before the contemplated relaxation could be made effective. There are, as you may know, 45 countries which have either ratified or adhered to this treaty. In addition, classification societies and sea labor also should be consulted. With so many countries and interests involved, it is doubted that their concurrence to a suspension of the convention could be secured in the time available if the desired result is to be achieved. It is believed that the necessary agreements could not be obtained in less than 2 months.

The industry committee recognized in its report that some exports of oil products are necessary to maintain the economies of foreign nations. The committee, therefore, recommended that only minimum export requirements from the United States be met during the present shortage in this country. You may be sure that the Department of State will cooperate in the carrying out of this recommendation to the fullest extent consistent with our national interest in supplying petroleum products essential to the economies of foreign nations. This cooperation will of course be indirect since the responsibility for the administration of export controls under the Second Decontrol Act of 1947 is that of the Department of Commerce.

Sincerely yours,

CHARLES E. BOHLEN,
Counselor.

THE SECRETARY OF THE NAVY,
Washington, January 20, 1948.

Hon. CHARLES W. TOBEY,
United States Senate Committee on Interstate and Foreign Commerce, Washington, D. C.

DEAR SENATOR TOBEY: The special industry committee appointed by you in early December to study the critical petroleum situation subsequently rendered a report which contained many well considered recommendations for action to be taken by both Government and private interests to conserve fuel-oil supplies, and increase the transportation means engaged in the movement of these supplies.

Because of your keen interest and effective leadership in these matters you will, I know, appreciate a report of what measures the Navy Department has taken to comply with the suggestions made to you by the special industry committee. Accordingly I am listing below certain steps which the Navy Department had already taken in addition to those flowing from the recommendations of that committee:

(a) On November 6, 1947, issued a directive to all shore establishments regarding the necessity for utmost fuel conservation and included detailed instructions for achieving that result.

(b) On December 6, 1947, reemphasized the directive mentioned in (a) above and further directed that the installation of new or conversion fuel-oil-burning equipment be suspended immediately except in those cases where extreme hardship could be proved and approval for work continuance on that basis be obtained.

(c) On January 12, 1948, submitted Navy requirements for petroleum products for the second half of the current fiscal year to the Department of the Interior for notification to industry. These requirements have been searchingly scrutinized and now represent only the actual consumption needs of the Navy during the 6 months' period in question.

(d) On January 12, 1948, an agreement was reached with the Governor of Rhode Island and representatives of the Governors of the other five New England States whereby the Navy will release, subject to replacement in kind by June 30, 1948, a total of 940,000 barrels of petroleum products from Navy-owned storage in the New England area for emergency relief of distressed consumers in that area. This amount of fuel represents a distinct sacrifice of the Navy's inventory position and was made only after thorough consideration of the suffering and hardship which will prevail in the New England States should this fuel not be made available.

I regret to advise that it is wholly impracticable for the Navy to comply with that recommendation of the special industry committee regarding temporary employment in the Gulf Coast Atlantic service of some of the 50 tankers being reconditioned for use of the military services. As you are probably already aware, the program of reconditioning these vessels was initiated by the Navy department for the very purpose of aiding the critical petroleum transportation problem by releasing operating tankers regularly chartered by the military services from the Maritime Commission. It is difficult to understand, therefore, by what logic the special industry committee arrived at the conclusion that the Navy could release vessels formerly chartered from the Maritime Commission and at the same time, at least temporarily, the tankers obtained as replacements therefor. In this connection you will be pleased to note that in anticipation of the availability of some of the 50 tankers being reconditioned the Navy has requested the allocation of only eight chartered tankers from the Maritime Commission for January liftings. This is in marked contrast with the 37 vessels assigned to the Navy by the Maritime Commission in December of which nine did not actually arrive at loading ports until early January thus making a total of 17 chartered tankers from the Maritime Commission in use during the current month.

The Navy Department is keenly aware of the serious situation confronting many sections of the country and stands ready to render any further assistance to alleviate hardship and suffering which is compatible with the Navy's basic responsibility in matters of national security.

Sincerely yours,

JOHN NICHOLAS BROWN,
Acting.

THE SECRETARY OF THE NAVY,
Washington, January 15, 1948.

Hon. CHARLES W. TOBEY,
United States Senate,
Washington, D. C.

DEAR SENATOR TOBEY: The very excellent report, submitted by the committee organized by you of representative oil producers and distributors, which was forwarded to me in your letter of December 22, 1947, has received intensive study in the Navy Department. The recommendations submitted for alleviation of the current fuel shortage are most sound and extremely constructive.

Action to implement the recommendations made by your committee, as applying to the Navy, has been initiated and some effective results have already been accomplished.

Since early last summer, the Navy has been operating under directives to exercise the utmost economy with respect to the consumption of petroleum products consistent with the performance of assigned missions and training operations necessary to maintain the fighting efficiency of the fleet and naval aviation. Current requirements are being reduced to a minimum and during this period of critical short supply the Navy where it can is making oil available on a replacement basis. In addition, those Navy installations which can burn coal in lieu of oil are being shifted to coal.

Assistance to veterans' hospitals and other Federal institutions has been provided in the eastern seaboard States by the supply of fuel from Navy stocks. This form of relief has resulted in a correspondingly additional amount of fuel becoming available to civilian consumers from their regular commercial suppliers in those localities.

The 50 tankers recently acquired by the United States Maritime Commission are being placed in operation with the utmost dispatch. In anticipation of their readiness, the Navy released, during December, a considerable number of tankers that were under charter from the United States Maritime Commission which have been diverted to the transportation of commercial cargoes. Inasmuch as this tanker program has been temporarily delayed, the Navy is about 20 cargoes behind schedule for December. However, this delay is being accepted and reinstatement of chartered tankers has not been requested. During January an appreciable number of the 50 tankers will be in operation, and their addition to the world tanker fleet will contribute greatly to the solution of the transportation difficulties.

Please be assured that the Navy will keep the fuel situation under continuous study and will continue to institute any possible action consistent with protection of the national security toward rendering assistance in relieving the critical shortage of fuel which is now facing the country. The Navy is most desirous to cooperate with your committee in this common cause and to contribute in the accomplishment of the task.

Sincerely yours,

JOHN L. SULLIVAN.

OFFICE OF DEFENSE TRANSPORTATION,
Washington, D. C., December 23, 1947.
The Honorable CHARLES W. TOBEY,
Chairman, Subcommittee on Oil and Coal Shortage, United States Senate, Washington, D. C.

DEAR SENATOR TOBEY: This will acknowledge receipt of your letter of December 20, to which was attached a copy of a report of the special committee appointed by you to inquire into the fuel situation and make suggestions to overcome it.

I think your committee has done a good job in making recommendations and feel sure that if they are carried out with the full cooperation of all participating agencies that they will go a long way toward ameliorating the fuel shortage.

I feel, however, that there should be some over-all committee and perhaps a small committee of the oil industry, car owners, and railroads that will attempt to equalize the supply between the several geographical areas where the shortage may develop, and to this end the Office of Defense Transportation pledges its full support to your committee and stands ready to meet with such a group whenever you may suggest.

Cordially,

J. M. JOHNSON,
Director.

ASSOCIATION OF AMERICAN RAILROADS,
Washington, D. C. December 23, 1947.
Hon. CHARLES W. TOBEY,
Chairman, Subcommittee on Oil and Coal Shortage, United States Senate, Washington, D. C.

DEAR SENATOR TOBEY: I have and thank you for your letter of December 20. Your courtesy in sending me a copy of the report presented to you by the committee which you appointed to consider and submit recommendations dealing with the threatened shortage of fuel oil throughout the country is appreciated.

This report has been carefully examined and I agree with you that a voluntary effort on the part of all concerned is the desirable way of dealing with this matter. You may be assured of the wholehearted cooperation of the railroads and this association with any and all groups which may be created for the purpose of taking such action as seems desirable. We are in position to be helpful in the movement of tank cars and shall promptly respond to any request which may require action so far as the movement of these cars is concerned. We have been in touch with the tank car companies, as suggested in your letter, since early in the summer and are cooperating with them in every way possible. You will probably recall the statement to this effect made by our representative at the conference held on December 9.

It occurs to me that it would be desirable if you would arrange to have someone named representing the oil industry from whom we may obtain information as to the transportation of crude oil and distillates. I believe it would also be helpful if you would arrange for the creation of a committee representing the tank-car owners, with representatives of the oil industry, the Office of Defense Transportation, the Army, Navy, and this association serving thereon. Through such a committee we should be able to meet and deal with any requirements which may arise so far as transportation is concerned. If this suggestion meets with your approval, I shall be glad, upon receipt of advice, to designate a representative of the association to serve as a member.

You indicate that both the Senate committee and the committee of oil representatives will continue in existence and keep in touch with one another. It would also be helpful and appreciated if you would advise me through what source I may contact the committee of oil representatives for the purposes of discussing the desirability of meeting with the representatives of the oil industry, tank-car owners, ODT, Army, and Navy. I have in mind that possibly such a meeting would be helpful in setting up an arrangement which would be fully responsive to what you have in mind.

Sincerely,

W. T. FARICY,
President.

REPEAL OF INDIAN LIQUOR LAWS IN CERTAIN PARTS OF MINNESOTA—MOTION TO RECONSIDER

Mr. O'DANIEL. Mr. President, I enter a motion to reconsider the vote taken today on House bill 1049, Calendar 866, a bill to repeal certain acts of Congress known as Indian liquor laws in certain parts of Minnesota.

The PRESIDENT pro tempore. The motion will be entered.

EXECUTIVE MESSAGES REFERRED

As in executive session,

The PRESIDENT pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations, which were referred to the appropriate committees.

(For nominations this day received, see the end of Senate proceedings.)

RECESS TO WEDNESDAY

Mr. WHERRY. Mr. President, I move that the Senate take a recess until Wednesday next at 12 o'clock noon.

The motion was agreed to; and (at 4 o'clock and 31 minutes p. m.) the Senate took a recess until Wednesday, January 28, 1948, at 12 o'clock meridian.

NOMINATIONS

Executive nominations received by the Senate January 26, 1948:

FEDERAL RESERVE SYSTEM

M. S. Szymczak, of Illinois, to be a member of the Board of Governors of the Federal Reserve System for a term of 14 years from February 1, 1948. (Reappointment.)

Thomas Bayard McCabe, of Pennsylvania, to be a member of the Board of Governors of the Federal Reserve System for the unexpired term of 14 years from February 1, 1942.

MUNICIPAL COURT, DISTRICT OF COLUMBIA

Frank Hammett Myers, of the District of Columbia, to be an Associate Judge of the Municipal Court for the District of Columbia, vice Hon. Nathan R. Margold, deceased.

IN THE ARMY

CHIEF OF STAFF

Gen. Omar Nelson Bradley to be Chief of Staff, United States Army, effective on date of appointment, vice General of the Army Dwight David Eisenhower.

PROMOTIONS IN THE REGULAR ARMY OF THE UNITED STATES

To be major

*Lt. Col. Leo Murphy, [redacted], Army of the United States (captain, U. S. Army), with rank from September 7, 1947.

To be first lieutenants

First Lt. Ralph Gunther Tross, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 3, 1948.

First Lt. Richard Holt Dolson, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 4, 1948.

First Lt. Leland Boyd Fair, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 4, 1948.

Capt. Joseph Daniel Hughes, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 5, 1948.

First Lt. John Thomas McAtee, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 5, 1948.

Capt. Clarence Ames Martin, Jr., [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 6, 1948.

First Lt. Francis Lester Wycoff, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 6, 1948.

First Lt. Durell Benner Hartman, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 6, 1948.

First Lt. Luther Leon Halbrook, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 6, 1948.

First Lt. Lawrence Edward Spellman, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 9, 1948.

First Lt. Richard Edwin Cross, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 9, 1948.

Capt. Joseph Aaron Goldes, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 13, 1948.

First Lt. Robert Arnott Cady, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 15, 1948.

Capt. Norman Maynard Stephens, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 17, 1948.

First Lt. John Hamilton Burke, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 17, 1948.

First Lt. Raymond Preston Davis, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 18, 1948.

First Lt. Gilbert Harry Amis, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 20, 1948.

First Lt. William Paul Hartman, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 26, 1948.

First Lt. William Thornton Coburn, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 26, 1948.

First Lt. William Carlton Wilkinson, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 27, 1948.

First Lt. Richard Henry Kelly, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 29, 1948.

Second Lt. Harold Elwin Maier, [redacted], U. S. Army, with rank from January 29, 1948.

First Lt. Alvin Carl Jensen, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 30, 1948.

First Lt. John Christian Wallman, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 30, 1948.

First Lt. Milton Max Nemky, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 30, 1948.

First Lt. Willard Almur Dodge, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 30, 1948.

First Lt. Robert Burnham Brewer, [redacted], Army of the United States (second lieutenant, U. S. Army), with rank from January 31, 1948.

MEDICAL CORPS

To be lieutenant colonels

*Col. Paul Herbert Martin, [redacted], Medical Corps, Army of the United States (major, Medical Corps, U. S. Army), with rank from August 1, 1947.

*Col. Otto Leonard Churney, [redacted], Medical Corps, Army of the United States (major, Medical Corps, U. S. Army), with rank from August 29, 1947.

*Lt. Col. Richard Barr Jones, [redacted], Medical Corps, Army of the United States (major, Medical Corps, U. S. Army), with rank from September 18, 1947.

*Col. Francis Patrick Kintz, [redacted], Medical Corps, Army of the United States (major, Medical Corps, U. S. Army), with rank from December 4, 1947.

*Lt. Col. Augustus Alonzo Hall, [redacted], Medical Corps, Army of the United States (major, Medical Corps, U. S. Army), with rank from December 20, 1947.

*Lt. Col. Frank Eric Hagman, [redacted], Medical Corps, Army of the United States (major, Medical Corps, U. S. Army), with rank from December 22, 1947.

To be majors

*Lt. Col. Richard Irving Crone, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from August 1, 1947.

*Maj. George Augustine Goder, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from August 24, 1947.

*Lt. Col. John Randolph Hall, Jr., [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from September 11, 1947.

*Lt. Col. Lucio Ernest Gatto, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from September 12, 1947.

*Lt. Col. David Harry Naimark, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from September 14, 1947.

*Maj. Aniello Francis Mastellone, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from September 20, 1947.

*Maj. William Leroy Vogt, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from September 24, 1947.

*Col. Raymond Taylor Jenkins, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from October 10, 1947.

*Col. Carl Bennett Stilson, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from October 10, 1947.

*Lt. Col. Robert Nathan Lehman, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from October 10, 1947.

*Lt. Col. Louis Franklin Saylor, [redacted], Medical Corps Army of the United States (captain, Medical Corps, U. S. Army), with rank from October 10, 1947.

*Maj. Raymond Bender Croissant, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from October 10, 1947.

*Maj. Jon Olafur Stefan Sigurdsson, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from November 1, 1947.

*Lt. Col. John Warren Guerin, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from November 9, 1947.

*Col. George N. Schuhmann, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from November 30, 1947.

*Lt. Col. Alonzo Allan Towner, Jr., [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from December 4, 1947.

*Lt. Col. Wilbur Dwight Dice, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from December 10, 1947.

*Lt. Col. Ralph Everett Reiner, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from December 15, 1947.

*Lt. Col. Joseph Robert Vivas, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from December 22, 1947.

*Maj. William Nelson Donovan, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from December 29, 1947.

*Lt. Col. Norman Clemm Veale, [redacted], Medical Corps, Army of the United States (captain, Medical Corps, U. S. Army), with rank from December 30, 1947.

To be captains

*Capt. Clarence Blake Hewitt, [redacted], Medical Corps, Army of the United States (first lieutenant, Medical Corps, U. S. Army), with rank from August 2, 1947.

*Capt. Byron Landt Miller, [redacted], Medical Corps, Army of the United States (first lieutenant, Medical Corps, U. S. Army), with rank from September 2, 1947.

*Maj. Carl Barry Weller, [redacted], Medical Corps, Army of the United States (first lieutenant, Medical Corps, U. S. Army), with rank from October 4, 1947

*Maj. James Barnes Hartgering, [redacted], Medical Corps, Army of the United States (first lieutenant, Medical Corps, U. S. Army), with rank from October 7, 1947.

Richard R. Williams, Wild Rose, Wis., in place of M. A. Potter, transferred.

HOUSE OF REPRESENTATIVES

MONDAY, JANUARY 26, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Lord and our God, as man has a hard time getting through this distracted world, with Thy sheltering arms come to the bewildered and the perplexed. Keep them within our Creator's will, with no impatience or evasions of Thy moral law, which is perpetual in its obligations.

We pray for that longed-for mysterious power which lifts men into the comradeship which shares the higher bread of life. Grant that those who are overborne with care, with privations and afflictions, may find comfort in the compassion of the more fortunate, who are led by the inspiration of a common Saviour and the vision of a common destiny. Let us rid ourselves of our enemies by making them our friends, and Thine shall be the praise.

In the name of our Redeemer. Amen.

The Journal of the proceedings of Thursday, January 22, 1948, was read and approved.

MESSAGES FROM THE PRESIDENT

Sundry messages in writing from the President of the United States were communicated to the House by Mr. Miller, one of his secretaries.

MESSAGE FOM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed, with an amendment in which the concurrence of the House is requested, a bil of the House of the following title:

H. R. 4127. An act to amend the Civil Service Retirement Act of May 29, 1930, as amended.

The message also announced that the Senate insists upon its amendment to the foregoing bill, requests a conference with the House on the disagreeing votes of the two Houses thereon, and appoints Mr. LANGER, Mr. BALDWIN, Mr. TAFT, Mr. CHAVEZ, and Mr. JOHNSTON of South Carolina to be the conferees on the part of the Senate.

The message also announced that the Senate had passed a bill of the following title, in which the concurrence of the House is requested:

S. 1842. An act to extend to February 29, 1948, the period during which the use of grain for the production of distilled spirits or neutral spirits for beverage purposes may be controlled under title III of the Second War Powers Act, 1942.

The message also announced that the President pro tempore has appointed Mr. LANGER and Mr. CHAVEZ members of the joint select committee on the part of the Senate, as provided for in the act of August 5, 1939, entitled "An act to provide for the disposition of certain records of the United States Government," for the disposition of executive papers in the following departments and agencies:

1. Department of Agriculture.
2. Departments of the Army and the Air Force.
3. Department of Justice.
4. Department of the Navy.
5. Post Office Department.
6. Federal Communications Commission.
7. Federal Security Agency.
8. Housing and Home Finance Agency.
9. Office of Selective Service Records.
10. United States Maritime Commission.
11. War Assets Administration.

REMOVAL OF INDUSTRIAL PLANTS FROM GERMANY BY WAY OF REPARATION

The SPEAKER laid before the House the following communication from the Department of State, which was read, and, together with the accompanying papers, referred to the Committee on Foreign Affairs:

JANUARY 24, 1948.

MY DEAR MR. SPEAKER: By his letter of December 19, 1947, the Honorable John Andrews, Clerk of the House of Representatives, forwarded an attested copy of House Resolution 365 of the Eightieth Congress, adopted by the House of Representatives on December 18, 1947. The resolution requests the Secretaries of State and of Defense to transmit to the House of Representatives at the earliest practical moment certain information, specified in 11 questions set out in the text of the resolution, regarding the removal of industrial plants from Germany by way of reparation.

The Department of State, for itself and the Department of Defense, herewith respectfully submits a basic reply to the questions asked by the House of Representatives. Every effort has been made to obtain to the fullest extent and as rapidly as possible the information requested by House Resolution 365. Because of the urgency of putting the requested information before the House, the submission has not been cleared with the Bureau of the Budget, to which, however, copies are being sent.

It will be observed that much of the detailed information requested is lacking regarding the British, French, and Soviet zones of occupation in Germany. Through both diplomatic channels and through the office of military government (United States), the British and French Governments have been asked to supply the additional information needed. These Governments have not been able to comply quickly with this request, because their occupation authorities have not maintained such data in the form in which it is desired by the House of Representatives. The representatives of these Governments have given assurances, however, that they will make every effort to obtain the information which is presently lacking. This additional information and the checking of the information herewith submitted will probably require further communications to the House of Representatives from the Department of State and the Department of Defense.

No official information on reparation removals is available for the Soviet zone of occupation in Germany, nor has there been in response to the resolution a request to the Government of the Soviet Union for such information. Since the Soviet Government has repeatedly, the most recently at the meeting of the Council of Foreign Ministers at London in December 1947, refused to comply with requests of this nature, it was

not considered that a reiteration would be effective.

Sincerely yours,

ROBERT A. LOVETT,
Under Secretary.

EXTENSION OF REMARKS

Mr. OWENS asked and was given permission to extend his remarks in the RECORD and include an article from Human Events.

Mr. SMITH of Wisconsin asked and was given permission to extend his remarks in the RECORD in two instances and include extraneous matter.

WATER AND POWER SHORTAGE IN CALIFORNIA

Mr. WELCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include excerpts from an Associated Press dispatch which appeared in yesterday's Washington newspapers.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. WELCH. Mr. Speaker, this session of Congress will provide, and I shall support, vast sums to restore the economy of European nations. At the same time, we should provide adequately for our own economy and our national defenses. On Saturday last, I made a statement before the Subcommittee on War Department Civil Functions Appropriations which is directly related to this situation in California.

Flood control as it applies to semiarid California means conservation of rain and snow waters which normally come in that State during the short season from October to April. To hold these waters for beneficial usage instead of permitting them to run unharnessed and at times cause great damage in their mad rush to the Pacific Ocean, means large storage dams, including dams for multiple purposes, are imperatively necessary. They will serve a dual purpose—not only protecting valuable farm lands, but also assisting in meeting the critical shortage of power.

There is both a critical water and power shortage from one end of the State of California to the other. A primary cause of the growing demands for both water and power in California is the tremendous increase in population taking place in that State. Census statistics show that there were 6,907,387 persons in California in 1940. By July 1, 1947, this population increased 43 percent to 9,876,000. In the single year from July 1, 1946, to July 1, 1947, the population of California increased by over 350,000, which means people have been entering the State at a rate of over 6,000 per week. It is, therefore, imperative that not one acre-foot of water be permitted to run wild into the sea and that every kilowatt of potential hydroelectric power be produced to meet this enormous and unprecedented shift in population which has been taking place in such a short period of time. This population movement exceeds any shift in population that has taken place throughout our entire history in a similar length of time. It is a condition over which California has absolutely no control.

The critical situation California is already facing is being made more severe by the drought now taking place. An Associated Press dispatch of January 24 from Los Angeles calls attention to the fact that there has been no rainfall whatever for the 31 preceding days in that section and the preceding 39 days in the San Joaquin Valley at the southern end of the great Central Valley. This drought is occurring in the middle of the normal wet season. The following quotation from that dispatch indicates how gravely critical the situation is:

THIRTY-ONE-DAY DROUGHT PLAGUES FARMERS AS HEAT CONTINUES IN CALIFORNIA

Thirty-one days without rain and not a drop in sight was the parched picture today as southern California moved deeper into its winter of dry discontent.

The dryness has been accompanied by near-record heat—rising to 85 several days in Los Angeles. It was 80 in San Joaquin Valley, and 73 today in San Francisco, the warmest January 24 the bay city has had since 1899.

With closest rains expected somewhere in Utah and moving eastward, the weatherman was unable to brighten the outlook for agriculturists, frankly worried as they have not been in years over crops which last year grossed $120,000,000.

Winter grain crops were stunted or drying from lack of moisture, and orange growers increased irrigation by 25 percent over last year. * * *

Three cities—Santa Barbara and Ventura in the south and Benicia in northern California—have adopted forms of water rationing. It was the thirty-ninth rainless day for southern San Joaquin Valley.

There has been only 1.92 inches of rain since July 1, as compared to a southern California norm of 6.68 inches.

INTERNATIONAL MONETARY FUND

Mr. SMITH of Ohio. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. SMITH of Ohio. Mr. Speaker, hats off to the civilian or producing population of France for throwing the International Monetary Fund out the window.

By forcing their politicians to make the official value of the franc conform more nearly to its true or black-market value in spite of fund opposition, the French workers—those who produce the necessaries of life—have rendered an invaluable service to the workers of all countries.

The repudiation by France of the monstrosity called the International Monetary Fund comes as no surprise to those of us who opposed the measure creating it. We expected it and said so. This is clearly shown in the hearings.

This repudiation of one of the pet schemes of the American one-worlders ought to have a sobering effect upon them. It is doubtful, however, that it will because we already hear suggestions for an international monetary conference to do, I suppose, what was promised the International Monetary Fund would accomplish but failed to carry out.

It is too early to know just what the international repercussions will be from the action taken by France. All we can say now is that the printing-press-money pot all over the world is boiling. I wish this might be a sign that a vigorous movement has been started to put a torch to all the fiat money in the world and restore to the people their gold for making their exchanges and settling their contracts.

EXTENSION OF REMARKS

Mr. DONDERO asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

SPECIAL ORDER GRANTED

Mr. JENKINS of Ohio. Mr. Speaker, I ask unanimous consent that, after the disposition of business on the Speaker's desk and the conclusion of special orders heretofore granted, I may address the House for 15 minutes today.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

THE AVIATION INDUSTRY

Mr. JACKSON of California. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. JACKSON of California. Mr. Speaker, I hold in my hand a copy of the Westwood Hills Press, Westwood Hills, Calif., of January 15. The headline carries a grim warning to America and to Americans. That headline is as follows: "Drastic cut at Douglas. Skeleton force of 2,600 by mid-April seen by officials."

This plant, which contributed with the rest of the aviation industry so much to the winning of the war, is to all intents and purposes ready to close. This plant, which at the peak of its production employed 41,000 technicians and skilled workers in the aviation industry, is about to bow out of mass production. Our American wings carried the free world and carried the Allies to victory. They played a major role in the winning of the war. The lack of those wings, unless we take immediate and drastic action, may lose us the peace. In a world in turmoil we must protect the aviation industry or suffer again the consequences of inaction and inertia.

A TEACHER'S EXPERIENCE WITH COMMUNISM

Mrs. BOLTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentlewoman from Ohio?

There was no objection.

Mrs. BOLTON. Mr. Speaker, we are doing all we can to help the other countries of the world gain enough strength to withstand communism in their midst. It would seem as if we should be careful to be certain of our strength at home.

I want to read from a letter written by a teacher in this country:

I was thrown by the recommendation of the Harvard appointment bureau into the educational front of the Communist underground, for although on the surface, I was teaching in a sleepy New England village—in reality, the headmaster was a friend and classmate of John Reed—and thought as he did. I now know that he chose an inexperienced teacher to mold in the Communist pattern but my background and a thorough course in all of Russian history at Harvard Graduate School were my weapons with which I fought the fight until the end of the year and then resigned.

Being in the so-called progressive movement of education, I was thrown once again into the Communist front in a midwestern city where I signed a 3-year contract. This principal told his teachers not to go to church. I went. He assembled them at his home not for teachers' meetings but to talk communism. Countless are the times I have argued against his ideas—just so that someone on the faculty would still think and not be taken in. The only contract I ever broke was with this man. I'm informed that one of the archbishops of the Catholic Church (whose nuns were attending the summer school at that same place) when told of the true state of affairs there stopped their attendance.

Having been on leave of absence from the New York schools I joined Textile High School (not five blocks from Communist headquarters) simply taken over by the Communist teachers, the hammer and sickle on the blackboard of every classroom, the principal threatened with his life if he told on them.

Their ablest leaders concentrated on "getting" me. They told me how terrible capitalists were and, of course, I knew so many more than they did that I simply laughed at them. Then they pestered me with literature, including In Fact. My constant answer was the brief, capitalist phrase, "not interested." I never entered a teacher's room that I was not approached at once.

Not having to continue there I returned to my own city and entered its public-school system in 1939. Many school officials wonder why I have taught so many places. Communism in our schools and colleges, as you must know, is the answer. The reason is simple—there are too many schools in which communism is taught and I will not teach communism.

The SPEAKER. The time of the gentlewoman from Ohio has expired.

EXTENSION OF REMARKS

Mr. BYRNES of Wisconsin asked and was granted permission to extend his remarks in the RECORD.

Mr. ANDREWS of New York asked and was granted permission to extend his remarks in the RECORD and include an editorial on the St. Lawrence seaway.

Mr. CASE of South Dakota asked and was granted permission to extend his remarks in the RECORD in two instances and include extraneous matter.

Mr. SCHWABE of Oklahoma asked and was granted permission to extend his remarks in the RECORD in four instances and to include extraneous matter.

Mr. ELLIS asked and was granted permission to extend his remarks in the RECORD and to include a newspaper article.

Mr. ROHRBOUGH asked and was granted permission to extend his remarks in the RECORD and include an editorial from yesterday's Washington Post, entitled "The Fulcrum of Democracy."

SENATOR BUSHFIELD'S SERVICE

Mr. CASE of South Dakota. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota [Mr. CASE]?

There was no objection.

Mr. CASE of South Dakota. Mr. Speaker, thousands of South Dakotans read Senator BUSHFIELD's statement, Friday, withdrawing from the political arena, with deep regret. People may not always have agreed with HARLAN BUSHFIELD but they always knew where to find him. He has been what is known as a strong man, firm in his convictions, fearless in his opinions, and able in his advocacy of any cause.

Senator BUSHFIELD became chairman of the Republican Party in South Dakota for the 1936 campaign when Republican strength was at an all-time low. Under his leadership, South Dakota became the spearhead of a Republican revival that was gradually to sweep the Nation.

Leslie Jensen took the brunt of the battle and was elected Governor with Don McMurchie as Lieutenant Governor and Roy Doherty joined J. J. Murphy as railroad commissioner. The New Deal clung to most of the other State offices. I was elected to Congress, one of two new Republicans that year to come from west of the Mississippi.

It was the start of a great comeback for the Republican Party.

Two years later, BUSHFIELD, himself, was elected Governor with a complete slate of State officers, while CHAN GURNEY and KARL MUNDT were elected to the Senate and House of Representatives, respectively. BUSHFIELD was reelected Governor in 1940 with an increased majority and in 1942 was elected to join GURNEY in the United States Senate.

In Washington, Senator BUSHFIELD quickly demonstrated his ability and today holds high rank in the Committees on Agriculture and Finance, as well as party councils. His decision to conserve his energies for his official duties is characteristic. When he announced early for reelection, doubtless he hoped for a second term without the strain of a primary contest. When circumstances decreed otherwise, he placed his official responsibilities first. When he retires at the conclusion of his term, he will be entitled to the rest he has earned and to the respect of the people he has served.

THE FUEL-OIL SHORTAGE

Mr. MILLER of Connecticut. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. MILLER of Connecticut. Mr. Speaker, for the past several weeks we have heard almost daily complaints from colleagues who represent constituents who are suffering property damage and personal discomfort because of the unjustifiable fuel-oil shortage.

This morning I want to take just a minute to commend one of our colleagues, the gentleman from the First District of Massachusetts, JOHN HESELTON, for the effective work he has done week after week in an effort to get to the bottom of this unhappy situation. Sundays, holidays, and evenings JOHN HESELTON has been hard at work searching out the truth and trying to find a solution to the problem, so that we won't face these shortages in the future.

Without in any way casting reflections on the fine work done by other Members of this House, I express my appreciation to the gentleman from Massachusetts [Mr. HESELTON] and extend to him the well-known orchid.

EXPORT OF GRAIN TO CANADA

Mr. HILL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks, and include a short table.

The SPEAKER. Is there objection to the request of the gentleman from Colorado [Mr. HILL]?

There was no objection.

Mr. HILL. Mr. Speaker, it is about time the American housewife learns that the greatest competitor which she has today when she goes to purchase a loaf of bread or a pound of meat is the United States Federal Government.

I want to give you a few figures that were contained in the Times-Herald under date of January 24, 1948. Listen to these exports of corn to Canada:

In August 1946, I will read only the round figures, 255,000 bushels.

In 1947, the same month, 816,000 bushels.

In September 1946, 63,000 bushels.

In September 1947, 542,000 bushels.

In October 1946, it was 23,000 bushels; in 1947 it was 592,476.

In November of 1946 it was 261,745; in 1947, 573,658.

In December of 1946 it was 379,246. For the same month in 1947 it was 730,611.

And listen to rye. What do you suppose they made out of this rye? I will let some of the Congressmen on my right tell me.

In August of 1946 we shipped 666 bushels. In August 1947, 1,977 bushels.

In September, October, November, and December of 1946 we shipped exactly none, but listen to these figures for 1947: September, 194,259 bushels; October, 744,096 bushels; November, 436,815 bushels.

Now let me give you the totals: The total for the year 1946 was 2,378,858 bushels of corn; for 1947, 8,085,768. For rye the total shipped for the entire year 1946 was 666 bushels; in 1947 it was 1,433,356 bushels.

It is about time the American people began to understand who is getting this grain and where it is going.

For your convenience in studying these figures, I set them forth in the table from which I read:

If you want to know where the United States grain went that was alleged to have been saved by restriction on United States industry, read the following:

[Bushels]

	Exports of United States corn to Canada		Exports of United States rye to Canada	
	1946	1947	1946	1947
August	255,338	816,687	666	1,977
September	63,418	542,046	0	194,259
October	23,095	592,476	0	744,096
November	261,745	573,658	0	436,815
December	379,246	730,611	0	(1)
Total for year	2,378,858	8,085,768	666	1,433,356

[1] Embargo.

WHAT IS AN INSIDER?

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MACKINNON. Mr. Speaker, what is an insider? Some profess to not know what this word means. Ordinarily when you or I want to know the meaning of an ordinary word the customary place to turn is the dictionary. "Insider" is an ordinary word. Webster's New International Dictionary, second edition, unabridged, page 1285, defines an "insider" as:

A person inside; hence, one in a position to have first-hand information; opposed to an outsider.

An "insider" is thus found to mean a person in a position to have first-hand information. Mr. Speaker, that definition exactly fits Mr. Edwin W. Pauley, Special Assistant on Procurement and Reparations to the Secretary of the Army, Democratic national committeeman from California, and formerly United States Ambassador at Large on Reparations, and treasurer of the Democratic National Committee. It is apparent therefrom that during all times pertinent to the pending inquiries Mr. Pauley was an "insider."

EXTENSION OF REMARKS

Mr. HESELTON asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article by the gentleman from Massachusetts [Mr. HERTER].

THE FUEL SITUATION

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include a newspaper article.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, all the newspapers published in New England last Friday, which I have seen, carried warnings of the blizzard which struck that storm-weary region this week end. Today's reports are that between 12 and 14 inches of snow were added to the from 49.8 inches in Boston up to 85.9 inches elsewhere, which has blanketed New England to date. All this was accompanied by low temperatures, ranging from zero to 45° and was accompanied by high winds from 30 to 60 miles per hour. The storm here, which brought 5 inches of snow and a low of 10°, tied activities up rather badly and resulted in 34 greater Washington families sending emergency calls for fuel oil as supplies dwindled, was a slight imitation of the one in New England. What the results were in New England so far as their fuel-oil supplies are concerned remains to be seen.

Uncomfortable as this storm was here, it may have a healthy effect in at long last making clear to some persons in authority how serious the situation has been, is, and will be in other parts of the country unless effective action is taken even at this late date under the authority vested in the Secretary of Commerce under the Export Control Act of 1940, as amended (50 Stat. 463) and extended to February 29, 1948, by this Congress by the Second Decontrol Act of 1947 (Public Law 188, 80th Cong., July 15, 1947), and to February 28, 1949, by the action in December (Public Law 395, 80th Cong.).

In the same New England newspapers, another interesting dispatch was carried with a Washington date line. I am confident that the news dispatch is entirely correct. If it was read in full, it would be clear that the comfortable warmth in the House and Senate Chambers and in our offices is supplied from coal, not fuel oil. But we all realize the tendency to read headlines only, and I am confident you will recognize the possible impressions left on those readers who were trying desperately to obtain fuel oil to heat their homes, hospitals, schools, and industries up there.

I have in my hand the article appearing in the Boston Post. I wish it could be reproduced exactly in the RECORD, with the ½-inch block headline, "Solons' offices will not be cold." I will ask for the return of the clipping to my office so that any of you receiving letters about the warmth of your working conditions may see it. And I shall include in my remarks at this point the full article and the headline:

SOLONS' OFFICES WILL NOT BE COLD—OIL SHORTAGE MAY HIT OTHER AREAS, BUT CONGRESSIONAL BUILDING IS HEATED WITH COAL

WASHINGTON, January 22.—There may be a fuel shortage in some parts of the country but don't worry—your Congressman is cozy.

His office, as well as the House and Senate Chambers, is heated by coal, not fuel oil.

For that reason he is not affected by President Truman's recent order that the temperatures of oil-heated Government buildings must be held down to 68° during the working hours and 60° at night.

A spot check of thermometers in the House wing of the Capitol showed that nowhere was the temperature below 72°. One just outside Speaker JOE MARTIN'S office registered 76° this afternoon.

Of five thermometers in the House Chamber, four have been broken and contain no mercury. In a fifth the mercury stood at 140°, but it seemed to be broken, too.

In the two House Office Buildings, where individual Members can control the temperature through room regulators, the readings ranged from 60 up to the high 80's.

Timothy Murray, engineer in charge of the Senate wing, assured a reporter that "We have plenty of coal."

"We keep the Senate Chamber at 75°," he added. "They like it a little warm in there."

The Pentagon, frequently described as the world's largest office building, also uses coal. The engineer said he tries to keep the heat up to 74° or 76°.

At the White House, served by a central heating plant which supplies several other Government buildings, the thermostat was set at 68°.

Let me now read some other sample headlines: Boston Herald, "Congressmen cozy and warm"; Hartford Courant, "Congressman cozy in fuel shortage"; Worcester Telegram, "Thermometers broken in United States House Chamber."

I suggest that you may want to make a note of the page number covering these headlines. While I was not here, I understand those who were, received considerable correspondence when the campaign for bundles for Congress was on and also when the debate as to assigning gasoline-ration cards to Members of Congress was raging. Some of us may have to face another kind of blizzard—correspondence on this subject of heat in the Capitol and office buildings.

Three sentences from an editorial appearing in one of these papers are interesting and possibly prophetic. They are:

The tempers of thoughtful New Englanders do not improve when they study this terrible winter in terms not of snow and ice but of dollars and cents. * * * Little wonder that the patience of New Englanders snaps now and then. The other day a Rhode Island man seized a gun and went out shooting icicles.

I hope that a companion article may be prepared covering the facts as to the amount of floor space owned and operated by the Federal Government, apart from the Capitol and the office buildings, and covering how much of that space has been heated by oil. Certainly we of the New England delegation know that as early as December 13 we requested an investigation of the possibility of conversions in all Government buildings, not only in the affected areas but throughout the country, to determine the wisdom of such means of relieving the fuel-oil situation and that we urged vigorous action be taken to that end. We know that we repeated that request on December 19. We regret that, as of this afternoon, the only affirmative steps reported to us were those taken by the Navy at four of its installations, as reported in the letter of January 9 from Acting Secretary of the Navy Kenney, and the less vigorous action taken by the Army at Fort Myer, Va., and Stewart Field, N. Y. The latest authentic report is that the Government controls, owns, or operates approximately 138,000,000 gross square feet of space in over 5,800 buildings in our country. My latest advice is that there are about 1,700 average rooms in the four buildings here. I doubt if all four contain as much gross square feet as the Navy Annex. Certainly they are dwarfed by the gross square feet in the 360 Federal Government buildings operated by the Federal Works Agency in the District

of Columbia; too, it should be mentioned that while the power plant heats the Capitol and the three office buildings, it also heats the Library of Congress, the Government Printing Office, the Washington City Post Office, the Supreme Court Building, the Annex to the Library, and the Botanic Garden while burning coal to heat these four buildings. The latest figures on the employees in the executive departments are 1,999,853 people. In contrast to the 435 Members of the House and the 96 Members of the Senate, with their committee and personal staffs, it is doubtful if there are more than 3,500 persons working in the Capitol and in the respective office buildings, heated, incidentally, exclusively by coal. I think it safe to assert that the relative heating problem is about 1 to 1,500 as to buildings alone.

In his letter of January 19, Mr. Steelman advised that the final report of the Federal Works Agency, which is conducting the requested investigation, should be available to the White House shortly after January 22. Perhaps our friends of the press can help us develop the facts.

WE MUST RAISE THE PAY OF GOVERNMENT OFFICIALS

Mr. DEVITT. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. DEVITT. Mr. Speaker, two apparently unrelated news stories in yesterday's press prompt me to join them together in order to draw therefrom an observation, the soundness of which is supported by each.

Mr. T. P. Wright announced his resignation as Civil Aeronautics Administrator assigning as his principal reason the inadequate salary provided for the position. He has accepted private employment at almost twice the $10,000 Government pay. This is a common story. Almost every week an able administrative officer of the Government quits for the more remunerative field of private employment. Indeed, in resigning, Mr. Wright observed that his case was not unique but rather the rule with those in Government posts who do not possess independent wealth.

The second story from Washington concerned a high Government official who does possess independent wealth, Mr. Edwin W. Pauley, Special Assistant to the Secretary of the Army. It was charged, and I believe proved, by former Governor Stassen, of Minnesota, that Mr. Pauley, largely through his Government associations, was able to profit personally on the commodity markets of this country to the extent of almost $1,000,000.

My observation is that we must do something in the field of legislation in order to attract and retain able and honest Government administrators. They should come, principally and preferably, from the ranks of those who do not possess great wealth. Ten thousand dollars a year is not commensurate pay for a proven top-flight Government official.

To engage an inordinate number of independently wealthy persons to help administer our laws is neither consonant with our accepted concept of democratic ideals nor conducive to the most vigorous and disinterested execution of those laws.

The remedy lies in raising the pay of Government officials. We have been penurious employers long enough. If we want good government in America, we must hire good men at good pay to run that government.

EXTENSION OF REMARKS

Mr. KNUTSON asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. MILLER of Nebraska. Mr. Speaker, on Thursday last I received permission to extend in the RECORD an article on reclamation. I am informed by the Public Printer that this will exceed two pages of the RECORD and will cost $159.75, but I ask that it be printed notwithstanding that fact.

The SPEAKER. Without objection, notwithstanding the cost, the extension may be made.

There was no objection.

SPECIAL ORDER GRANTED

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent that today, after disposition of matters on the Speaker's desk and at the conclusion of any special orders heretofore entered, I may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

THE FUEL SITUATION

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WOLVERTON. Mr. Speaker, just before the Christmas recess last December I informed the House in detail of the hearings by the Committee on Interstate and Foreign Commerce upon the current petroleum situation, culminating in the recommendation by the committee of a nine-point program which it believed would provide much relief if the program were speedily carried out by the executive agencies involved. As I said at that time, the committee and its staff would diligently pursue the situation during the holidays and ensuing weeks to determine what more, if anything, need be done.

I am today filing a detailed report by the committee covering both the immediate and longer-range situation, and making five specific recommendations:

First. The prompt execution of the nine-point program recommended by the committee on December 19 to alleviate the immediate petroleum situation.

Second. The immediate cessation of the exportation of all petroleum products until it can be determined whether they are at the expense of our national economy or national security.

Third. The deferment of making any foreign commitment involving the supply of petroleum and petroleum products until a complete review has been made of the entire petroleum problem to determine to what extent such commitments can be made without injury to our national economy or security.

Fourth. The immediate authorization of additional funds and continuing authority to the Department of the Interior for accelerating the program of development of oil from coal, shale, and other substances.

Fifth. The immediate establishment of a congressional committee to be known as the Joint Committee on Fuel Policy.

Recommendation 1 involves the execution of the nine-point program adopted by the committee December 19 to meet the immediate situation. Briefly, these nine points are:

First. The export-control authority should be exercised to prohibit or curtail the exportation of fuel oil and other petroleum products to alleviate the present shortage.

Second. Navy vessels should be employed to transport fuel oil.

Third. The Maritime Commission should defer transfer of tankers to foreign purchasers.

Fourth. The Maritime Commission should arrange for tankers sold to be temporarily returned to the United States trade.

Fifth. The Secretary of the Interior should coordinate his and other activities of the Government with those of State fuel coordinators.

Sixth. Voluntary petroleum industry committees should be established to secure most efficient use of petroleum facilities.

Seventh. The Office of Defense Transportation should secure most efficient use of tank cars.

Eighth. The President and departments and agencies of the Government should take all other possible and appropriate steps in alleviating the shortage;

Ninth. The Maritime Commission should be authorized and required to repair and operate its laid-up tanker fleet.

We understand that some action has been taken on each recommendation, such as: Some reduction in export licenses covering petroleum products, some reduction in exports of fuel oils to Canada, assistance from Navy stocks and tankers, retention of American tankers in the American trade, placing in service of the laid-up American tanker fleet, meetings with State fuel coordinators, and meetings of the industry. In committee hearings starting tomorrow full reports on action taken on these matters will be made by the heads of the respective agencies involved. I shall report promptly thereafter on the action which the committee finds has been taken and recommends further must be taken.

In the midst of much conflicting testimony given to the committee regarding the nature of the causes of the shortage and ability to meet this winter's demand, one thing has stood out regarding the situation, especially in the Middle West and on the east coast. This is the fact that the industry estimates of available

supply and probable demand, even taking into account reduction in household temperatures, rested upon favorable weather conditions without any undue cold snap. The weather we are experiencing has wiped out whatever margin there might have been. The committee, accordingly, in recommendation 2, is calling for immediate cessation of exports until it can be determined whether they are at the expense of our national economy.

The Middle East situation currently looks far from good, with the Moslem reception of the partition of Palestine raising considerable doubt as to the security of further transportation of oil. This is important inasmuch as under the European recovery program the Middle East was heavily counted upon as a source of supply for the expanding petroleum requirements of Europe. Testimony recently has been offered by responsible governmental authorities that if this source cannot be counted upon, Europe must receive its supply of oil from the United States, which would mean rationing here. Committee recommendation 3, accordingly calls for the deferment of any foreign commitment covering petroleum and petroleum products until the world-wide demand and supply picture, and the reliance hitherto placed upon the Middle East as a source of supply, can be reviewed.

The longer range petroleum supply situation does not look much more favorable during the next few years at least. For the first time petroleum and natural gas have so risen in dominance in our economy that they are supplying more than half of the Nation's fuel and energy. Although further examination into this area as well as that of alternate and substitute sources of fuel and energy is required, we do know at this time that we are possessed of vast oil shale and coal deposits susceptible of being converted into oil. The committee, therefore, in recommendation 4, calls for the immediate acceleration and expansion of the current Bureau of Mines experimental and developmental work into the commercial practicability of extraction of oil from coal, shale, and other substances.

The committee's fifth recommendation relates to further examination into the entire field of fuels and energy. We have been informed that the petroleum shortage of this past winter is likely to be recurring during the next 4 or 5 years at the very least. So far it is not apparent to the committee that either the Government or the industry has given this problem the energetic attention which it deserves.

From the evidence it appears that there are shortages of facilities all along the line: First, at the refineries which, if there were additional oil today, could not handle more; then in tanker, tank car, and barge transportation facilities which, if there were additional products, are insufficient to handle more; in pipe lines for the transport of either additional crude or products; and in the final distribution system of bulk stations, storage, and transport. If all of these facilities, on which the industry indicates it proposes to expend some $4,000,000,000 over the next few years, were available, however, it is still far from clear that assured additional crude oil is provided at the well-head source to flow through and fill these enlarged facilities. Nor is it at all evident that adequate supplies of crude remain in the ground long to sustain such flow.

The committee does not believe that we are forced to accept the panaceas which so far have been offered to us by Government and by industry, namely: the cheerful acceptance by the consuming public of the inevitability of these tight situations; the leaving to industry to work out without governmental interference this problem which for some time now they have assured us would not arise and the solution to which they so manifestly so far seem unable to reach; or acquiescence to the superficial remedy suggested of allocating or rationing available supplies without maximum effort to effectuate a real cure through bringing supplies and demand in line.

The shortage of natural gas in many areas is all too well appreciated by consumers dependent upon this source of fuel. Utilization of electric energy also has increased at unanticipated rates with the country getting by this past December only through great efforts by the industry and much good luck, and with entirely too low reserve capacity.

The fast increasing requirements of our expanding economy for fuels and energy, plus ever-important considerations of national defense, therefore warrant comprehensive study of all fuels and energy sources, their supply, their demand, and their interrelationships. Such study is prerequisite to a national fuel policy, the formulation of which cannot be delayed. This study the committee embarked upon through its staff some weeks ago, the outline of which is carried in detail in the committee's report of today. In such outline the committee has had the cooperative assistance of all industries involved.

While the committee is specifically charged with the responsibility, under the Reorganization Act, of a large share of our fuels, it recognizes that many committees properly have interests in many separate phases of the fuel problem. Some dozen committees in both Houses currently are in various aspects of the problem. This is not a problem which can be approached piecemeal. It must be essayed at once. The committee, accordingly, recommends the establishment of a joint congressional committee to be known as the Joint Committee on Fuel Policy.

In this connection, at the committee's direction, I have today introduced a House Concurrent Resolution to establish such committee.

The SPEAKER. The time of the gentleman from New Jersey has expired.

EXTENSION OF REMARKS

Mr. REEVES asked and was given permission to extend his remarks in the RECORD and include an article entitled "A Redeclaration of Rights."

Mr. CROW asked and was given permission to extend his remarks in the RECORD and include a statement appearing in the Wall Street Journal entitled "A Statesmanlike Appraisal."

Mr. ANGELL asked and was given permission to extend his remarks in the RECORD and include an editorial appearing in the Oregon Daily Journal.

SPECIAL ORDERS GRANTED

Mr. MASON. Mr. Speaker, I ask unanimous consent that on Wednesday next, at the conclusion of the legislative program of the day and following any special orders heretofore entered, I may be permitted to address the House for 20 minutes on the subject Pertinent Observations Concerning the Taft-Hartley Labor Law.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. RAYBURN. Mr. Speaker, I ask unanimous consent that on tomorrow, at the conclusion of the legislative program of the day and following any special orders heretofore entered, that the gentleman from Texas [Mr. MAHON] may be permitted to address the House for 30 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

LEAVE OF ABSENCE

Mr. KUNKEL. Mr. Speaker, I ask unanimous consent that the gentleman from New York [Mr. GAMBLE] be granted leave of absence on account of official business.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

COMMUNISM IN GOVERNMENT

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GROSS. Mr. Speaker, we all want to get rid of the Communists, in and out of the Government. The President wants to do the same thing, but he wants $50,000,000 to do the job.

I have been thinking a good deal about this, and I believe that the President, our Secretary of State, and other executives in the Federal Government could get rid of most of the Communists without spending any money.

The Civil Service Commission, in its regulations, should require as the first qualification of an applicant, or present officeholder, a certificate or statement from an election-board official indicating that they are registered voters, registered with one of the two major parties, and exercising their privilege to vote granted them under the Constitution.

Someone might ask: Why registered with one of the two major parties? The answer is simple. It is essential in our system of government that we have two parties, but we do not need more than two parties. As for the 12,000,000 registered nonpartisan voters, they could present a sworn statement that their voting is within the two major parties.

I believe that this would get 98 percent of the Communists out of the Government and keep them out. Apparently the Government is employing many people who do not have sufficient interest, loyalty, or patriotism to vote on election day, and I am convinced that any man or woman in America who holds a position and is receiving public funds for his services should at least take sufficient interest in his government to vote regularly.

THE OIL SITUATION

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute, to revise and extend my remarks and include a letter.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

Mrs. ROGERS of Massachusetts. Mr. Speaker, I am in receipt of this letter dated January 20 from an oil company in Texas.

The letter reads in part:

DEAR MADAM: The voluntary response to assist in bringing about the release and transportation of the inventory of finished fuel oil at our Texas City refinery and the resumption of production at the refinery of vitally needed fuel oil was indeed praiseworthy. Your contribution was of such value that had it not been for this effort, great distress might have occurred.

Your assistance and cooperation have been of untold value in the public interest and your efforts in that direction must be sincerely appreciated by and gratifying to all concerned. Thank you sincerely.

Respectfully yours.

Mr. Speaker, I am thoroughly in accord with the long-range program that the gentleman from New Jersey [Mr. WOLVERTON] has brought forth. His House Committee on Interstate and Foreign Commerce is to be congratulated in recommending an immediate ban on all exports of petroleum products. I say that today we need action in getting oil to the people for their burners. The embargo of the exporting of oil for the immediate emergency I recommended weeks ago. The Administration's recommendation to convert from oil to coal is slow and unsatisfactory. The Government cannot do it in many instances as it would take several months. When it can be done, it is an enormous expense to shift from oil to coal and from coal to oil and back again. The embargo against the shipment of oil to foreign countries is necessary so that the American people will not have to endure the terrible suffering on account of the cold. The delay in issuing the embargo has been incredible and outrageous.

OLEOMARGARINE

Mr. RIVERS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Carolina?

There was no objection.

Mr. RIVERS. Mr. Speaker, righteous indignation and the pent-up wrath of the American people will compel the Congress to repeal the unconstitutional, unjustifiable tax on oleomargarine. I do not complain so much about the fact that we have to pay 15 cents tribute to the butter interests on oleomargarine. We can do that and get it. But, this morning I have introduced a resolution repealing the law which makes it prohibitive to serve the armed forces with oleomargarine even though they cannot get butter. That bill will be referred to the Committee on the Armed Services, it will be reported out, and I venture the opinion and the prophecy that this Congress will repeal the law making it prohibitive to serve oleomargarine to the armed forces of our country even if they wanted to serve it. Remember this, you do not get Bang's disease from oleomargarine; you do not get tuberculosis from oleomargarine. You get a lot of good calories. Get on my wagon now before it gets loaded. I am now taking applications.

UNIFORMITY OF FEDERAL PENSIONS

Mr. MORRIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. MORRIS. Mr. Speaker, it is my desire today to call the attention of the Congress particularly to one aspect regarding our pension system that is at long last receiving the serious consideration of many Members. That aspect is uniformity of Federal pensions.

In fact, I do not feel that it is going too far to say that any Federal grant which does not apply uniformly among recipients is not really a pension at all. It is therefore proper that we characterize our present old-age benefits as old-age assistance rather than pensions.

Old-age assistance is a dole, not a pension. While I am in no way discrediting old-age assistance, or discounting the benefit that it has been to millions of our people, I do charge that it is not what many of us consider an honorable American pension. I charge also that it is not large enough. It is not adequate even where the largest or maximum grants are paid to meet the requirements for the mere necessities of life. I believe that all Members will agree to this. How would a Member of the Congress like to live an entire day and night on what might be termed only about half the price of a reasonable meal? How would one like to do that every day and every night? Yet this is not the aspect that I started out to talk about. Even though payments now are small, and should by all means be increased now, they should also be uniform. That is, whatever amount we pay to one recipient we should pay to everyone qualified to benefit under our legislation. There should be no discrimination, regardless of State or residence. We should not only increase the amount of benefits now, we should also change our old-age assistance to a uniform American pension. We should do both now.

EXTENSION OF REMARKS

Mr. ABERNETHY asked and was given permission to extend his remarks in the RECORD and include an article by Dr. Clarence Poe from the Progressive Farmer.

Mr. DELANEY asked and was given permission to extend his remarks in the RECORD and include a sermon delivered by Bishop Kearney, of Brooklyn.

Mr. JOHNSON of Oklahoma asked and was given permission to extend his remarks in the RECORD and include a copy of a letter he wrote to a constituent.

FEDERAL AID TO EDUCATION

Mr. JOHNSON of Oklahoma. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. JOHNSON of Oklahoma. Mr. Speaker, for a few minutes this morning I want to discuss Federal aid to education. Two bills have been drawn up with great care and introduced in both Houses of the Congress, House bill 2953 and Senate bill 472, providing for Federal aid to education. These bills differ in some minor details, but either of them would be a great help to our school children at a time when they are suffering from educational neglect.

In my own State of Oklahoma our educational system faces a financial crisis. This same situation exists in many of the other States. This is manifested in Oklahoma by a shortage of teachers, low salaries, run-down and inadequate school buildings and equipment, and most all of this stems directly from a lack of funds.

President Truman stated, in part, in his state of the Union message on January 8, 1948, that "another fundamental aim of our democracy is to provide an adequate education for every person." This fundamental aim is not being provided in many States because those States and local communities cannot provide the funds to anywhere near adequately support their school systems. In most instances it is simply a matter of not being able to foot the bill.

The Federal aid to education program throughout the Nation would work much like the equalization program in some of our States, including my own State, Oklahoma. I grew up with this problem. My father taught in typical small country schools in Oklahoma for 27 years. I remember well how much it meant to him as a teacher, to his pupils, and to the entire community when a minimum school program was established in Oklahoma about 1926. It meant that at last State funds would be used to develop educationally all of the people in the State of Oklahoma. It meant that these funds would be used to maintain better schools in the poorer communities, thus bringing the educational opportunities of the underprivileged children nearer the standard of those who were fortunate enough to live in the richer communities.

There has been expressed by some the fear that Federal assistance to education would mean Federal domination of public-school systems. I would point out that such domination cannot be achieved without the consent of Congress and that the Congress is never likely to give that consent.

In that connection I would like to point out that the two bills, H. R. 2953 and S. 472, give protective guaranty that State control will be continued. Under the terms of those bills every one of our States will be given some assistance as the Federal money will be distributed on the basis of need, economic ability, and effort to support the schools.

I can think of no valid reason for delaying action on the Federal aid to education bills in view of the conditions existing in this country today. Under the Constitution the Federal Government is authorized to levy taxes to provide for the general welfare. Education is included in this category. The revenue resources of the Federal Government have increased at a much greater rate than the sources of revenue within the States and local governments upon which the causes of public education must depend. These States must be helped. Every day of postponement of action on the Federal aid to education bills is costly because every day of good schooling that is missed is a loss that cannot be replaced.

During the first session of the Eightieth Congress, hearings were held on S. 472 and more than 50 witnesses, representing educational, civic, agricultural, labor, church, and other organizations were heard. Those witnesses were virtually unanimous in agreeing that Federal assistance for schools is needed. If we had any doubt as to the need for Federal aid for the schools, or apprehensions as to the practicability of it, they should have vanished during the convincing arguments presented at the hearings on this pending legislation.

Under the provisions of S. 472 the State of Oklahoma would receive in allocations approximately $9,195,000 per annum. Since education is the basis of our national security and our economic welfare, this amount of money being allocated to the State of Oklahoma to augment her own educational financial structure would mean that she could assume her basic responsibilities in these respects along with the rest of the Nation.

It seems incredible to me that Congress will fail to act upon a measure upon which so much depends, and the time for action is now. I sincerely hope that the Federal aid to education bill will pass at this the second session of the Eightieth Congress.

INCOME-TAX REDUCTION

Mr. POAGE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. POAGE. Mr. Speaker, the much publicized Republican tax bill is about to reach the floor. It was originally what the chairman of the Ways and Means Committee described as an across-the-board cut. The Democrats revealed the inequity of such a bill, and the Republican majority has yielded and included just half of the relief to low income-tax payers that President Truman asked. The part of the bill that gives relief to the masses was forced in by the Democrats.

The other substantial tax cut in the bill is a bold and brazen appeal to the voters of the higher income groups in politically doubtful States. The bill proposes to give reductions in non-community-property States without asking those taxpayers to assume the obligations of community property.

The interesting feature to this vote-getting device is that it gives reductions only where the Republicans can hope to get votes in return. Texas and Louisiana were evidently considered hopeless, so the bill made no effort to get votes there. This bill is clearly intended to give tax relief only in return for Republican votes.

EXTENSION OF REMARKS

Mr. FORAND asked and was given permission to extend his remarks in the RECORD and include a paper prepared for him by the office of the secretary of state of Rhode Island.

Mr. HOLIFIELD asked and was given permission to extend his remarks in the RECORD and include a newspaper editorial.

Mr. ALMOND asked and was given permission to extend his remarks in the RECORD and include an address on the life of Matthew Fontaine Maury, Robert Edward Lee, and Thomas Jonathan Jackson.

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the RECORD and to include a newspaper article.

Mr. DINGELL asked and was given permission to extend his remarks in the RECORD and include a statement with regard to the proposed restrictions as well as the already existing restrictions on the manufacture of alcoholic beverages.

Mr. STIGLER asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. MADDEN asked and was given permission to extend his remarks in the RECORD in two instances and in one to include a letter from a constituent.

Mr. HARRIS asked and was given permission to extend his remarks in the RECORD in connection with the European recovery program, and to include therein an editorial from the Arkansas Gazette of Little Rock, Ark., entitled "The Price of Defeat."

Mr. KEFAUVER asked and was given permission to extend his remarks in the RECORD in three instances, in one to extend his remarks with reference to the late Honorable Josephus Daniels, in another to include part of the proceeds at a national meeting of the Junior Chamber of Commerce together with an address by Mr. Edward Wimmer, and in another instance with reference to the Federal Housing Act.

Mr. McCORMACK asked and was given permission to extend his remarks in the RECORD in two instances.

SPECIAL ORDER GRANTED

Mr. HARNESS of Indiana. Mr. Speaker, I ask unanimous consent that on tomorrow, after the disposition of business on the Speaker's desk and the conclusion of special orders heretofore entered, I may address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

EXTENSION OF REMARKS

Mr. HARNESS of Indiana asked and was given permission to extend his remarks in the RECORD and include an address recently delivered by him before the medical association.

Mr. BANTA asked and was given permission to extend his remarks in the RECORD and include a letter.

Mr. LEWIS asked and was given permission to extend his remarks in the RECORD.

Mr. MUNDT asked and was given permission to extend his remarks in the RECORD and include some newspaper editorials.

SLACK-WATER ROUTE FROM THE GULF OF MEXICO TO THE GREAT LAKES BY WAY OF THE TENNESSEE-TOMBIGBEE INLAND WATERWAY—RELIEVE THE OIL SHORTAGE IN THE NORTHEASTERN STATES

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, Members from many of the Northern States are complaining, and justly so, of the inadequacy of our transportation system to furnish fuel oil to their areas. People are actually suffering for the want of heating facilities. This situation must be corrected. It never should have been permitted to exist in the first place.

We have a project that was authorized by the last Congress which will go a long way toward relieving the situation. I refer to the Tennessee-Tombigbee Inland Waterway. When completed it will provide what amounts to a slack-water route from the Gulf of Mexico to the Great Lakes, and to all other points on the upper Mississippi and the Ohio Rivers.

We are asking for funds with which to begin the construction of this great project, which, as I said, when completed will provide what is virtually a slack-water route from the Gulf of Mexico to the Great Lakes, as well as to Minneapolis and St. Paul on the upper Mississippi, and to Pittsburgh, Pa., on the Ohio. These may sound like astounding statements, but I can show you they are correct.

The Army engineers say that there is not another project on the face of the earth where the traffic can be transferred from one major watershed to another with so much ease, so little expense, and such tremendous savings in transportation costs and distances. They have sent up a statement of the amount needed to

begin this work, and the Bureau of the Budget has sent up an estimate.

This new project would provide a slack-water route from Mobile, Ala., up the Tombigbee River to the Tennessee River, 481 miles, and a downstream route from where this project enters the Tennessee River to Cairo, Ill., on the Mississippi River, 262 miles. It is only 218 miles from Cairo to where the Illinois River intersects the Mississippi. That 218 miles is upstream, but it is more than offset by the 262 miles down the Tennessee River from where this project connects with that stream to Cairo, Ill.; and then you have a slack-water route along the Illinois River 326 miles to Chicago on the Great Lakes.

There are seven locks and dams on the Illinois River which provide this slack-water route, and then there are 26 locks and dams between St. Louis and Minneapolis and St. Paul which provide a slack-water route to those points on the upper Mississippi.

It is 215 miles from where this project connects with the Tennessee River downstream to Paducah, Ky., on the Ohio River. There are 46 locks and dams on the Ohio River above Paducah, which provide a slack-water route all the way from Paducah to Pittsburgh. This simply means that downstream traffic from all of those points, including Sioux City, Iowa; Omaha, Nebr., and Kansas City, Mo., would take advantage of the swift current of the Mississippi from Cairo, Ill., to New Orleans, La., 869 miles, for downstream traffic, but would return by the way of this slack-water route, in order to save the expense of fighting the swift current of the Mississippi.

Now let us see what that would mean.

A 14,000-ton barge would save $9,800 on its fuel bill alone in going from New Orleans to Cairo by way of this slack-water route, up the Tombigbee to the Tennessee and then down the Tennessee to Cairo. That would mean that every bargeload of wheat, corn, rye, oats, and other commodities going down from any of the Western States would save $9,800 on its fuel bill by returning by way of this slack-water route to Cairo, if it carried a similar load of, we will say, cottonseed meal, sulfur, bauxite, or any other material.

If it went from Mobile, it would save $20,160; and if it went from Birmingham, Ala., to Cairo, or from Demopolis, Ala., to Cairo, the saving would be $28,140 on a 14,000-ton load.

That means that oil from those vast new oil fields in southeastern Mississippi and southwestern Alabama would be transported by barges into the Great Lakes by way of the Tennessee-Tombigbee Inland Waterway at 67 cents a ton as against $2.68 a ton that it now costs them to fight their way upstream against the swift current of the Mississippi River.

That means that this oil could be transported into the Great Lakes for one-fourth the amount it now costs to take these barges back up the Mississippi.

Going from New Orleans to Paducah, one of these 14,000-ton barges would save $11,760 on its fuel bill alone; going from Mobile to Paducah it would save $22,160 on its fuel bill alone; going from Birmingham or Demopolis to Paducah, the savings would be $30,100 on the fuel bill alone.

The traffic would move counterclockwise, going down the Mississippi, in order to take advantage of the swift current of that stream, and returning by way of the Tennessee-Tombigbee Inland Waterway in order to take advantage of the slack-water route.

I am inserting at this point a table, worked out by the Army engineers, showing the tremendous savings which this great project will provide. It shows the savings on the small tows of 3,500 tons and also on the large ones of 14,000 tons.

The table referred to follows:

From—	To—	Via Mississippi, per ton	Via Mississippi, per tow of 3,500 tons	Via Tombigbee-Tennessee, per ton	Via Tombigbee-Tennessee, per tow of 3,500 tons	Average savings per ton	Average savings per tow of 3,500 tons	Average savings per tow of 14,000 tons
Houston, Tex	Cairo	$2.34	$8,190	$1.94	$6,790	$0.40	$1,400	$5,600
	Paducah	2.42	8,470	1.88	6,580	.54	1,890	7,560

	Paducah	3.01	10,535	.35	1,225	2.66	9,310	37,240
	Tombigbee-Tennessee junction	3.33	11,655	.08	280	3.25	11,375	45,500

I hope every Member of the House and Senate will read this table carefully and see what this great project will mean to their people, now and for generations to come.

The SPEAKER. The time of the gentleman from Mississippi has expired.

CIVIL SERVICE RETIREMENT ACT

Mr. REES. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the bill (H. R. 4127) entitled "An act to amend the Civil Service Retirement Act of May 29, 1930, as amended," with Senate amendments, disagree to the Senate amendments, and agree to the conference asked by the Senate.

The Clerk read the title of the bill.

The SPEAKER. Is there objection to the request of the gentleman from Kansas? [After a pause.] The Chair hears none, and appoints the following conferees: Mr. REES, Mr. STEVENSON, Mr. BUTLER, Mr. MURRAY of Tennessee, and Mr. LYLE.

REPEALING REPRESSIVE LAWS AGAINST OLEOMARGARINE

Mr. DINGELL. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Michigan [Mr. DINGELL]?

There was no objection.

Mr. DINGELL. Mr. Speaker, it is evident there is widespread interest in this question affecting the continuance of the iniquitous tax on oleomargarine. It is really not a revenue provision; it is a repressive measure intended not only to injure but to deliberately put out of business a legitimate industry which manufactures the wholesome edible product known as oleomargarine.

On tomorrow morning in executive session I intend to present before the Committee on Ways and Means in connection with the tax bill an amendment to repeal all Federal excise taxes levied upon oleomargarine. If the interest of this House is what I think it is and what it ought to be, you will immediately get in touch with your member on the Committee on Ways and Means and ask his support of my proposal, which will once and for all wipe out what should never have been on the statute books of the Federal Government.

The SPEAKER. The time of the gentleman from Michigan [Mr. DINGELL] has expired.

EXTENSION OF REMARKS

Mr. HOEVEN asked and was given permission to extend his remarks in the RECORD in two instances and include in each certain clippings.

VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES—BEN W. COLBURN (H. DOC. NO. 511)

The SPEAKER laid before the House the following veto message from the President of the United States, which was read by the Clerk:

To the House of Representatives:

I return herewith, without my approval, H. R. 645, a bill "for the relief of Ben W. Colburn."

It is the purpose of the bill to pay the sum of $4,529.55 to Ben W. Colburn, of Tulare, Calif., by reason of losses alleged to have been sustained by him in connection with the purchase of certain smoke generators from the Treasury Department under contracts dated May 12, 1944.

It appears that Mr. Colburn purchased a total of 7,417 smoke generators under two sales contracts for a total contract price of $7,529.55; that the smoke generators were located at Fort Hahn, Calif., and San Diego, Calif.; that bids on this commodity were invited on the basis of "as is, where is," without recourse; that the description of the generators was based on the best available information, but no warranty, written or oral, was given or authorized by the Treasury Department as to the exact quantity, quality, condition, size, or description of the property, or that it was in condition to be used for the purpose for which it was originally intended.

It appears, moreover, that Mr. Colburn, in reliance on a private report as to condition of the generators failed to avail himself of an opportunity to inspect the property offered for sale. Since he did not avail himself of the opportunity offered for inspection of the property prior to entering into the contracts but relied on a report of a third party as to the condition of the property, there appears to be no legal or equitable basis for charging the Government with the consequences of his negligence. So far as concerns the condition of surplus goods offered for sale by the Government on an "as is, where is" basis without warranty or guaranty of any kind, the law is clear that a bidder who fails to take advantage of an opportunity to inspect cannot subsequently recover on the ground that the goods are of an inferior quality.

In view of the facts and circumstances as set forth above, and since the bill selects a single purchaser of surplus property for special treatment by directing the payment to him of a refund denied to others, all others similarly situated being discriminated against, there appear to be no circumstances which would warrant the granting of the relief authorized by this bill. I am therefore constrained to withhold my approval of the measure.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 24, 1948.*

The SPEAKER. The objections of the President will be spread at large upon the Journal.

Without objection, the message, together with the bill to which it relates, will be referred to the Committee on the Judiciary and ordered to be printed.

There was no objection.

VETO MESSAGE FROM THE PRESIDENT OF THE UNITED STATES—OSCAR AND ANNA CARLBLOM (H. DOC. NO. 510)

The SPEAKER laid before the House the following message from the President of the United States, which read:

To the House of Representatives:

I return herewith, without my approval, H. R. 3754, entitled "An act for the relief of Oscar and Anna Carlblom."

The bill authorizes and directs the Secretary of the Treasury to pay, out of any money in the Treasury not otherwise appropriated, the sum of $32, or such other sums as he has, or may hereafter, collect from Oscar and Anna Carlblom of Lisbon, N. Dak., as income tax for the calendar year beginning January 1, 1944, and ending January 1, 1945. The bill asserts that for the stated taxable year the taxpayers had no net income that was subject to taxation, their total net income being $489.96.

An examination of the records indicates that the parties to whom relief is afforded by the bill filed Form W–2 (Rev.) as their income-tax return for the calendar year 1944. The filing of Form W–2 (Rev.) constitutes, under the law, an irrevocable election to take the optional standard deduction, and, accordingly, the Commissioner of Internal Revenue is without authority to permit a change once the election has been made. The record in this case further shows that even if the taxpayers could have been allowed to file a Form 1040, itemizing deductions, only part of the tax paid could have been refunded since a part of certain deductions which the taxpayers proposed to itemize would not have been allowable under the law in any event.

The Congress has specifically provided that the election to take or not to take, the optional standard deduction shall be irrevocable. The granting of the proposed relief would constitute a discrimination against many similarly situated taxpayers and would set an undesirable precedent.

HARRY S. TRUMAN.

THE WHITE HOUSE, *January 26, 1948.*

The SPEAKER. The objection of the President will be spread at large upon the Journal.

Without objection, the message, together with the bill to which it relates, will be referred to the Committee on the Judiciary and ordered printed.

There was no objection.

AMENDING THE TRADING WITH THE ENEMY ACT

Mr. WADSWORTH. Mr. Speaker, by direction of the Committee on Rules, I call up House Resolution 431, providing for the consideration of H. R. 4044, a bill to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases.

The Clerk read as follows:

Resolved, That immediately upon the adoption of this resolution it shall be in order to move that the House resolve itself into the Committee of the Whole House on the State of the Union for consideration of the bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases. That after general debate, which shall be confined to the bill and continue not to exceed 2 hours, to be equally divided and controlled by the chairman and ranking minority member of the Committee on Interstate and Foreign Commerce, the bill shall be read for amendment under the 5-minute rule. At the conclusion of the reading of the bill for amendment, the Committee shall rise and report the same to the House with such amendments as may have been adopted, and the previous question shall be considered as ordered on the bill and amendments thereto to final passage without intervening motion except one motion to recommit.

Mr. WADSWORTH. Mr. Speaker, I do not intend to consume any considerable period of time in presenting this rule. I realize, of course, that the gentleman from Illinois is entitled to 30 minutes, which I yield to him at this time.

Mr. Speaker, H. R. 4044 has been reported from the Committee on Interstate and Foreign Commerce. As announced by the Clerk, it is a bill looking toward amending the Trading With the Enemy Act.

The bill is divided into three titles. The first title is highly important, and with the possible exception of a committee amendment, which will be open for discussion when the bill is read for amendment, is intended to make the policy of the United States with respect to the treatment of enemy-alien property conform with agreements already reached between the Allied Powers with respect to such property found within their respective borders and certain other agreements relating to enemy-alien property found within neutral countries at the termination of the recent war.

Title II of the bill provides for the creation, temporarily, of a commission to study a very difficult and complex problem; that is the proper procedure by which the Government of the United States, including the Congress of the United States, may proceed to accomplish a solution in accordance with sound policy of the claims of American citizens against enemy countries and nationals.

The third title relates to the extension of certain relief to American citizens, nonmilitary, who suffered fearful punishment and torture in certain detention camps maintained in American territory by the Japanese during the recent war, American civilians who were caught as it were in the Philippines, on the island of Midway, and at Wake, and perhaps one or two other places.

That in brief is a recital of the general purposes of the bill. I do not intend to discuss it in detail, believing, as I do, that the members of the Committee on Interstate and Foreign Commerce who have studied this for a good many months are far better equipped to do so than I am.

Mr. SABATH. Mr. Speaker, I yield my time to the gentleman from Georgia [Mr. COX].

Mr. COX. Mr. Speaker, I yield myself 5 minutes.

Mr. Speaker, I am not opposing the adoption of the pending rules resolution, but I do wish to direct attention to title I

of the bill, consideration of which House Resolution 431 makes in order.

The gentleman from New York [Mr. WADSWORTH] has told you what the bill contains. I regret that he did not elaborate his views upon title I. I have the feeling, Mr. Speaker, that the policy laid down in title I is a policy for which this Congress can take little credit. It is an abandonment of a policy heretofore followed by civilized nations with respect to the property of nationals of enemy countries. Hurriedly looking over the report which the Committee on Interstate and Foreign Commerce filed on the bill, I find a statement to the effect that title I violates no international understanding of what constitutes good morals. I hope this is so. Mr. Speaker, we are at this moment practically endeavoring to win the favor of all the peoples of the world. We are spending billions of dollars to carry the impression to other peoples that we are just and fair. We are doing this because we desperately need their support. We are in greater need of this support than our people have been told or that is understood. I do not believe that the amount of property that this Government would acquire through the confiscation of enemy alien property as this bill provides will compensate us for the damage that it may do.

The other provisions of the bill, of course, are entirely satisfactory to me, and I take it that this House will adopt the bill as a whole. But I would call attention to studious and serious-minded Members of this body, interested in the protection of the good name of our country, to see if title I cannot be so framed as would insure that the bill be not left in such shape as to have it characterized as legalized robbery. I know that under the existing state of public feeling, it is difficult to sustain the position that I suggest, but nevertheless I do have these misgivings. We are here proposing to take the property of aliens, nationals of enemy countries, which represents investments made in this country, in thousands of instances upon the invitation of our country, and we are going to confiscate that property and cover it into the Treasury of this country for no reason in the world other than that owners happen to be nationals of alien countries. Many perfectly innocent people will, under the bill, lose their all.

Mr. GEARHART. Mr. Speaker, will the gentleman yield?

Mr. COX. I yield to the gentleman from California.

Mr. GEARHART. I appreciate the concern the distinguished gentleman from Georgia feels, but I cannot agree with him that the procedure suggested in section 1 is at all out of line with precedent, nor can I agree with him that it marks a change in American attitude toward the properties of enemy aliens.

Mr. COX. Certainly, it is a complete reversal of the policy we pursued following the late war.

Mr. GEARHART. I understand that Professor Borchard in some of his writings made statements in line with the gentleman's contention, but eminent international lawyers of just as great repute challenge his statements, and they are borne out by the fact that the Versailles Treaty, which was signed by all the countries involved in World War I, contained just such a provision; and, although the United States did not sign it, we did later sign a treaty with Germany, known as the Treaty of Berlin, and in that treaty some provision was carried and was partially executed, until another scheme was entered upon later, which resulted in our losing 20 percent of the German assets and in $100,000,000 of American claims going unsatisfied.

Mr. COX. I am not disposed to combat the position the gentleman takes. He may be right. I would, however, like very much if the gentleman from New York [Mr. WADSWORTH] would find it agreeable to elaborate upon the statement he made, which was that title I is in keeping with an understanding formally arrived at by the Allied countries in the late war.

Mr. WADSWORTH. Mr. Speaker, may I quote from a letter which was addressed to the gentleman from California [Mr. HINSHAW] by the State Department, in which there is quoted the language of certain agreements made between the Allied Powers during this recent war. For example, article 6 (A) of the final act of the Paris Conference on Reparations for Germany, to which this and 17 other governments are signatory, provides as follows:

> Each signatory government shall, under such procedures as it may choose, hold or dispose of German enemy assets within its jurisdiction in manners designed to preclude their return to German ownership or control and shall charge against its reparation share such assets.

May I call the attention of the gentleman to that language, "to preclude their return to German ownership or control and shall charge against its reparation share such assets."

Mr. COX. In spite of the fact that it is my profound conviction that the agreement is in violation of good morals, I withdraw even such suggestion of opposition as may have been carried in the remarks I made.

Mr. WADSWORTH. Mr. Speaker, I yield myself such time as I may desire.

Mr. Speaker, there are other documents which bear upon this situation and which defend the bill most definitely. It was stipulated in one of those agreements that Germany undertakes to compensate her nationals with respect to the detention or sale of their property rights or interests in allied or associated states.

The government assumes the duty to reimburse its nationals for loss due to its own action in waging war. It has become perfectly apparent, Mr. Speaker, that war today is total war and that the people of a country that goes to war under the government of that country must share the responsibility for what happens. It is along those lines and in conformance with other agreements which I shall not take the time to read now because I would prefer to permit the gentleman from the Committee on Interstate and Foreign Commerce to do so that this bill is offered.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. WADSWORTH. I yield.

Mr. COX. If the gentleman had made this very clear statement before the Committee on Rules when the gentleman from California [Mr. HINSHAW] appeared asking for a rule, I would not have taken the position that I have expressed.

Mr. WADSWORTH. Mr. Speaker, I yield such time as he may desire to the gentleman from Michigan [Mr. MICHENER].

COMMITTTEE ON THE JUDICIARY

Mr. MICHENER. Mr. Speaker, I ask unanimous consent that Subcommittee No. 2 of the Committee on the Judiciary may sit this afternoon during general debate.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

AMENDING THE TRADING WITH THE ENEMY ACT

Mr. WADSWORTH. Mr. Speaker, I yield such time as he may desire to the gentleman from California [Mr. HINSHAW].

Mr. HINSHAW. Mr. Speaker, in view of the reference made to my appearance before the Committee on Rules in behalf of this bill, may I say to the gentleman from Georgia that after my appearance I immediately called the Department of State to ask for a full explanation on this subject as it was by recommendation of the Department of State, I believe, that this title was included in the bill. They sent me a letter which I transmitted to the Committee on Rules before the Committee on Rules took action on the bill. I assume that the letter having been sent to them, it was made known to all those who were present, and I believe, although, of course, I do not know, that the action of the Committee on Rules was taken subsequent to the receipt of this letter from the Department of State.

Mr. COX. Mr. Speaker, may I point out to the gentleman that I did not see the letter and was not present at the time the rule was granted. In view of the statements made, may I say that so far as I personally am concerned I can see no basis for opposition to the bill.

Mr. Speaker, I yield the remainder of my time to my colleague the gentleman from Illinois [Mr. SABATH].

Mr. SABATH. Mr. Speaker, I too deplore the necessity, as does my colleague the gentleman from Georgia, of taking over the property of enemy aliens. I wish that it would not be necessary, but I know that the matter has received a great deal of consideration and study on the part of those upon whom we must, after all, rely. It has also received careful study and consideration by the Committee on Interstate and Foreign Commerce, which unanimously reported the bill. I would prefer, if there is any property owned by any individual that is worth less than $5,000, that it should be exempted from the operation of this act. But, as I understand, this legislation applies to 355 pieces of real-estate property and about 129 pieces of unimproved property in the custody of the Alien Property Custodian.

Mr. HINSHAW. Mr. Speaker, will the gentleman yield?

Mr. SABATH. I yield.

Mr. HINSHAW. The gentleman will be pleased to know, I am sure, that in title I of the bill, section 1, the last line provides:

Nothing in this section shall be construed to repeal or otherwise affect the operation of the provisions of section 32 of this act or of the Philippine Property Act of 1946.

Section 32 of the Trading With the Enemy Act exempts a great deal of property from being taken over by the Alien Property Custodian. Any property that has been wrongfully taken over from a friendly alien living in the United States I understand may be returned to him.

Mr. SABATH. I am thankful to the gentleman for calling my attention to the provisions of section 32, although I had been familiar with it heretofore, but somehow it had escaped me.

If ever a committee of Congress was justified in reporting a bill to take over alien property, it has surely been justified in this instance against the German-Nazi and Japanese owners. These two nations have been guilty of the most brutal war against us which took 300,000 American lives and inflicted 700,000 casualties, saying nothing of the forced expenditure of $280,000,000,000, now reduced to $258,000,000,000, which the American taxpayers will continue to pay beyond the lives of us here before this tremendous debt is wiped out.

I concur in the viewpoint of the gentleman from Georgia that we should demonstrate to the world that we are even now financing and aiding in world rehabilitation; that we are fair and do not wish, as has been stated by someone, however, without authority, to deviate from our old-established policy.

I feel that no one can accuse us that we have not been extremely fair, liberal, and humane with the peoples of the world, including those, who, as I stated before, viciously and murderously and without provocation or justification, warred against us—whilst their representatives were talking peace in Washington, they attacked us at Pearl Harbor.

The leaders of these nations with the approval of at least 95 percent of their peoples massacred, murdered, poisoned, and burned millions of innocent men, women, and children. The Japs murdered our boys who were obliged to surrender, and in defenseless position were tortured in a manner that exceeded the atrocities of barbarians of olden days. But even with that inhuman treatment, I feel that there may be some alien enemy nationals who have not been guilty or sanctioned those atrocities who should receive fair consideration in the disposition of their property. However, as stated by the gentleman from California [Mr. HINSHAW] certain exemptions are provided in section 32, and such alien enemy nationals may be exempted from the operation of the act.

Mr. Speaker, it is extremely difficult for me to understand how some Members and some people permit themselves to be influenced by the propaganda, emanating from the same sources as after the First World War but now with still greater determination and resourcefulness, in behalf of the very leaders who originally supported Hitler to war against nearly the entire world. A few of these leaders have been convicted, some are now on trial, but there still remain hundreds who represented the Farben interests that aims again to rebuild their war industries and attain the power and influence that may enable them within a few years to start another war.

I read in today's paper a statement by General Clay that we have turned over a billion of dollars of surplus property for about 20 cents on the dollar which is to be paid for, if I am not mistaken, in 20 years. I am constrained to say that there is no more assurance that this money will be paid than their failure to pay their obligations and reparations after the First World War. I feel that the value of this surplus property exceeds that of the property now in the hands of the Alien Property Custodian which the bill before us provides to be taken over by our Government.

Mr. Speaker, is it possible that men in high positions should show such interest in rebuilding Germany in the hope that she may cooperate with us in any future conflict with any other country? I think it is but wishful thinking on their part. I have the utmost sympathy for the innocent hungry and starving people, and especially for the children, and am willing that they be aided, but I am unwilling that we should lend aid to the militaristic group controlled by the Farben cartel interests. At the same time we must be mindful that we have in this country—the greatest and richest in the world—thousands of children, orphans, and old people that we must not neglect while we are aiding the starving peoples of other nations that are striving to establish a real democratic form of government.

Mr. Speaker, I think this legislation is in the right direction, and I compliment the members of the Committee on Interstate and Foreign Commerce who have brought this bill before us.

I am in favor of the rule as well as the bill.

Mr. WADSWORTH. Mr. Speaker, I yield 10 minutes to the gentleman from California [Mr. GEARHART].

Mr. GEARHART. Mr. Speaker, first of all I want to congratulate the members of the Committee on Interstate and Foreign Commerce, particularly the gentleman from California [Mr. HINSHAW], chairman of the subcommittee, for bringing to the floor legislation dealing with this very, very important problem.

Following World War I, we blundered and blundered badly in the handling of alien property, alien assets, and alien funds that were seized during the course of that war, with the result that today the United States Treasury holds a $500,000,000 German gold bond, and American claimants, with claims totaling $100,000,000, have gone totally uncompensated for their losses, all the consequence of enemy action.

I am, however, not in accord with all of the provisions of the act. I cannot accept the procedure without protest. So bad is the procedure that I am constrained to and will at the proper time offer an amendment to the bill which will provide an entirely different method of establishing the legality of claims and for their satisfaction by the Treasury. I offer this amendment setting up a new procedure because of our unhappy experiences, disastrous as they were, in meeting similar situations by use of the so-called claims commission procedure.

If the bill made in order by this rule is passed as now written it will end up with the establishment of an international claims committee with men appointed who will strive for the rest of their lives to keep their business going, and American national claimants will wait, and wait; and, like the claims arising out of World War I, will, in all probability be waiting until their dying days. Their claims against the enemy powers, the result of enemy action, will be paid, if they are ever paid, not to the claimants who suffered the damage but to their heirs. It is the way of claims commissions.

Mr. BECKWORTH. Mr. Speaker, will the gentleman yield?

Mr. GEARHART. I yield.

Mr. BECKWORTH. I am mighty glad the gentleman has seen fit to bring that point up because this very day we have a record that shows that more than $2,000,000 has already been returned to people some of whom were not American citizens. That which the gentleman is talking about is taking place already; this very day we are returning property to so-called friendly nationals of other countries while at the same time we are setting up a commission to study the claims of our own citizens.

Mr. GEARHART. I thank the gentleman very much for his contribution.

Every minute that we delay in the paying of these claims is a minute when crafty gentlemen in the employ, undoubtedly, of foreign nationals, enemy nationals at any rate, will be busily engaged in devising, by one method or another, ingenious schemes to repossess their foreign clients of this property; to get it away from the United States and back into the hands of those who a short time ago would have destroyed us in war.

Mr. Speaker, as between our fellow American citizens who have suffered detriment as a consequence of enemy action and those foreign nationals who but a short time ago would have destroyed us, there should be no difference in opinion. We owe it to ourselves to see to it that our fellow citizens do not lose as we debate fanciful questions. If the former owners of this vast estate are innocent of wrongdoing and suffer inconvenience as a consequence of this procedure, let them look to their own government for reimbursement and redress, not to us.

Here is the procedure that will be applied if my amendment is adopted, and I offer it with the endorsement of a great number of eminent lawyers: Our American citizens will be permitted to go into their own American courts and present their claims and establish them by proof as Americans are accustomed to and in accordance with the principles of Anglo-Saxon justice; and when they have established their claims, and the courts have rendered judgments upon them, the

procedure which my amendment would authorize would then be satisfied out of the funds on deposit in the Treasury, funds which have found their way into the Treasury as a consequence of the sale of seized alien property. This is a simple procedure and it is an American procedure, one which if adopted will meet the situation completely. It is an efficient method. Our American claimants will get their money within a reasonable time, within their lifetime, if you please. Remember, 2 years and more have already gone by since the fighting in the Second World War was brought to a triumphant conclusion—and nothing has yet been done.

Mr. BECKWORTH. Mr. Speaker, will the gentleman yield?

Mr. GEARHART. I am pleased to yield to the distinguished gentleman from Texas.

Mr. BECKWORTH. I know the gentleman has studied this matter thoroughly and I want to supplement that which he has already said.

On March 8, 1946, we had a law come into being, and also on August 8, 1946, we had a law come into being, whereby the kinds of people the gentleman is talking about can get this property back and it is being given back.

This morning our committee discussed a bill (H. R. 4903) to amend the Trading with the Enemy Act and a part of an amendment we considered is as follows: After the words "citizen of the United States" the following would be inserted "or an individual who at any time after December 7, 1941, and prior to the expiration of the time during which return may be properly made under this act has been or is deemed to be a citizen of the United States."

In other words, we have another bill that would broaden the scope of those eligible to get property back. The effort is already in the making to invite those people to come in and get back the property just like they did at the conclusion of World War I.

Mr. GEARHART. The evil forces are again at work. The gentleman's presentation is not only convincing; it is alarming. I am suggesting the opening of our constitutionally established tribunals to allow American national claimants to go into their courts and, in accordance with the principles of Anglo-Saxon justice, to there establish their claim. Is there anything wrong in that? It is not considered a wrong method by so eminent a jurist as the late Chief Justice of the United States, Harlan F. Stone, who in penmanship endorses the principles of my amendment. Neither is it not considered a wrong method by the Chief Justice of the United States Court in the District of Columbia, Mr. Justice Bolitha J. Laws.

Mr. Justice Laws in his letters affirms his faith in our courts in no uncertain terms. Let me read it into the RECORD. These are his words:

OCTOBER 12, 1943.

HAROLD G. ARON, Esq.,
1620 I Street NW.,
Washington, D. C.

DEAR ARON: Because of my absence from the city on cases of the United States Emergency Court of Appeals, I have been delayed in receiving your letter of August 9 and therefore have not been in a position to make answer to it.

I have read the article written by you and Frederick W. Eisner entitled "American Property Claims Against Germany and the Coming Peace Treaty" and have found it most interesting and instructive. I feel there can be no question of the advisability of setting in motion a definite plan for the liquidation of claims against German nationals and against the German Government.

Your suggestions with respect to the manner of adjudicating claims impressed me as being both fair and expeditious. While the Federal judiciary doubtless will have unusually heavy dockets following the war, yet claims of our citizens against German interests and property are of great importance, frequently are for large amounts, and it would seem entirely appropriate that Congress should confer jurisdiction upon the Federal courts to hear them.

I feel that you and Mr. Eisner made a real contribution to a constructive program by your timely article.

Very sincerely,

BOLITHA J. LAWS.

I may point out at this time that Mr. Harold G. Aron, a very eminent and outstanding lawyer of both New York and Washington, in collaboration with Mr. Frederick W. Eisner, also a New York lawyer, wrote the article to which these two eminent jurists refer for the American Bankers Magazine. In that article they stressed the necessity of devising a new method for the adjudication and satisfaction of claims against foreign nationals arising out of war action, this as the years of cruel miscarriages of justice and the indeterminable delays attending the commission method of procedure. They suggest as a substitute the adoption of a judicial procedure, which, as I stated a moment ago is endorsed by the late Chief Justice Harlan Stone, and by Mr. Chief Justice Laws of the United States District Court for the District of Columbia.

Mr. WADSWORTH. Mr. Speaker, I move the previous question.

The previous question was ordered.

The SPEAKER. The question is on the resolution.

The resolution was agreed to.

A motion to reconsider was laid on the table.

(Mr. HINSHAW asked and was given permission to include in the remarks he will make in Committee certain letters and other matter.)

Mr. WOLVERTON. Mr. Speaker, I move that the House resolve itself into the Committee of the Whole House on the State of the Union for the consideration of the bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases.

The motion was agreed to.

Accordingly the House resolved itself into the Committee of the Whole House on the State of the Union for the consideration of the bill H. R. 4044, with Mr. JENKINS of Ohio in the chair.

The Clerk read the title of the bill.

By unanimous consent, the first reading of the bill was dispensed with.

Mr. WOLVERTON. Mr. Chairman, I wish to announce that the time on this side will be under the control of the gentleman from California [Mr. HINSHAW]. The gentleman from California [Mr. HINSHAW] served as chairman of the subcommittee that drew up this legislation, has given considerable time to its study, and will be in charge of the bill.

Mr. HINSHAW. Mr. Chairman, I yield 10 minutes to the gentleman from New Jersey [Mr. WOLVERTON].

Mr. WOLVERTON. Mr. Chairman, the fundamental purpose of the bill now under consideration, H. R. 4044, is to provide a means by which American citizens, having war claims against either Germany or Japan, may be compensated out of the property of Germany or Japan and their nationals which has been taken over by the Government of the United States.

Title I of the bill provides that no property or interest therein of Germany, Japan, or any national of either such country vested in or transferred to any officer or agency of the United States Government at any time after December 17, 1941, shall be returned to former owners thereof or their successors in interest, nor shall the United States pay compensation therefor. It further provides that the net proceeds remaining upon the completion of administration, liquidation, and disposition pursuant to the provisions of the law of any such property or interest therein shall be paid into the Treasury of the United States.

Title II of the bill establishes a War Claims Commission, to be composed of three members to be appointed by the President and who shall hold office for 1 year. The Commission shall cease to exist after the expiration of 1 year after the date on which a majority of its members first appointed take office, but the President may by Executive order fix an earlier expiration date.

It shall be the duty of the Commission to inquire into and report to the President with respect to war claims arising out of World War I or World War II, as follows:

First, the estimated number and amount of such claims, classified by types and categories; and, second, the extent to which such claims have been or may be satisfied under international agreements or domestic or foreign laws.

It is also provided that the report of the Commission shall contain recommendations with respect to, first, categories and types of claims, if any, which should be allowed and the legal and moral bases therefor; second, the administrative method by which such claims should be adjudicated and paid, and any priorities or limitations which should be applicable; and, third, any limitations which should be applied to the allowance and payment of interest or fees in connection with such claims.

Furthermore, the Commission is to include in its report recommendations as to the policies which, in its judgment, should be followed in the national interest with respect to the application of any property or interest vested in or transferred to the Alien Property Custodian, or the proceeds thereof, to the payment of debts owed by the persons who owned such property or interest immediately prior to such vesting or transfer, and shall make such proposals for legislation

as it deems appropriate for carrying out such recommendations.

In addition thereto, the Commission shall include in its report, first, such other recommendations as it deems appropriate; and, second, such proposals for legislation as it deems appropriate for carrying out the recommendations made in such report.

It can be readily seen from this brief description of titles I and II of the bill, that there is no intention to determine by the legislation now before us any general or specific policy with respect to the character of claims to be recognized, or, priorities as between different categories or types of claims, or the basis on which the amount of compensation is to be determined. The testimony before the committee revealed so many different classes of claims with conflicting rights, and alleged priorities, and so varying in degree, that it seemed unwise, if not impossible, at this time and without further study to lay down hard and fast basic principles to govern the disposition of the enemy assets now in the hands of the Government among the numerous and varied claimants. The questions and issues that have been raised are too technical and complicated, both from a legal as well as a factual standpoint, to permit of decision without the fullest information and most careful consideration. The only intelligent and common-sense way, in the opinion of the committee, is to provide for a commission to make the necessary detailed study and examination of facts and principles that is necessary if justice and equity are to prevail.

The committee, however, does recognize that there are some claimants who stand in such an acknowledged position of priority of right, and who are so greatly in need of immediate relief, that it would be unfair and unjust not to recognize their claims immediately and provide emergency relief.

Therefore title III is set up under the terms of the bill to care for such cases as I have just described.

It provides emergency relief benefits to those American citizens who were taken by the Japanese on Midway, Guam, Wake Island, and the Philippines, or while in transit to or from any such places and were interned. Persons who went into hiding in order to escape internment are treated on the same basis as those who were interned.

The committee held extensive hearings in which testimony was presented as to the suffering of many American civilians who were taken in the Philippines and other American territories and possessions, and were interned by the Japanese for the duration of the war. Innumerable acts of almost unbelievable cruelty were perpetrated by the Japanese upon many of the internees. In addition, in the final battles of our troops to liberate our people from the Japanese, many of our internees were killed or seriously wounded. Beyond that, however, there was the general suffering caused by starvation and the deliberate withholding of medical care.

About 3,000 calories are required for the average man on light labor. Many men in the camps were required to do heavy labor and yet they did not receive even the 1,750 calories which the Japanese military had promised to supply daily. By September 1944, for example, in the Santo Tomas camp, the internees received an average of about 1,350 calories; in October and November, 1,100 calories; and in December 1944 and January 1945 the ration was reduced to 650–800 calories per day. By that process of slow starvation the average weight lost for men was 51 pounds, and for women 32 pounds. Witnesses testified that in spite of repeated requests and remonstrances, medicines and hospital supplies and equipment were refused the internees by the Japanese. What little was received, was supplied by the American and Philippine Red Cross.

The committee has also been deeply impressed by the medical expert testimony received by it with respect to the actual and potential after effects of the prolonged starvation. For example, it has been known that sometimes it takes several years before the symptoms of beriberi, the most frequent disease resulting from malnutrition, disappear. Heart diseases and conditions quite commonly result from extended malnutrition, and many deaths are yet expected to occur as a direct consequence of starvation. Likewise, various kinds of eye conditions have been manifest.

While not each and every internee has been seriously affected, it is the considered opinion of medical experts that a great many of them will in years to come suffer serious ill health from the latent effects of the prolonged starvation experienced by them. Many have died already and the life expectancy of most of these internees is expected to be materially shortened.

In the course of the hearings, a letter was received from Mr. Francis B. Sayre, diplomatic adviser of the State Department and United States High Commissioner to the Philippine Islands, prior to the outbreak of the war, stating that these civilians were left in the Philippines. It reads as follows:

DEPARTMENT OF STATE,
Washington, March 21, 1947.

Hon. CHARLES A. WOLVERTON,
House of Representatives,
Washington, D. C.

MY DEAR MR. WOLVERTON: In connection with the hearings on bill H. R. 1823, may I send you this word to urge the Congress to give favorable consideration to such relief as is possible to those civilians who, caught in the Philippine Islands by the Japanese, suffered personal injury at the hands of the enemy.

As United States High Commissioner to the Philippine Islands during the time, the unfortunate and unhappy position of American and Filipino civilians weighed heavily upon me. During the months immediately preceding the war, it proved impossible, as High Commissioner, to give official notice that American civilians should leave the islands. At that time it was impossible to predict whether a direct attack would be made upon the Philippines by the Japanese, when such might occur, or, indeed, whether hostilities would break out. Although I seriously debated in my own mind issuing such a notice, my advice from Washington was not to do so. Washington felt that with due regard to the national interest it would be inadvisable to issue such a notice. As a result no such official notice was issued.

A number of Americans called upon me to ask my personal advice. I could only reply that no one at the time could foretell whether an attack would occur or, if so, when, and that I must leave it to each individual citizen to decide for himself whether or not it was wise to return or send his family back to the United States.

When the Japanese did attack in early December 1941, it was too late for civilians to leave the islands. By that time all commercial sailings had been interrupted by Japanese action and when I conferred with Admiral Hart, the commander of the East Asiatic Fleet, I was informed that it was quite impossible for the Navy to get the civilians out of Manila under the war conditions then prevailing.

As a result, American civilians found themselves entrapped in the Philippines with no way of escape.

Many American civilians thus trapped by the Japanese suffered pitiably at their hands. I urge that Congress take such action as is appropriate for the relief of those American civilians still in distress as a result of their injuries and losses suffered in the Philippines.

Sincerely yours,

FRANCIS B. SAYRE.

The record shows that while as a matter of national policy no warning was given to American civilians to leave the Philippines and other American Territories and possessions, ample warnings were given to American civilians who resided in Europe and Asia. The State Department press releases are set forth in the appendix of the committee report. It may therefore be said that the American Government discharged its obligation to American citizens who resided in Asia and Europe and that they chose to stay on at their own risk. It will be the duty of the War Claims Commission established pursuant to title II of this act to advise the Congress as to the rights of those citizens. On the other hand, it appears to your committee that the United States Government has a clear moral obligation to relieve the distress of those citizens who resided in the Philippines and other American Territories and possessions and who, as a matter of national policy, were not given any warnings to leave and who consequently, as stated by Mr. Sayre, "found themselves entrapped."

Title III makes it clear that any relief provided thereunder is by no means to be considered in satisfaction of any war claims which those citizens have against the Japanese Government and which are to be considered by the War Claims Commission established by title II of this bill.

Title III makes applicable to the case of internees who are entitled to relief the provisions of the act of December 2, 1942, with some changes to meet specific conditions. The act of December 2, 1942, provides for benefits for detention, disability, and death in respect to employees of Government contractors. The conditions which that act was designed to meet are substantially parallel to the cases of civilian internees which title III intends to cover. The measure would be administed by the Federal Security Administrator, who presently administers the 1942 act.

The act of December 2, 1942, utilizes and integrates the provisions of two earlier acts, namely, the Employees' Com-

pensation Act of September 7, 1916 and the Longshoremen's and Harbor Workers' Compensation Act of March 4, 1927. The first of these—Employees' Compensation Act—provides the administrative features and sections dealing with the furnishing of medical care; the second—Longshoremen's Act—furnishes the provisions which control the payment of benefits for disability and death. Reference to the act of December 2, 1942, furnishes some additional provisions, such as those dealing with detention benefits, time limitations, and other procedural matters. Title III of the bill utilizes all three of such acts, and at the same time provides such additional checks and balances as are deemed necessary to meet the specific case situations with which the title deals.

Furthermore, both the Employees' Compensation Act and the Longshoremen's and Harbor Workers' Compensation Act are Federal workmen's compensation acts. The Longshoremen's Act benefit provisions were adopted because they are full and complete with respect to proper indemnities to be payable for disability and death. The amounts payable as such benefits are in accord with proper concepts of indemnity for injury and death as reflected in State workmen's compensation laws. Rather than to adopt an entirely new scale of benefit payments or a new concept of indemnity, the committee adopted a tried and proven plan. In addition, considerable advantage is obtained by reason of judicial constructions and interpretations which greatly facilitate administration; moreover, there would be no necessity for the creation of an administrative agency to administer title III, as experts in this field are presently carrying out similar functions. This factor should expedite materially the payment of benefits and reduce greatly the cost of administration.

The cost of the benefit payments provided for under title III is approximately $50,000,000. The net proceeds which will be covered into the Treasury of the United States pursuant to title I of the bill are estimated to amount to between $235,000,000 and $275,000,000.

In the work of the committee, the gentleman from California [Mr. HINSHAW] our distinguished colleague, has rendered very worth-while service before the committee in preparing this legislation. We have, likewise, had the very helpful interest of the gentleman from Texas [Mr. BECKWORTH]. Both of these gentlemen introduced legislation dealing with this matter in the early part of this session and this bill H. R. 4044, now before the House, is the outgrowth of these two bills, plus the long and careful consideration of the entire committee. Nor should I overlook the suggestions made by the gentleman from Pennsylvania [Mr. VAN ZANDT] in connection with the legislation he had introduced on the subject.

The bill now before the House is so worth while in purpose, and so necessary if real justice is to be done in behalf of these war claimants, that I ask for its approval by the House.

Mr. HINSHAW. Mr. Chairman, I yield myself 5 minutes.

Mr. Chairman, as the gentleman from New Jersey has said, this subject when brought before our committee appeared to be and was found to be exceedingly complicated. There were so many ramifications to the claims and claimants as well as to past actions, laws, treaties, and international agreements that it was considered by the committee that it would be necessary to have a Presidential commission appointed to study the types of claims, and the international laws and customs and precedents and the various relationships that might follow them, and that that commission should properly prepare itself to make recommendations to the Congress for legislation. Frankly, while the committee worked long hours and weeks on this bill and employed its staff to the utmost, it was unable to spare the time to make a full and complete study. Therefore, the recommendation for a commission to make this study and make recommendation to the Congress was incorporated in the bill. It originally provided that the recommendation be made by March 31, 1948. Obviously, that could not be done, so the committee has authorized me to offer an amendment later giving the date January 3, 1949, as the date of reporting by this commission.

There were many worthy claimants for reparations and damages. This bill does not in any way attempt to settle or make payment for any claim of damages or reparation. That should be understood. My beloved colleague the gentleman from California [Mr. GEARHART] proposes to offer an amendment to establish a method of settling these claims and damages. It is possible that his method would be the method ultimately recommended by the commission. I do not know. Personally, I think the matter should go to the commission for its full study and complete report, and I will discuss that matter further when the amendment is offered.

When we were debating this matter under the rule, the gentleman from New York [Mr. WADSWORTH] mentioned a letter from the Department of State, which was transmitted to me, in which the State Department sets forth its reasons for supporting title I, section 1, of this bill.

At this point, Mr. Chairman, under a previous unanimous-consent request, I shall insert in the RECORD the letter from the State Department, under date of January 19, 1948, in full. This letter sets forth the reasons why the State Department agrees with this bill, that all of this property should be liquidated and turned in to the Treasury of the United States.

DEPARTMENT OF STATE,
Washington, January 19, 1948.

The Honorable CARL HINSHAW,
Committee on Interstate and Foreign Commerce, House of Representatives.

MY DEAR MR. HINSHAW: The Department understands that in connection with congressional consideration of H. R. 4044, a bill "to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases," objection has been raised with respect to section 1 of the proposed measure which contains an express declaration of legislative policy that no vested property of Germany or Japan, or of any national of either, shall be returned to the former owners, and that the United States shall pay no compensation therefor to such former owners.

I may say that the Department has repeatedly reported to committees of Congress its agreement with the basic policy stated in section 1 of the proposed measure. The Department understands that similar reports have been made by other interested agencies of this Government, including the Treasury Department, the War Department, and the Department of Justice. With respect to the position of this Department in relation to the matter of enemy external assets, attention may be invited to the following international commitments entered into by this Government.

1. In the Potsdam agreement it was stipulated that with a view to compelling Germany to compensate to the greatest possible extent for the loss and suffering that she had caused to the United Nations "and for which the German people cannot escape responsibility":

* * * * *

"3. The reparation claims of the United States, the United Kingdom, and other countries entitled to reparations shall be met from the western zones and from appropriate German external assets."

2. Article 6A of the Final Act of the Paris Conference on Reparations from Germany, to which this and 17 other governments are signatory, provides as follows:

"Each signatory government shall, under such procedures as it may choose, hold or dispose of German enemy assets within its jurisdiction in manners designed to preclude their return to German ownership or control and shall charge against its reparation share such assets (net of accrued taxes, liens, expenses of administration, other in rem charges against specific items and legitimate contract claims against the German former owners of such assets)."

3. The United States, the United Kingdom, and France were designated by the Inter-Allied Reparation Agency to act as trustees for the 18 countries which are members of that Agency, to carry out the following resolution of the Paris Conference on Reparation:

"That the countries which remained neutral in the war against Germany should be prevailed upon by all suitable means to recognize the reasons of justice and of international security policy which motivate the powers exercising supreme authority in Germany and the other powers participating in this conference in their efforts to extirpate the German holdings in the neutral countries."

Pursuant to this obligation, the Governments of the United States, the United Kingdom, and France have signed accords concerning German assets with Switzerland (May 25, 1946), and Sweden (July 18, 1946), and are currently negotiating with Portugal and Spain. Under the Swiss and Swedish accords, those countries are obliged to liquidate German assets within their territory. Under the Swiss accord, 50 percent of the proceeds of liquidation is to "be placed at the disposal of the Allies for the rehabilitation of countries devastated or depleted by the war," and 50 percent is to accrue to the Swiss Government. Under the Swedish Accord, substantial contributions were to be made by Sweden from the proceeds of liquidation of German assets for the rehabilitation of countries and peoples devastated by the war. Both of these accords provide for indemnification of the Germans whose property is affected by payment in German money.

It may be observed that in the annex to section IV of part X of the Treaty of Versailles (the rights and benefits of which were accorded the United States by the treaty between the United States and Germany concluded August 25, 1921) the Allied and Associated Powers reserved the right to retain and liquidate all assets of German nationals within their respective jurisdictions, such liquidation to be carried out in accordance with the laws of the allied or associated state concerned. It was also stipulated that:

"Germany undertakes to compensate her nationals in respect of the sale or retention of their property, rights, or interests in allied or associated states."

While a portion of the German assets in the United States after World War I were returned, a portion thereof is still retained by the United States pursuant to the Harrison resolution approved June 27, 1934 (48 Stat. 1267).

In the Treaties of Peace with Italy, Hungary, Rumania, and Bulgaria, which came into force September 15, 1947, each of the Allied and Associated Powers are accorded the right to "seize, retain, liquidate, or take any other action with respect to all property, rights, and interests" in its territory of those former enemy nations or their nationals, and to apply such property or the proceeds thereof to such purposes as it may desire within the limits of its claims and those of its nationals against the particular former enemy country or its nationals. Each of these treaties stipulates that the former enemy country will undertake to compensate its nationals whose property has been retained by the Allied Powers.

It will be noted, therefore, that the policy of nonreturn of German and Japanese assets in the United States, as provided in section 1 of H. R. 4044, is in accord with that stipulated in international agreements in relation to external enemy assets concluded by the United States and other countries as a consequence of World War II. Moreover, it is assumed that any peace settlements with Germany and Japan will contain provisions for the nonreturn of German and Japanese assets, as well as provisions requiring Germany and Japan to pay compensation to their respective nationals for such assets.

In conclusion, I may observe that the amount realized from the liquidation of German and Japanese assets in the United States, which would constitute the major portion of reparations receivable by the United States, will doubtless represent only a very small proportion of the losses and damages sustained by the United States and its nationals as a consequence of the war which those countries waged against the United States. I may add that, as you know, several measures are pending in the Congress which contemplate that the proceeds obtained from the liquidation of German and Japanese assets shall be utilized in satisfying claims of American nationals against those countries for losses and damages sustained by them as a consequence of the war.

Because of the urgency of the matter, this communication has not been cleared with the Bureau of the Budget, to which a copy is being sent.

Sincerely yours,

CHARLES E. BOHLEN,
Counselor
(For the Secretary of State).

Mr. LEA. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to my colleague from California.

Mr. LEA. If this bill is enacted as proposed, would it be within the jurisdiction of the commission to recommend payment to interned Japanese in compensation of property taken from them? That is, Japanese interned in the United States.

Mr. HINSHAW. I would say if they were American citizens, they would.

Mr. LEA. If they were aliens, would it be within the jurisdiction of the commission?

Mr. HINSHAW. No. Any alien who has a claim against the property of his own government can settle that with his own government, as I understand it, and it is no matter of concern of the United States, unless the claimant came under the provisions of section 32 of the Trading With the Enemy Act, in which case he has a right to make application now for the return of his property, or the equivalent, as I understand section 32 of that act.

Mr. GOFF. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to the gentleman from Idaho.

Mr. GOFF. I am impelled to question about this letter that you have from the State Department. I agree that probably they have removed any doubts as to the strict legality of the procedure contemplated here. However, I do think a word of commendation is due the gentleman from Georgia [Mr. Cox] as to the strict morality of taking private property to settle these claims. I think it speaks well for his natural sense of justice.

On the question of the matter just raised as to whether this fund can be used to remunerate Japanese who were detained in this country during the war by this Government, I think I will have to disagree with my distinguished colleague from California, because an entirely different situation exists there. The Japanese that we interned were treated with the strictest consideration, according to our various conventions with other countries. They were treated well and fairly. In this case we have civilian internees who were treated with cruelty, men and women, whose stories I have heard——

Mr. HINSHAW. I must interrupt the gentleman; I did not yield to him for a speech.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. HINSHAW. Mr. Chairman, I yield myself 5 additional minutes.

I suggest to the gentleman that he read title 32 of the Trading With the Enemy Act. I recognize with him that the Alien Property Custodian who is now in the Department of Justice, has certain powers in reference to seized property of persons who may be enemy aliens in a technical sense but who were nevertheless friendly with the United States. If those people prove to be unfriendly to the United States which we consider to be inimical to our interests, I am sure there will be nothing done for them.

Mr. FARRINGTON. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to the distinguished Delegate from Hawaii.

Mr. FARRINGTON. I wish to know whether under the provisions of this bill individuals who suffered losses and damages because of the attack on Hawaii on December 7, 1941, will be in a position to be heard?

Mr. HINSHAW. Indeed they would under title 2 of the bill. Their claims should be considered by the Commission and the recommendations made by the Commission to the Congress for legislation to handle such claims will then be heard by the Congress and the matter settled.

Mr. FARRINGTON. I assume from the gentleman's statement, then, that persons who have suffered can look forward to presenting their claims when and if this bill is enacted into law.

Mr. HINSHAW. They will have an opportunity of presenting their claims for the purpose of information when the commission is established, but the claims would not be adjudicated until after the Commission had reported the proper machinery for the adjudication of those claims and enabling law enacted.

Mr. GEARHART. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to my distinguished colleague from California.

Mr. GEARHART. In further consideration of the subject raised by the Delegate from Hawaii, I do not believe the gentleman wants him to understand that title 2 will validate claims of that type.

Mr. HINSHAW. There is nothing in the bill anywhere that validates any claim. I have not said so.

Mr. GEARHART. That is true; and under title 2 a Commission is set up which will decide whether or not claims of that type shall be considered by the Congress, and recommend legislation accordingly.

Mr. HINSHAW. The Commission does not decide anything; it makes a recommendation to Congress.

Mr. GEARHART. And recommends to Congress accordingly.

Mr. HINSHAW. That is right, that is perfectly right.

Now, I would be very glad to answer to the best of my ability any questions the Members may have in mind concerning any portion of the bill.

Mr. VAN ZANDT. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to my distinguished colleague from Pennsylvania.

Mr. VAN ZANDT. Under title 2 of the gentleman's bill is it not correct for me to assume that those men who were in the armed forces and who were prisoners of war and victims of atrocities, especially at the hands of the Japanese, will have their day in court to present their claims?

Mr. HINSHAW. Not for adjudication of the claim but for the presentation of the type of claim for consideration by the Commission in connection with its recommendations to the Congress for handling such claims. They are entitled, in my opinion, of course, to the greatest measure of damages of any persons in the United States who suffered damages at the hands of enemy governments; and I trust that the Commission will in its report recommend that priority No. 1 be given to the claims of members of the armed forces who suffered so horribly at the hands of the Japanese.

Mr. VAN ZANDT. If the gentleman will yield for another question.

Mr. HINSHAW. I yield.

Mr. VAN ZANDT. Is it not proper for me to say that title 2 was written into this bill mostly because of the highly complicated problem confronting the

committee in its effort to perfect a bill which would set up the machinery to take care of the claims of former military prisoners of war.

Mr. HINSHAW. That is, of course, absolutely correct. It was written in the bill, not in the terms of the language of the bill introduced by the gentleman from Pennsylvania known as H. R. 1000, but his having called that subject so forcibly to the attention of the committee as an exceedingly important type of claim made it incumbent upon the committee to order the study made and a probability that in the course of this study to be made by the Commission that such claims as the gentleman refers to would be given priority No. 1.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to the gentleman from Arkansas.

Mr. HARRIS. That does not in any way indicate that there might be a change in the present law with reference to the responsibility of the Government in connection with the compensation paid to men of the service who for one reason or another have become disabled.

Mr. HINSHAW. I do not quite understand the gentleman. There is no reference to compensation of servicemen in this bill. They are compensated under Veterans' Administration laws and regulations.

Mr. HARRIS. As I understand it, this proposes to set up a war-claims commission whereby anyone who receives injuries, whether in the military service or otherwise, and who becomes disabled because of the action of the Japanese or the Germans, may file a claim for damages for that injury.

Mr. HINSHAW. The veterans of the war are now taken care of under veterans' legislation by the Veterans' Administration and by laws that were passed in the interest of the armed forces. There is no question, in my mind, but what such persons who engaged in the march of Bataan, and other similar horrible cruelties, are entitled to reparation and damages for violation of the Geneva Convention. However, this committee in its inability to spend sufficient time to go completely into the subject has recommended the commission to make a complete study and report to the Congress.

At this point, Mr. Chairman, I insert a resolution adopted by the American Legion at its national convention last August. The resolution follows:

Resolution 811

Resolved by the American Legion in national convention assembled in New York City, N. Y., August 28–31, 1947, That the legislative committee urge the Congress to expedite prompt consideration and fair settlement of the claims of American citizens and their dependents who were interned as civilian prisoners by enemies of the United States during World War II, and further urge the Congress to immediately consider and determine their requests for rehabilitation and relief.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. BECKWORTH. Mr. Chairman, I yield such time as he may desire to the gentleman from New York [Mr. KLEIN].

Mr. KLEIN. Mr. Chairman, I ask unanimous consent that the gentleman from New York [Mr. CELLER] may extend his remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

EFFECT OF BECKWORTH COMMITTEE AMENDMENT TO TITLE I OF H. R. 4044

Mr. CELLER. Mr. Chairman, prior to the passage of section 34, American creditors had recourse to section 9 of the act, which permitted them to sue the Custodian for payment of their debts. Section 34 took away this right and substituted an equitable distribution principle for the first-come-first-served principle. In order to be eligible as a claimant under section 34, the creditor must be an American or Philippine citizen, resident, or corporation. The statutory scheme also provides for a system of priorities in the event the vested property account of the debtor is insufficient to pay all the claims. Under this priority schedule, wage and salary claims under $600 and all other claims for services rendered, for expenses incurred in connection with such labor or services, for rent, for goods and materials delivered to the debtor, and for payments made to the debtor for goods and services not received by the claimant are to be paid prior to the payment of any large creditors. The experience of the Office of Alien Property has been that the average claim asserted is a small claim in connection with services rendered, such as claims for wages and salaries in fairly small amounts, and claims for goods sold and delivered.

After the passage of the statute, the Office of Alien Property took extensive steps to notify American creditors that their rights under section 9 (a) no longer existed and that the sole procedure was under section 34. Approximately 80,000 claim forms have thus far been distributed to the public upon request. No forms have been distributed except on request. Approximately 30,000 debt claims have thus far been received by the Office. It is anticipated that 50,000 claims will eventually be filed. These claims total approximately $400,000,000. Although it is difficult to estimate the amount which will eventually be paid out as the result of the allowance of debt claims, it is believed that a maximum of $35,000,000 will be paid to American creditors under section 34. A great many of the claims will be disallowed because of ineligibility of claimant or invalidity of the debt. Other claims, while allowed in full, will not be paid in full because the debtor's account is insolvent in respect to the amount of claims asserted against it.

The energies of the Office of Alien Property have been directed to answering requests for information concerning the program and preparation of necessary procedures for its successful and efficient operation. An average of from 8 to 10 attorneys have been working on all aspects of the debt claims program, and the services of 35 administrative personnel have been utilized. This personnel has been receiving and docketing debt claims, processing the claims to eventual allowance or disallowance, and handling correspondence with reference to claims. More than 2,000 letters a month have been sent in response to inquiries from the public.

The statute provides for the issuance of bar orders barring claims in respect of particular debtors named therein. Thus far, three bar orders have been issued and a fourth is in process:

First. Bar Order No. 1, affecting 308 debtors, fixed September 2, 1947.

Second. Bar Order No. 2, affecting 50 debtors, fixed December 17, 1947.

Third. Bar Order No. 3, affecting 150 debtors, fixed February 25, 1848.

Approximately 1,500 creditors' claims are involved in the issuance of these orders. Eleven claims, totaling $17,000, have been allowed thus far. Processing of eleven additional claims have been completed and they are now before the Director of the Office of Alien Property for approval. All the claims against the debtors listed in the three bar orders have been processed to some extent, and many of them are in their final stage. In excess of 200 claims are presently being actively worked on by the debt claims personnel.

It would be impossible to estimate the amount of money expended by the Office of Alien Property on the debt claims program, or the amount of money spent by persons to assert and perfect their claims filed in reliance on the statute. The statute, in general, is designed to protect the interest of the small American creditor. Many claims have been asserted by holders of bonds issued by the German or Japanese Government, and individual concerns of these countries. These claims by the American investor will not be allowed until the smaller claims have been allowed in accordance with the statutory priority.

The effect of the amendment would be to place Congress in the position of having reneged on its promise to satisfy the valid claims of American creditors, while at the same time having deprived them of their previous right of suit under section 9 of the Trading With the Enemy Act.

I understand this amendment, suggested by Representative BECKWORTH, was passed by the Interstate and Foreign Commerce Committee by a slender margin.

The Judiciary Committee, which considered a similar amendment, when that committee presented its bill concerning enemy alien property in the last Congress—which bill passed—rejected it decisively in committee. That was August 1946. The Congress passed the bill without the amendment. What we rejected then, should we accept now?

Mr. KLEIN. Mr. Chairman, I ask unanimous consent to speak out of order and to extend my remarks at this point in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New York?

There was no objection.

LOY HENDERSON: THE MAN WHO RUNS OUR STATE DEPARTMENT'S NEAR EAST DIVISION

Mr. KLEIN. Mr. Chairman, for many months we have been hearing charges and denunciations of our State Department's Near Eastern Section. Usually

the name of Loy Henderson, Director of Near Eastern and African Affairs, is repeated as the man who has been willfully and wantonly distorting the foreign policy of the United States as enunciated by the Congress and the President.

Today, at last, we have a careful analysis of the facts, a sifting of the evidence regarding the record of this controversial State Department official. I am referring to the current series of articles in the New York Post entitled "Man in the Saddle, Arabian Style," by Charles Van Devander and James A. Wechsler, in which a meticulous and dispassionate study exposes the true danger involved in permitting the direction of the enormously powerful and strategic Near Eastern Section to rest in the hands of Loy Henderson.

HENDERSON HAS POLICY OF HIS OWN

The Van Devander-Wechsler series does not indicate any deep Machiavellian plots by Henderson; they do not show any instances where this man has personally gained or profited by distorting our foreign policy. They do show that Henderson has been working, with fanatical zeal, for a backward and decayed policy—out of conviction. This man Henderson has a foreign policy of his own, based on such deep-seated prejudices and biases that he functions as a virtual propagandist for feudalism and imperialism in the Middle East, in conflict with progressive principles and democratic interests of the United States.

Essentially, the charge against Henderson is that he is pro-Arab League, that he is a fellow traveler of the British Colonial Office as regards Palestine, that he has built up an organization within the State Department which has persistently aided and abetted Anglo-Arab policies in Palestine and elsewhere. This group has thwarted every practical attempt to assist the Jews in Palestine, and to support any program of political change in the Near East. I know not, and care less, what Mr. Henderson's motives may be. Presumably he believes that he can best serve his country's interests by yoking us to every wazir, satrap, and pasha of the Near East. We are not interested in motives, but in results, and the evidence has now been presented which clearly demonstrates that this man is completely unfit, on the basis of his record and performance, to develop a policy in accord with our interests and traditions.

ARGUMENT FALLS APART

In closing I should like to point out that Henderson will probably justify everything he has done by claiming that he has been building a "bulwark against communism." This argument falls apart when one realizes that it is the British-Arab feudal policy in the Middle East which is the greatest cause for communism among the Arab masses. We, the United States, must not be trapped into the belief that we can check communism in the Near East by subsidizing barbarism, polygamy, savagery, and banditry. If it is Mr. Loy Henderson's pleasure to advocate such a course, let him do so on his own as a private citizen and not as an official of the State Department and a servant of the American people drawing public pay.

Since we are so economy minded, I strongly recommend that we find out if we are not throwing our money away by tolerating a key official in the State Department whose very presence is a stumbling block to the effective execution of American foreign policy.

I call on the Foreign Affairs Committee to investigate the entire role of the Near Eastern Division and Henderson in particular, and further, I urge that the House Appropriations Committee consider their appropriation for Henderson's division in the State Department in the light of the findings of the Foreign Affairs Committee.

MAN IN THE SADDLE: ARABIAN STYLE—1

LOY HENDERSON RUNS OUR STATE DEPARTMENT NEAR EAST DIVISION

(By Charles Van Devander and James A. Wechsler)

WASHINGTON.—Loy Henderson's name is seldom in the headlines. Most Americans have never heard of him; and few would include him in their list of men who today are decisively shaping great world events.

This comparative obscurity is of Henderson's own choosing. It is one of the significant and enlightening facts about the man who, more than any other individual, influences day-to-day American foreign policy in the critical hot spots of Greece, Palestine, and the whole Near East.

Behind his private silken curtain Henderson pursues certain deeply held objectives for America with selfless intensity. When, as sometimes happens, his personal foreign policy deviates from the basic principles laid down in higher echelons of the Government few sounds of the resultant struggle seep out through the muted walls of the State Department.

There is no front-page crisis that might precipitate a show-down over who is really running American foreign policy.

Represents the firm hand of United States foreign policy

Henderson occupies one of the more luxurious offices in the new State Department Building. The card on the door identifies him as director of the department's "Office of Near Eastern and African Affairs." After he passes through this portal at an early 8 o'clock each morning, the director's glance sweeps around a large room in which the spectacular decorations are a brilliantly colored tiger-skin rug and an 8-foot oil painting of a nineteenth century Bey of Tunis. In one corner is an intimate grouping of leather sofa, chairs, and coffee table for relaxed conversation.

As he crosses to his desk, Henderson's gaze lingers for a moment on a glass-covered table-top map of the vast territory throughout which he represents, not the disembodied voice but the very material hand, of American foreign policy. Henderson almost automatically directs attention to this map as he discusses his work with visitors. The territory there outlined starts with Greece in the west, crosses the Dardanelles to Turkey, embraces Palestine, Iran, and Iraq and sweeps on to include Pakistan, India, Ceylon, and Burma, newly freed from British rule and established as an independent state. Southward Henderson's sphere of influence within the State Department includes all of still-somnolent Africa.

It's a big responsibility, taken very seriously

For United States relations with this tremendous area, Henderson accepts a personal responsibility, and it is a responsibility that he takes very seriously. He has more than the normal career diplomat's contempt for the lack of information, and the possibly ulterior motives, of political superiors who may not share his approach to any given problem.

When there is disagreement a process of patient attrition sets in, which almost inevitably results in Henderson's winning a partial, if not a total, victory. After all, the Secretary of State and even the President are dependent on Henderson's office and its consular outposts for information about events and forces in the Middle East, as well as for the execution of established United States policies in that area.

In carrying out the duties of his vitally important and strategic office Henderson is guided not only by the directives of established authority but equally by the inner prickings of an exceptionally severe and stubborn conscience which from earliest boyhood has made it either difficult or impossible for him to deviate from what he conceives to be the line of duty. There is no record of his conscience ever having won less than a draw against high Government policy.

Henderson is not a product of political patronage. As a civil-service employee he has steadily risen in the State Department's ranks through the administrations of five Presidents — Harding, Coolidge, Hoover, Roosevelt, and Truman. The results of next November's elections are unlikely to affect his position or diminish his influence, though it may be suspected that he would be happier with a Taft in the White House.

One of his guiding principles is a firm belief that friendly relations with the Arab world are of great, if not overriding, importance to the people of the United States. Problems in the Near and Middle East are likely to be inspected chiefly in the light of what he calls "our Arab policy"—a fact which has not increased the confidence of Jewish groups in his impartiality on the burning issues of Palestine. That the suspicion with which these groups regard him has some justification is indicated by his admonition to a new colleague several years ago that American espousal of a Jewish state would "wreck our whole Arab policy."

When the issue of partitioning Palestine recently came before the United Nations for decision Henderson tacitly recognized a widespread distrust of his motives by requesting Secretary of State Marshall to relieve him of any direct participation in the United Nations discussions.

Palestine case settled, no talk of resigning

The Palestine issue has now been adjudicated, and the United States is committed to a solution of Arab-Jewish rivalries which would appear to confront the Director of the Office of Near Eastern and African Affairs with a personal problem. He has shown no disposition to resign, however, and his superiors apparently are willing to leave the day-to-day conduct of Palestinian policy in his hands, although there are unconfirmed rumors that a transfer to another post may be in the works.

Henderson's passion for anonymity has provided a shield against widespread criticism. One of the few frontal attacks on him was made last year by Bartley C. Crum, liberal Republican lawyer who served on the joint Anglo-American Committee on Palestine.

Bart Crum, writing of his experience in The Silken Curtain, reported initial briefing, included this admonition from Loy Henderson:

"There is one fact facing both the United States and Great Britain, Mr. Crum. That is the Soviet Union. It would be wise to bear that in mind when you consider the Palestine problem."

Bartley Crum's guns clearly aimed at him

This interesting insight into Henderson's approach to the Palestinian issue was allowed to pass without challenge; but when Crum later charged flatly that State Department officials on the "middle level" were deliberately sabotaging Palestinian policies laid down by the President and the Secretary of State and conveying private assurances to the Arabs, there was a resounding backfire. Al-

though Crum did not name names, his guns clearly were aimed at Loy Henderson.

Dean Acheson, then Acting Secretary of State, intercepted the attack. He replied with considerable heat that the responsible officials of the State Department stood behind everything that went out from the Department.

The incident demonstrated, as perhaps Loy Henderson's whole career proves, that an able, single-minded, and determined individual can swing a lot more than his own weight as long as he is able to give the boss the right answers at the right time. The career organization of the State Department provides exceptional opportunities for such exceptional men.

HENDERSON'S FORTUNES SAG IF UNITED STATES-RUSSIAN AMITY GROWS

(By Charles Van Devander and James A. Wechsler)

WASHINGTON.—To people who meet him socially, Loy Wesley Henderson seems like an orthodox member of the striped pants diplomatic club. The director of the State Department's Office of Near Eastern and African Affairs is amiable, urbane, and mannered, as if conscious that he is the wearer of an old-school tie. His personality is concealed—or perhaps illuminated—by a sort of gray protective coloration.

He has a faint gray mustache and sparse gray hair, starting well back from the forehead. He dresses in conservative grays and wears sedate ties.

If the portrait conforms to the stereotype of the wealthy young man of the upper classes who has set the prevailing fashion in our diplomatic league, it is slightly deceptive; or perhaps simply an evidence of Henderson's adaptability. He is in fact—as his middle name inevitably suggests—the son of a Methodist minister. There were no silver spoons around at his birth, and he toiled at a variety of jobs—in a steel mill, a rubber factory, and the Kansas wheat fields—to help finance his own education.

Henderson and an identical twin brother, christened Roy, were born not quite 56 years ago—the date was June 28, 1892—on their grandfather's farm in the foothills of the Ozark Mountains 3 miles from Rogers, Ark. Their grandfather, who was of Scotch (and some Irish) extraction, was a veteran of the Indian, Mexican, and Civil Wars who had taken his family south in reconstruction days. Loy remembers him as a valiant soldier, blind in his old age, who told fascinating stories of Indian warfare.

As a minister's son he belied the old legend

Loy's father was not the typical Methodist minister, which may explain why Loy has confounded all of the form players by his sober and painfully conscientious progress through a quarter-century up the State Department's career ladder, instead of going to the dogs as ministers' sons are—perhaps fictionally—supposed to do.

The Reverend George Milton Henderson, who now is retired and resides in Colorado, was only 22 and just finishing his theological studies when the twins were born. The young minister was a hearty extrovert, a man of broad social consciousness and of virtually no bigotry. In most of the middle-western towns where he preached during his active career, the local Catholic priests became his closest friends.

The budding diplomat whom he had fathered turned out to be a serious, introspective, and studious youth. Young Loy discovered Shakespeare early in life. By the time he was 13 he had read most of the English classics and was eager to go on to Latin and Greek. The ancient classics still are his favorite bedtime literary fare.

Death of twin brother altered course of his life

Loy Henderson would have become a lawyer, and doubtless a shrewd and successful one, if it had not been for the death of his twin brother in 1920. This was a deep personal tragedy which altered the whole course of the surviving twin's life. And in view of the powerful and highly individual influence which Henderson has since acquired over vital phases of American foreign policy one is tempted to consider his personal tragedy as an event of more than passing importance in world history.

The twins were physically identical and spiritually closely attached to each other. They shared a passion for individuality which was constantly thwarted by their similar tastes—not only in clothes, but in girl friends. Minor problems which arose from this struggle for individuality were settled by the toss of a coin. As the result of one such chance judgment, Loy grew an adolescent mustache, while Roy went clean-shaven.

The boys had decided to study law and set up a partnership. Loy, after being graduated from Northwestern University, was in his second year at Denver University Law School, and Roy was at Harvard Law, when the United States entered the First World War in 1917. Both promptly volunteered. Roy was accepted for officers' training camp, but in the course of his training suffered an injury from which he later died after he had resumed his studies at Harvard.

Loy was turned down by the Army because of a partial stiffness of his right arm—the permanent result of a boyhood fall from a tree. He thereupon joined the Red Cross and was sent to France and later Germany, where he also served after the war as a member of an interallied commission for reparations and for repatriation of prisoners of war.

Upon his return to the United States in the fall of 1921, Henderson decided to abandon law and to seek a career in diplomacy. The springs of that decision went back many years to the summer of 1904, when Loy was a boy of 12 and his father was pastor of a church in Jefferson, Ohio. The leading citizen of Jefferson was the American author and editor, William Dean Howells. That summer Howell's brother, a United States consular official, visited Jefferson and excited the romantic imagination of all of the small boys by appearing on the streets as an exotic figure in shorts, with helmet, and deep tropical tan.

He took the civil-service examination in January of 1922, and 4 months later received his first appointment. The assignment was a disappointment, because Loy had asked for service in eastern Europe, and he was sent to Ireland instead.

His fortunes go down when alliance thrives

Looking back, it is significant that Henderson's chief interest as long ago as 1922, was in eastern Europe. Way ahead of his fellow citizens he had spotted the new Soviet Union of Russia as the villain in the world drama. During the twenties and the thirties, when he served in many parts of the world, his intellectual hobby was to keep track of the activities of the Communist International. His premonitions were strengthened into a firm conviction during 2 years he served at Riga, the outpost from which we kept an eye on the Soviet homeland during the long era of nonrecognition, and later by 2 years in the Embassy at Moscow.

To some extent, Henderson's fortunes in the State Department have gone up and down in reverse ratio to the cordiality of United States-Soviet relations. His influence was in temporary eclipse during the period of the wartime grand alliance, when he was shunted off to Baghdad for 2 years as Ambassador to Iraq.

It was in mid-April of 1945, just as prospects of postwar differences began to cloud United States-Russian relations, that he was recalled to Washington and placed in his present key office, from which he directs United States policy in the tinder-box area.

Responsibility for the steady deterioration of relations between the world's two greatest powers since that time cannot be isolated in Moscow or Washington and certainly not in the Office of Near Eastern and African Affairs. The downward course of those relations has, however, had the result of increasing the prestige and strengthening the hand of the man who now has no doubt that he was right all along about Russia.

ATMOSPHERE ABOUT HENDERSON AGGRESSIVELY ANTI-SOVIET

(By Charles Van Devander and James A. Wechsler)

WASHINGTON.—Mrs. Loy Henderson, wife of the State Department's Director of Near Eastern and African Affairs, frequently is referred to by casual acquaintances as a White Russian. This is a technical error, but the political connotations are accurate enough. Mrs. Henderson is forthrightly and, for a diplomat's wife, even indiscreetly anti-Soviet in her feelings.

She is a Latvian by birth, the former Elise Marie Heinrichson, daughter of a once well-to-do landowner whose fortunes have shrunk as a result of German pillaging and Communist expropriation. She and Henderson met when he was a United States consul at Riga in 1927–29, and she was a music student at the conservatory. They were married in 1930 and she is now an American citizen.

As such she was with her husband in Moscow from 1934 to 1938 when he served as second secretary and, later, first secretary in the American Embassy. Mrs. Henderson apparently made very little effort to conceal her political dislike of her Communist hosts during that period. Several years later, when she was back in Washington, diplomatic circles buzzed eagerly with the story of how Mrs. Henderson, a charming and gracious figure in Capital society, had verbally and almost physically assailed Mme. Oumansky, wife of the then Russian ambassador to the United States, at a dinner party in the home of Joseph E. (Mission-to-Moscow) Davies.

The incident occured when the ladies had retired to the drawing room for after-dinner coffee. A horrified butler summoned Davies from his brandy, and an actual physical encounter was averted.

His anti-Soviet emotions are constantly cropping out

While Henderson's own anti-Soviet feelings are necessarily suppressed in public, his colleagues in the State Department are well aware that he shares his wife's personal reaction to the present Russian regime. His strong emotions on this subject constantly crop out in top-level staff meetings, even on details which do not fall within his own territorial sphere of influence. In several specific cases with which he was not directly concerned he has argued vehemently against granting visas for known Communists to enter—or leave—the United States.

Publicly, Henderson makes no secret of the fact that he has viewed world Communist activities with alarm for some 30 years. His early concern apparently sprang from a basic political conservatism, but in the present atmosphere of Washington this consistently held bias can readily be made to pass for keen foresight.

The Hendersons tend to associate with persons of similar views. One of his closest friends is Constantine Brown, venerable conservative diplomatic columnist for the Washington Star, who regularly indoctrinates his readers with the inevitability, if not the desirability, of an armed decision with Russia.

Enjoys all of his work, including the soirees

Mr. and Mrs. Henderson live unpretentiously at the Blackstone Hotel in Washington. They attend diplomatic social events, but as a rule only those relating to the Near and Middle Eastern countries which constitute Henderson's chief area of responsibility in the State Department. Henderson regards attendance at such affairs as a duty, but not necessarily as a chore. It is just another part of his work, all phases of which he enjoys.

The Hendersons share an interest in music. He studied violin from the age of 6 until 16 and became more than ordinarily proficient. He never touches the instrument now, because he cannot spare the time for regular practice, and he thinks there is nothing more unpleasant than poor violin playing. Their indulgence in music consists of attendance at concerts and an occasional evening of recorded music—usually the works of Brahms, Beethoven, or Tchaikovsky. They go to the movies only three or four times a year. Henderson likes "good" movies—a category from which he specially excludes tawdry musicals in technicolor.

A social smoker and drinker, has little time for exercise

Henderson is moderate in his self-indulgences. He smokes four or five cigars a week, usually in the afternoon when he has a visitor in his office. He never thinks of smoking when he is alone. Drinking is on a similar basis. He takes a social drink—preferably a dry martini—only when the occasion seems to call for it. He gets very little exercise. He has played golf from time to time in the past, but without ever taking the game seriously.

All of this adds up to the picture of a man who finds complete outlet for his energies in his work. Henderson arises at 6 and his normal day at the office is from 8 a. m. to about 7 p. m. He retires by midnight, and finds that 6 or 6½ hours' sleep a night is sufficient.

The extensive State Department organization over which Henderson presides is a remarkably tight-knit unit of men who agree generally with each other and with the chief. Its ideological and political orientation has changed little under Henderson; his predecessor as head of the office, Wallace Murray, was a Foreign Service officer of very similar views.

His staff joins in calling for friendship with Arabs

The Near Eastern and Middle Eastern Divisions of his office are packed with men who share Henderson's outlook on the world in general and on the overriding importance of our relations with the Arabs in particular. Many of the east Asian specialists are sons of missionaries who labored long in Arab territory. To them Beirut is the capital of Arab nationalism and a crucial zone in the world diplomatic struggle. They have grown up to believe that there is, as one of them is reported to have observed, no point in risking our friendship with 80,000,000 Arabs for the sake of a few thousand Jews.

This attitude is deeply engraved in the minds of most of Henderson's colleagues in the Near Eastern Division, in which the counterbalancing influence of pro-Zionist partisans is notably lacking. The explanation—if one were ever made—of the virtual exclusion of Jewish employees from the division would probably be that they are likely to suffer from bias. And it would be strongly emphasized that there was nothing personal in this comment.

In the past, anti-Zionist voices in the State Department have skillfully exploited the divisions among Jewish organizations as justification for American apathy, and this tendency still continues. Henderson, for example, is now inclined to attribute Arab intransigence to the agitation of Jewish revisionists, a comparatively small faction which spurns the UN partition plan and would like to extend the Jewish state to all of Palestine and Transjordan.

He has been known to suggest that there would be infinitely greater chance of a peaceful conclusion of the Palestine strife if the Arabs were convinced that the Jewish homeland would be permanently confined within the boundaries laid down by the United Nations. Meanwhile, Henderson fears that if there should be any armed clash between Americans and Arabs over Palestine it would embitter relations between this country and the Arab world for generations.

MAN IN THE SADDLE: ARABIAN STYLE—4

GREEKS MUST HAVE A WORD FOR HENDERSON'S ENTHUSIASM

(By Charles Van Devander and James A. Wechsler)

WASHINGTON.—For 25 years Loy Henderson has served in widely scattered areas of our diplomatic network. He has accumulated a substantial body of fact, local lore, and incidental intelligence. He has not been subject to congressional cross-examination, campaigns for reelection, or any other grueling review.

He is a member of the United States foreign-service "club," one of the most tightly knit mutual protective associations ever formed anywhere. He has seen Cabinets, Secretaries of State and department heads rise and fall.

In most other areas of Government his own fortunes would have been affected by these fluctuations. But while the State Department changes at the top and bottom (there was, for example, an influx of young liberals into lower-echelon places during the war) it remains extraordinarily constant in the crucial middle. That is where the civil-service career men hold sway.

And the Office of Near Eastern and African Affairs, which Henderson took over in April of 1945, after two wartime years in the relative oblivion of Iraq, is peculiarly loaded with members of that fraternity.

Two big diplomatic fights involve his department

In the ensuing 2½ years, Henderson's division has been intimately involved in two of the fateful diplomatic battles of the postwar era—the Greek crisis and the fight for a Jewish homeland in Palestine. The record of his deeds in these affairs is not spelled out in public communiqués. In accordance with State Department protocol, he formally depicts himself as an agent carrying out orders shaped by men of higher rank than himself.

These reticent disclaimers are not entirely justified. For the fact is that, in the long and decisive intervals between top policy decisions, day-to-day judgments are made, cables are dispatched, answers to inquiries are drafted. Even if a superman were designated Secretary of State he could scarcely be expected to read and review all the documents that are sent out under his name.

Both the Secretary and the Under Secretary must perforce rely on division heads for guidance and information as well as for the performance of carefully defined chores. With the advent of Secretary Marshall this dependence was increased; the Secretary would be the first to admit that he had not been briefed on all the complex facts of international life before he took office. Unlike former Secretary Byrnes, Marshall does not attempt to carry the State Department in his brief case.

His enthusiasm centers on our role in Greece

Just what part Henderson played in the formulation of the so-called Truman doctrine of aiding Greece and Turkey to resist Communist encroachments is not a part of the public record; presumably it was substantial. In any event, he has accepted the Truman doctrine, with its scarcely hidden threat that this country might use force to preserve Greek and Turkish national integrity, with an enthusiasm that has not always characterized his views of high policy as laid down by Presidents Roosevelt and Truman.

Henderson is much less alarmed over the prospect that United States troops might have to be sent to Greece than he is, for instance, over the possibility of their employment against Arabs in Palestine; which he thinks would be a major tragedy.

Opinions differ as to his real position

Evaluations of Henderson's role in the execution of some phases of the Greek-aid program differ markedly in the Capital. For example there are those who regard him as a supporter of the rightist government, but men who were identified with Paul Porter's early economic mission found to their avowed surprise—that the head of the Near Eastern Office appeared sympathetic to the desperate need for economic reconstruction and reform in Athens as a corollary of our anti-Communist stand.

Last autumn Henderson flew to Greece to iron out a sharp clash between members of ex-Governor Griswold's administrative group and the embassy crowd over the extent to which we should unofficially insist on a broadening of the Government and a clean-up of corruption. He is credited here with being instrumental in bringing the elderly Liberal leader, Themistocles Sophoulis, into the Government as Premier. But whether this was an actual concession by the ruling bloc in Athens, or whether Sophoulis merely became a prisoner of the rightists are matters of current controversy.

The greater question is whether Henderson and his prototypes in the State Department have really accepted the concept to which they so often pay lip-service—the notion that effective resistance to communism requires a genuine tolerance of non-Communist leftists who may be committed to varying degrees of social change.

Historically our emissaries abroad have wined and dined with kings and rarely felt the common touch. They have tended to identify American interests with maintenance of the economic status quo everywhere. In the light of his background in that service an address which Henderson delivered last October on some current problems of modern Greece may be revealing.

He challenges aspersions on Greek politicians

After declaring that the people of Greece still cherish the ideals of tolerance and democracy, he went on:

"This spirit of liberalism is not the monopoly of any Greek party or group. It is deeply imbedded among both royalists and republicans and in most of the political parties of the present parliament regardless of whether such parties are in the center or to the right or left of center."

In the same address, Henderson challenged the widespread American belief, which he is inclined to attribute to skillful Communist propaganda, that most Greek politicians are venal. He agreed that there are some unworthy politicians "in Greece as elsewhere," but he added emphatically:

"I have come back from Greece with the firm conviction that among the political leaders of that country can be found the same spirit of lofty patriotism and broad statesmanship as exists among political leaders in the United States or in any other country the government of which rests upon the freely expressed will of the population."

Steeped in classics, puts finger on changes

For an appropriate comment on that statement one can turn to the Saturday Evening Post's correspondent Demaree Bess, who in the January 3 issue wrote with scornful amusement of Americans who got along so well with Greek Government politicians that they described them to me as just like our politicians at home. As most SEP readers know, Bess is anything but a leftist.

It has been mentioned earlier in this series that Henderson still enjoys reading the ancient classics and contemplating the change in mores since ancient times. One of the significant changes that he likes to point out is that the ancients judged men solely by what they did, while our law and custom gives major weight to the question of intent.

Henderson regards our modern standard as an advance in jurisprudence, but he still philosophizes, somewhat tritely, that a man who means well can do as much harm as one bent on evil. Time will show whether or not that may be for himself a fitting epitaph.

Mr. BECKWORTH. Mr. Chairman, I yield myself 10 minutes.

Mr. Chairman, I certainly agree with what has been said before that this legislation is worth while. It is good legislation. It should have been passed immediately after the conclusion of the war rather than at this late date, in my opinion.

Mr. Chairman, a number of Members of the House have indicated a great deal of interest in the passage of legislation that will bring about a definite policy with reference to alien property. I have spoken to quite a number of the Members. Often it is said that this is a complicated subject, which is true. It is one of the most complicated subjects to handle, if the individual Members of Congress undertake to be fair to all concerned, but because it is complicated is no reason why the Congress should not undertake to solve it in a just and equitable way.

I want to commend the gentleman from California [Mr. GEARHART], for the good work he has done in the past on this question. I am aware of the fact that long before most of us were paying much attention to the enemy-property problems he was doing a very substantial and constructive work with reference to this important subject.

The policy that we shall have as our own with reference to alien property, if this legislation passes, will be a just and fair policy. Much has been said about confiscating property. We are not confiscating any property. The property already is the property of the American Government. It is our job now to try to handle it in a fair and just way, being fair to everyone who feels he has an interest in this particular property.

Let us examine for a moment some of the values of property which our Alien Property Custodian contends we now have in our alien-property fund.

The report to which I refer was issued March 7, 1947. It showed that we have in round figures $205,000,000 worth of German property; Japanese property of $56,000,000; Italian property of $17,000,000; Hungarian property of $2,000,000; Rumanian property of $1,000,000; Bulgarian property of about $600,000, and over $4,000,000 of property of nationals of formerly enemy occupied countries, making a total of some $288,000,000. Of course some Italian property is in the process of being returned. That is a good deal of property which this Government already has title to.

Now, with reference to the question of claims, I have a clipping here which illustrates the kind of claims that are sometimes advanced. This headline says, "Swiss firm sues United States for release of $4,000,000." I will just read a part of it:

A Swiss firm said to be controlled by Germans asked the district court yesterday to compel the Justice Department to release securities said to be worth more than $4,000,000. A court injunction was asked by the trustees for Henkel & Cie., of Basil, Switzerland. The company said the securities were seized under the Trading With the Enemy Act. However, the company contends it is not controlled by enemies as defined in the act.

I want to make this point at this time. Of course, a person who is seeking to recover enemy property today is not going to admit that he is an enemy of this Government. No. When he undertakes to get it back he comes as a friend. He comes alleging it was a mistake for our Government to have taken over his property. Of course, with a good deal of property available there are going to be hundreds of smooth and smart people coming in and presenting claims. You cannot censure anybody that has even a remote chance to recover for presenting a claim against a sum of money of around $300,000,000. So the claims are coming in again as they did at the conclusion of World War I.

What took place after World War I? That is very significant with reference to enemy property. Incidentally, may I say at this point that in March and August 1946—I feel sure the dates are correct—laws were enacted on the statute books whereby our Alien Property Custodian could return enemy property and already he is giving enemy property back. With reference to what took place after World War I, I think you will find it mighty interesting to note this. Our colleague the gentleman from New York [Mr. REED], a very able man, presented before the Congress not long ago a bill which has just been passed recently. The report has this significant paragraph in it. This bill, mind you, was before our committee in July:

The purpose of the Reed bill, H. R. 4043, as amended, and reported by the committee, is to change the order of the remaining unpaid priorities under section 4 of the Settlement of War Claims Act of 1928 so as to place claims arising out of World War I of American citizens ahead of German claims.

That is a significant statement. The Congress had to pass a law with reference to World War I as late as July of 1947 to place the claims of American citizens ahead of German claims. How the Congress back in the years gone by ever came to the conclusion of placing its own citizens at a disadvantage to the citizens of a country that we fought, I cannot understand. But we had to do it; we passed the law to which I refer in 1947. What was said with reference to that legislation by its proponents?

German nationals as a result of World War I made claims against the United States for about $650,000,000 as compared with $1,500,000,000 of American claims against Germany. The claims of German nationals were allowed to the extent of $453,000,000 as compared with $275,000,000 allowed to American nationals on their much larger claims, and German nationals have actually been paid approximately $409,000,000 as compared with only about $173,000,000 to American nationals.

Mr. MACKINNON. Mr. Chairman, will the gentleman yield?

Mr. BECKWORTH. I yield to the gentleman from Minnesota.

Mr. MACKINNON. While the gentleman is talking about World War I, what is the effect, the intent, or the purpose of extending at this time the provisions of section 203 (a) to war claims arising out of World War I?

Mr. BECKWORTH. I am not sure I understand the gentleman.

Mr. MACKINNON. I am referring to page 4 of the bill. Title II is entitled "War Claims Act of 1947," which is the subject of the legislation that is presently proposed. Section 203 (a) proposes to authorize the Commission that is established hereby to submit information also with respect to war claims arising out World War I. What is the point of it?

Mr. BECKWORTH. Some claims of American citizens have not yet been settled, claims which arose out of World War I. That is just exactly what the Reed bill was trying to get at—to give some American claims a preference over German claims they did not have.

Mr. MACKINNON. Claims against the United States Government?

Mr. BECKWORTH. No; claims against the German Government by American citizens.

Mr. MACKINNON. Does the gentleman believe there is any possibility of recovering any money on these claims?

Mr. BECKWORTH. I do not know. We passed the Reed bill in July of last year, undertaking to help American citizens in that connection. Yes, I feel this legislation stands a chance to help American claimants to which the gentleman refers.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BECKWORTH. Mr. Chairman, I yield myself five additional minutes.

I want to read a little bit more from Mr. REED'S statement. Speaking before our committee, the gentleman from New York [Mr. REED] said:

I call attention to the fact that following the passage of the Settlement of War Claims Act of 1928, heretofore referred to, and the release of the bulk of the property pledged for the American awards and claims, the United States concluded with Germany an agreement, heretofore referred to, known as the Debt Settlement Agreement of 1930 (45 Stat. 500). The United States under this agreement accepted German Government bonds, to be paid in 103 installments over a period of years, as evidence of Germany's indebtedness to American award holders and claimants and agreed "to accept the full faith and credit of Germany as the only security and guaranty for the fulfillment of Germany's obligations."

Germany paid only three of the 103 installments required to be paid by the Debt Settlement Agreement of 1930, its last payment being the installment due March 31, 1931.

Yes; I say it is incumbent on the Congress to take care of its own citizens who have claims against the nationals or against the governments that fought us. Under this legislation we can certainly do that.

I introduced a bill about 2½ years ago that included and would include our military personnel who suffered at the hands

of the enemy inhuman treatment. I definitely feel that the boys on Bataan who suffered inhuman treatment at the hands of the Japanese, and our soldiers in Germany and other European countries that suffered inhuman treatment at the hands of the Germans and others in European countries, should profit under the terms of legislation like this. Personally, if I had my way about the legislation, I would enable them to get something now. I think they deserve it. But this bill does better than nothing in that respect in that it gives them a chance to come before the Claims Commission and to present their claims. Of course that is not a lot of help. The fact that a person has a right to go before a Commission and present his side of something does not necessarily mean that he is going to get anything to satisfy his claim. One thing I hope for, however, by the terms of the legislation which we have before us is to retain in the bill an amendment which will stop the return of property "to American citizens and friendly nationals that had been vested under findings that it was owned by nationals of Germany"; also, I would like to do the same thing with reference to Japanese property. We passed alien-property bills in 1946, and, in my opinion, that was a great mistake, because already over $2,000,000 of property has been returned. As I pointed out when the gentleman from California [Mr. GEARHART] was addressing the committee a while ago a bill was discussed before our committee that morning having for its purpose the return of alien property to a person who "has been or is deemed to be a citizen of the United States." Who knows whether it will pass? If enough weight is brought behind it, it might pass. As the situation stands today, we are actually giving back to so-called foreign friendly nationals property they contend is theirs and at the same time saying to our own civilians and our own servicemen, "You wait, we want to study this question, and maybe then we will give you a chance to adjudicate your claims." My amendment should remain in the bill in the interest of keeping this property intact and giving all legitimate claimants an even break. I might mention this, that at the beginning of World War I, we took over a certain enemy property. At the beginning of World War II, we again took over property from some of the same companies, mind you, the same companies. I hope we will not have to take it from some of those same companies a third time.

A way to prevent that is to be careful about the return of the property.

Mr. RIZLEY. Mr. Chairman, will the gentleman yield?

Mr. BECKWORTH. I yield.

Mr. RIZLEY. I agree wholeheartedly with the gentleman's statement that we should retain in the bill the amendment which will keep the property intact until we can adjudicate those claims. But there is one thing that is not clear in my mind about this bill. We set up a Commission here to do something, but they do not have any power to adjudicate those claims, do they?

Mr. BECKWORTH. They do not. They just study them.

Mr. RIZLEY. Then what happens?

Mr. BECKWORTH. Well, you know what may happen or could happen. The same thing might happen as in the case of the study of a commission which made a report on transportation headed by a fellow named Webb, from Kentucky, with reference to freight rates. Nothing was ever done, which I regret. There is no guarantee that anything will happen. That is the reason I say that my original bill carried a provision, and I am still in accord with that original bill, which would definitely help our service people at this time and our civilians, too. As the gentleman from California [Mr. HINSHAW] said, even though we shall pay or give emergency relief to a group of these people who suffered in the Philippines and on Wake, Guam, and Midway, yet we are not undertaking to say that we are adjudicating their claims at all by this legislation.

Mr. FERNANDEZ. Mr. Chairman, will the gentleman yield?

Mr. BECKWORTH. I yield.

Mr. FERNANDEZ. I would like to clear up one matter. On page 6, section 302, of the bill, we find the following:

> The term "civilian" means only a person who, at the time of the occurrence of the event which gave rise to a claim for benefits under this title, was a citizen of the United States.

I would like to know if the Filipinos before they obtained their independence were considered citizens of the United States and would therefore come under this title.

Mr. BECKWORTH. I am not sure I can give you an accurate answer on that, but I yield to the gentleman from California [Mr. HINSHAW] to answer that question please.

Mr. HINSHAW. The Filipinos were not.

Mr. FERNANDEZ. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Texas has expired.

Mr. BECKWORTH. Mr. Chairman, I have no further requests for time at this time.

Mr. HINSHAW. Does the gentleman mean he has finished debate on his side?

Mr. BECKWORTH. No; I did not mean that. I simply meant I did not have any requests for time just now.

Mr. HINSHAW. Well, we have used more time on this side than the gentleman has used. Will the gentleman use some of his time?

Mr. BECKWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from New Mexico [Mr. FERNANDEZ].

Mr. FERNANDEZ. Mr. Chairman, when this bill was being considered I appeared before the committee, because the committee was also considering the bill offered by the gentleman from Pennsylvania [Mr. VAN ZANDT] and the bill which I had introduced, which would give the same relief to veterans who were prisoners of war of the Japanese that it would give to civilians.

As the bill has been reported out, I am very much disappointed that although the relief given by title III is very meager, nevertheless, the veterans who were prisoners of war have been left out. I propose to offer an amendment so as to give them some relief. Those veterans who served under the flag of the United States in the Philippines were made prisoners of war and were maltreated almost beyond description. For example, one of the boys from New Mexico who came back, was maltreated by the Japanese. While a prisoner of war and while he was unconscious, they drove a nail through the top of his head. Fortunately, he did not die, but returned to this country after being a prisoner of war for many, many months; but he suffered continuously. Finally, he was taken to the hospital in Denver and the doctors there X-rayed his head and found this nail right in the top of his head. They drew the nail out. The result was that he became paralyzed completely for a period of time. Fortunately, he has recovered the use of his hands, but he has suffered beyond description.

Like this youngster, there are any number of cases of boys who were prisoners of war in Japan. I do not understand why we are going to leave them out. It may be said that they have received from the Federal Government some relief, but where they have so received some relief, this bill will permit the administrator to deduct the amount that has been received.

I hope that when the time comes the amendment which I will offer will be accepted by the committee.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I am happy to yield to the gentleman from California.

Mr. HINSHAW. I think the gentleman is under some misapprehension.

Mr. FERNANDEZ. I hope I am. I hope they are included.

Mr. HINSHAW. As a matter of fact, as has been stated on the flocr before, this bill does not intend by its terms to provide for the payment of any reparation or any damages whatsoever. It provides for study of that question which is to be completed within 10 months and at the beginning of the next session of Congress a report will be made to the Congress concerning its recommendations about such things as priorities, standards, law, and, finally, legislation to provide for such priorities.

Mr. FERNANDEZ. I understand that, and that is the reason I said the bill was not satisfactory. But, nevertheless, by title III you do give some relief to certain civilian internees, prisoners of war, but you excluded veterans from that category.

Mr. HINSHAW. I can assure the gengleman that the relief provided in title III for internees who were citizens of the United States in a lawful place, under the flag of the United States, is no more than has already been provided such people as are veterans, war contractors' employees, and others.

Mr. FERNANDEZ. If the veterans have been paid a sum because of their suffering, it can be deducted under this bill.

Mr. HINSHAW. There is no payment in title III of the bill that has anything to do with suffering. This is relief to people—Americans—who are destitute and sick because of long internment, starvation, and maltreatment at the hands of our enemies. In no sense is this a reparations bill.

Mr. FERNANDEZ. Call it injury if you will, but the veteran should be entitled to the same consideration.

Mr. HINSHAW. It is a disability payment just as the veteran's compensation is a disability payment.

Mr. FERNANDEZ. The veterans have not been paid disability payments commensurate with the suffering and injuries they received at the hands of the Japanese.

Mr. HINSHAW. If the veteran is found to have a disability that entitles him to compensation under the provisions of the present law he is taken care of, is he not?

Mr. FERNANDEZ. Certainly, and under the bill those payments would be deducted and he would be paid only the difference between what he has received and what the administrators determines to be the amount due for the actual injury. As I say, the amount the Federal Government pays for disability does not begin to pay for the suffering they underwent.

Mr. HINSHAW. Neither will the amounts to be paid under this bill compensate for the damage suffered by civilians. The claims for damages and reparations of the military personnel and the civilian internees and all others constitute another subject that is provided for as best we may at present under title II.

The CHAIRMAN. The time of the gentleman from New Mexico has expired.

Mr. HINSHAW. Mr. Chairman, I yield myself 3 minutes.

The CHAIRMAN. The gentleman from California is recognized for 3 minutes.

Mr. HINSHAW. Mr. Chairman, as I have seen several times during the course of the discussion of this bill and its provisions, there is a considerable amount of confusion in the minds of many people as to whether reparations or damages for suffering for maltreatment and so forth will be paid to the internees, the civilian internees in the Philippines.

There is no such intent in the bill. They have a claim or will have a claim which they can make for damages for maltreatment similar to the claim that will be made by a member of the armed forces who found himself being horribly maltreated by the Japanese military. Title 3 merely provides that certain civilians who were on their lawful enterprises, on United States Territorial soil, under the flag of the United States, and who were in fact encouraged to remain there, who were not warned to leave, and who performed noble and valiant service of a different kind than military to the United States, who now find themselves destitute and homeless, in want and suffering, and dying—just as the other people who were placed in internment camps and prisons—are entitled to such relief as the United States can give them; but it is no greater certainly than the relief proposed for veterans of the war who had similar and even worse treatment, or for the employees of contractors of the Navy who have already been taken care of under another bill passed in 1943. It merely makes current the condition of the civilian internee. They have claims for damages for maltreatment. The veterans have damage claims for maltreatment. The employees of the contractors who were taken on Wake and Guam and elsewhere have claims for reparations and damages against the Japanese Government; and I trust and hope that those claims with all of the other varieties of claims for damages and reparations which will no doubt be presented to this commission will be considered and proper standards drawn for, let us say, the guidance of any court or any international reparations commission, and that furthermore, they will recommend to the Congress of the United States what shall be desirable on the part of our Government in the nature of additional reparations from the Japanese Government certainly, and perhaps also from the German Government, which is not now contemplated as receiving them.

Mr. BECKWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from Arkansas [Mr. HARRIS].

Mr. HARRIS. Mr. Chairman, I am wholeheartedly in support of this bill presented here today. It is a good bill and, as the gentleman from Texas said, one that should have been enacted into law some time ago. I call attention to the fact that it is a technical bill. There are some phases of it that are somewhat difficult to understand but when we keep our thought on just what the bill proposes to do after all it is not so difficult to understand.

In the first place, there was something like $235,000,000 to $275,000,000 taken over by the United States on December 17, 1941, belonging to the Japanese and German Governments and the nationals of those governments. That money has been impounded. The question of what to do with it has arisen and, of course, up until now has not been definitely settled.

This bill proposes that the money shall be placed in the miscellaneous receipts of the Treasury of the United States. In other words, it becomes a part of the general fund out of which a determination later will be made as to what shall be done with it. The gentleman from Texas [Mr. BECKWORTH] has given a great deal of time and study to this important bill and the Nation is indebted to him for his efforts not only during this year but in the last session of Congress for bringing to the attention of the people the importance of this legislation and how this money should be expended in order to compensate those who we feel are justly entitled to receive it.

The question then arises as to the war claims commission, what kind of recommendations it will make and what will be done after those reports and recommendations have been made. It is important to remember, as I tried to bring out a few minutes ago in colloquy with the gentleman from California [Mr. HINSHAW] that there is no intention whatsoever that this proposal will change or offer any indication of changing the compensation that veterans receive under veterans' laws. This would merely place them in the category of receiving consideration in dispensing of these funds of the German and Japanese Governments and their nationals for damages sustained and injuries suffered during the time they were interned and in many instances suffered grave disabilities.

Mr. Chairman, we then have the problem as to what claims will be registered against this fund. There is some indication that the claims will go far beyond the amount of money available. This bill provides that the commission shall make a report and the Congress will have at least 6 months to make a determination as to what claims shall be paid, to whom, the priorities, the amounts, and so forth, under an amendment which the committee adopted offered by the gentleman from Texas [Mr. BECKWORTH]. We might well keep in mind that at that time, according to the report here, it will be the prerogative of the Congress to determine if the Treasury of the United States will be called upon to pay not only the money that has been taken from the German and Japanese Governments and their nationals but any additional money that the commission might report and the Congress might determine justified to pay the entire claims presented to the commission. That is an important provision that the Congress should not overlook.

This provision and others that have been discussed are very well worth considering in adopting the policy contained in this bill.

The CHAIRMAN. The time of the gentleman from Arkansas has expired.

Mr. WOLVERTON. Mr. Chairman, I yield 5 minutes to the gentleman from Iowa [Mr. DOLLIVER].

Mr. DOLLIVER. Mr. Chairman, in the discussion of this matter I think it has become apparent to everybody that this is a matter of considerable complication. It is a bit obscure to try to find out what the very meat of this thing is. I will therefore try to address myself to two of the portions of the bill which perhaps are most obscure to me, in the hope that in illuminating my own mind I can, perhaps, assist some of you who, like me, are asking questions of yourselves.

In the first place let me say this, that after listening to the witnesses before the committee there was no doubt in the mind of any member of the Committee, but that there was a great need for legislation on this subject. My command of the English language is utterly insufficient to portray the cruelties, the tortures, the hardships, and the indignities that were heaped upon our nationals, civilian and military, in this war. There is a great variety in those just claims for wrongs done by the enemy. They are as different as day is different from night, and that is a very poor parallel. They are as diverse as the human mind could imagine.

As the gentleman from California [Mr. HINSHAW] has pointed out, the

committee felt that in order to classify these claims, and in order to get some rationality out of this situation, the claims should be classified by experts who are qualified so to do; men who could spend a considerable amount of time, certainly much more time than the committee could spend, to determine the categories of claims that should be allowed.

Accordingly, the bill provides that a commission shall be set up for that precise purpose of determining the categories of claims which ought to be allowed, and that the commission shall then report back to the Congress as to what further legislation ought to be passed to implement those categories and claims which they might designate. Admittedly that is a slow process and is not going to come to fruition right away.

Mr. GEARHART. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield to the gentleman from California.

Mr. GEARHART. As a matter of fact, that commission will not be able to complete its work and report to this Congress. Whatever report it renders will be submitted to another Congress which might be of an entirely different frame of mind than we are.

Mr. DOLLIVER. That may be very true, but of course we have to act in the light of the information we have at this time.

Mr. GEARHART. That is the very reason why I am suggesting in my amendment that we confer jurisdiction upon the Federal courts and allow them to proceed to adjudicate these claims and render judgment. They can be adjudicated against the cash which will be on deposit in the Treasury.

Mr. DOLLIVER. I will perhaps have something to say at the time the gentleman offers his amendment on that subject.

Mr. BATES of Massachusetts. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield to the gentleman from Massachusetts.

Mr. BATES of Massachusetts. Does the gentleman believe, according to the language in the bill, that any claimant for a fishing boat, a fishing boat that was sunk by German submarines, would have a proper opportunity under this bill to make a claim?

Mr. DOLLIVER. The gentleman has suggested one of a very great number of claims that might be presented for this Commission to recommend to the Congress. That is what this committee, which passed upon this legislation and prepared it, felt it was not qualified to pass upon. The Committee on Interstate and Foreign Commerce did not have the time to go into all the ramifications and the great variety of claims that might be presented.

Mr. BATES of Massachusetts. But the Commission, under the provisions of this bill, would have the right to recommend and consider such a claim.

Mr. DOLLIVER. Yes, and they come back to us, setting up the kind of claims and categories which they think should be considered as proper claims.

Mr. BATES of Massachusetts. I thank the gentleman.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. WOLVERTON. Mr. Chairman, I yield the gentleman five additional minutes.

Mr. DOLLIVER. We now come to a very important matter, and that is the question that was raised by our colleague on the Rules Committee, the gentleman from Georgia [Mr. Cox]. He questioned the morality of taking the private property of alien citizens for the satisfaction of claims of American citizens as distinguished from claims of the Government.

Admittedly this is a very complex and difficult question. I have been able to convince myself that such a procedure is proper and morally correct, but I recognize quickly that there may be differences of opinion.

Let us consider it from the standpoint of whether it is morally objectionable for the United States Government to liquidate the assets now held or to be held by the Alien Property Custodian to be used for the claims of American citizens. In the first place, let it be said that from one standpoint there is no such thing as private property during time of war. Indeed, we nearly found that out in the United States, because our Government actually during the war periods, both in 1917 and 1941, took what it needed to carry on the war and to bring it to a successful conclusion. Most of us would recognize that as proper, whether morally right or not. The exigencies of the situation demanded it. We all know that there are few limitations on the power of the Government in time of war.

A rule which has been alluded to by the gentleman from Idaho in his discussion with another speaker on this subject originated, as I read history, back in the days when the Hanseatic League, a trading league in Europe, was in its ascendency, toward the end of the Middle Ages. The wars of those days were matters between petty principalities primarily and to a considerable extent were private affairs.

So the international law grew up that private property, particularly as it applied to members of the Hanseatic League and the merchants trading in that League, should be inviolate in time of war. But I call your attention to the fact that now, under the situation in which we now live, as our warfare is now carried on, there is no such thing as private property in the sense that it is not subject to the exigencies of war.

From the standpoint it is morally proper for the United States Government to take the property of Japanese or other enemy aliens and apply it to the legitimate claims of American nations to compensate them for the hideous wrongs which were perpetrated on them.

Mr. GOFF. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield to the gentleman from Idaho.

Mr. GOFF. May I preface my remarks by saying that I favor the bill in general, but there are some doubts I should like to have removed? There is no question about the right to take private property due to the necessities of war, but there is an equally strong right to give just compensation for that particular property.

Mr. DOLLIVER. To my mind, the obligation to make just compensation for the taking of that private property rests not with the United States Government but with the enemy government. If there is a Japanese national whose property is taken from him by the United States in the exigencies of war, then the duty to compensate that Japanese national rests not with us but with the Japanese Government.

Mr. BECKWORTH. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield to the gentleman from Texas.

Mr. BECKWORTH. It occurs to me that the gentleman is perfectly correct in what he says, that if there had been any issue as to whether or not this Government has a right to take someone's property, that issue should have been resolved when the war began because, according to the Department of Justice in a letter written June 18, 1947, this is the current status of the property. If the gentleman will bear with me I will read just a short paragraph:

> The Department is unreservedly in favor of the principle of this title.

Reference is there made to title I of the bill.

> The property of enemy countries and enemy nationals vested by the Government is, under existing law, the property of the United States.

We are not taking anybody's property.

> The bill recognizes and states explicitly that the former owners of such property have no claim for its return.

That is the current situation today. The only claim they could have is what we might in our wisdom in the future give them.

Mr. DOLLIVER. I appreciate the contribution of the gentleman and thank him.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. BECKWORTH. Mr. Chairman, I yield five additional minutes to the gentleman from Iowa [Mr. DOLLIVER].

Mr. DOLLIVER. I thank the gentleman from Texas.

Mr. Chairman, may I call the attention of the Committee to the fact that these claims which our citizens will have against the enemy countries will far exceed the conceivable amount which might be garnered from the private property of enemy nationals in this country.

The question therefore presents itself whether we should treat the enemy nationals in a way that we do not treat our own nationals and whether we should compensate enemy nationals first and our own nationals second, or, to put it in another way, whether we should put on the backs of the American taxpayers the burden for the compensation of our own nationals and relieve the enemy taxpayers from carrying that load.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield.

Mr. HINSHAW. May I suggest to the gentleman that he remind the Members of the Congress that if perchance the United States had not won this war that the damages that would be paid by the United States in the form of reparations and things of that kind to the ones who might have been the victors, perhaps the Japanese, would be something out of this world. Practically all Americans would be indebted to the Japanese for the rest of their natural lives.

Mr. DOLLIVER. I think the gentleman is entirely correct and thank him for his contribution.

Mr. Chairman, one final aspect of this thing which I think is worth thinking about is that in recent months and years we have been called upon to assist some of our allies with loans and gifts. Some of us have said on the floor of the House that before we make any more gifts or loans we should require our Allies to liquidate the private holdings of their citizens in this country and apply that upon their needs. To my mind, there is considerable merit to such an argument.

But our failure to pass this kind of legislation and recognize the morality of this principle which is involved in this law would result in our compensating our enemies and penalizing our friends. We would require our Allies as a condition to our helping them that their citizens liquidate their holdings in the United States and at the same time return to our enemies' nationals their private holdings. We would give back to our enemies all the private property which we have taken and require our friends to liquidate all their private holdings in this country before they could get help from us.

Mr. BECKWORTH. Mr. Chairman, will the gentleman yield?

Mr. DOLLIVER. I yield.

Mr. BECKWORTH. Does not the gentleman feel that the Government of the United States was very careful before it took over anybody's property at the beginning of this war?

Mr. DOLLIVER. Of course. We have to rely upon the administrative agencies and the executive department to see that that is done. Personally, I have the same confidence that the gentleman has expressed.

The CHAIRMAN. The time of the gentleman from Iowa has expired.

Mr. HINSHAW. Mr. Chairman, I yield 5 minutes to the gentleman from Connecticut [Mr. MILLER].

Mr. MILLER of Connecticut. Mr. Chairman, most of the provisions of this bill have been pretty thoroughly discussed by other members of the Interstate and Foreign Commerce Committee. I voted to report the bill out of the committee and I believe it is good legislation, although I am frank to say that I do not think it deals adequately with the men and women who served in the armed forces and who were taken prisoners of war. I have no objection to the bill in its present form. It is perfectly all right with me to have this Commission study the problem, but I do not think the Congress should make payments dependent on certain assets that our Government has taken from enemy nationals or enemy countries for the funds with which to pay just compensation to those who served in the armed forces. I think that servicemen who were prisoners of war are in a category separate and apart from the civilian internees. I hope that before this proposed Commission has a chance to complete its study of this problem and make its report to the Congress that the Congress itself, will approve other legislation that I believe should come out of the Committee on World War Veterans' Legislation. Such legislation should make just and generous provision for those in the armed forces who were taken prisoners of war.

Mr. WOLVERTON. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Connecticut. I yield.

Mr. WOLVERTON. I think the thought that is being expressed by the gentleman from Connecticut with respect to the rights of service men and women is one in which we all concur, so that if the language in the bill as now drawn does not sufficiently cover the subject to the gentleman's satisfaction, I am certain there will be no objection on the part of the committee in adding such language as would make it certain.

Mr. MILLER of Connecticut. I am glad the gentleman interrupted me. I did not intend to leave any impression of criticism of the committee or the bill. I said I voted for it, but I do not think this committee can deal with the problem thoroughly in the way it should be dealt with. It is perhaps a stop-gap. I certainly did not intend to be critical of the legislation. If I were, I would not have voted to report it out.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. MILLER of Connecticut. I yield.

Mr. HINSHAW. The veterans legislation which the gentleman has in mind, which would throw a presumption of disability in certain cases, a presumption which is not now granted by the Veterans' Administration, I think would be pretty much in order for the Veterans' Administration committee to bring out. I think I would be very happy to support such legislation.

Mr. MILLER of Connecticut. That is exactly the thing that I wanted to express, that I think the Congress should write into law, so that the Veterans' Administration will have direct instructions, to grant a definite presumption of service connection for every man who was a prisoner of war for any length of time. Those men cannot prove that on a certain date they suffered from a certain illness. There were no records kept. They should not be called upon to offer any proof to the Veterans' Administration that the disability from which they are suffering today was in fact due to their term as a prisoner of war. They should be granted a very substantial rating.

The CHAIRMAN. The time of the gentleman from Connecticut has expired.

Mr. HINSHAW. Mr. Chairman, I yield the gentleman two additional minutes.

Mr. MILLER of Connecticut. I welcome these last few minutes to make it clear that I am not finding fault with what this bill tries to do for men in the service, but rather to take advantage of the opportunity to express the hope that the Committee on World War Veterans' Legislation will before this commission completes its work, come in here with legislation that will put these men in a class separate and apart from either other service men or civilians.

It is rather difficult to write into a law adequate provisions that will take care of physical suffering. I listened to the testimony of men who appeared before our committee who described the indignities and suffering that prisoners of war were subjected to in the Japanese prison camps. It was beyond human comprehension; but still there is a degree of suffering that is just about 100 percent, and we must not forget that there are men who were not prisoners of war who came back from the battlefields, who suffered year after year in Veterans' Administration hospitals, who had gangrene, and who had to lie in their beds and watch their flesh decompose and drop off their bones. That is suffering about all any human being can stand. It is pretty difficult to supply a monetary compensation for suffering. It certainly cannot be done by any amendment offered on the floor of the House to legislation under consideration.

So I hope the bill will be passed in the form in which it was reported from this committee. This committee has gone as far as it can in this matter. I hope that other committees will take up where we have left off and see that these men have justice for the suffering they have undergone.

The CHAIRMAN. The time of the gentleman from Connecticut has again expired.

Mr. BECKWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from Maine [Mr. HALE].

Mr. HALE. Mr. Chairman, I feel rather strongly that if there is any opposition to this bill it is opposition based on misunderstanding of what the bill accomplishes and of what it fails to accomplish. I merely wish to direct my attention to title II of the bill which very emphatically does not make any provision whatever for the adjudication of claims. It provides only for a War Claims Commission to determine and recommend as to the character of claims which should be allowed and as to their priority and so on.

I wish particularly to call attention to the third paragraph on page 15 of the report which contains a letter from Douglas W. McGregor, the Assistant to the Attorney General, in which he comments on title II and says:

> This title recognizes that the problem of payment of war claims is a highly complex one. In view of the great number and variety as well as the agggregate amount of such claims, it would seem highly desirable that proposals for payment of them from public funds should be preceded by the careful study called for by the title. Aside from the problems of what claims should be paid and the equitable treatment of various types of claimants, with respect to priorities, ratable distribution, and the limitations on the interest and fees to be paid, there is involved the fundamental problem of the ultimate source and amount of the funds to be used for satisfaction. Moreover, the problem is intimately connected with the

reparations to be paid by the German and Japanese Governments and the burdens in general which the economies of those two countries may be expected to bear.

If an attempt is made to superimpose upon this legislation some provisions about the actual adjudication of claims, the attempt will, in my opinion, be subject to a point of order because that is not the subject matter of this bill. The War Claims Commission, when it gets around to reading its conclusions and reporting them, will, under a committee amendment to be offered, have until January 3, 1949, in place of the present date of March 31, 1948, found on line 7 of page 4. I repeat that when the War Claims Commission has done its work, then it must make recommendations to the Congress as to legislation which will fix the character of the claims to be allowed, the priorities in which they should be allowed, and the funds from which payment will be made. Then, and not until then, it seems to me, could Congress appropriately legislate machinery for the adjudication of those particular claims, whether in the district courts of the United States, as the gentleman from California [Mr. GEARHART] desires, or in some special tribunal like that which adjudicated the so-called Alabama claims after the Civil War. All those questions require further legislation which cannot be enacted today and which should not be enacted today.

Mr. SNYDER. Will the gentleman yield?

Mr. HALE. I yield to the gentleman from West Virginia.

Mr. SNYDER. In what time does the gentleman estimate we will be able to pay some of these claims after we go through all this machinery set up here and in further legislation and hearings on the merit of the claims?

Mr. HALE. If the War Claims Commission reports on January 3, then it ought to be possible in the next Congress to pass the necessary legislation regarding claims which will be recognized as valid and the machinery for the adjudication of those claims. Once that legislation is passed, adjudication and payment of the claims can be begun forthwith. I anticipate that some claims may be in shape to be proved immediately on the passage of appropriate legislation, while other claims, for one reason or another, not necessarily within the control of the claimant, may not be approved for many years. That has been the experience in all matters of this kind.

The CHAIRMAN. The time of the gentleman from Maine has expired.

Mr. HINSHAW. Mr. Chairman, I yield the gentleman one additional minute.

Mr. HALE. Mr. Chairman, I just want to make the point that the question of policy is eminently one that Congress will be called upon to pass on. Congress may in its wisdom elect to say that all claims against the United States or against the fund or whatever it may be shall be offered for proof and adjudicated before some specified date of limitation. That is a question of policy that we ought to consider at the appropriate time.

Mr. BECKWORTH. Mr. Chairman, I yield 5 minutes to the gentleman from California [Mr. GEARHART].

Mr. GEARHART. Mr. Chairman, the question was raised, and it is a very important one and very timely, When will those claims be paid? Well, in the light of experience with claims commissions it can be safely said, that is, if this bill is adopted in its present form, they will, in all probability be paid to the grandchildren, the heirs of those who suffered the injuries and detriment upon which the claims are based. The claims of World War I, which were intrusted to another claims commission, have not been paid to this day. Claims arising out of World War I, to the extent of $100,000,000, remain unsatisfied up to this very moment. Such is the work of claims commissions.

I raise the question here, Mr. Chairman, is it necessary for us to create another commission of three, each at $12,000 a year, to perform a congressional function when there is already an available agency of the Government, one held in very high repute, the Federal judiciary system, which is right now ready and willing to accept the jurisdiction of the subject matter, to proceed to the adjudication of these enemy war-action claims? The purpose of my amendment is to accomplish a result within the lifetime of people now living. "Strangely radical," a bureaucrat would exclaim.

Mr. Chairman, let us do this through the Federal courts. I referred previously, and will incorporate in the RECORD at the proper time, a letter from a former Chief Justice of the United States, Harlan F. Stone, who has approved the procedure which I have incorporated in the amendment I shall offer to this bill. I have read to you, and there will be incorporated in this RECORD, a letter from the Chief Justice of the United States District Court of the District of Columbia in which approval of the court procedure method my amendment proposes is expressed. If the time available, and the patience of the committee would permit I could at this point list a most impressive group of eminent American jurists and publicists who likewise and with equal enthusiasm, endorse my proposal for court action rather than the slow and unsatisfactory claims commission method. However, if you reject my amendment and go through with this claims commission procedure, it merely means, my friends, that you have set up one more commission whose members will draw $12,000 a year, three men who will learn to like their jobs very, very much. They are required to report within 1 year. Well, that is fine, but I will tell you what they are more apt to do, if I know anything about commissioners and bureaucrats. At the end of the year they will come in and say that they have not been able to complete their work and therefore will ask Congress to extend their time, and they will keep on asking for extensions until the Congress grows restive. Then what will they recommend to the Congress of the United States? They will recommend the setting up of another claims commission to adjudicate the claims in accordance with the recommendations of the first commission. And then their friends will say that they should be appointed to the new claims commission because they are better qualified by experience and thorough-going knowledge of the subject they will go on when they are appointed to the new claims commission and they will be like Tennyson's babbling brook, as all claims commissions do, ad infinitum, on into eternity, and after a while the grandchildren of the claimants who, Lord knows, ought to have their claims satisfied right now, will probably get the money to spend on new, bright and shiny airplanes. No one will want jeeps in that distant day.

Mr. PRIEST. Mr. Chairman, will the gentleman yield?

Mr. GEARHART. I yield to the gentleman from Tennessee.

Mr. PRIEST. The gentleman will agree, will he not, that the life of the Commission is very definitely fixed at approximately 10 months, when a report must be made.

Mr. GEARHART. That I know, and I thank the gentleman for mentioning it, but if the gentleman had been listening, he would have known that I have already pointed that out very carefully. At the end of the year they will come in and recommend that they need a little more time and get themselves reappointed for another year, and then they will recommend that a new commission be set up and that they be appointed to it so that they can go on with the adjudications. You see, they will be experts by then.

That is the old, old gag, the thing which Members on this side of the aisle are supposed to be turning their backs upon; this forever setting up of commissions to do things that there is already an efficient and going arm of government ready to handle.

Do you not trust the Federal courts? I want to say to you that I trust the Federal courts, and I think every claimant who has a war action claim against the United States or any foreign power would be willing to submit his claim to the constituted judicial authorities of this great Republic of ours. Why not? Do you want this thing to go on forever and ever and ever?

Mr. LEA. Mr. Chairman, will the gentleman yield?

Mr. GEARHART. I yield to the gentleman from California.

Mr. LEA. Does the amendment that the gentleman proposes provide the standards that would govern the action of a court in determining the claim?

Mr. GEARHART. My amendment confers jurisdiction upon the courts and gives them the power to make such rules and regulations as they shall need to govern the procedure in these cases. It was approved as sufficient by Chief Justice of the Supreme Court Harlan Stone and by Chief Justice Laws of the District Court. It was approved in principle in a letter sent to me by the then Secretary of State, Mr. Stettinius, when I incorporated the subject matter of this amendment in a bill which I introduced in a previous Congress. It was also approved

in principle by Secretary of State James Byrnes at a time when I had another bill up to the same effect, both saying, though, that they wanted the matter delayed, and we certainly have gotten 100 percent of the delay they requested. Years have rolled by, and the end is not yet.

The CHAIRMAN. The time of the gentleman from California has expired.

Mr. BECKWORTH. Mr. Chairman, I yield the gentleman 2 additional minutes.

Mr. LEA. Mr. Chairman, will the gentleman yield further?

Mr. GEARHART. I am happy to yield to the distinguished gentleman from California.

Mr. LEA. Is it not a fact that in most instances there is no legal authority to justify an award by the court for these claims, and Congress must adopt a standard by which the courts would be governed before they could render judgment? In most instances they automatically have to deny these claims because there is no legal authority for granting them.

Mr. GEARHART. With all due respect to the gentleman from California, whom I hold in very warm affection, I cite the expressions of the former Chief Justice of the United States and the present Chief Justice of the United States Court of the District of Columbia. They are ready to proceed under this legislation grant.

Let us do something now. Let us not set in motion a procedure which may never result in anything being achieved. Remember, the report of that Commission will not be made to this Congress. It will be made to another Congress, one which may be of an entirely different frame of mind than this. We know not what they may do, we know not how quickly they will act. We do not have the slightest idea whether they will act with expedition or whether it will allow this legislative subject matter to lie without action, as the three or four Congresses before this one has allowed this same question to lie in their dockets without any action at all. I plead with you, let us get action, and get action now, for these people who need it and need it so badly. My amendment would do that.

Mr. HINSHAW. Mr. Chairman, I yield myself such time as I may desire.

Mr. Chairman, my friend from California is a very distinguished member of the bar, and I am an engineer. I am not as cognizant of the procedures in the district court of the United States as he is, but as an engineer I can say to my lawyer friend that in any case standards must be applied. I do not know how many judges there are in the district court nor how many courtrooms there are where they meet, but it is a quite considerable number, from my observation. There are 8 or 10 of them in my own county, to my certain knowledge.

If these cases are to be brought before all of these judges, who is going to know, for example, how much money there will be available to pay off these claims? Suppose they allow claims in the total of $1,000,000,000. We know that we are covering into the Treasury by this bill $250,000,000. If someone does not examine the number of cases and the kinds of cases, and set standards for the awarding of damages, and so forth, there may be money to pay only the first few who put in their claims, and there may be none for the remainder.

Those are some of the matters that require study. It is not as though the United States Government itself were paying these claims as such. If we want to pay what the Japanese Government should pay for the maltreatment of our prisoners and the sinking of our ships and all the other things they, as a defeated nation may be held to account for, then we should be mighty certain that we are going to be able to have the money from the proper sources to pay all the claims and not just merely the first few that are filed.

That is one of the reasons why we require a commission to study this subject. The quality of the claims, the standards by which they should be adjudicated, the amounts that may be paid for personal suffering and loss, under the Geneva convention, for example, all of those things must be taken into consideration, and the claims should be handled in accordance with priorities, priorities to be established for, we will say, the veterans of Bataan and others who have suffered similarly, as being No. 1 for consideration by these courts, and not merely in the order of filing the dockets.

There are many things to be discussed here which my friend from California knows are exceedingly important.

It was the hope of this committee that this bill could be passed last July, that it would then have become law, and that the Commission which was to be established would have reported by March 31 of this year, so that before the end of this Congress we could have had the necessary law and establishment to apply to this subject. That was not possible. We therefore must extend it to the nearest date of which we can conceive as a possible legislative date beyond the appointment of the Commission, namely, January 3, 1949. For myself, if I am a Member of that Congress, I could say here that if that Commission fails to report with the proper legislation I would be happy to see the matter taken completely out of its hands and turned over to the appropriate committee of the Congress for spending its time, and a very long time it takes, to examine these claims and set up standards and priorities.

Mr. GEARHART. Mr. Chairman, will the gentleman yield?

Mr. HINSHAW. I yield to the gentleman from California.

Mr. GEARHART. I do not know how it happened that the word "standards" was injected into this discussion, because "standards" is not a proper description.

Mr. HINSHAW. I am not a lawyer. A standard is an engineering practice. It may be something else in the legal practice.

Mr. GEARHART. We use the word "standard" when we direct certain commissions created by Congress to do certain things.

Mr. HINSHAW. I wish the gentleman would apply the correct term quickly as my time is limited.

Mr. GEARHART. I would have done so a long time ago if I had not been interrupted three times, so I trust the gentleman will not chide me for taking up his time.

The way this is done by this act and this amendment which I would introduce is by conferring jurisdiction upon the courts in these cases, just as the Congress has in other cases conferred jurisdiction upon the courts to hear, determine, and render judgment. That is covered in my amendment, if there is any doubt about it.

Mr. HINSHAW. In every case that the gentleman mentions, there are legal standards for the guidance of the court, a measure of damages that is established by law in accordance with long precedent. There are no precedents in this matter. There are no standards established, and it would be a hodge-podge job for the many district courts of the United States to try to resolve this question.

Mr. Chairman, I believe there are no further requests for time, and unless the gentleman from Texas has any further requests for time, I ask that the Clerk read.

The CHAIRMAN. General debate having been concluded, the Clerk will read the bill for amendment.

The Clerk read the bill, as follows:

Be it enacted, etc.—

TITLE I

SECTION 1. The Trading With the Enemy Act of October 6, 1917 (40 Stat. 411), as amended, is hereby amended by adding at the end thereof the following new section:

"SEC. 39. No property or interest therein of Germany, Japan, or any national of either such country vested in or transferred to any officer or agency of the Government at any time after December 17, 1941, pursuant to the provisions of this act, shall be returned to former owners thereof or their successors in interest, nor shall the United States pay compensation therefor. The net proceeds remaining upon the completion of administration, liquidation, and disposition pursuant to the provisions of this act of any such property or interest therein shall be covered into the general fund of the Treasury as miscellaneous receipts. Nothing in this section shall be construed to repeal or otherwise affect the operation of the provisions of section 32 of this act or of the Philippine Property Act of 1946."

With the following committee amendment:

On page 2, line 13, insert as follows:

"SEC. 2. No property or interest therein shall be applied to the payment of debts, under the provisions of section 34 of the Trading With the Enemy Act of October 6, 1917 (40 Stat. 411), as amended, during the period beginning with the date of the enactment of this act and ending 6 months after the date on which the report of the War Claims Commission, made pursuant to title II of this act, is received by the Congress."

The CHAIRMAN. For what purpose does the gentleman from California rise?

Mr. HINSHAW. Mr. Chairman, this being a committee amendment originally offered by the gentleman from Texas, may I suggest that he now speak if he

desires to do so in support of the amendment, as I would like to speak in opposition to it.

Mr. GEARHART. Mr. Chairman, I offer a substitute for the committee amendment.

Mr. HINSHAW. If there is not going to be any support for this amendment, I would like to rise in opposition to it.

Mr. BECKWORTH. Mr. Chairman, I am in favor of the amendment and do expect to advocate its passage, but if the gentleman desires to speak, he certainly has the right to rise in oposition to it.

Mr. HINSHAW. Mr. Chairman, I rise in opposition to the amendment.

Mr. GEARHART. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. GEARHART. As a point of information, Mr. Chairman, I am offering a substitute amendment to the committee amendment. Do I not have the right to offer it at this time?

The CHAIRMAN. The Chair must first recognize the gentleman from California [Mr. HINSHAW].

Mr. HINSHAW. Mr. Chairman, I rise in opposition to the committee amendment. This amendment was agreed to by a very small majority of the committee. I believe it was largely because we are so very fond of our distinguished friend, the gentleman from Texas. I personally could not support the amendment because I believe it is not in the interest of proper legislation. Certain of the Members have come to me, who joined in supporting the amendment, and have indicated that they would have another viewpoint at this time, and I know particularly the chairman of my committee has so authorized me to state. In addition, there is opposition on the part of the Department of State and the Department of Justice to this amendment. The matter was taken up with them last July while the committee print was still under consideration. I have letters from them under date of July 7 and 8, in which they oppose this amendment and another amendment which may be presented by the gentleman from Texas. I might read from a letter from the State Department:

> This is a matter primarily affecting the operations of the Department of Justice. It may be stated, however, that in view of the length of time already elapsed in which creditors have been denied payment of their claims, further delay of more than 1 year before consideration of payment of their claims may be taken would be undesirable.

Then, in the Department of Justice letter, similar words were used. Then they refer particularly to the words "inimical to the welfare of the United States." The Department says, "It will be very difficult to define, except in the most extreme cases, and which would operate in many cases to penalize conduct which at the time when it occurred was lawful under the laws of the United States." Then it refers to other matters.

Therefore, I would be personally in opposition to the amendment. I think the committee is about evenly divided.

Mr. BECKWORTH. Mr. Chairman, I rise in support of the amendment.

Mr. Chairman, practically every person who has been on the floor today has said he believes these claims should be adjudicated. I made the statement originally that, in my opinion, this legislation should have been passed long ago. It should have been. The trouble is that today property is being returned, and the veterans of Bataan cannot even submit their claims. I repeat, today property is being returned and the veterans of Bataan cannot even submit their claims. There is nobody to whom they can submit them.

To whom is the property being returned? According to a table which I placed in the RECORD, January 20, 1948, it is being returned in the following manner:

> Property returned to American citizens and friendly nationals that had been vested, under findings that it was owned by nationals of Germany.

Of course, people are coming before the Alien Property Custodian today and saying, "I am a friend of America." Why? Because they want their property back. That is what they did after the First World War, and the Germans got 80 percent back and many Americans do not have their World War I claims satisfied today.

I say to you it is not consistent with the policy of the legislation we have before us today to continue to give back this property, as we are doing.

One of the firms, at the conclusion of World War I, that got property back, was the General Aniline & Film Co. At the beginning of this past war it had its property taken over again, if I understand correctly. Let us see who is getting some property back, according to the tables supplied me by the Alien Property Custodian. Some examples are: 1. First National Bank of Chicago, $30,-861.64; 2. Maurice Stern, 1,734 shares of common stock General Aniline & Film Co., $109,000; 3. Leopold H. P. Klotz & North American Investment Co., $457,000. We find one R. E. Stern got back 1,734 shares of that property, worth $109,000. What kind of property is this, in most cases, anyway? Let me read to you a little bit of it. The Alien Property Custodian compiled this statement:

> Continental Hendel Bank, $5,000,000 claim already filed.

Here is another one for $201,230, filed in behalf of a Swedish concern.

Here is another one for $215,000, filed in the interest of a Swedish concern.

Just as companies and people did after World War I, they are getting it back again, while we are compelling our veterans of Bataan to wait; while we are compelling our citizens to wait. We should make everybody wait—including those who were dealing with the enemy in such a way that this country of ours had to take over their property at the beginning of the war. If you want to be fair to the veterans of this country, if you want to be fair to the civilians of this country who have not yet received a penny, you will certainly keep in this legislation the committee amendment. Many veterans suffered inhuman treatment in the Philippines and in Japan and in Germany and other European countries. I have letters in my files which describe that treatment. The prisoner or the civilian has to wait while these people are getting back sums of money as I have described. How this can happen I cannot understand. I certainly hope the Members of this Congress will see fit to retain this important amendment in the legislation before us.

Mr. GEARHART. Mr. Chairman, I offer a substitute for the committee amendment.

The Clerk read as follows:

> Amendment offered by Mr. GEARHART as a substitute for the committee amendment in the bill: Insert a new section to be known as section 2, as follows:
>
> "SEC. 2. (A) No property or interest therein shall be applied to the payment of debts, under the provisions of section 34 of the Trading With the Enemy Act of October 6, 1917 (40 Stat. 411) as amended, nor shall any part or any portion of the proceeds from the sale or disposition of property or any interest therein of Germany or Japan or any national of either of such countries covered into the general fund of the Treasury as miscellaneous receipts be applied to the satisfaction or reduction of any claims of American nationals save and except pursuant to a judgment or judgments sought and obtained in the manner and in the form as in this title provided.
>
> "(B) The United States district court for the district wherein the claimant is resident, including the United States district courts for the Territories and possessions of the United States, sitting without a jury, shall have exclusive jurisdiction to hear, determine, and render judgment on claims of American nationals, their heirs and legal representatives, in respect of damage or injury inflicted upon their persons, property, rights, or interests, by measures of enemy governments, including acts of force, violence, or duress, or legislative, administrative, judicial, and other measures, undertaken or enacted after January 1, 1931, including (but not limited to) all personal injury and death claims arising out of maltreatments of former prisoners of war by the Governments of Germany or Japan, their armed forces, or their nationals, in violation of the International Convention Relating to Treatment of Prisoners of War, signed at Geneva, Switzerland, on July 27, 1929, by the plenipotentiaries of the United States, Germany, Japan, and other nations therein represented: *Provided*, That such jurisdiction shall not extend to claims for loss, damage, personal injuries, or death, with respect to which compensation is authorized under other laws of the United States.
>
> "(C) The clerk of United States district courts in each district shall certify to the Congress, at the beginning of each new session of the Congress, the judgments of the court with respect to such claims, for such action as the Congress may deem advisable.
>
> "(D) (a) The United States district courts in the several districts are authorized to make such rules and regulations as may be necessary to carry out their functions under this act.
>
> "(E) The Attorney General is authorized and directed, upon the request of any district court, to appoint a law officer to aid the court in the performance of its functions under this act and to protect the interests of the United States.
>
> "(F) Every claim cognizable under this act shall be forever barred, unless within 2 years after the date of the enactment of this act, it is presented in writing to the United States district court having jurisdiction of such claim pursuant to this act, in accordance with the rules and regulations of such court."

Mr. HALE. Mr. Chairman, I make a point of order against the amendment and desire to be heard on the point of order.

The CHAIRMAN. The gentleman will state his point of order.

Mr. HALE. Mr. Chairman, I make the point of order that the amendment is not germane to the subject matter of the bill.

Mr. BECKWORTH. Mr. Chairman, a parliamentary inquiry.

The CHAIRMAN. The gentleman will state it.

Mr. BECKWORTH. The gentleman from Maine is talking about the substitute, is he not?

The CHAIRMAN. The Chair will answer by stating that he is.

The Chair will hear the gentleman from Maine on his point of order.

Mr. HALE. Mr. Chairman, the amendment is not germane to the subject matter of the bill. If it were germane either to the title of the bill or to any part of the bill it would presumably be with respect to title II with the provisions of which it is entirely inconsistent. Neither the title of the bill nor the language of title II purports to make any provision at all for the adjudication of claims. Title II purports simply to set up a commission to recommend to Congress what claims shall be received as valid in whatever tribunal shall be determined upon to pass upon them, the priority of the claim, the funds from which payments shall be made once the claims have been adjudicated valid, and so on.

The whole machinery suggested by the gentleman from California [Mr. GEARHART] is machinery which could be set in motion only after the Congress had laid down a basic law as to what claims should receive favorable consideration. That is a question of policy that this Congress must fix before any question of adjudication can arise. The amendment of the gentleman from California [Mr. GEARHART], as I understand it, relates only to the question of adjudication.

The CHAIRMAN. Does the gentleman from California [Mr. GEARHART] desire to be heard?

Mr. GEARHART. Mr. Chairman, generally speaking, the bill provides ultimately for the payment of claims against German and Japanese nationals in accordance with a formula not clearly defined in the bill, but the bill in general does deal with the subject of claims arising against alien enemies and their property.

Title I provides for the disposition of money derived from that source—alien property—and this addition to title I merely directs in detail an ultimate disposition of that same property. Title I creates the deposit, and my amendment merely provides a method of withdrawal.

Title II provides for an investigation, that is true, but title III contemplates an ultimate payment of claims. My amendment most certainly complements and completes that which title II leaves loose in space.

My amendment is most certainly germane to title III, as that title does provide for the adjudication and payment of a certain type of war-action claims out of the former property of enemy aliens.

I submit, Mr. Chairman, my amendment is germane to the bill the Committee now has under consideration.

The CHAIRMAN. The Chair is ready to rule.

If the substance of the matter set forth in the amendment offered by the gentleman from California [Mr. GEARHART] were introduced as a separate bill in the House of Representatives, it would, of course, be immediately referred by the proper authority to the Judiciary Committee for consideration. There is, of course, a relation between everything contained in the gentleman's substitute and the matter contained in this bill; however, the gentleman seeks to set up a completely new agency which is recognized in the Constitution and is recognized in legislative procedure as an institution unto itself, with its own jurisdiction fixed by law. The gentleman seeks to place the material of this bill under the jurisdiction of the Federal courts, which would be a matter not within the jurisdiction of the committee having charge of this bill.

For that and other reasons, the Chair is constrained to sustain the point of order.

Mr. HINSHAW. Mr. Chairman, I ask for a vote on the committee amendment which I and other Government departments oppose.

The CHAIRMAN. The question is on the committee amendment appearing on page 2.

Mr. BECKWORTH. Mr. Chairman, I wish the Chair would state clearly what the vote is. I would like it fully understood that the committee amendment is in the bill and we would be voting to strike out the committee amendment.

The CHAIRMAN. The vote is on the committee amendment as printed in the bill.

The question was taken; and the Chair being in doubt, the Committee divided, and there were—ayes 29, noes 5.

So the committee amendment was agreed to.

The Clerk read as follows:

TITLE II

SHORT TITLE

SEC. 201. This title may be cited as the "War Claims Act of 1947."

WAR CLAIMS COMMISSION

SEC. 202. (a) There is hereby established a commission to be known as the War Claims Commission (hereinafter referred to as the "Commission") and to be composed of three persons to be appointed by the President. Each member of the Commission shall receive a salary at the rate of $12,000 a year. One of such members shall be designated by the President as chairman of the Commission. Two members of the Commission shall constitute a quorum for the transaction of business. Any vacancy that may occur in the membership of the Commission shall be filled in the same manner as in the case of an original appointment.

(b) The Commission may employ a secretary, and such legal, clerical, and technical assistants as may be necessary to carry out its functions under this title.

(c) The Commission is authorized to make such rules and regulations as may be necessary to carry out its functions under this title, including regulations covering the filing with it of war claims.

(d) The Commission shall cease to exist at the expiration of 1 year after the date on which a majority of its members first appointed take office, but the President may by Executive order fix an earlier expiration date. Upon expiration of the Commission, all books, records, documents, and other papers in the possession of the Commission shall be deposited with such department or agency of the Government as the President may designate.

INQUIRY AND REPORT WITH RESPECT TO WAR CLAIMS

SEC. 203. (a) The Commission shall inquire into and report to the President, for submission of such report to the Congress on or before March 31, 1948, with respect to war claims arising out of World War I or World War II, and shall present in such report its findings on—

(1) the estimated number and amount of such claims, classified by types and categories; and

(2) the extent to which such claims have been or may be satisfied under international agreements or domestic or foreign laws.

(b) The report of the Commission shall contain recommendations with respect to—

(1) categories and types of claims, if any, which should be allowed and the legal and moral bases therefor;

(2) the administrative method by which such claims should be adjudicated and paid, and any priorities or limitations which should be applicable; and

(3) any limitations which should be applied to the allowance and payment of interest or fees in connection with such claims.

(c) The Commission shall include in such report recommendations as to the policies which, in its judgment, should be followed in the national interest with respect to the application of any property or interest vested in or transferred to the Alien Property Custodian, or the proceeds thereof, to the payment of debts owed by the persons who owned such property or interest immediately prior to such vesting or transfer, and shall make such proposals for legislation as it deems appropriate for carrying out such recommendations.

(d) The Commission shall include in such report (1) such other recommendations as it deems appropriate, and (2) such proposals for legislation as it deems appropriate for carrying out the recommendations made in such report.

(e) Such report, with accompanying evidence, shall be printed as a public document when received by the Congress.

Mr. HINSHAW (interrupting the reading of the section). Mr. Chairman, I ask unanimous consent that the further reading of the section be dispensed with and be printed in the RECORD, and that the Clerk read the amendment which has been offered on behalf of the committee to this section.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

The CHAIRMAN. The Clerk will read the amendment.

The Clerk read as follows:

Amendment offered by Mr. HINSHAW as a committee amendment: On page 4, line 7, strike out "March 31, 1948" and insert "January 3, 1949."

The CHAIRMAN. The question is on the committee amendment.

The committee amendment was agreed to.

Mr. VAN ZANDT. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. VAN ZANDT: On page 4, line 8, after the comma at the end of

the line, insert the following: "including particularly, but not limited to, claims on account of abuse, starvation, and other forms of mistreatment of prisoners of war in violation of the provisions of international agreements or the laws and customs of war or principles of international law."

Mr. VAN ZANDT. Mr. Chairman and members of the Committee, this amendment concerns members of the armed forces who as prisoners of war were victims of atrocities during the period of World War II. In discussing this amendment I am reminded of my assignment by the commander in chief of the forces of the Southwest Pacific to proceed to Manila and report to a congressional committee headed by Senator TYDINGS, of Maryland.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. VAN ZANDT. I yield to the gentleman from California.

Mr. HINSHAW. Before the gentleman goes further, I would like to say to him that the committee has considered his amendment and believes that it is a very worthy one, and agrees entirely that it should be adopted as a part of this bill.

Mr. VAN ZANDT. I thank the gentleman.

While in Manila with this congressional committee it was my privilege to visit personally with the members of the armed forces who had been prisoners of the Japanese, and who were at that time returning to their homes in the United States, many of them for hospitalization. Like many who served in World War II, I know what a broken body looks like, but to me the most ghastly sight that I witnessed during the war was the condition of these boys as they passed through Manila en route home. Never in the history of warfare have so many atrocities been committed, especially the type of atrocities that the Japs inflicted on our men. When talking to these liberated prisoners of war I solemnly vowed that if it was my privilege to return to the Congress of the United States I would see to it that legislation would be introduced and considered for their benefit.

It was my privilege to come back to this Congress after my service in World War II, and to introduce H. R. 1000 early in the Eightieth Congress. The committee was kind enough to consider H. R. 1000, but during the discussion of the bill it developed the matter was so highly complicated it was beyond the ability of the committee to perfect the bill. Realizing this, a resolution was then introduced, known as House Joint Resolution 173, incorporating practically the same language contained in title II of H. R. 4044 now under consideration. It is of title II that I wish to refer to at this moment.

First, I want to commend the committee for their action in adopting title II. As a matter of fact, they are to be commended for the entire bill. The provisions of title II will give to these former prisoners of war who were so brutally treated by the Japs an opportunity to file their claims, after a commission has been created and the necessary machinery perfected, to process such claims.

If the recommendations of this Commission are accepted by Congress these veterans will receive payment of their claims.

For your information let me read from the hearings on H. R. 4044 a statement attributed to William Horabin, of Albuquerque, N. Mex., a former prisoner of war in which he recites the horrible treatment he received at the hands of the Japanese. I read from page 359 of the committee hearings:

Our boat moved from Davao to Zamboanga Harbor. Then we lay in that harbor for 18 days without leaving the hold or receiving any explanation from the Japs. On the eighteenth day we left Zamboanga for Manila. Three days later at 4:30 p. m. an American submarine sent two torpedoes into our ship, which was in no way marked as a prisoner-of-war ship. The suffering and agony that followed is indescribable. The Japanese immediately turned their machine guns on the trapped men in the hold and dropped hand grenades on them. A few men, including myself, escaped through a crack in the ship's hull that had been caused by the concussion of the explosion and a few more forced their way out through the hold entrance. Many men reached the water only to be killed by rifle and machine-gun fire from the remaining ships in the convoy or were hunted down in motor launches and killed with the stroke of a saber.

Mr. BECKWORTH. Mr. Chairman, will the gentleman yield?

Mr. VAN ZANDT. I yield to the gentleman from Texas.

Mr. BECKWORTH. I commend the gentleman on the work he has done to help the veterans. As I understood, this amendment also takes in the soldiers who suffered atrocities in Germany and other European countries?

Mr. VAN ZANDT. The gentleman is correct.

Mr. BECKWORTH. Many of the atrocities these men suffered were just as violent as some of the ones the gentleman has described.

Mr. VAN ZANDT. They were probably as violent, but there were not as many of them.

Mr. Chairman, the amendment I have offered provides that when the Commission established in title 2 reports to Congress through the President, such report shall definitely designate that claims arising from abuse, starvation, and other forms of mistreatment of prisoners of war shall have priority over all other claims. Let us remember that these boys who were prisoners of war and victims of cruel and barbarous treatment are still broken in mind and body from such a terrible experience. Knowing Congress as I do and since Chairman HINSHAW of the committee informed us there was no objection to my amendment I sincerely hope that it will receive unanimous approval.

Mr. MACKINNON. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, I have taken this time for the purpose of asking a question of the gentleman from Pennsylvania. It is the gentleman's definite purpose by the amendment he offers, and which I wholeheartedly support, to include within the word "abuse" abuse amounting to death, such as where a man has been beheaded, and things of that character?

Mr. VAN ZANDT. His dependents would be involved then.

Mr. MACKINNON. You intend by your amendment that that class of case should be specifically covered.

Mr. VAN ZANDT. That is right, and the dependents would take their place alongside of the veteran and be given priority in the report submitted by this Commission relative to claims that should be paid or recognized.

Mr. MACKINNON. I just wanted to make that clear, Mr. Chairman, that that group of cases was covered by the gentleman's amendment. I have such a case in my district.

Mr. WALTER. Mr. Chairman, I move to strike out the last two words.

Mr. Chairman, a few moments ago the committee adopted a committee amendment to title I, section 2, the effect of which will be to prevent the payment of adjudicated claims to American nationals. It is indeed unfortunate that this amendment was adopted. It has the effect of repealing the law that the Committee on the Judiciary reported during the last session after very careful consideration and after unanimous action by the committee, which was passed by the Congress.

I call your attention to the unanimous report of the Committee on the Judiciary last year in which it was stated that the purpose of the bill and the amendment to the First War Powers Act was to provide machinery for paying claims of creditors against the former owners of vested properties on an equitable basis to the extent that the assets vested from each debtor permit.

The adoption of this amendment prevents the payment of claims that have been long outstanding, claims of American nationals against the property vested by the Alien Property Custodian. Unless when we get back into the House, the action heretofore taken is rejected, it is going to mean that the Alien Property Custodian will never wind up his work. I distinctly remember in 1932 when I first came to Congress there were literally hundreds of cases in the office of the Alien Property Custodian that should have been terminated. It was with that experience in mind that the Committee on the Judiciary, after long and thorough hearings at which representatives of the Department of State and the Department of Justice testified, unanimously reported this measure. I trust that you will give consideration to the rights of American citizens in this property at the proper time and when we get back into the House reject this amendment when the opportunity is given you for such action.

I yield to the chairman of the Committee on the Judiciary, the gentleman from Michigan.

Mr. MICHENER. I was necessarily momentarily absent from the floor when this amendment was considered. I agree wholeheartedly with what the gentleman from Pennsylvania has said. I do hope that the House in its wisdom will take action different from that which was taken by the Committee a minute ago.

Mr. WALTER. Yes; I am certain that the amendment was not considered as

thoroughly as it should have been because we must bear in mind that ever since the Alien Property Custodian started to function, he was looking to the day when the legitimate claims of American nationals could be paid, in part at least. If this amendment is permitted to stand, it is going to place a premium in the hands of those who have already acted. The disposition of claims will not be made equitably and it will be a case of first come, first served. Certainly, as the committee pointed out in its report, all of our people will not be fairly dealt with.

Mr. BECKWORTH. Mr. Chairman, I move to strike out the last word.

Mr. Chairman, the gentleman who just preceded me would seem to indicate that only American citizens are denied the right of getting their property back under the amendment which has just been adopted. I do not think that is quite the fact. I think that foreign friendly nationals likewise can get property back today. The amendment does not repeal anything. It does not repeal a single law. It simply causes American citizens and foreign friendly nationals, who had property that was taken over by our enemy property custodian at the beginning of World War II, to wait like the boy who fought on Bataan must wait, and like the civilian must wait, until this whole thing is settled. It takes these classes out of a preferred position. It does not permit a foreign national, for example, to be in a preferred class compared to an American citizen.

The gentleman refers to what the Department says. Let us see what the Department says. I am referring to the Justice Department. In one place it says:

> The Department is unreservedly in favor of the principle at this time—

Talking about title I—

> that property of enemy countries and enemy nationals vested in the Government is, under existing law, the property of the United States. The bill recognizes and states conclusively that the former owners of such property have no claim for its return.

Not a bit in the world do they have any claim for its return. Now, let us find out how complicated this whole issue is, why the entire matter should be carefully studied. I further quote from the same letter that the Justice Department wrote our chairman June 18, 1947; the quoted part refers to title 2;

> This title recognizes that the problem of payment of war claims is a highly complex one. In view of the great number and variety as well as the aggregate amount of such claims, it would seem highly desirable that proposals for payment of them from public funds should be preceded by the careful study called for by the title. Aside from the problems of what claims should be paid and the equitable treatment of various types of claimants, with respect to priorities, ratable distribution, and the limitations on the interest and fees to be paid, there is involved the fundamental problem of the ultimate source and amount of the funds to be used for satisfaction. Moreover, the problem is intimately connected with the reparations to be paid by the German and Japanese Governments and the burdens in general which the economies of those two countries may be expected to bear.

I said that this bill should have been passed long ago, and it should. The Judiciary Committee passed enemy property legislation in 1946. It was my contention at the time that one their bills passed the House that not enough attention was given to the over-all subject. You will find that I was on the floor and said I was opposed to the legislation. That was in December 1945. There was not a treaty written at the time; but they brought in legislation and passed it through the House of Representatives in 1945, which was only a little after war had been concluded, and this is 1948, when American citizens are coming in here asking for a chance to be heard with reference to their claims; not to get any property back; and the interesting angle about this whole thing is that while a man is pleading for a chance to get his property back, to be reimbursed for inhuman treatment at the hands of the enemy, here come some people who day by day are getting their property back—some not even citizens of this country. So I say to you this provision should be kept in the bill. In fairness to whom? Not foreign nationals. What does this table say that I put in the RECORD on January 20, 1948?

Property returned to American citizens and friendly nationals that had been vested under findings that it was owned by nationals of Germany.

Mr. WALTER. Mr. Chairman, will the gentleman yield?

Mr. BECKWORTH. I yield.

Mr. WALTER. The gentleman is talking about a bill that was reported in 1945. We are talking about two different things. I am talking about the bill approved August 8, 1946.

Mr. BECKWORTH. The bill I am talking about was approved in 1946. Were there not two of them?

Mr. WALTER. One in 1945 and one in 1946.

Mr. BECKWORTH. No. Both of them were in 1946; one in March and one in August. If I am not mistaken, the House passed the bill that became law in March, in December 1945.

Mr. HARRIS. Mr. Chairman, will the gentleman yield?

Mr. BECKWORTH. I yield.

Mr. HARRIS. According to the statement made by the gentleman from Pennsylvania [Mr. WALTER] and the gentleman from Michigan [Mr. MICHENER], a moment ago, that the committee amendment would repeal provisions of the law referred to, this does not repeal any law. Does it not merely suspend payment and operation of that law until 6 months after the Claims Commission has made its report?

Mr. BECKWORTH. That is right. Some of these claims are for as much as $5,000,000. As I recall, one firm has already recovered nearly $1,000,000 and one person $100,000. What this does is to put all American citizens and friendly nationals on the same basis. Let us study this thing and see how much each who has a just claim can ultimately recover.

If that is unfair, I do not know what fairness means.

The CHAIRMAN. The time of the gentleman from Texas [Mr. BECKWORTH] has expired.

The question is on the amendment offered by the gentleman from Pennsylvania [Mr. VAN ZANDT].

The amendment was agreed to.

The CHAIRMAN. The Clerk will read.

Mr. HARRIS. Mr. Chairman, I renew my request and again ask unanimous consent that further reading of the bill dispensed with, that it be printed in the RECORD at this point, and the bill be considered as read.

Mr. HINSHAW. Just a moment. I think that is a prerogative of this side. To start with, we were giving a couple of Members the opportunity to offer amendments in due course.

The CHAIRMAN. There being objection, the Clerk will read.

The Clerk read as follows:

GENERAL POWERS OF COMMISSION

SEC. 204. For the purpose of this title the Commission is authorized to hold hearings and to conduct investigations, and to make full use of pertinent information, including war claims or statements relating thereto, available in other departments or agencies of the Government. The President may designate an existing department or agency which shall furnish the Commission with such administrative services as may be required. Department and agency heads are authorized to assign for temporary duty with the Commission any of their officers or employees and may utilize their officers or employees to perform for the Commission any technical services which the Commission may request. The Commission is authorized to reimburse departments and agencies for the cost of services furnished and personnel assigned to or working on behalf of the Commission.

AUTHORIZATION FOR APPROPRIATION

SEC. 205. There is hereby authorized to be appropriated not to exceed $325,000 to carry out the provisions of this title.

TITLE III

SHORT TITLE

SEC. 301. This title may be cited as the "Internees' Relief Act of 1947."

DEFINITIONS

SEC. 302. When used in this title—

(1) The term "civilian" means only a person who, at the time of the occurrence of the event which gave rise to a claim for benefits under this title, was a citizen of the United States.

(2) The term "detention" means any restraint of personal liberty (a) due to capture by the enemy, as a prisoner, internee, hostage, or otherwise; or (b) in hiding to avoid capture or internment by the enemy.

(3) The term "Administrator" means the Federal Security Administrator.

EXTENSION OF THE ACT OF DECEMBER 2, 1942

SEC. 303. (a) Except as otherwise provided in this title, the provisions of titles I and II of the act entitled "An act to provide benefits for the injury, disability, death, or enemy detention of employees of contractors with the United States, and for other purposes", approved December 2, 1942 (56 Stat. 1028), as amended, are extended and shall apply in respect to the injury, disability, or death resulting from injury, or detention of a civilian, in the same manner and to the same extent as if such civilian were an employee within the purview of such act of December 2, 1942, as amended.

(b) For the purpose of determining the benefits extended and made applicable by subsection (a)—

(1) the average weekly wage of such civilian, whether employed, self-employed, or not

employed, shall be deemed to have been $37.50;

(2) no compensation shall be paid for detention of any person with respect to any period during which such person was under the age of 16 years;

(3) any disability incurred or aggravated during, or caused by, detention shall be regarded as having resulted from injury from a war-risk hazard as defined by such act;

(4) the benefits for detention shall be payable for the period of detention, beginning with first day thereof and ending with the date upon which the civilian was returned to the jurisdiction of the United States, or the date upon which the particular area in which such person was situated was liberated by the military or naval forces of the United States or its allies, whichever is the earlier;

(5) the provisions of such act shall be applicable whether or not the civilian was employed;

(6) notice of injury or death shall not be required; and limitation provisions with respect to the filing of claims for detention, injury, disability, or death shall not begin to run until the date of the enactment of this title.

(c) For the purpose of determining the right to benefits under this title of a person claiming as widow, status as widow may be accepted upon a showing, satisfactory to the Administrator, sufficient to establish a common-law marriage, whether or not such marriage is recognized by the law of the place of residence of the parties, unless acceptance of such status should operate to deprive a lawful widow of her right to benefits. The acceptance of such status shall not operate to increase the maximum aggregate amount of benefits payable in any case should a lawful widow be found entitled to benefits, after acceptance of status as herein authorized.

(d) The following provisions of such act of December 2, 1942, shall not apply in the cases of such civilians: So much of section 101 (b) (1) as provides for payments of detention benefits to dependents of the detained person; section 101 (d); section 104; and section 105.

(e) Any unpaid promissory notes or other evidences of indebtedness executed by or on behalf of such civilians to the Government of the United States in consideration of their transportation or repatriation may be canceled whenever the head of the department or agency of the Government to which such notes or other evidences of indebtedness are payable finds that recovery in respect thereof would be impracticable or would cause hardship to the maker thereof.

(f) Rights or benefits which, under this title, are to be determined with reference to other provisions of law shall be determined with reference to such provisions of law as in force on January 3, 1947.

(g) Except as may be modified by this title, the terms used in this title shall have the same meaning as such terms have under such act of December 2, 1942, and for purposes of taxation benefits payable under this title shall be regarded in the same category as benefits under such act of December 2, 1942.

EXCLUSIONS

SEC. 304. (a) This title shall not apply to a person who, at the time of the occurrence of the event which gave rise to a claim for benefits under this act, was—

(1) a person within the purview of the act entitled "An act to provide compensation for employees of the United States suffering injuries while in the performance of their duties, and for other purposes," approved September 7, 1916, as amended, and as extended; or

(2) a person within the purview of the act entitled "An act to provide benefits for the injury, disability, death, or enemy detention of employees of contractors with the United States, and for other purposes," approved December 2, 1942, as amended; or

(3) a regularly appointed, enrolled, enlisted, or inducted member of any military or naval force.

(b) This title shall not apply to a person who at any time voluntarily gave aid to, collaborated with, or in any manner served the enemy or the purposes of the enemy.

LIMITATIONS

SEC. 305. (a) The provisions of this title shall apply with respect to injury, disability or death from injury, or detention, only if the event giving rise to the right to benefits occurred at Midway, Guam, Wake Island, the Philippine Islands, or at any other Territory or possession of the United States, attacked or invaded by the Imperial Japanese Government, or while in transit to or from any such place.

(b) The money benefit for disability or death shall be paid only to the person entitled thereto, or to his legal or natural guardian if he has one, and shall not upon death of the person so entitled survive for the benefit of his estate or any other person.

(c) The benefit for detention shall be paid to the person entitled thereto, or to his legal or natural guardian if he has one, and shall in case of death of the person so entitled be payable only to or for the benefit of the following persons:

(1) widow or dependent husband if there is no child or children of the deceased;

(2) widow or dependent husband and child or children of the deceased, one-half to the widow or dependent husband and the other half to the child or children of the deceased in equal shares; and

(3) child or children of the deceased (in equal shares) if there is no widow or dependent husband.

(d) The benefit of a minor of or an incompetent person who has no natural or legal guardian may, in the discretion of the Administrator, be paid, in whole or in such part as he may determine, for and on behalf of such minor or incompetent, directly to the person or institution caring for, supporting, or having custody of such minor or incompetent.

(e) No person, except a widow or child, shall be entitled to benefits for disability or detention in respect to himself, and to death benefits on account of the death of another. No person shall be entitled to money benefits in excess of $7,500 on account of the death of another person or persons. A person, other than a widow or child, whose right to money benefits is derived from his own detention or disability and from the death of another, or on account of the death of more than one person, shall elect which benefit he shall receive, and any payment accepted prior to such election shall be charged against the benefits so elected.

(f) Benefits for injury or disability shall not be payable for any period covered by the benefit for detention; but the right to benefits on account of disability continuing after detention ceased, including benefits on account of the loss, or loss of use, of a member or function of the body, shall not be affected.

REDUCTION OF BENEFITS

SEC. 306. (a) If a civilian or his dependent receives or has received from the United States any payments on account of the same injury, death, or detention, or from his employer, in the form of wages, or payments in lieu of wages, or in any form of support or compensation (including workmen's compensation) in respect to the same objects, the benefits under this title shall be diminished by the amount of such payments in the following manner:

(1) Detention benefits shall be reduced by the amount of payments to the detained person or to his dependents on account of the same detention;

(2) Benefits on account of injury or disability shall be reduced by the amount of payments to the injured person on account of the same injury or disability;

(3) Benefits on account of death shall be reduced by the amount of payments to the dependents of the deceased civilian on account of the same death.

(b) Should the civilian or dependent receive any payment under this title, made under mistake of fact or law, the recovery of which is not waived under the applicable provisions of such act of December 2, 1942, any other benefit payment in the same case to which the same civilian or dependent is entitled shall be reduced so as to recoup any overpayment of benefits. The reduction of any benefit under this section shall be accomplished in such manner as the Administrator shall determine to be equitable.

ADMINISTRATION

SEC. 307. The provisions of this title shall be administered by the Federal Security Administrator, in accordance with the provisions of titles I and II of such act of December 2, 1942. All provisions in such titles, relating to matters other than benefits or administration, unless made inapplicable by other provisions of this title, shall be applicable with respect to this title as though embodied therein.

PAYMENTS UNDER THIS TITLE NOT TO AFFECT WAR CLAIMS

SEC. 308. The payment of benefits to any person under this title shall not affect the right of such person (1) to file any war claim with any domestic or international tribunal or agency having jurisdiction to consider or adjudicate such claims, or (2) to receive any payment or award made by any such tribunal or agency.

TIME OF TAKING EFFECT

SEC. 309. This title shall take effect as of December 7, 1941, and the right of individuals to benefits shall be held to have begun to accrue as though this title had been in effect as of such date.

APPROPRIATIONS

SEC. 310. There is hereby authorized to be appropriated such sums as may be necessary to carry out the provisions of this title.

Mr. HINSHAW (interrupting the reading of the bill). Mr. Chairman, I ask unanimous consent that further reading of the bill be dispensed with, that it be printed in the RECORD, and that the bill be open to amendment at any section, the sections to be handled in sequence.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. FERNANDEZ (when section 304 was called). Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. FERNANDEZ: On page 10, line 18, after the word "amended", strike out the semicolon, insert a period, and strike out the word "or" in line 18, and all of lines 19 and 20, and insert at the end of line 23 the following:

"(c) In this title wherever the words 'civilian' or 'civilians' are used those words shall be construed to include members of the military or naval forces who were citizens of the United States."

Mr. HINSHAW. Mr. Chairman, I reserve a point of order against the amendment.

The CHAIRMAN. The gentleman from California reserves a point of order against the amendment.

The gentleman from New Mexico is recognized for 5 minutes in support of his amendment.

Mr. FERNANDEZ. Mr. Chairman, section 304 of the bill, on page 10, contains this language:

This title shall not apply to a person who, at the time of the occurrence of the event which gave rise to a claim for benefits under this act, was * * *

(3) a regularly appointed, enrolled, enlisted, or inducted member of any military or naval force.

My amendment merely strikes that language out of the bill, that is, the words "a regularly appointed, enrolled, enlisted, or inducted member of any military or naval force."

It ther adds another clause making it definite that wherever the words "civilian" or "civilians" are used they shall be construed to include members of the armed forces who were citizens at the time.

Mr. Chairman, I am not going to repeat the argument I made in favor of this amendment a while ago, but I do want to point out that the heroes of Bataan appeared before the committee because they want action now. They do not want a lick and a promise such as that contained in title II. They want to be included in any legislation which may pass this House and they want the same treatment that civilians who were prisoners of war of the Japanese are given by this bill.

I hope that the committee will approve my amendment.

Mr. BECKWORTH. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield to the gentleman from Texas.

Mr. BECKWORTH. I congratulate the gentleman on offering such an amendment. I realize this is a very difficult problem to get at, but this amendment does undertake to do what I wanted to do with my original legislation, that is, to include servicemen in the awarding of anything that went to those who suffered cruel and inhuman treatment.

The CHAIRMAN. The time of the gentleman from New Mexico has expired.

Mr. HINSHAW. Mr. Chairman, I ask unanimous consent that the gentleman may be permitted to speak for three additional minutes.

The CHAIRMAN. Is there objection to the request of the gentleman from California?

There was no objection.

Mr. HINSHAW. Mr. Chairman, will the gentleman yield?

Mr. FERNANDEZ. I yield to the gentleman from California.

Mr. HINSHAW. Of course, it is obvious that the gentleman has in mind extending the benefits contained in this title to members of the armed forces who were captured. Actually, the bill provides elsewhere that where benefits have been paid from any other fund, either by contractors or by any employer, they shall be deducted from the benefits to be received under this bill. Consequently, I am very much afraid that it would not benefit the people the gentleman has in mind one iota. From that standpoint, it really does not matter.

Mr. FERNANDEZ. I repeat that I am not at all satisfied with the bill, but it is the best we have. For what it is worth, I want the men of Bataan to have at least whatever benefit would accrue under this bill to others, meager though it is.

Mr. HINSHAW. Mr. Chairman, I renew my point of order against the amendment.

The CHAIRMAN. The gentleman will state his point of order.

Mr. HINSHAW. Mr. Chairman, the amendment as I have read it seeks to include for the purpose of this title military personnel and no one is more concerned with those men than I am. I am a member of both the American Legion and the Veterans of Foreign Wars, as are other Members of this distinguished body. To say that the term "a person within the purview of this title" and so forth, shall include the regularly appointed, enrolled, enlisted, or inducted members of any military or naval force, which I believe is the sense of the amendment, would really change the entire title, which is intended to be an internees' relief bill of 1947 as stated in the title and applies only to internees. I do not see how you can include prisoners of war among internees, as they have no relationship to each other except that they were both incarcerated, but they were incarcerated under different international law.

Mr. FERNANDEZ. Mr. Chairman, the term includes prisoners of war, and if the gentleman's contention is correct, then the so-called Van Zandt amendment was also subject to a point of order. If my amendment is subject to a point of order, so was his amendment subject to a point of order.

The CHAIRMAN. The Chair is ready to rule.

Referring to the remarks of the gentleman from New Mexico [Mr. FERNANDEZ] relative to the amendment offered by the gentleman from Pennsylvania [Mr. VAN ZANDT] the Chair may say that no point of order was lodged against the amendment offered by the gentleman from Pennsylvania.

Referring to the point of order made by the gentleman from California, even if the language which the gentleman from New Mexico seeks to strike out were not in the bill the Chair doubts very much if the gentleman's amendment would be germane because the title of section 3 definitely refers to one class and only one class. This legislation affects the rights of that class known and designated as internees, and then they have strengthened the bill, evidently intending to strength their position, by adopting the language used on page 10, which the gentleman seeks to strike out. Consequently, the Chair is constrained to sustain the point of order.

Mr. HINSHAW. Mr. Chairman, I believe there are no further amendments to be offered to the bill.

The CHAIRMAN. Under the rule, the Committee rises.

Accordingly the Committee rose; and the Speaker having resumed the chair, Mr. JENKINS of Ohio, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases, pursuant to House Resolution 431, he reported the bill back to the House with sundry amendments adopted by the Committee of the Whole.

The SPEAKER. Under the rule, the previous question is ordered.

Is a separate vote demanded on any amendment?

Mr. HINSHAW. Mr. Speaker, I ask for a separate vote on the so-called committee amendment, being section 2, as published in the bill on page 2, lines 13 to 20, inclusive.

The SPEAKER. Is a separate vote demanded on any other amendment? If not, the Chair will put them en gross.

The amendments were agreed to.

The SPEAKER. The Clerk will report the amendment on which a separate vote has been demanded.

The Clerk read as follows:

SEC. 2. No property or interest therein shall be applied to the payment of debts, under the provisions of section 34 of the Trading With the Enemy Act of October 6, 1917 (40 Stat. 411), as amended, during the period beginning with the date of the enactment of this act and ending 6 months after the date on which the report of the War Claims Commission, made pursuant to title II of this act, is received by the Congress.

The SPEAKER. The question is on the committee amendment.

The question was taken; and on a division (demanded by Mr. HINSHAW) there were—ayes 37, noes 17.

So the committee amendment was agreed to.

The SPEAKER. The question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed and read a third time and was read the third time.

The SPEAKER. The question is on the passage of the bill.

The bill was passed.

A motion to reconsider was laid on the table.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to Mr. BROPHY (at the request of Mr. ARENDS), for the day, on account of official business.

EXTENSION OF REMARKS

Mr. KEATING asked and was given permission to extend his remarks in the RECORD and include an address delivered by Hon. RAYMOND E. BALDWIN, Senator from Connecticut.

Mrs. ST. GEORGE asked and was given permission to extend her remarks in the RECORD and include an editorial.

Mr. BRADLEY asked and was given permission to extend his remarks in the RECORD and include a resolution adopted by the Fleet Reserve Association.

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD and include an editorial.

Mr. SHAFER asked and was given permission to extend his remarks in the RECORD in two instances and include in one an editorial.

Mr. HARLESS of Arizona asked and was given permission to extend his remarks in the RECORD.

Mr. HAVENNER asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

Mr. ROGERS of Florida asked and was given permission to extend his remarks in the RECORD and include an article by Mr. J. C. Penney.

Mr. LANDIS (at the request of Mr. HALLECK) was given permission to extend his remarks in the RECORD.

Mr. KLEIN. Mr. Speaker, I ask unanimous consent to include in the remarks I made in Committee of the Whole this afternoon some newspaper articles.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

SPECIAL ORDERS GRANTED

Mr. SADOWSKI. Mr. Speaker, I ask unanimous consent that today and tomorrow, following any special orders heretofore entered, I may be permitted to address the House for 15 minutes.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the special order heretofore granted the gentleman from Illinois [Mr. MASON] for Wednesday next be vacated and that he be permitted to address the House for 20 minutes on tomorrow, following any special orders heretofore entered.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

The SPEAKER. Under previous order of the House, the gentleman from North Carolina [Mr. BULWINKLE] is recognized for 30 minutes.

THE PRESIDENT'S MESSAGE

Mr. BULWINKLE. Mr. Speaker, the message which President Truman delivered on the state of the Union on January 7 caused a number of Members of the House, on the Republican side of the aisle, to make severe criticisms of nearly all—if not all—of his message.

I listened to the President very intently, and it brought back to my mind another document which was issued some 2½ years ago.

I also remembered that shortly after the campaign of 1946 that letters were issued by the treasurer of the Republican National Committee over his signature to a number of citizens of the United States. This letter read as follows:

REPUBLICAN NATIONAL COMMITTEE,
Chicago, November 29, 1946.

DEAR MR. ———: I hope you are as happy about the election results as I am. In my opinion we have made a tremendous start toward turning the American Government back to the American people and bringing order out of the present chaos at home and abroad.

I assume you have contributed to some of the local Republican finance committees but thus far we have not had the pleasure of including you as a contributing member of the Republican National Committee.

We need $500,000:

1. To take care of campaign and other expenses payable before December 31.

2. To expand our publicity services; including our monthly and semimonthly publications, to tell the Republican story to the American people.

3. To provide research facilities to help the new Republican House and Senate to do the job the voters clearly have indicated they should do with respect to putting the ship of state back on an even keel.

Will you be one of 1,000 persons to contribute $500 to the Republican National Committee for these purposes? Or, if you prefer, would you be willing to raise that sum among your friends and associates?

Now that we have won the election we should not fail in our obligation to carry on with respect to the important work which lies ahead.

Your sympathetic and favorable consideration will be deeply appreciated and I shall await your reply with much interest.

Sincerely,

JAMES S. KEMPER,
Treasurer.

Mr. Speaker, I wondered when I saw this letter in December of 1946 why it was necessary for the Republican National Committee to provide research facilities to help the new Republican House and Senate do the job the voters clearly have indicated they should do with respect to putting the ship of state back on an even keel. As this was one of the major purposes for collecting $500,000, it was clearly to instruct the new Republicans in the House as to what they should do. Evidently, they were not instructed properly and the money was wasted, or on the other hand, the money was collected and never used for the purpose stated in the letter.

As I stated, when I sat listening to the President's message, it brought another document to my mind. That document was the Republican platform of 1944—the platform that you new Members who needed instruction on were elected on. In some 29 or more particulars, there is a similarity between these two documents. For the purpose, therefore, of instructing the Members which the Republican National Committee failed to do, I will read these sections from both documents to you:

SPEECH OF THE PRESIDENT OF THE UNITED STATES ON THE STATE OF THE NATION, JANUARY 7, 1948

HUMAN RIGHTS

The United States has always had a deep concern for human rights. Religious freedom, free speech, and freedom of thought are cherished realities in our land.

Any denial of human rights is a denial of the basic beliefs of democracy and of our regard for the worth of each individual.

Today, however, some of our citizens are still denied equal opportunity for education, for jobs and economic advancement, and for the expression of their views at the polls. Most serious of all, some are denied equal protection under our laws. Whether discrimination is based on race, or creed, or color, or land of origin, it is utterly contrary to American ideals of democracy.

THE REPUBLICAN PLATFORM OF 1944

HUMAN RIGHTS

In times like these, when whole peoples have found themselves shackled by governments which denied the truth, or worse, dealt in half-truths or withheld the facts from the public, it is imperative to the maintenance of a free America that the press and radio be free and that full and complete information be available to Americans.

We pledge the establishment of Federal legislation of a permanent Fair Employment Practice Commission.

The payment of any poll tax should not be a condition of voting in Federal elections, and

SPEECH OF THE PRESIDENT OF THE UNITED STATES ON THE STATE OF THE NATION, JANUARY 7, 1948

HUMAN RIGHTS

ALASKA AND HAWAII

I believe that the time has come for Alaska and Hawaii to be admitted to the Union as States.

SOCIAL SECURITY

We should now extend unemployment compensation, old-age benefits, and survivors' benefits to millions who are not now protected. We should also raise the level of benefits.

HEALTH

The greatest gap in our social-security structure is the lack of adequate provision for the Nation's health. We are rightly proud of the high standard of medical care we know how to provide in the United States. The fact is, however, that most of our people cannot afford to pay for the care they need.

I have often and strongly urged that this condition demands a national health program. The heart of the program must be a national system of payment for medical care based on well-tried insurance principles. This great Nation cannot afford to allow its citizens to suffer needlessly for the lack of proper medical care.

Our ultimate aim must be a comprehensive insurance system to protect all our people equally against insecurity and ill health.

HOUSING

Within the next decade, we must see that every American family has a decent home. As an immediate step we need the long-range housing program which I have recommended on many occasions. This should include financial aid designed to yield more housing at lower prices. It should provide public housing for low-income families, and vigorous development of new techniques to lower the cost of building.

VETERANS

We have had, and shall continue to have, a special interest in the welfare of our veterans. Over 14,000,000 men and women who served in the armed forces in World War II have now returned to civilian life. Over 2,000,000 veterans are being helped through school. Millions have been aided while finding jobs, and have been helped in buying homes, in obtaining medical care, and in adjusting themselves to physical handicaps.

All but a very few veterans have successfully made the transition from military life to their home communities. The success of our veterans' program is proved by this fact. This Nation is proud of the eagerness shown by our veterans to become self-reliant and self-supporting citizens.

NATURAL RESOURCES

We need to protect and restore our land—public and private—through combating erosion and rebuilding the fertility of the soil.

We must expand our reclamation program to bring millions of acres of arid land into production, and to improve water supplies for additional millions of acres.

We must protect and restore our forests by sustained-yield forestry and by planting new trees in areas now slashed and barren.

THE REPUBLICAN PLATFORM OF 1944

HUMAN RIGHTS

we favor immediate submission of a constitutional amendment for its abolition.

We favor legislation against lynching and pledge our sincere efforts in behalf of its early enactment.

ALASKA AND HAWAII

Hawaii, which shares the Nation's obligations equally with the several States, is entitled to the fullest measure of home rule looking toward statehood; and to equality with the several States in the rights of her citizens and in the application of all our national laws.

Alaska is entitled to the fullest measure of home rule looking toward statehood.

SOCIAL SECURITY

Extension of the existing old-age insurance and unemployment insurance systems to all employees not already covered.

HEALTH

A careful study of Federal-State programs for maternal and child health, dependent children, and assistance to the blind, with a view to strengthening these programs.

The continuation of these and other programs relating to health, and the stimulation by Federal aid of State plans to make medical and hospital service available to those in need without disturbing doctor-patient relationships or socializing medicine.

HOUSING

The stimulation of State and local plans to provide decent low-cost housing properly financed by the Federal Housing Administration, or otherwise, when such housing cannot be supplied or financed by private sources.

VETERANS

The Republican Party has always supported suitable measures to reflect the Nation's gratitude and to discharge its duty toward the veterans of all wars.

We approve, have supported, and have aided in the enactment of laws which provide for reemployment of veterans of this war in their old positions, for mustering-out pay, for pensions for widows and orphans of such veterans killed or disabled, for rehabilitation of disabled veterans, for temporary unemployment benefits, for educational and vocational training, and for assisting veterans in acquiring homes and farms and in establishing themselves in business.

NATURAL RESOURCES

A comprehensive program of soil, forest, water, and wildlife conservation and development, and sound irrigation projects, administered as far as possible at State and regional levels.

We favor a comprehensive program of reclamation projects for our arid and semi-arid States, with recognition and full protection of the rights and interests of those States in the reclamation and control of water for present and future irrigation and other beneficial consumptive uses.

SPEECH OF THE PRESIDENT OF THE UNITED STATES ON THE STATE OF THE NATION, JANUARY 7, 1948

THE REPUBLICAN PLATFORM OF 1944

NATURAL RESOURCES

We favor full development of our forests on the basis of cropping and sustained yields; cooperation with private owners for conservation and fire protection.

STOCK PILING

We need accurate and comprehensive knowledge of our mineral resources and must intensify our efforts to develop new supplies and to acquire stock piles of scarce materials.

We favor adequate stock piling of war minerals and metals for possible future emergencies.

PUBLIC WORKS

We must continue to erect multiple-purpose dams on our great rivers—not only to reclaim land, but also to prevent floods, to extend our inland waterways, and to provide hydroelectric power. This public power must not be monopolized for private gain. Only through well-established policies of transmitting power directly to its market and thus encouraging widespread use at low rates can the Federal Government assure the people of their full share of its benefits. Additional power, public and private, is needed to raise the ceilings now imposed by power shortages on industrial and agricultural development.

We should achieve the wise use of resources through the integrated development of our great river basins. We can learn much from our Tennessee Valley experience. We should no longer delay in applying the lessons of that vast undertaking to our great river basins.

The Federal Government should plan a program for flood control, inland waterways, and other economically justifiable public works, and prepare the necessary plans in advance so that construction may proceed rapidly in emergency and in times of reduced employment. We urge that States and local governments pursue the same policy with reference to highways and other public works within their jurisdiction.

AGRICULTURE

Price supports

We need to continue price supports for major farm commodities on a basis which will afford reasonable protection against fluctuations in the levels of production and demand. The present price-support program must be reexamined and modernized.

An American market price to the American farmer and the protection of such price by means of support prices, commodity loans, or a combination thereof, together with such other economic means as will assure an income to agriculture that is fair and equitable in comparison with labor, business, and industry. We oppose subsidies as a substitute for fair markets.

CROP INSURANCE

Crop insurance should be strengthened and its benefits extended in order to protect the farmer against the special hazards to which he is subject.

Serious study of and search for a sound program of crop insurance with emphasis upon establishing a self-supporting program.

FARM COOPERATIVES

We also need to improve the means for getting farm products into the markets and into the hands of consumers. Cooperatives which directly or indirectly serve this purpose must be encouraged—not discouraged.

Support of the principle of bona fide farmer-owned and farmer-operated cooperatives.

RURAL ELECTRIFICATION PROGRAM

We need to go forward with the rural electrification program to bring the benefits of electricity to all our farm population.

To make life more attractive on the family type farm through extension of rural electrification services to the farm * * *.

SOIL CONSERVATION

We can, and must, aid and encourage farmers to conserve their soil resources and restore the fertility of land that has suffered from neglect and unwise use.

A comprehensive program of soil, * * * conservation and development.

PRIVATE ENTERPRISE

Growth and vitality of our economy depend on vigorous private enterprise. Free competition is the key to industrial development, full production and employment, fair prices, and an ever improving standard of living.

We shall promote the fullest stable employment through private employment.

MONOPOLY

Competition is seriously limited today in many industries by the concentration of economic power and other elements of monopoly. The appropriation of sufficient funds to permit proper enforcement of the present antitrust laws is essential. Beyond that we should go on to strengthen our legislation to protect competition.

Small business must be preserved by the enforcement of laws against monopoly and unfair competition.

WAGE EARNERS

The Government has wisely chosen to set a floor under wages. But our 40-cent minimum wage is inadequate and obsolete. I

The Republican Party accepts the purposes of the National Labor Relations Act, the Wages and Hours Act, the Social Security Act,

SPEECH OF THE PRESIDENT OF THE UNITED STATES ON THE STATE OF THE NATION, JANUARY 7, 1948

WAGE EARNERS

recommend lifting the minimum wage to 75 cents an hour.

In general, however, we must continue to rely on our sound system of collective bargaining to set wage scales. Workers' incomes should increase at a rate consistent with the maintenance of sound price, profit, and wage relationships and with increasing productivity.

ARMED FORCES

We believe that the United States can be an effective force for world peace only if it is strong. We look forward to the day when nations will decrease their armaments. Yet, so long as there remains serious opposition to the ideals of a peaceful world, we must maintain strong armed forces.

UNITED NATIONS

We have learned that a healthy world economy is essential to world peace—that economic distress is a disease whose evil effects spread far beyond the boundaries of the afflicted nation.

For these reasons the United States is vigorously following policies designed to achieve a peaceful and prosperous world.

We are giving, and will continue to give, our full support to the United Nations. While that organization has encountered unforeseen and unwelcome difficulties, I am confident of its ultimate success.

WORLD TRADE

We are seeking to restore the world trading system which was shattered by the war and to remedy the economic paralysis which grips many countries.

To restore world trade we have recently taken the lead in bringing about the greatest reduction of world tariffs that has ever occurred. The extension of the provisions of the Reciprocal Trade Agreements Act, which made this achievement possible, is of extreme importance. We must also go on to support the International Trade Organization, through which we hope to obtain world-wide agreement on a code of fair conduct in international trade.

RELIEF AND REHABILITATION OF FOREIGN COUNTRIES

Our present major effort toward economic reconstruction is to support the program for recovery developed by the countries of Europe. In my recent message to the Congress I outlined the reasons why it is wise and necessary for the United States to extend this support. I want to reaffirm my belief in the soundness and promise of this proposal. When the European economy is strengthened, the products of its industry will be of benefit to many other areas of economic distress. The ability of free men to overcome hunger and despair will be a moral stimulus to the entire world.

INFLATION

Already inflation in this country is undermining the living standards of millions of families. Food costs too much. Housing has reached fantastic price levels. Schools and hospitals are in financial distress. Inflation threatens to bring on disagreement and strife between labor and management.

ECONOMY

Government expenditures have been, and must continue to be, held at the lowest safe level. Since VJ-day Federal expenditures have been sharply reduced. They have been cut from more than $63,000,000,000 in the fiscal year 1946 to less than $38,000,000,000 in the present fiscal year. The number of civilian employees has been cut nearly in half—from 3,750,000 down to 2,000,000.

THE REPUBLICAN PLATFORM OF 1944

We favor the maintenance of postwar military forces and establishments of ample strength for the successful defense and the safety of the United States, its possessions and outposts, for the maintenance of the Monroe Doctrine, and for meeting any military commitments determined by Congress.

We favor responsible participation by the United States in postwar cooperative organization among sovereign nations to prevent military aggression and to attain permanent peace with organized justice in a free world.

Such organization should develop effective cooperative means to direct peace forces to prevent or repel military aggression. Pending this, we pledge continuing collaboration with the United Nations to assure these ultimate objectives.

If the postwar world is to be properly organized, a great extension of world trade will be necessary to repair the wastes of war and build an enduring peace. The Republican Party, always remembering that its primary obligation, which must be fulfilled, is to our own workers, our own farmers and our own industry, pledges that it will join with others in leadership in every cooperative effort to remove unnecessary and destructive barriers to international trade. We will always bear in mind that the domestic market is America's greatest market and that tariffs which protect it against foreign competition should be modified only by reciprocal bilateral trade agreements approved by Congress.

We favor the prompt extension of relief and emergency assistance to the peoples of the liberated countries without duplication and conflict between Government agencies.

We favor immediate feeding of the starving children of our allies and friends in the Nazi-dominated countries and we condemn the New Deal administration for its failure, in the face of humanitarian demands, to make any effort to do this.

We favor assistance by direct credits in reasonable amounts to liberated countries to enable them to buy from this country the goods necessary to revive their economic systems.

We shall maintain the value of the American dollar and regard the payment of Government debt as an obligation of honor which prohibits any policy leading to the depreciation of the currency.

We shall eliminate from the budget all wasteful and unnecessary expenditures and exercise the most rigid economy.

SPEECH OF THE PRESIDENT OF THE UNITED STATES ON THE STATE OF THE NATION, JANUARY 7, 1948

TAXATION

On the other hand, Government revenues must not be reduced. Until inflation has been stopped there should be no cut in taxes that is not offset by additions at another point in our tax structure.

Mr. Speaker, I trust that my speech today giving in detail a number of portions of the Republican platform will be extremely beneficial to you gentlemen on the left because it will refresh your recollection—if you have forgotten—or it will inform you what the platform was if you do not know.

The SPEAKER. Under previous order of the House, the gentleman from Ohio [Mr. JENKINS] is recognized for 15 minutes.

THE MARSHALL PLAN

Mr. JENKINS of Ohio. Mr. Speaker, the Marshall plan—who knows exactly what it is? Nobody. It seems to be something one day and something else the next day. Its origin, apparently, was accidental and it now seems to have no definite purpose or direction.

One day they say it is economic in its principal purpose and the next day they say it is military.

One day they say it is a fixed 5-year program and the next day someone high in the administration says 1 year or 15 months at a time is better.

One day they say about $25,000,000,000 is necessary to carry on the program and the next day they say $17,000,000,000 will do. Then someone says $5,000,000,000 or $6,000,000,000 will be enough.

One day Marshall said "take is as it is or leave it." The next day other men high in the administration said in effect, "We must have it to prevent war and we are willing to modify it."

Mr. Speaker, all this simply means that the Marshall plan is no definite plan at all but is a designation of another movement to have the United States give away a large amount of money and supplies without any satisfactory system of distribution and without any lasting benefits to our country.

There is little wonder that the Foreign Affairs Committee of the House is having difficulty in disposing of this matter.

Mr. Speaker, there is no doubt that the American people are willing to do whatever is reasonably necessary to relieve hunger and suffering in Europe and in Asia, but they demand a different system of distribution than that which has heretofore been followed. The situation is entirely different now than it was during the war. Then it was principally a matter of food and clothing and temporary relief. Now it is a matter of strengthening weak and discordant governments so that they can unify their people—stabilizing the unstable and depreciated currencies of these countries so that they can trade among themselves—rehabilitating the industrial, commercial, and agricultural activities of these countries so that they can provide employment for their people and

THE REPUBLICAN PLATFORM OF 1944

TAXATION

As soon as the war ends, the present rate of taxation on individual incomes, on corporations, and on consumption should be reduced as far as is consistent with the payment of the normal expenditures of Government in the postwar period.

---

thereby increase their national wealth and security.

Mr. Speaker, the situation is a difficult one and the task before us requires our best efforts. It is a matter for Congress and not a departmental matter that can be handled by the State Department or any of the other departments of the Government.

Mr. Speaker, the Congress should realize the importance of this matter and proceed immediately toward giving it affirmative and courageous consideration. Too much time has been wasted in an attempt to satisfy departments of the Government that do not want to yield power and prestige.

To this task Congress should call to its assistance the best financial and business experts of the Nation—men who know finance and the importance of a stable currency to the welfare of a country. Men who know foreign transportation and its complications. Men who know construction here and abroad and men who know how to set up business on a world-wide scale.

This task can only be done well by congressional action putting foreign aid under a separate authority. This authority should be in the form of a separate corporate agency with a bipartisan board of directors of the caliber and qualifications that I have already mentioned. The Board should be empowered to select a chairman or administrator to carry out its wishes.

This Board should immediately make a survey of the needs and facilities of the several countries with the purpose of assisting them to strengthen their currencies and to rehabilitate their industries and production agencies. When a preliminary survey is made, which should not take more than a month, this Board should immediately make recommendations to the Congress or to the President or both. The Congress should supply this Board with a few millions which it can use for emergency relief while it is making these surveys.

When more thorough surveys and recommendations are made the Congress and the President will then better know what to do and how to do it. Congress will then be better able to know how much money and how much national aid will be necessary. Congress will also then know how much these countries are willing to do for themselves.

Moneys and credits of these countries and their citizens on deposit or hidden in the United States or elsewhere should be applied to this relief program. Since no other countries are collaborating with the United States in this program, it is not only our privilege but it is our duty to make our own plans and to carry them out as we think best, always keeping in mind our obligation to protect our own economy.

Unless serious political or military contingencies arise this task should be completed in 3 years at a total outlay of not more than three or four billion dollars.

The SPEAKER. Under previous order of the House, the gentleman from Michigan [Mr. SADOWSKI] is recognized for 15 minutes.

WHERE DOES OUR FOREIGN RELIEF MONEY GO?

Mr. SADOWSKI. Mr. Speaker, the report of the Joint Committee on Reduction of Nonessential Expenditures of the Congress of the United States, Senate Document No. 112, Eightieth Congress, first session, is truly an amazing report. It shows that the total estimate of postwar assistance for foreign relief, rehabilitation, and so forth, has reached the staggering sum of nineteen to twenty billions of dollars, exclusive of what may be contemplated under the Marshall plan proposals. This report covers the period from July 1945 to September 1947.

What is especially interesting to note is that Germany and Italy, two of the enemy nations, received $1,674,000,000, while Poland, Czechoslovakia, Finland, Hungary, Albania, Yugoslavia, Bulgaria, Rumania, and the U. S. S. R., together with Ukraine and White Russia, received a total of $1,644,000,000. Germany and Italy, the enemy nations, received $30,000,000 more than these much devastated nations of eastern Europe.

I ask you, gentlemen, is this the way to make friends?

England, France, and Greece received $7,288,000,000.

Maybe this policy makes sense to some people, but I am sure that it will not be understood by the vast majority of our citizens, and that it does not have their approval. I am sure that our citizens expected a humane policy which would give fair and equal assistance to the nations devastated by war. Must we continue to follow a relief or rehabilitation program based on politics?

Our original purpose was to work out a relief, rehabilitation, and recovery program for European nations in conjunction and in cooperation with the United Nations. This was the honest and proper way to pursue a world-recovery program, but the selfish and greedy bankers and international cartelists, under the guise of a bipartisan program, wrecked the plan that the honest and decent American citizens were supporting. A world-recovery program under the United Nations would have cost our taxpayers less than one-half of what this selfish and inequitable program is costing us, and it would have brought us the respect, gratitude, and love of the whole world, instead of envy, fear, suspicion, and hatred.

I believe that our support of the rightists, or of the prewar status quo, can only bring us the enmity and hatred of the European people. That is why our position is so bad in Greece today, and that is also why we have made a mess of it in China. The people of Europe do not want communism, but likewise, and even more strongly, they do not want a return to their old governments, and to the misery, intrigue, war, and starvation that those governments have brought upon them.

I am not in sympathy with a program which will shower billions of dollars on some nations and some people, and ignore the plight of other people who suffered so much at the hands of the Nazis. How do you feel when you read that 2,500,000 German children could eat American ice cream for Christmas, and 1,000,000 Polish orphan children, who went through all kinds of hell for six long years, are ignored and forgotten?

It seems like our bipartisan, big business, and international cartelist program will only bring us the hatred and enmity of all the people of the world. We appropriated $600,000,000 for German civilan relief on July 23, and then 2 weeks later canceled a miserable $15,000,000 relief fund for Poland. This is something that my constituents cannot understand.

We had originally embarked on a sound American program which would give aid and credits to all people and all nations. This was the right policy to pursue, as it was in the old American tradition that has made America strong and respected. The present policy has resulted in a lot of confusion and misunderstanding. For example, we have now three groups of people in America: Those who are sincerely supporting a program of genuine relief and assistance out of the charity of their big Christian American hearts. Then there is the second group that has always opposed old-age pensions, school-lunch programs, aid to veterans, Federal aid to school teachers, aid to the incapacitated, the blind, and crippled. Yes; those who wouldn't give a bone to a starving dog we find strongly supporting the Truman plan and the Marshall plan, because it is a policy of anticommunism and a restoration of the rightists and reactionaries in Europe. Thirdly, there is the group of big bankers and international cartelists, and all of those speculators in petroleum products, grain, and commodities who see for themselves an opportunity to make big profits quickly out of these free dollars that are being given to certain countries. Their motives for supporting the program are not based on patriotism, on a sound foreign policy that would work for peace, or because of sympathy for the destitute and hungry, but they have only one purpose in mind, and that is high prices, greed, and big profits that they can realize quickly out of this program.

I would like to see a genuine relief program, where the gifts from America would be distributed directly to the needy people by established charitable organizations, such as the Red Cross, the various religious relief organizations, and the many other societies that for years have been doing this kind of work, so that our gifts would not fall into the hands of the profiteers and black marketeers, or into the hands of political cliques, where the people must sell their souls to get bread or are bled white by the profiteers. This method of distribution has brought us

the hatred and enmity of the destitute and hungry.

This program should be supplemented further by the bill which I introduced, and the amendment that I offered to the recent relief bill, which provides for free postage on gift packages being sent from the citizens of the United States to the people of Europe. In the first 9 months of last year Americans spent $44,000,000 for postage alone to send these gift packages. They are sending old clothes, shoes, food, and those things that the people in Europe desperately need. These packages go directly to the needy and the recipients know that they come from the United States. These gift packages have brought us more goodwill than any other thing that we have done, and it is my firm conviction that this program should be encouraged, as it would bring the greatest benefits in goods to the needy and genuine appreciation to the American people who send these packages.

Then, further, I believe that we should junk the present Marshall and Truman program, and instead, we should give loans and credits, without interest, to all nations and their people who have suffered from the ravages of war. We should not play favorites and try to rebuild one country as against another, and particularly, as we have been doing recently, where we ignore nations and people who have been our loyal friends for centuries, and who have been on our side in every struggle. It is said "but they have a government that we do not like." And I say in reply, "So what? The people of that nation also may not like their government, but governments come and governments go, but nations and people remain forever."

We cannot drop the American iron curtain that Churchill created for us on these unfortunate people and say "you must go to Russia for bread and sustenance." These people have fought for freedom and liberty for centuries. Both Germany and Russia have tried at various times to swallow and devour them, but each time they were unsuccessful and had to yield them up.

These people stand in ghastly fear of our policy of rebuilding Germany. They know that Germany has sprung at their throats at every opportunity, and in some nations, such as Poland, there is hardly a family who has not suffered the loss of fathers, mothers, brothers, or sisters. Here is a nation that had 30,000 orphans in prewar days. Today it has 1,000,000 orphans as a result of German barbarism and bestiality. Twenty thousand tons of human ashes were found at one crematorium just outside of Warsaw. These people and these nations have a right to be alarmed about our present policy. They also have a right to ask, "Why do not you give us an equal opportunity to rehabilitate and reestablish ourselves?"

Now, let us turn to the recent London Conference at which Russia asked for $10,000,000,000 in reparations from Germany, and which we opposed so strongly. From my viewpoint, this is not an unreasonable request. It is estimated that Poland suffered over $100,000,000,000 in property damage by the Nazis. Russia's damages in all probability are two or three times as great as that of Poland. Now, why should not the Germans work and pay for their sins? Certainly $10,000,000,000 is not a great amount of compensation for the damages they inflicted upon the Russian people. Since the war the United States has already contributed twice that much for the relief of European nations, and the funny part of it is that we won the war. It will serve America no good to be identified as supporting the Fascists and antidemocratic forces anywhere in the world. Certainly, that is not the desire nor the program of the rank and file of the American people. We love our liberty, and we have advanced steadily in our fight for better economic and living conditions. I am sure that the sympathies of the average American are with the downtrodden, and not with the kings, queens, dukes, and the big-landed aristocracy of Europe, or with the European cartelists and monopolists. The people of Europe desire liberty, freedom, democracy, and better living conditions just as much as we do. I believe that they shall get them. I believe that neither the left nor right shall win in Europe. I only hope that when the clouds over Europe roll away that we shall not be hated and despised by everyone. I am sure that the United States will be respected, loved, and admired if we follow the program on relief that I suggested, and also the program on credits and loans to all nations, without interest, and so as to give all of them an equal opportunity to rehabilitate themselves without playing favorites one way or another.

After the last World War our country was whipped into a frenzy and hysteria over Bolshevists and Reds, and many thousands of people were rounded up and lodged in jail. In recent months we have witnessed a rebirth of this program. Unless the citizens awaken they will find themselves stripped of their civil liberties, as I find that already, even in Congress, many liberals and progressives fear to speak out their thoughts and feelings, because today it takes courage to speak out frankly and buck the press, radio, and the big international cartelists.

It will be different 4 or 5 years from now when these cartelists will be flooding the world markets with goods made in Germany and other European countries by 35 cents an hour labor. When our industries in Detroit will have to shut down and our labor will be unemployed because they will be unable to meet the competition of these international Americans.

It would be revealing to find out just what American firms have made European business connections in the last 2 years—and to what extent have they invested in European industry, banking, and business.

This, I am sure, would explain, "Where does our foreign relief and rehabilitation money go?"

SENATE BILL REFERRED

A bill of the Senate of the following title was taken from the Speaker's table and, under the rule, referred as follows:

S. 1842. An act to extend to February 29, 1948, the period during which the use of grain for the production of distilled spirits or neutral spirits for beverage purposes may be controlled under title III of the Second War Powers Act, 1942; to the Committee on Banking and Currency.

SENATE ENROLLED BILL SIGNED

The SPEAKER announced his signature to an enrolled bill of the Senate of the following title:

S. 929. An act to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564).

ADJOURNMENT

Mr. HINSHAW. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 4 o'clock and 47 minutes p. m.), the House adjourned until tomorrow, Tuesday, January 27, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1246. A letter from the Chairman, Munitions Board, National Military Establishment, transmitting a report detailing the activities with respect to stock piling between July 1 and December 31, 1947; to the Committee on Armed Services.

1247. A letter from the vice president and comptroller, the Chesapeake & Potomac Telephone Co., transmitting a comparative general balance sheet of the Chesapeake & Potomac Telephone Co. for the year 1947; to the Committee on the District of Columbia.

1248. A letter from the vice president and comptroller, the Chesapeake & Potomac Telephone Co., transmitting a statement of receipts and expenditures of the Chesapeake & Potomac Telephone Co. for the year 1947, which is to be substituted for the report submitted on January 6, 1948; to the Committee on the District of Columbia.

1249. A letter from the Archivist of the United States, transmitting a report on records proposed for disposal by various Government agencies; to the Committee on House Administration.

1250. A letter from the Under Secretary, Department of State, transmitting certain information required by House Resolution 365 regarding the removal of industrial plants from Germany by way of reparation; to the Committee on Foreign Affairs.

1251. A letter from the Acting Secretary, Department of State, transmitting a draft of a proposed bill to authorize the President to permit nationals of other nations to receive instruction and training in schools, training establishments, ships, units, and other installations maintained or administered by the Department of the Army, the Department of the Navy, the Department of the Air Force, or the United States Coast Guard; to the Committee on Armed Services.

1252. A letter from the Chairman, the National Archives, transmitting the Annual Report of the National Archives Trust Fund Board, for the fiscal year ending June 30, 1947; to the Committee on Post Office and Civil Service.

1253. A letter from the Chairman, Housing and Home Finance Agency, Home Loan Bank Board, transmitting the Fifteenth Annual Report of the Federal Home Loan Bank Administration, covering reports of all its constituent units, the Federal Home loan Bank System, the Federal Savings and Loan Insurance Corporation, and the Home Owners' Loan Corporation for the fiscal year 1947 (H. Doc. No. 508); to the Committee on Banking and Currency.

1254. A letter from the President, Board of Commissioners of the District of Columbia, transmitting a report of the transactions of the government of the District of Columbia during the fiscal year ended June 30, 1947; to the Committee on the District of Columbia.

1255. A letter from the Secretary of the Interior, transmitting a report on operations under the Synthetic Fuels Act for the period January 1 to December 31, 1947; to the Committee on Public Lands.

1256. A communication from the President of the United States, transmitting a recommendation that the Congress enact legislation authorizing the agreement of March 19, 1941, between the United States and Canada for the development of the Great Lakes-St. Lawrence seaway and power project (H. Doc. No. 509); to the Committee on Public Works.

1257. A letter from the Archivist of the United States, transmitting the Eighth Annual Report on the Franklin D. Roosevelt Library, which covers the fiscal year ending June 30, 1947; to the Committee on House Administration.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JENNINGS: Committee on the Judiciary. H. R. 2000. A bill for the relief of Jeffersonville Flood Control District, Jeffersonville, Ind., a municipal corporation; without amendment (Rept. No. 1269). Referred to the Committee of the Whole House on the State of the Union.

Mr. WOLVERTON: Committee on Interstate and Foreign Commerce. Preliminary report pursuant to section 136 of the Legislative Reorganization Act of 1946; relating to fuel investigation; without amendment (Rept. No. 1270). Referred to the Committee of the Whole House on the State of the Union.

Mrs. ROGERS of Massachusetts: Committee on Veterans' Affairs. H. R. 4478. A bill to provide basic authority for certain administrative expenditures for the Veterans' Administration, and for other purposes; without amendment (Rept. No. 1271). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. JENNINGS: Committee on the Judiciary. S. 1411. A bill for the relief of Willie Ruth Chapman; with an amendment (Rept. No. 1257). Referred to the Committee of the Whole House.

Mr. CASE of New Jersey: Committee on the Judiciary. H. R. 380. A bill for the relief of Edward L. Barreras; with an amendment (Rept. No. 1258). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 697. A bill for the relief of Mrs. Essie N. Fannin, Miss Helen Hicks, Miss Marie Hicks, Miss Frances Fannin, William O. Thompson, and Mrs. W. D. Thompson; with amendments (Rept. No. 1259). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H. R. 2214. A bill for the relief of Dave Hougardy; without amendment (Rept. No. 1260). Referred to the Committee of the Whole House.

Mr. FEIGHAN: Committee on the Judiciary. H. R. 2914. A bill for the relief of Hassler-Ponder Toy Manufacturing Co., Inc.; without amendment (Rept. No. 1261). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 3089. A bill for the relief of Mississippi Central Railroad Co.; without amendment (Rept. No. 1262). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 3425. A bill for the relief of the Lebanon Woolen Mills, Inc.; without amendment (Rept. No. 1263). Referred to the Committee of the Whole House.

Mr. JENNINGS: Committee on the Judiciary. H. R. 3427. A bill for the relief of Mrs. Mary H. Overall and Thomas I. Baker; with amendments (Rept. No. 1264). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. H. R. 1929. A bill for the relief of Edwin Osgood Cogan, his wife Helen Olga Cogan, and his daughter Isabel Joan Cogan; with an amendment (Rept. No. 1265). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. H. R. 2427. A bill for the relief of Jose Cabral Lorenzo; with an amendment (Rept. No. 1266). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. H. R. 3968. A bill for the relief of Olive Irene Milloglav; with an amendment (Rept. No. 1267). Referred to the Committee of the Whole House.

Mr. FELLOWS: Committee on the Judiciary. H. R. 4443. A bill for the relief of Jacob Cohen; without amendment (Rept. No. 1268). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. CROW:

H. R. 5116. A bill to provide for limiting participation as beneficiary under National Service Life Insurance Act, as amended, and for other purposes; to the Committee on Veterans' Affairs.

By Mr. D'EWART (by request):

H. R. 5117. A bill to transfer to the Territorial government of Alaska the administration within such Territory of laws relating to Indians, and for other purposes; to the Committee on Public Lands.

By Mr. D'EWART:

H. R. 5118. A bill to authorize the sale of certain individual Indian land on the Flathead Reservation to the State of Montana; to the Committee on Public Lands.

By Mr. FELLOWS:

H. R. 5119. A bill to amend the immigration laws relating to stowaways, and for other purposes; to the Committee on the Judiciary.

By Mr. KEFAUVER:

H. R. 5120. A bill to amend the Servicemen's Readjustment Act of 1944 as amended to provide homes for veterans by assistance to the various States, including the District of Columbia; to the Committee on Veterans' Affairs.

By Mr. ALLEN of California:

H. R. 5121. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. BARTLETT:

H. R. 5122. A bill to amend section 9 of the act of August 24, 1912 (37 Stat. 512); to the Committee on Public Lands.

By Mr. DAVIS of Georgia:

H. R. 5123. A bill to increase World War I and II disability and death compensation and pension rates; to the Committee on Veterans' Affairs.

By Mr. EVINS:

H. R. 5124. A bill to provide automobiles for disabled veterans of World War I under the same terms and conditions as are now applicable to veterans of World War II; to the Committee on Veterans' Affairs.

H. R. 5125. A bill to grant increased subsistence allowances to veterans undergoing courses of education or training under the Servicemen's Readjustment Act of 1944; to the Committee on Veterans' Affairs.

H. R. 5126. A bill to amend subsection 602 (d) (5) of the National Service Life Insurance Act of 1940, as amended, to extend for 2 years the time within which eligible persons may apply for gratuitous insurance benefits; to the Committee on Veterans' Affairs.

By Mr. FISHER:

H. R. 5127. A bill to amend the Surplus Property Act of 1944 with reference to condemnation powers of the Administrator; to the Committee on Expenditures in the Executive Departments.

By Mr. JACKSON of California:

H. R. 5128. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. JOHNSON of California:

H. R. 5129. A bill relating to the taxation of certain property owned by the Reconstruction Finance Corporation; to the Committee on Banking and Currency.

By Mr. LANDIS:

H. R. 5130. A bill granting exemption from income tax in the case of retirement pensions and annuities of public-school teachers; to the Committee on Ways and Means.

By Mr. MURRAY of Wisconsin:

H. R. 5131. A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation; to the Committee on Banking and Currency.

By Mr. NIXON:

H. R. 5132. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. PRICE of Illinois:

H. R. 5133. A bill to exempt from admissions tax admissions to concerts conducted by civic and community membership associations; to the Committee on Ways and Means.

By Mrs. ROGERS of Massachusetts (by request):

H. R. 5134. A bill to amend Public Law No. 432, Seventy-sixth Congress, to include an allowance of expenses incurred by Veterans' Administration beneficiaries and their attendants in authorized travel for vocational rehabilitation purposes; to the Committee on Veterans' Affairs.

By Mr. SIKES:

H. R. 5135. A bill to authorize the appropriation of $80,000 for improvements to the harbor in St. Andrews Bay, Fla.; to the Committee on Public Works.

By Mr. ANDERSON of California:

H. R. 5136. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. LESINSKI:

H. R. 5137. A bill to amend the Immigration Act of 1924, as amended; to the Committee on the Judiciary.

By Mr. McCORMACK:

H. R. 5138. A bill to provide benefits for members of the Reserve components of the armed forces who suffer disability or death while on 2 weeks' active duty, and for their dependents; to the Committee on Armed Services.

By Mr. SADOWSKI:

H. R. 5139. A bill providing direct Federal old-age assistance at the rate of $60 per month to needy citizens 60 years of age or over; to the Committee on Ways and Means.

By Mr. JONKMAN:

H. R. 5140. A bill to amend the act approved August 5, 1947, entitled "An act to provide for the reincorporation of the Institute of Inter-American Affairs, and for other purposes"; to the Committee on Foreign Affairs.

By Mr. SCHWABE of Oklahoma:

H. R. 5141. A bill to amend section 2 of the act of January 29, 1942 (56 Stat. 21), relating to the refund of taxes illegally paid by Indian citizens; to the Committee on Public Lands.

By Mr. CHURCH:

H. R. 5142. A bill to encourage enterprise capital investment in production facilities, private research laboratories, rental homes, and other long-term assets; to the Committee on Ways and Means.

H. R. 5143. A bill amending the Internal Revenue Code to provide an alternative tax, at the election of the taxpayer, on income derived from an unincorporated business; to the Committee on Ways and Means.

By Mr. GRANGER:

H. R. 5144. A bill providing for the conveyance of the Bear Lake Fish Cultural Station to the Fish and Game Commission of the State of Utah; to the Committee on Merchant Marine and Fisheries.

By Mr. McDONOUGH:

H. J. Res. 308. Joint resolution designating the 25th day of April 1948 as the fiftieth anniversary of the Spanish-American War; to the Committee on the Judiciary.

By Mr. RIVERS:

H. J. Res. 309. Joint resolution to permit the use of oleomargarine by the armed forces; to the Committee on Armed Services.

By Mr. GRANT of Alabama:

H. Con. Res. 133. Concurrent resolution designating Horace C. Carlisle as poet laureate of the Congress; to the Committee on House Administration.

By Mr. WOLVERTON:

H. Con. Res. 134. Concurrent resolution to create a joint congressional committee to be known as the Joint Committee on Fuel Policy; to the Committee on Rules.

H. Con. Res. 135. Concurrent resolution to provide for the expenses of carrying out House Concurrent Resolution 134; to the Committee on House Administration.

By Mr. ANDREWS of New York:

H. Res. 447. Resolution authorizing the Committee on Armed Services to continue its investigation on matters coming within jurisdiction of the committee; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. ALLEN of Louisiana:

H. R. 5145. A bill for the relief of the legal guardian of Andrew Ferdinand DeWitt, Jr., a minor; to the Committee on the Judiciary.

By Mr. BRAMBLETT:

H. R. 5146. A bill for the relief of Joe Tortoloni; to the committee on the Judiciary.

By Mr. D'EWART:

H. R. 5147. A bill authorizing the Secretary of the Interior to issue a patent in fee to Florence A. W. Arens; to the Committee on Public Lands.

By Mr. GRANT of Alabama:

H. R. 5148. A bill for the relief of Walter H. Houston; to the Committee on the Judiciary.

By Mr. MITCHELL:

H. R. 5149. A bill for the relief of Mrs. Renata Cuff; to the Committee on the Judiciary.

By Mr. McCORMACK:

H. R. 5150. A bill for the relief of George E. Finnegan; to the Committee on the Judiciary.

By Mr. WHITTINGTON:

H. R. 5151. A bill authorizing the Secretary of the Interior to issue to James P. Love a patent to certain lands in the State of Mississippi; to the Committee on Public Lands.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1201. By Mr. LEWIS: Petition of 26 residents of Salem, Ohio, and vicinity, circulated by Charles H. Carey Post, No. 56, American Legion Auxiliary, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1202. Also, petition of 74 residents of East Liverpool, Ohio, circulated by the American Legion Auxiliary of East Liverpool Post, No. 4, in support of legislation establishing a system of universal military training; to the Committee on Armed Services.

1203. By Mr. SMITH of Wisconsin: Resolution adopted by Lodge No. 2018, International Workers Order, Racine, Wis., repudiating Attorney General Clark's statement with reference to the loyalty of that organization; to the Committee on Un-American Activities.

1204. By Mrs. SMITH of Maine: Resolution of Local No. 464, International Brotherhood of Pulp Sulphite and Paper Mill Workers, affiliated with the American Federation of Labor, Dixfield, Maine, signed by Raymond Hanson, president, and Mrs. Jennie C. Haines, secretary, urging Congress to enact the Stratton displaced-persons bill into law; to the Committee on the Judiciary.

1205. By Mr. SMITH of Wisconsin: Petition of residents of Racine, Wis., urging legislation establishing a system of universal military training; to the Committee on Armed Services.

1206. By the SPEAKER: Petition of Detroit Federation of Post Office Clerks, Local No. 295, NFPOC, petitioning consideration of their resolution with reference to endorsement of H. R. 4710; to the Committee on Post Office and Civil Service.

1207. Also, petition of the State Water Resources Board of California, petitioning consideration of their resolution with reference to a request to make adequate 1949 appropriations for flood control in California; to the Committee on Appropriations.

1208. Also, petition of Cassius M. McDonald, petitioning consideration of his resolution with reference to redress of grievances; to the Committee on the Judiciary.

1209. Also, petition of Nicholas J. Curtis, Trenton, N. J., petitioning consideration of his resolution with reference to redress for judicial wrongs or grievances; to the Committee on the Judiciary.

HOUSE OF REPRESENTATIVES

TUESDAY, JANUARY 27, 1948

The House met at 12 o'clock noon.

The Chaplain, Rev. James Shera Montgomery, D. D., offered the following prayer:

Our Heavenly Father, we praise Thee for Thy blessed promise: Thou wilt keep him in perfect peace whose mind is stayed on Thee. Amid the blinding flashes of a world convulsed in the throes of misery, be Thou the holy benediction of strength and encouragement, blessing us with zest of soul and those rugged virtues which make nations live. We pray that our passion to serve may match our privileges, linking us to a might that shall forever surmount a tyrant's ambition. O keep America in a crusade that makes secure the freedoms of the individual and that blasts the corrosive evils of human slavery. O Lord, cause Thy face to shine forth, and we shall be saved, to help generations to come. In Thy holy name. Amen.

The Journal of the proceedings of yesterday was read and approved.

MESSAGE FROM THE SENATE

A message from the Senate, by Mr. Frazier, its legislative clerk, announced that the Senate had passed without amendment a bill of the House of the following title:

H. R. 3645. An act relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes.

The message also announced that the Senate had passed, with amendments in which the concurrence of the House is requested, bills of the House of the following titles:

H. R. 774. An act to amend an act to authorize the Secretary of War and the Secretary of the Navy to make certain disposition of condemned ordnance, guns, projectiles, and other condemned material in their respective Departments;

H. R. 1366. An act to facilitate procurement of supplies and services by the War and Navy Departments, and for other purposes;

H. R. 2361. An act to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818;

H. R. 3153. An act to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota;

H. R. 3322. An act to facilitate rights-of-way through restricted Osage Indian land, and for other purposes; and

H. R. 3326. An act to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes.

The message also announced that the Senate had passed bills of the following titles, in which the concurrence of the House is requested:

S. 400. An act authorizing the issuance of a patent in fee to Mabel Townsend Pretty On Top;

S. 401. An act authorizing the Secretary of the Interior to issue a patent in fee to Clarence M. Scott;

S. 773. An act authorizing the issuance of a patent in fee to Mrs. Mary E. Leaf;

S. 1214. An act to amend the act entitled "An act to provide for the training of officers for the naval service, and for other purposes," approved August 13, 1946, as amended;

S. 1298. An act to validate payments heretofore made by disbursing officers of the United States Government covering cost of shipment of household effects of civilian employees, and for other purposes;

S. 1407. An act authorizing the issuance of a patent in fee to Robert E. Doyle;

S. 1470. An act to amend the act entitled "An act to make provision for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers' Train-

ing Corps, and Citizens' Military Training Camps who are injured or contract diseases while engaged in military training, and for other purposes," approved June 15, 1936, as amended, and for other purposes;

S. 1485. An act to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, New Mexico;

S. 1517. An act authorizing the issuance to James Perry Doyle of a patent in fee to certain lands in Big Horn County, Mont.;

S. 1521. An act to authorize the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, and the Secretary of the Treasury to detail certain scientific and technical personnel employed by or within the National Military Establishment or the United States Coast Guard to duty in privately owned plants and laboratories;

S. 1545. An act to authorize a bridge, roads and approaches, supports and bents, or other structures, across, over, or upon lands of the United States within the limits of the Colonial National Historical Park at or near Yorktown, Va.;

S. 1591. An act to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes;

S. 1611. An act to extend the time for completing the construction of a bridge across the Mississippi River at or near Sauk Rapids, Minn.;

S. 1673. An act to authorize the promotion of James Y. Parker, Army serial No. O20712, as major, Army of the United States, as of March 1, 1942, under the act of February 16, 1942 (56 Stat. 94), and for other purposes;

S. 1733. An act to authorize payment to certain enrolled members of the Seminole Tribe of Indians under act of July 2, 1942 (Public, No. 645, 77th Cong.);

S. 1783. An act to provide for retention in the service of certain disabled Army and Air Force personnel, and for other purposes;

S. 1791. An act to transfer certain lands at Camp Phillips, Kans., to the Department of the Army;

S. 1794. An act to authorize the Houston Council, Navy League of the United States, to construct a reflecting pool at the United States naval hospital, Houston, Tex.;

S. 1796. An act to provide for the preservation of the frigate *Constellation* and to authorize the disposition of certain replaced parts of such vessel as souvenirs, and for other purposes;

S. 1799. An act to amend the act of June 3, 1916, as amended, to make it applicable to the Canal Zone, Guam, American Samoa, and the Virgin Islands;

S. 1800. An act relating to the restrictions on the use of crypt and window spaces of the United States Naval Academy chapel;

S. 1802. An act to authorize the President to award the Medal of Honor to the unknown American who lost his life while serving overseas in the armed forces of the United States during the Second World War; and

S. 1961. An act to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes.

The message also announced that the Senate had—

Ordered, That the Senator from Vermont, Mr. FLANDERS, be appointed a conferee on H. R. 4127, an act entitled "An act to amend the Civil Service Retirement Act of May 29, 1930, as amended," in place of the Senator from Ohio, Mr. TAFT, resigned.

ADJOURNMENT OVER

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that when the House adjourns today it adjourn to meet at noon on Thursday next.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

PERMISSION TO COMMITTEES TO FILE REPORTS

Mr. HALLECK. Mr. Speaker, I ask unanimous consent that the Committee on Ways and Means and the Committee on Rules may have until midnight tomorrow night to file reports.

The SPEAKER. Is there objection to the request of the gentleman from Indiana?

There was no objection.

PERMISSION TO COMMITTEE TO SIT DURING SESSION OF HOUSE TODAY

Mr. SIMPSON of Illinois. Mr. Speaker, I ask unanimous consent that the Subcommittee on Foot and Mouth Disease of the Committee on Agriculture be allowed to sit this afternoon during the session of the House.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

EXTENSION OF REMARKS

Mr. ARNOLD asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

Mr. BOGGS of Delaware asked and was given permission to extend his own remarks in the Appendix of the RECORD.

NEED FOR SCRAP IRON

Mr. PATTERSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. PATTERSON. Mr. Speaker, I wish to call to the attention of the Members of the House a situation of grave concern to all of our citizens. At the present time, there is a tremendous shortage of pig iron in this country—such shortage resulting from increased use of this commodity because of the lack of steel scrap available for melting. Furnaces producing pig iron have diverted almost their entire output to steel companies, thus forcing out of the market foundries which have been, in the past, producing the necessary castings and parts to keep our industrial machine running.

I contend that this situation has become serious enough to warrant action along the lines of a Nation-wide scrap drive. I believe that we in America, who did so well in this respect to aid in our total production for war, should again be asked to participate in a project of this kind so that our postwar needs might be more adequately filled. There is available in practically every city of Europe tremendous quantities of the scrap resulting from military destruction. Harbors, fields, and streets of Europe are cluttered with broken implements of war which might well now be utilized to be bent into the plowshares necessary for peace.

In the New England area alone, a goodly percentage of the foundries now engaged in production of parts from pig iron are readying plans for either partial or complete curtailment of production facilities. The situation is a truly serious one and could very easily result in the unemployment of thousands upon thousands of workers not only in these factories but in the industries dependent upon these suppliers for the manufacture of their own appliances. The factors entering into this current shortage are of great diversification and I intend to make a more complete study to ascertain whether or not our exports of pig iron to foreign countries are, in part, responsible for our shortage at home. There can be no justification for the export of material necessary to maintain our industrial life line here in America.

I ask that the Congress consider very seriously the question of recommending to our people here at home, and to our own military government and allies abroad, that they use every concerted effort to gather in available steel scrap so that this situation might be alleviated to some degree. The problem is one of tremendous significance and should be faced squarely now by the administrative agencies of our Government, as well as by the Congress so that some remedial action may be taken before a complete shut-down of our production facilities is an actuality.

LABELING OF FERTILIZER SHIPPED IN INTERSTATE COMMERCE

Mr. LEMKE. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. LEMKE. Mr. Speaker, during the first sessions of this Congress, I introduced a bill, H. R. 869. I introduced a similar bill in two previous sessions. This bill, if passed, would require the manufacturers to label as to its contents fertilizer shipped in interstate commerce.

For some reason I have not been able to get a hearing on this bill. Of course, the Fertilizer Trust is opposed to it. That goes without saying. They have not only circularized Congress but the Nation against this bill. The question is, "Why?" You can guess.

This bill requires the shipper to print on, or affix to each bag, package, or container, a statement showing the different kinds of materials, and the percentage of each contained in such fertilizer. This act is similar to the Pure Food and Drug Act, the Whisky Act, and the Wool Labeling Act.

Surely no honest manufacturer can object to letting the farmers know what he is selling to them. We talk about long-range agricultural programs, and short-range programs, but in reality have overlooked many of the vital things agriculture is interested in.

We are confronted with a serious shortage of nitrogen in this country, and

we are shipping some of our limited supply to the war-stricken peoples of Europe to help them grow the necessary food crops.

In order to conserve our supply of nitrogen, I am in favor of returning to the methods of making fertilizer that were in vogue in other years, when the farmers grew good crops with considerably less fertilizer per acre, and were not plagued with the plant diseases that give them so much trouble today.

In those days the farmers grew good crops with 30 to 40 percent less fertilizer per acre than they are using today.

In fact, the cotton that clothed the Nation, the corn grown in the South, the Middle Atlantic, and some of the northern States, and the tobacco that made R. J. Reynolds and Buck Duke rich, was grown with fertilizer made this way.

The methods of making fertilizer have undergone radical changes during the past 25 years, and this has been costly and hurtful to the farmers.

During this period the manufacturers have cheapened the quality of fertilizer from time to time by using more and more of the cheap water-soluble sources of nitrogen, and less and less of the organic sources of nitrogen.

Prior to the time these formula changes were made, only one-third of the nitrogen had been obtained from water-soluble sources and two-thirds from organic sources.

Federal and State plant pathologists recommended these proportions, and it was generally believed that one-third of the nitrogen from quickly soluble sources was as much as the plant could take up before some of it was washed in the soil water beyond the reach of the plants.

It was also believed that two-thirds of the nitrogen from organic sources was needed to give the plant a healthy growth and feed it to maturity.

As the manufacturers began to increase the water-soluble nitrogen content of the fertilizer, and to use less of the organic sources of nitrogen, the farmers found it necessary to use more and more fertilizer per acre in order to get enough organic nitrogen to give the plants a healthy growth.

When the manufacturers found that the Federal and State plant experts offered no objection to these formula changes, they became bolder and actually secured the removal from the State laws of some of the restrictions that were necessary for the protection of the farmers.

These rewritten State laws permitted the manufacturer: First, to increase the nitrogen content of the fertilizer 21 percent; second, to remove from the bags what were known as source tags which told the farmers what materials had been used in making the fertilizer; and third, to use almost unlimited proportions of the cheap water-soluble sources of nitrogen without letting the farmers know that this was being done.

The use of so little of the organic sources of nitrogen forced the farmers to use at least 30 percent more fertilizer per acre in order to get enough organic nitrogen to feed the crops to maturity.

The use of so much of the water-soluble sources of nitrogen resulted in an extensive spread of destructive plant diseases that had never plagued the farmers prior to the time these radical formula changes were made.

The losses to tobacco growers resulting from the ravages of blue mold, and black shank, run into millions of dollars each year, and the tomato and potato blights have done much damage to garden and truck crops.

Men of such eminence as Sir A. D. Hall, M. A., and Fellow Royal Society, London, England, and Lyon and Buckman, Cornell University, had discovered long ago the harmful effects on the crop of too much nitrogen—particularly soluble nitrogen.

Hall said that high nitrogenous manuring made all plants more susceptible to disease, and Lyon and Buckman said that an excess of soluble nitrogen would result in harmful effects on the crop, and decrease the plant's resistance to disease.

You are no doubt aware of the fact that 102 fertilizer firms and individuals were indicted in the District Court of the United States for the Middle District of North Carolina for violations of the Sherman Act, and for having exerted an undue influence on State lawmakers and State commissioners of agriculture.

The defendants admitted their guilt, and paid over a quarter of a million dollars in fines, but they are still exerting an undue influence.

Robert M. Salter, Chief of the Bureau of Plant Industry, made a surprising suggestion to the fertilizer industry in a speech that he delivered at their convention at Hot Springs, Va., on June 25, 1946.

This is what he said:

> Probably you can spend a little more money advantageously in subsidizing research on special problems through fellowships and grants to States. A little financial oil applied to the squeaks in the research machinery often produces surprisingly good results.

A subsidy places the recipient of the funds under obligations to the donor, and I think it ill behooves a branch of the Federal Government to accept gifts of money from men who have violated the Sherman Act and have exerted undue influence on some State officials.

I hope the Committee on Agriculture will find the facts, and let the Congress have the benefit of its conclusions at the earliest possible moment.

We cannot afford to temporize with a matter of such vital concern to the farmers, gardeners, and truck growers of the Nation.

The enactment of my bill would enable the farmer to know whether he was spending his money for such good materials as blood, fish scrap, animal tankage, and cottonseed meal, or for such inferior materials as leather scraps, hair, wool waste, and feathers.

It would prevent the use of coloring matter and enable the farmer to know whether the fertilizer contained harmful proportions of the cheap soluble sources of nitrogen.

The facts that I have cited lead me to believe that a properly made fertilizer would enable the farmers to grow better crops with 30 percent less fertilizer per acre, and would probably be helpful in the prevention of plant diseases.

A 30-percent reduction in the farmers' expenditures for fertilizer in 1946 would have saved the farmers $156,300,000.

The constitutional guaranties of equal protection under laws clearly place on the Federal Government the duty to see that all fertilizer that moves in interstate commerce is honestly labeled.

Congress has enacted laws for the protection of the purchasers of food, drugs, woolen goods, and whisky, and justice requires that the farmer be given the same information and protection.

EXTENSION OF REMARKS

Mr. SCRIVNER asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial.

ERP! WHOSE PLAN IS IT?

Mr. SCRIVNER. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include copies of two letters.

The SPEAKER. Is there objection to the request of the gentleman from Kansas?

There was no objection.

Mr. SCRIVNER. Mr. Speaker, early in June 1947 the Secretary of State made a short speech of about 1,200 words at Harvard University. Possibly he, as well as many others, was surprised when the radio, press, and administration spokesmen called it the Marshall plan or Marshall doctrine.

After several days of this publicity I began to receive letters seeking information regarding this so-called Marshall plan. To get first-hand information I addressed a letter to Secretary Marshall on July 9, 1947, which read as follows:

> In order that I may have a clear conception of the proposed program and be better prepared to answer many inquiries relative thereto, I would appreciate your furnishing me a concise statement, in easily understandable language, of just what the Marshall doctrine is. Particularly I would like to know:
>
> 1. When and by what authority was the proposal made?
>
> 2. What does it propose to do?
>
> 3. What obligations have already been made under it?
>
> 4. If adopted, what further obligations will this country be expected to assume?
>
> 5. What control will this Government have as to commitments which would become a charge against American taxpayers?
>
> 6. When will our Government cease to be financially responsible for the program (a) as to any one of the participating countries? (b) as to all European countries covered by the program?
>
> An early response will be appreciated.

One would expect an immediate reply if a plan had really existed. Three weeks passed before I had any response.

Mr. Speaker, you can see for yourself a surprising statement which confirmed the idea many had of the nonexistence of any plan, for the Secretary said: "It is neither a doctrine nor a plan."

It is to be noted that the Secretary, in the last paragraph of his letter, quoted below, calls attention to the fact that they—the European nations—were then talking in terms of a 4-year program:

DEPARTMENT OF STATE,
Washington, July 29, 1947.

DEAR MR. SCRIVNER: Your letter of July 9 asking for a statement on the Marshall doctrine undoubtedly refers to the speech I made at the commencement exercises at Harvard University on June 5, 1947. I enclose a copy of the speech which discussed the critical economic situation in Europe and emphasized the importance to this country of having it improve. The speech contained a suggestion to the countries of Europe that additional American aid depends, however, upon agreement among as wide a group of European countries as possible on their requirements and on what they can do in their own behalf. The speech also suggested that any assistance the United States might extend in the future should provide a cure for Europe's disordered economy rather than a palliative.

These suggestions constitute neither a doctrine nor a plan. They were made by me under my authority as Secretary of State, responsible to the President, and subject to the laws and Constitution of the United States in conducting the foreign affairs of this country. Although no specific obligations have been assumed under them, the suggestions involve a moral obligation in our own interest to do what we can to help Europe carry out any general program it develops.

What particular obligations may be assumed by the United States in the future, I am unable to say. We stand at a turning point in our relations to our traditional friends among the nations of the Old World. Either we must finish the task of helping them adjust to the changed demands of the new age, or be reconciled to seeing them move in directions not consistent with our traditions and with consequent far-reaching implications for our future prosperity and security. However, when the 16 European countries which have just met in Paris complete their present study of their requirements and the extent of their own ability to meet them, Congress will have the challenging opportunity to make the vital decision on what obligations the United States can assume. It is expected that the studies of the European countries will be forwarded to this Government about September 1, 1947, but they will be carefully examined by the interested agencies of the Government before any proposals for legislative action are sent to the Congress by the President.

Through Congress this Government will have complete control over commitments which would become a charge against American taxpayers. As is well realized in Europe, the United States cannot be committed to any specific program of aid without congressional authorization and appropriation of funds.

Until a program is completed and Congress has determined the participation of this country in it, a definitive answer to your question regarding when our financial responsibility in the program would end is not possible. While it is purely a reflection of their own thinking, you may be interested to know, however, that a number of the European countries are talking in terms of a 4-year program.

G. C. MARSHALL.

Although the President's message on the $590,000,000 interim-aid bill hinted that a long-range program was being developed, the first statement approaching a definite program was the President's message on European relief. This message of December 18, 1947, presented the proposed European recovery program—ERP—in detail; in so much detail, with the exhibits, it is almost beyond assimilation.

The Harvard speech of Secretary Marshall bears the earmarks of offhand remarks prepared somewhat in haste to meet a dead line for a speaking engagement to which little importance was attached. If we knew the author of the speech, we might learn the source of the idea for it, which may cost American taxpayers billions of dollars and possibly the return to wartime controls.

Is it any wonder that the question is often asked, "Whose plan was it?"

Can we be blamed for looking at some of these proposals with skepticism?

Despite Secretary Marshall's ultimatum to a Senate committee that it was the European recovery program as presented or nothing, attention should be called to his letter in which he recognized the position the Congress occupies. What could have changed his views in the 5 or 6 months between the time he wrote the letter and his appearance on the Hill?

Have the American people forgotten that President Truman's plea for Greek-Turkish aid was based on the need for seeds, fertilizer, food, fuel, clothing, medical supplies and medical aid, with only a passing reference to the military? The relief asked was based on those needs. We find now that practically all of the aid to Turkey and the greater portion of funds allotted to Greece went for military aid—something not disclosed in the President's message. Have they forgotten that Congress was told that only a few military advisers would be sent to Greece, and those only to supervise the use of financial and material aid in the tasks of reconstruction?

I would like to have the answers to many questions, but right now especially to these:

First. When did the Marshall plan really come into being? It did not exist in June. There was no plan in July, or in September.

Second. If the plan itself was not formulated until November or December, what was behind the Marshall plan ballyhoo which began in June?

Third. Whose idea is or was it?

Fourth. What is its real purpose?

Fifth. Was it proposed as a face-saving measure because someone did not carefully weigh the import and impact of his words?

Sixth. Will it, too, as did the Greek-Turkish aid, call for more than is now suggested?

Seventh. What program of self-help has been adopted in Europe for which our support is supposed to be needed?

Eighth. And how far can we go in helping Europe without increasing our own troubles, especially our high food costs?

With these questions answered honestly, directly, concisely, and simply, many of us could more soundly form our opinions as to the merits of the various versions of the proposed program.

Incidentally, Mr. Speaker, you can bet your bottom dollar—and this is not speculation, being a certainty—that after the present bill to authorize ERP gets under way the Congress will be faced with a similar proposal for Japan, Korea, and other far eastern countries.

EXTENSION OF REMARKS

Mr. TWYMAN asked and was given permission to extend his remarks in the RECORD and include an article appearing in the Reader's Digest.

Mr. PHILLIPS of California asked and was given permission to extend his remarks in the RECORD and include a letter.

HARMONY

Mr. CARSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Ohio?

There was no objection.

Mr. CARSON. Mr. Speaker, harmony is what the world needs today. The problem is how to get it. We hope the United Nations can achieve it. There is one group that I know, and to which I belong, in which complete harmony prevails. This is an international organization known as the Society for the Preservation and Encouragement of Barber Shop Quartet Singing in America, Inc.

Currently this organization fosters fellowship and harmony through nearly 400 chapters with some 22,000 members in the United States and Canada. Founded 10 years ago in Tulsa, Okla., the society will hold its 1948 tenth annual international convention and quartet contest, June 10, 11, and 12, at Oklahoma City. If only harmony such as this could prevail in other international assemblies what a fine world this would be.

A love of harmony, musical and otherwise, is an attribute of many Members of this body. Some of us who belong to the SPEBSQSA are arranging to give this harmony an outlet in the form of a congressional quartet night, to be held at the Hotel Statler next Friday evening, January 30, at 8 p. m. How fine it would be if we could gather that evening and lift our voices in a blending of song together and set an example of harmony to the Nation. Keeping America singing is a noble aim. A nation that can do this will retain its balance and sanity and not go wrong. It will do us good to swell our voices in song together and seek that harmony that characterizes a close barber-shop chord. All Members of Congress are invited as well as their staffs.

THE OIL SITUATION IN NEW ENGLAND

Mr. NICHOLSON, Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. NICHOLSON. Mr. Speaker, this morning I received word that there are in my district cities, towns, and villages that are without oil. The surest way I know of to make a man a Communist is

to have either his father or his mother freeze. Now, I realize that as a new Member I cannot do anything about it, but I further realize that there are in this body strong, intelligent, and serious-minded men who know what to do. As far as I am concerned, from now on I am an isolationist; I always was one anyway, but I am getting stronger and stronger all the time, and you can talk about your Marshall plan and the other plans in the world to help out these Europeans. Well, who wants anybody here to freeze? Am I my brother's keeper? Yes, I am. Well, what is he going to do when I freeze? Now, then, there is a place here in this Congress—I do not know where it is, I am a new Member and I have too much to learn—but I know that somewhere in this picture here we can say, "Do not send another drop of oil to anybody as long as our people are freezing."

FISH STORY

Mr. GAVIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GAVIN. Mr. Speaker, this morning I want to tell a fish story.

After wading through correspondence day after day, letter after letter, on rent control, tax reduction, universal military training, reducing the budget, cutting the Federal pay roll, the Marshall plan, the Taft-Hartley law, housing, agricultural programs, reciprocal trade treaties, and what not, I thought this letter from my good Waltonian friends up in Pennsylvania—those great friends of wildlife, clean streams, and the great outdoors—was indeed a somewhat different and refreshing approach from the many requests made of us. It reads as follows:

FRANKLIN, PA., *January 20, 1948.*

Hon. LEON H. GAVIN,
Washington, D. C.

DEAR MR. GAVIN: Greetings, salutations, and best wishes from Franklin chapter, Izaak Walton League of America. It is the pleasure of this chapter that I write you requesting your assistance in securing Federal fish, most any kind available, for stocking local streams. In these times, with the fate of this Nation and the world itself in the balance, such request may appear, to you, most irreverent; but, while we fully realize the gravity of present-day conditions, and daily pray for the better guidance of great and small alike, we also believe that all must go ahead with plans for what, we do trust, will be a better, brighter, and more peaceful world for the future.

Believe-it-or-not for Congressman LEON H. GAVIN from Franklin chapter, Izaak Walton League of America:

We do not ask for tax relief, no, that is not our wish
We only ask, with all respect, can you get us any fish?

With all best wishes from Franklin chapter,
Very truly yours,

R. E. ELLIOTT,
Chairman, Fish and Game Committee, Franklin Chapter, IWLA, Franklin, Pa.

EXTENSION OF REMARKS

Mr. MACKINNON asked and was given permission to extend his remarks in the RECORD and include a letter.

Mr. BRADLEY asked and was given permission to extend his remarks in the RECORD in two instances and include two resolutions.

Mr. HESELTON asked and was given permission to extend his remarks in the RECORD and include a portion of a speech.

Mr. EDWIN ARTHUR HALL asked and was given permission to extend his remarks in the RECORD and include a radio address.

PERMISSION TO ADDRESS THE HOUSE

Mrs. ROGERS of Massachusetts. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks and include a brief description of Dr. Paul Magnuson.

The SPEAKER. Is there objection to the request of the gentlewoman from Massachusetts?

There was no objection.

[Mrs. ROGERS of Massachusetts addressed the House. Her remarks appear in the Appendix.]

FUEL SHORTAGE

Mr. HESELTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Massachusetts?

There was no objection.

Mr. HESELTON. Mr. Speaker, this morning the House Committee on Interstate and Foreign Commerce started its hearings on the results of its recommendations December 19. The Under Secretary of Commerce, Mr. Foster, was present and testified. Many interesting things developed. There will be further developments. But there is one thing to which I call your attention because, again, I am interested that you should be forewarned against what I think is going to be a blizzard of correspondence you will have to answer.

Late yesterday afternoon the gentleman from New Jersey [Mr. WOLVERTON] called my attention to a picture which appeared in one of his papers. On arriving home last night I found to my amazement that my own local newspaper, the Greenfield (Mass.) Recorder-Gazette, had it on its front page also. You had better check your papers and see whether it is not on their front pages too.

It has a headline "Milk for Europe's children and oil for Russia." There are two ships pictured. An arrow points to one ship and it bears the notation "Oil for Russia." Another arrow points to the other ship and it bears the notation "Milk for Europe." The legend underneath the picture reads:

Prepared to sail from San Diego, Calif., with a precious cargo for the hungry children of Europe is the California good-will milk ship, *Golden Bear* (right). In sharp contrast is the steamship *Kohlozonick* (left), which flies the Russian flag and is being loaded with hundreds of drums of transformer oil for the Soviet machines. Colorful ceremonies, in which 5,000 took part, marked the milk ship's sailing.

I asked Mr. Foster when this had occurred. He said, "That must have been last spring. There has been no shipment of that sort since June 30." I then asked International News Service to find out when the picture was taken. I received a message just before we recessed advising me the picture was taken in San Diego harbor on January 22, 1948.

I informed Mr. Foster and the committee of that and also advised that the American Petroleum Institute had reported to the committee staff, upon my request, that—

Transformer oil or transil oil is used in electric transformers and electric oil switches to submerge electric elements to provide a cooling or spark-quenching medium which is an insulator; that it is very sensitive oil and must be handled with great care to avoid contamination as it must not have any moisture in it.

It is my recollection that Mr. Foster stated, in substance, that such oil was not under the control exercised by the Department. If I am incorrect in that, I will make the proper correction as soon as I can obtain the transcript of the hearing.

I shall certainly tell Mr. Foster, as well as Mr. Harriman, that, in my opinion, such oils should be promptly included. Certainly the use of electric transformers in the manufacture of machinery and other items is well known to all of us.

TRANSPORTATION IN ALASKA

Mr. WOLVERTON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

Mr. WOLVERTON. Mr. Speaker, I am submitting today a report of the Committee on Interstate and Foreign Commerce on transportation in Alaska. This report is made in connection with the national transportation survey which the committee has been making with a view to recommending legislation on a national transportation policy. Certain preliminary reports on the survey already have been issued and others will be forthcoming as they deal with broad aspects of this vital subject. The committee feels, however, that by reason of the immediate significance of special transportation problems in that great Territory relating both to the development of the country and to the national defense, an interim report on the Alaskan situation is extremely timely.

In some 50 pages of critical analysis and important exhibits relating to all forms of territorial transportation, the committee thus presents the first all-inclusive report on Alaska transportation since 1913.

The committee is tremendously impressed through its study and examination of the importance of promptly improving and enlarging the transportation facilities of the Territory.

As part of a program to promote the necessary transportation expansion the committee offers seven specific conclusions and recommendations on each form of transportation and looking to the creation of a coordinating Alaskan Transport Authority.

Mr. Speaker, in the report on transportation in Alaska, the Committee on Interstate and Foreign Commerce recommends the creation of an Alaskan Transport Authority to administer a comprehensive and integrated transportation program for the Territory. This, it feels, is the first requirement in assuring the transportation development so manifestly needed.

The report points out that rail, air, highway, water, and pipe-line facilities are almost entirely financed by Federal, not private, funds, and calls attention to the competition among and the unconnected programs of the various agencies now responsible for different kinds of transportation. It states "that a thoroughly thought-out and comprehensive approach to the sponsorship required to maintain and expand all Alaskan transportation facilities is called for. This is desirable in the interest not only of intelligent and efficient expenditure of Federal funds, but also in most successfully achieving the adequate, reasonable, and continuous transportation service essential to that great Territory."

Stressing the importance of transportation to the development and settlement of the Territory and for provisions for national defense, the committee states that it has been tremendously impressed with the "importance of promptly improving and enlarging the transportation facilities of the Territory." The report blocks out six other specific recommendations of steps which should be taken immediately as part of a program to promote this necessary expansion:

First. Construction of the required civil airport facilities at the cities of Anchorage and Fairbanks, and enlargement within the Territory of other necessary aids to air navigation.

Second. Substantial improvement of the existing highway system and its material expansion by some of the routes indicated.

Third. Assurance of adequate and uninterrupted coastal water communications with the States and within the Territory.

Fourth. Rehabilitation of the Alaska Railroad generally as projected, but a review by the departments and committees concerned of the entire railroad picture.

Fifth. Establishment of a system of accounts for the Alaska Railroad which would offer opportunity for correct analysis of the financial operations of the road.

Sixth. The construction and rehabilitation of pipe-line facilities.

The report is frankly critical of the success of the past rail and highway programs in developing the Territory. It points out that in fact until the recent communication afforded by the airplane, the Territory in terms of both population and commerce was declining. Saying that "aviation is destined to remain dominant in the transportation system of Alaska" the report supports pending legislation for the construction of additional air facilities. Adequate air facilities are necessary not only since the airplane offers accessibility to places not otherwise easily reached and the airplane in Alaska is competitive economically with other forms of transportation, but also owing to considerations of national defense.

The one principal highway artery was not accompanied by any connecting road system until the war period. This the report states should be promptly enlarged, with specific roads immediately constructed.

While indicating that the difficulties in coastwise maritime operations and connections with the States are partly understandable owing to prewar decline in volume of civilian traffic and seasonal character of the trade, the report states immediate consideration must be given to providing adequate and uninterrupted service at reasonable rates.

The Alaska Railroad, the report finds, has not been operated best to induce expansion of the Territory with rates much too high. While the continued civilian traffic would not appear to warrant the current $50,000,000 rehabilitation program, this appears necessary for defense purposes. On such basis the report concludes that the future rate structure should be adjusted so that military, not civilian traffic, bears the burden of the project improved to standards necessary to support the military tonnage.

The accounting for railroad operations, the report also finds is not such as to give a clear picture of costs. Depreciation on the investment is not taken, nor any consideration given to a reasonable return on the investment. Indeed, if a reasonable rate of interest were assumed and depreciation taken, the $50,000,000 rehabilitation program would represent far more than the discounted present value of the operating savings claimed possible by this expenditure.

The importance of petroleum traffic is stressed in the report's recommendation of immediate construction of pipeline facilities. While acknowledging that the loss to the railroad of this tonnage would be significant, it is urged that this should mean only reconsideration of the railroad program. Indeed, the report recommends such reconsideration in any case owing to the location of new military installations. The suggestion is made for rail, pipe line, and highway facilities directly into the interior of Alaska from points east of the present railroad location.

In view of the current and anticipated petroleum shortages, the report is sharply critical of the conversion of railroad motive power from steam, with coal locally procurable, to Diesel-electric. The flat recommendation is made that all such conversion cease until a complete review has been made of the American and Alaskan petroleum situation.

THE OIL SITUATION AND THE MARSHALL PLAN

Mr. MILLER of Nebraska. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. MILLER of Nebraska. Mr. Speaker, during the last 10 days we have heard cries of anguish in the well of the House relative to the shortage of oil in the East and that people are cold. Well, I feel sorry for you folks in the East who are cold. I feel sorry for such people wherever they are when they are cold or hungry. It is interesting to note that my colleagues who are complaining so bitterly about the lack of oil have been speaking for the Marshall plan and in the past have supported these hand-outs. Do you realize that the Marshall plan calls for the shipment out of this country of huge quantities of coal and oil? Do you know that? Do you know that at the present time all our exports are about $1,000,000,000 more per month than our imports? How long do you think that we can continue shipping vital supplies out of this country which are needed at home and not get in trouble ourselves, especially when we do not have a promise of a fair return for what we export? Think that over. If you are cold in the East and need oil, think about not only oil but the lumber, steel, grains, and other vital products being exported. We need those materials at home—inflation is more money than goods, the cure is more goods than money—its simple but true. I just cannot have too much sympathy for you who are crying about being cold and who are still going to vote for the Marshall plan. The administration now has all the power needed to stop these exports. They are not doing it. Why? The administration has the power to put powerful brakes on inflation. It is not being done. Can anyone answer why?

EXTENSION OF REMARKS

Mr. CHURCH asked and was given permission to extend his remarks in the RECORD in three instances and to include three separate quotations.

THE BARD PLAN

Mr. CHURCH. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Illinois?

There was no objection.

Mr. CHURCH. Mr. Speaker, yesterday I introduced H. R. 5143, which I desire to designate as the Bard plan. One of my leading constituents, Mr. F. N. Bard, recently testified at length before the Committee on Ways and Means, and this bill represents his suggested revision of our present revenue laws. Congress has lent a very attentive ear to any proposals designed to increase production, increase employment, and decrease costs. Committee hearings and committee work have been energetically directed to this end.

The first requisite to increased production, increased employment, and lower prices is adequate capital to carry

on these activities, provide new machinery, and add increased inventories.

The largest employers of labor and white-collar workers in this country are the proprietors and partnerships scattered throughout the Nation in the smaller and larger cities. There are 8,000,000 of them. They produce considerably more tax revenue percentagewise than the corporations do. Proprietorships and partnerships are now treated by income-tax laws as individuals; no recognition is given to the fact that they are conducting their business with their venture capital just as the corporations are. Any proprietor getting a return over $5,000 a year begins to pay a higher tax than corporations pay, and the rate of increase is very rapid. A proprietor earning over $200,000 pays in the 85-percent bracket, retaining only 15 percent for his personal expenses, business losses, expansion, and so forth. It takes $10,000,000 worth of sales at 10 percent profit to earn $150,000, and this is a gross injustice and thoroughly unfair. A corporation on the same sales would retain approximately $620,000.

H. R. 5143, which I am including with my remarks, provides, in effect, that proprietors and partners may elect to separate their venture from their investment capital, keep a separate set of books on their business operations, and pay the corporate tax just as the corporations do.

There are many reasons why certain men prefer to operate as proprietors and partners, and they should be privileged to do as they please. That is the American way. All tax authorities agree that no man should be penalized by taxes because of his choice of a method of doing business.

These 8,000,000 proprietors and partners are industrious, hard-working citizens—taxpayers and voters. They are entitled to the utmost consideration by Congress, and if their tax relief is granted, the increased volume of business which they will produce will probably result in no loss in tax revenue. There will be a great loss in tax revenue because of the inability of these men to continue in business if the tax relief is not granted.

The bill referred to is as follows:

H. R. 5143

A bill amending the Internal Revenue Code to provide an alternative tax, at the election of the taxpayer, on income derived from an unincorpoated business

Be it enacted, etc., That chapter 1 of the Internal Revenue Code (relating to income tax is hereby amended by inserting after section 15 the following new section:

"SEC. 16. Alternative Tax on Income Derived From Unincorporated Business.

"(a) Definitions: As used in this section—

"(1) Unincorporated business: The term 'unincorporated business' means any trade or business (other than a trade or business which if incorporated by its owners or owner would be a 'personal holding company' as defined in section 501 or a 'personal service corporation' as defined in section 725) which is regularly carried on by one or more persons either individually, as a partnership, or through the medium of a trust, and is not otherwise taxable as a corporation under this chapter.

"(2) Unincorporated business net income: The term 'unincorporated business net income' means the excess of the income (exclusive of dividends and interest) from such trade or business or from any property or funds used in or held for use in such trade or business, over the deductions allowed by this chapter, which are attributable to the carrying on of such trade or business or to any property or funds used in or held for use in such trade or business.

"(b) Imposition of alternative tax: If for any taxable year a taxpayer has unincorporated business net income, there shall be computed, in lieu of the tax imposed by sections 11 and 12, a tax determined as follows:

"(1) A partial tax shall be first computed under sections 11, 12, and 117 upon the net income of the taxpayer reduced by an amount equal to the taxpayer's share of 100 per centum of the unincorporated business net income of such trade or business at the rates and in the manner as if this subsection had not been enacted.

"(2) A partial tax shall be computed under sections 13, 14 (a) and (b), and 15, on 100 per centum of such unincorporated business net income in the same manner, at the same rate, and with the same credits, deductions, exclusions and exemptions as if 100 per centum of such unincorporated business net income was the net income of a trade or business operated as a corporation during the taxable year.

"(3) The tax under this section shall be the sum of the partial tax computed under paragraph (1) plus the taxpayer's pro rata share of the partial tax computed under paragraph (2).

"(4) The tax under this section shall be levied, collected, and paid in lieu of the tax imposed by sections 11 and 12 if and only if the tax of the taxpayer to whom a pro rata share of such unincorporated business net income is otherwise taxable computed under this section, shall be less than the tax of such taxpayer computed without regard to this section.

"(c) Filing of statement: The alternative tax imposed by this section shall not be applicable unless the taxpayer shall, at the time of filing a return under section 51, submit a statement showing the following:

"(1) The name under which such trade or business is carried on and the taxpayer or taxpayers to whom the income therefrom is otherwise taxable under sections 11 and 12.

"(2) A schedule showing the property and funds used in or held for use in such trade or business, and the reserves and liabilities applicable thereto.

"(3) The amount of the tax computed under this section."

SEC. 2. The amendment made by this act shall be applicable with respect to taxable years beginning after December 31, 1947.

THE HIGH COST OF LIVING

Mr. GROSS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. GROSS. Mr. Speaker, we hear a lot about the high cost of living, but evidently it is going to get higher. A farmer writes me this morning, a neighbor of mine, and he says we are now paying wholesale for bran $102 a ton, middlings $103, soybean meal $125, ground oats $109 a ton—meat scraps off the market. Heavy whole oats are quoted at $1.77 a bushel. The price paid for corn delivered to warehouse, $2.75 a bushel. Wholesale laying mash price $117 to $120 a ton. Five days ago he says he received 53 cents a dozen for large white eggs. They are now quoting them at 48 and 49 cents a dozen.

Now there is no question about the cost of living getting higher and if we continue to send grain abroad, the dairy cows will go to market faster than ever. And when I think that the Department of Agriculture is recommending that the farmers put three chicks in for every one they sell so that we will have plenty of eggs next fall, it seems to me that the Department of Agriculture is just what they have always said it to be, filled up with a lot of fellows who just do not know. It ought to be brought back into Washington where it belongs and trimmed down to buttonhole size. These farmers ought to be left alone. If we do not do that, this country is going to be not only cold, but is going to be just as hungry as the people in Europe.

This farmer closes his letter by saying "and we do not want you to take our boys and put them in military training."

Had the Department of Agriculture stayed out of the poultry and eggs market the industry would have adjusted itself from time to time and we would not have the confusion, surpluses, and scarcities coupled with uncertainty as we have today.

EXTENSION OF REMARKS

Mr. BUCK asked and was given permission to extend his remarks in the RECORD and include a resolution.

Mr. CUNNINGHAM asked and was given permission to extend his remarks in the RECORD and include a letter from a constituent.

Mr. STEFAN asked and was given permission to extend his remarks in the RECORD and include a speech made by him before the American Road Builders' Association.

EXTENDING PROVISIONS OF STEAGALL AMENDMENT TO THE PRICE CONTROL ACT

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revised and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. MURRAY of Wisconsin. Mr. Speaker, yesterday I introduced bill H. R. 5131, to extend the provisions of the Steagall amendment to the Price Control Act, and the provisions of the LaFollette-Taft amendment to the CCC for an additional period of 2 years. This will extend the support program until December 31, 1950.

There are a few facts about this support program that should be presented at this time:

First. Support prices of 90 percent of parity are not high prices.

Second. While the administration of this support program is open to much justified criticism, that is not the fault of the law. The criticism is a result of very undesirable administration. For example, the placing of 165 percent of parity floor on one farm product and

allowing other farm products to sell for 50 to 60 percent of parity is the result of faulty administration of the law.

Third. The enactment of H. R. 5131 will take the question of a support program out of partisan politics and neither party will be called upon to place the support program in their platforms.

Fourth. Since 40 percent of the manufactured goods are purchased by the rural people, a support program even if only 90 percent of a fair price will prevent a major deflation if the program is administered on the basis of common sense.

Fifth. This support program is the best insurance against a depression that can be suggested.

I feel sure that our colleague the gentleman from Michigan, Mr. JESSE WOLCOTT, chairman of the Banking and Currency Committee, will give this legislation every consideration.

The Steagall and La Follette-Taft amendments were and are the two most beneficial agricultural legislative acts that have been enacted into law in the past 20 years, and I hope the legislation will have the wholehearted approval of the Congress.

Some may say that this proposal to extend the support program was expected to be proposed. This bill will bring the question up for consideration at a time when due consideration can be given the legislation.

The bill referred to is as follows:

H. R. 5131

A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation

Be it enacted, etc., That section 8 (a) of the Stabilization Act of 1942, as amended (U. S. C., 1940 edition, Supp. V, title 50, sec. 968), is amended by striking out "before the expiration of the 2-year period beginning with the 1st day of January immediately following the date upon which the President by proclamation or the Congress by concurrent resolution declares that hostilities in the present war have terminated" and by inserting in lieu thereof "on or before December 31, 1950."

SEC. 2. Section 4 (b) of the act entitled "An act to extend the life and increase the credit resources of the Commodity Credit Corporation, and for other purposes," approved July 1, 1941 (U. S. C., 1940 ed., Supp. V, title 15, sec. 713a–8), is amended by striking out "the expiration of the 2-year period beginning with the 1st day of January immediately following the date upon which the President by proclamation or the Congress by concurrent resolution declares that hostilities in the present war have terminated" and by inserting in lieu thereof "December 31, 1950."

SEC. 3. The first sentence of subsection (a) of section 7 of the act entitled "An act to extend the functions of the Reconstruction Finance Corporation for 2 years, and for other purposes," approved January 31, 1935, as amended (U. S. C., 1940 ed., Supp V, title 15, sec. 713), is amended by striking out "June 30, 1948" and inserting in lieu thereof "December 31, 1950."

SPECIAL ORDERS GRANTED

Mr. MURRAY of Wisconsin. Mr. Speaker, I ask unanimous consent that on next Tuesday I may address the House for 1 hour following the legislative business of the day in order that I may have the honor, privilege, and pleasure of giving the other side of the story so far as the question of oleomargarine is concerned.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. H. CARL ANDERSEN. Mr. Speaker, I ask unanimous consent that I may address the House for 30 minutes on next Tuesday following the gentleman from Wisconsin [Mr. MURRAY].

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

EXTENSION OF REMARKS

Mr. McDOWELL. Mr. Speaker, I ask unanimous consent that I may extend my remarks in the Appendix of the RECORD and include a citation given 5 minutes ago in Statuary Hall to Gen. EDWARD MARTIN, Senator from Pennsylvania, by the Veterans of Foreign Wars of the District of Columbia.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

Mr. ROONEY asked and was given permission to extend his remarks in the Appendix of the RECORD and include an article entitled "The Rights of Labor and Democracy Against Totalitarianism," published by the international labor relations committee of the American Federation of Labor.

Mr. CANNON asked and was given permission to extend his remarks in the Appendix of the RECORD and include therein an address by Hon. James A. Farley, before the National Foreign Trade Convention at the Hotel Jefferson, in St. Louis, Mo., on the timely subject of prospects for trade in the Far East.

Mr. WILLIAMS asked and was given permission to extend his remarks in the Appendix of the RECORD and include a statement by the commander of the Department of Mississippi Veterans of Foreign Wars.

Mr. BROOKS asked and was given permission to extend his remarks in the Appendix of the RECORD and include an editorial entitled "Let the Present Board Decide."

Mr. PRICE of Illinois asked and was given permission to extend his remarks in the Appendix of the RECORD and include a statement from the American Chamber of Commerce.

Mr. HUBER asked and was given permission to extend his remarks in the Appendix of the RECORD and insert a speech by William Doherty, president of the Letter Carriers' Association.

Mr. LARCADE asked and was given permission to extend his remarks in the Appendix of the RECORD and to include newspaper articles.

Mr. LANE asked and was given permission to extend his remarks in the Appendix of the RECORD in two instances, in one to include an address and in the other a newspaper article.

Mr. PHILBIN asked and was given permission to extend his remarks in the Appendix of the RECORD and to include an editorial.

THE OIL SHORTAGE EMPHASIZES NEED FOR PLACING ERP ON BUSINESSLIKE BASIS

Mr. SEELY-BROWN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Connecticut?

There was no objection.

Mr. SEELY-BROWN. Mr. Speaker, I listened with a great deal of interest to the statement made by the gentleman from Massachusetts [Mr. HESELTON] with regard to the critical fuel-oil shortage in New England caused by shipment of oil abroad. I also listened to the speeches critical of the Marshall plan that followed. As I listened to both these points of view it occurred to me that one thing is very apparent and that is that all of us in the United States Congress give real and serious consideration to the suggestions made by the gentleman from Massachusetts [Mr. HERTER], namely, that the entire European recovery program be put on a businesslike basis.

PERMISSION TO WAYS AND MEANS COMMITTEE TO FILE REPORT

Mr. KNUTSON. Mr. Speaker, I ask unanimous consent that the majority and minority members of the Committee on Ways and Means may have until midnight tonight to file their respective report and minority views on H. R. 4790.

The SPEAKER. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

PERMISSION TO BANKING AND CURRENCY COMMITTEE TO SIT DURING SESSION OF HOUSE TODAY

Mr. WOLCOTT. Mr. Speaker, I ask unanimous consent that the Committee on Banking and Currency may meet this afternoon notwithstanding the fact that the House may be in session.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

EXTENSION OF REMARKS

Mr. POULSON asked and was given permission to extend his remarks in the RECORD and include a newspaper article.

PARITY PRICE FOR CHICKENS AND EGGS

Mr. CURTIS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Nebraska?

There was no objection.

Mr. CURTIS. Mr. Speaker, why is it that the Department of Agriculture has failed to carry out a law as written by Congress? The farmers of the country have been guaranteed 90 percent of a parity for their products. The poultry raisers of the Middle West are receiving far less than 90 percent of a parity for chickens and eggs yet no move has been made by the Department of Agriculture to support the price.

It is my information that the parity price to farmers for chickens amounts to approximately 24.8 cents per pound, and on eggs 58 cents a dozen. Yet this is what a farm woman at Humboldt, Nebr., wrote in a letter to me dated January 20:

I am writing you in regard to the price of eggs. Why are the poultrymen completely ignored. I am not so young any more and my husband an invalid. I worked just as hard as I could last summer to raise a nice flock of chickens to help relieve the food shortage and for my pains am forced to sell eggs at 35 cents a dozen and corn selling at $3 a bushel, mash at $6.10 a hundred and I've borrowed $200 with which to buy feed. Had my chickens culled and received 13 cents a pound. If that isn't a disgrace, what is it? Unless something is done at once, there will soon be neither eggs nor chickens in the country and our own people will be going hungry. If more time were spent correcting such conditions and less at hatching up ways to ration food, we would all be better off.

This morning, Mr. Dent Holcomb, secretary of the Nebraska Poultry Improvement Association, wired me:

We urge you to support egg price to 90 percent parity. An emergency.

The Department of Agriculture has excused itself for not bringing about a rise in the price of poultry and eggs to the farmers of the Middle West by saying that the national average is already above 90 percent of a parity. Such a position is neither fair nor in accord with the previous practice of the Department of Agriculture. This Congress should insist that the present law be enforced and that these prices be supported.

Mr. Speaker, the support-price program inaugurated by the Congress has many fine features. It is this program that has made possible the loans on corn and wheat and other basic crops. The law authorizing these support prices expires December 31, 1948. I have introduced a bill to extend that program for two more years. The Congress should pass this legislation. The Congress should also demand that the Department of Agriculture take action at once under the existing law to carry out the intent of Congress in respect to poultry and egg prices.

EXTENSION OF REMARKS

Mr. LODGE asked and was given permission to extend his remarks in the RECORD and include an article in reference to Bridgeport, Conn.

Mr. KEATING asked and was given permission to extend his remarks in the Appendix of the RECORD regarding the constitutionality of the so-called Herter bill.

CERTIFICATES OF COMPETENCY TO CERTAIN MEMBERS OF THE OSAGE INDIAN TRIBE

Mr. D'EWART. Mr. Speaker, at the request of the gentleman from California [Mr. WELCH], chairman of the Committee on Public Lands, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 3326) to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes, with Senate amendment thereto, and concur in the Senate amendment.

The Clerk read the title of the bill.

The Clerk read the Senate amendment, as follows:

Page 1, line 3, strike out "upon request of the Indian."

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Senate amendment was concurred in.

A motion to reconsider was laid on the table.

RIGHTS-OF-WAY THROUGH RESTRICTED OSAGE INDIAN LAND

Mr. D'EWART. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 3322) to facilitate rights-of-way through restricted Osage Indian land, and for other purposes, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Strike out all after the enacting clause and insert: "That the Secretary of the Interior be, and he is hereby, empowered to grant rights-of-way for all purposes, subject to such conditions as he may prescribe, over and across any lands now or hereafter held in trust by the United States for individual Indians or Indian tribes, communities, bands, or nations, or any lands now or hereafter owned, subject to restrictions against alienation, by individual Indians or Indian tribes, communities, bands, or nations, including the lands belonging to the Pueblo Indians in New Mexico, and any other lands heretofore or hereafter acquired or set aside for the use and benefit of the Indians.

"SEC. 2. No grant of a right-of-way over and across any lands belonging to a tribe organized under the act of June 18, 1934 (48 Stat. 984), as amended; the act of May 1, 1936 (49 Stat. 1250); or the act of June 26, 1936 (49 Stat. 1967), shall be made without the consent of the proper tribal officials. Rights-of-way over and across lands of individual Indians may be granted without the consent of the individual Indian owners if (1) the land is owned by more than one person, and the owners or owner of a majority of the interests therein consent to the grant; (2) the whereabouts of the owner of the land or an interest therein are unknown, and the owners or owner of any interests therein whose whereabouts are known, or a majority thereof, consent to the grant; (3) the heirs or devisees of a deceased owner of the land or an interest therein have not been determined, and the Secretary of the Interior finds that the grant will cause no substantial injury to the land or any owner thereof; or (4) the owners of interests in the land are so numerous that the Secretary finds it would be impracticable to obtain their consent, and also finds that the grant will cause no substantial injury to the land or any owner thereof.

"SEC. 3. No grant of a right-of-way shall be made without the payment of such compensation as the Secretary of the Interior shall determine to be just. The compensation received on behalf of the Indian owners shall be disposed of under rules and regulations to be prescribed by the Secretary of the Interior.

"SEC. 4. This act shall not in any manner amend or repeal the provisions of the Federal Water Power Act of June 10, 1920 (41 Stat. 1063), as amended by the act of August 26, 1935 (49 Stat. 838), nor shall any existing statutory authority empowering the Secretary of the Interior to grant rights-of-way over Indian lands be repealed hereby.

"SEC. 5. Rights-of-way for the use of the United States may be granted under this act upon application by the department or agency having jurisdiction over the activity for which the right-of-way is to be used.

"SEC. 6. The Secretary of the Interior is hereby authorized to prescribe any necessary regulations for the purpose of administering the provisions of this act.

"SEC. 7. This act shall not become operative until 30 days after its approval."

Amend the title so as to read: "An act to empower the Secretary of the Interior to grant rights-of-way for various purposes across lands of individual Indians or Indian tribes, communities, bands, or nations."

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

TO QUIET TITLE TO LANDS DESCRIBED IN A TREATY BETWEEN THE UNITED STATES AND THE DELAWARE INDIANS

Mr. D'EWART. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 2361) to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 3, line 7, strike out "1947" and insert "1948."

Page 3, line 12, strike out "1947" and insert "1948."

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

SALE OF CERTAIN LANDS ON INDIAN RESERVATIONS IN THE STATES OF MONTANA, NORTH DAKOTA, AND SOUTH DAKOTA

Mr. D'EWART. Mr. Speaker, I ask unanimous consent to take from the Speaker's desk the bill (H. R. 3153) to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota, with Senate amendments thereto, and concur in the Senate amendments.

The Clerk read the title of the bill.

The Clerk read the Senate amendments, as follows:

Page 2, line 17, after "county", insert "in which the major portion of the Indian reservation lies."

Page 3, line 10, after "units", insert "for experimental purposes."

Page 4, strike out lines 1 to 5, inclusive.

Page 4, line 7, strike out all after "be" down to and including "order" in line 13, and insert "covered into the Treasury of the United States for credit to miscellaneous receipts."

The SPEAKER. Is there objection to the request of the gentleman from Montana?

There was no objection.

The Senate amendments were concurred in.

A motion to reconsider was laid on the table.

EXTENSION OF REMARKS

Mr. KEOGH asked and was given permission to extend his remarks in the RECORD in two instances to include in one an address delivered by Walter Van Hoesen, president of the New York Foreign Freight Forwarders and Brokers Association, and in the other an address delivered by Commodore Robert C. Lee.

Mr. DEVITT asked and was given permission to extend his remarks in the RECORD and include letters.

THE OIL SITUATION IN NEW ENGLAND

Mr. RANKIN. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. Mr. Speaker, again today the gentleman from Massachusetts [Mr. NICHOLSON] and also the gentleman from Massachusetts [Mr. HESELTON] have complained of the distressing conditions in the Northeastern States, due to the lack of fuel oil in that section of the country. On yesterday I pointed out some phases of the long-range programs that we have that we hope will relieve the situation in the years to come, particularly the slack-water route from the Gulf of Mexico to the Great Lakes by way of the Tennessee-Tombigbee inland waterway.

You will find my speech on page 548 of yesterday's RECORD. I hope you will all read it.

I realize that this is an emergency and one that cannot be passed over lightly. If this were a flood disaster on the Ohio or the Missouri Rivers or a cyclone disaster in Mississippi or Oklahoma or an earthquake disaster in some other section of the country we would be clamoring for Federal relief, and the Congress would respond to our pleas.

It seems to me that the Government should use the tankers that we now have to take oil to that section of the country to relieve the distressed conditions that now exist.

I do not know whether you realize it or not, but there is more oil produced in the State of Mississippi than is produced in every State east of Illinois and north of the Ohio and the Potomac Rivers. But the trouble is that this oil is being sent abroad, and the big tankers that are supposed to serve the northeastern seaboard are being used in international trade. The New England States have neither coal nor gas nor oil and very little water power. They are not looking to me to represent them. They are ably represented here by Members of both parties. But, as a Member who wants to see justice done, I suggest that these tankers be put into use, and if there are not enough of them, that we get sufficient tankers to supply those people with fuel until the cold winter months are over. They have not asked me for this contribution, but I just felt that under the circumstances, if I were in their place and they were in mine, that this is the attitude I would expect them to take; and I believe it is the attitude of a majority of the Members of Congress on this question.

Mr. Speaker, I ask unanimous consent to insert at this point in the RECORD a statement showing the number of barrels of oil produced monthly and daily in each State in the Union.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

Mr. RANKIN. The statement is as follows:

Total oil production, monthly and daily, as of Oct. 31, 1947

State	Monthly	Daily average
New York	416,000	13,400
Pennsylvania	1,120,000	36,100
West Virginia	253,000	8,200
Florida }	26,000	800
Virginia }		
Illinois	5,602,000	180,700
Indiana	447,000	14,400
Kansas	9,336,000	301,200
Kentucky	842,000	27,200
Michigan	1,469,000	47,400
Nebraska	20,000	600
Ohio	291,000	9,400
Oklahoma	12,571,000	405,500
Missouri }	6,000	200
Tennessee }		
Alabama	40,000	1,300
Arkansas	2,626,000	84,700
Louisiana	14,124,000	455,600
Mississippi	3,326,000	107,300
New Mexico	3,808,000	122,800
Texas	73,713,000	2,377,900
Colorado	1,486,000	47,900
Montana	771,000	24,900
Wyoming	4,055,000	130,800
California	28,565,000	921,500
Total	164,913,000	5,319,800

You will see where the oil supply has to come from, and it must be carried by trains or by barges or by tankers or by pipe lines in order to reach that section of the country.

As I said, this is an emergency, and I feel that immediate action is vitally necessary.

THE OIL SITUATION

Mr. POTTS. Mr. Speaker, I ask unanimous consent to address the House for 1 minute and to revise and extend my remarks.

The SPEAKER. Is there objection to the request of the gentleman from New York?

There was no objection.

Mr. POTTS. Mr. Speaker, the gentleman from Mississippi just mentioned that he thought the tankers which the Government has should be used to carry oil to New England. As of last December 17, or thereabouts, the Maritime Commission had only 17 tankers, 15 of them small and not all of them serviceable, which could be used for that purpose. Therefore, that is not the answer. This House in the closing days of last July passed a resolution to require the Secretary of Commerce to certify on any export of petroleum products that they were not needed for national defense or domestic consumption. Now, if he had carried out the mandate and the command explicit in that resolution to limit exports, we would not have the tremendous shipments of oil abroad. It is not Government-owned tankers that will serve our needs up there in New York and New England, because we do not have them. It is the putting into effect of the export controls so that this tremendous amount of oil is not sent abroad; and if it is unable to be sent abroad, private shippers get it up to New York and New England.

Mr. RANKIN. Mr. Speaker, will the gentleman yield?

Mr. POTTS. I yield to the gentleman from Mississippi.

Mr. RANKIN. I overlooked the pipe lines. Of course, there are pipe lines that take some oil to that area, but you are going to have to depend on them or the tankers or the barges or the railroads to get the oil to that territory.

Mr. POTTS. They do not take it now. I understand those pipe lines carry natural gas now.

Mr. RANKIN. But oil is not going to the New England States.

Mr. POTTS. Certainly not; and we also need it in New York.

EXTENSION OF REMARKS

Mr. SHAFER. Mr. Speaker, on yesterday I inserted in the RECORD an extension of remarks that included an article from the Sunday editions of the Washington Times-Herald. This article was highly complimentary to you, Mr. Speaker, and in my zeal to make it a matter of record I failed to observe that one paragraph contained an unfortunate and unfounded statement regarding our distinguished colleague, the gentleman from Virginia [Mr. SMITH], to the effect that he is a leader of antiveteran Democrats in the Rules Committee. I am personally deeply disturbed at being a party to having such a statement made a part of the record because it not only reflects on the excellent reputation the gentleman from Virginia enjoys in the Congress but on other patriotic Democrats on the Rules Committee who are rendering able service. I believe I can say without fear of contradiction that there is no such thing as an antiveteran bloc in this body. I therefore ask unanimous consent that the entire extension of remarks be expunged from the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. LODGE asked and was given permission to extend his remarks in the RECORD and include an article from Human Events.

FUEL SHORTAGE

Mr. STEVENSON. Mr. Speaker, I ask unanimous consent to address the House for 1 minute.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

Mr. STEVENSON. Mr. Speaker, a good many Members of Congress have been voicing the complaint that there is no fuel oil in their States. There is not a State in the United States that is suffering like the State of Wisconsin, where we are having subzero weather, the temperature going as low as 50° below zero. Those of you who live south of the the Mason and Dixon's line, south of the Ohio and the Potomac, do not know what cold weather is. The people in Wisconsin are cold, they are suffering and freezing. They cannot get fuel oil. Some of those who do get it are complaining that they have to pay exceptionally high prices for fuel oil.

In November a complaint was made to the President of the United States asking him to use his authority to stop the export of fuel oil that averages 12,000,000 barrels a month, now being shipped to foreign nations. The President has done nothing. He has not even acknowledged the requests and the pleas of the Congressmen who have written him. The Secretary of Commerce, Mr. Harriman, testified last November before a committee of Congress that he could regulate the export, or stop the export, of oil to foreign countries. He was asked if he could do it immediately, and divert it to the areas in this Nation that are suffering from the cold. He said he could. His assistant, Mr. Blaisdell, said he could do it in 15 minutes, that he had that power. Why in the name of common sense and humanity have they not done something? The people in this country need help. We have shipped on the average 12,000,000 barrels of fuel oil a month to countries abroad. In the first 9 months of 1947 we sent $2,800,000 worth of oil to Russia alone. I should like to have you figure out that nonsense. Some of those gentlemen in the executive department had better get busy and help the people of the United States. Our people are cold and they are freezing.

The SPEAKER. Under previous order of the House, the gentleman from New York [Mr. JAVITS] is recognized for 20 minutes.

THE UNITED STATES AND PALESTINE

Mr. JAVITS. Mr. Speaker, since the decision of the United Nations on the Palestine question on November 29, 1947, approved by 33 of those members of the United Nations voting—33 for partition, 13 opposed, 10 abstentions—there has been a great outcry among those opposed to this decision, making three principal objections: First, that it might put Russian troops on the Mediterranean; second, that it may endanger the peace; and, third, that it may interfere with the flow of oil to aid the European recovery program. It has also been argued that the United States used undue pressure on other nations to vote for partition, but when it is noted that Cuba and Greece, two states largely dependent on the United States for their economic life voted against partition, this charge would not appear to be tenable.

OBJECTIONS TO UNITED STATES ACTION

It is well, however, to consider the substance of the three major objections and also to consider their purpose. Their purpose—whether wittingly or not—is nothing less than to scare the American people into a new Munich to appease a group of small Arab states which are defying the United Nations. This purpose could be successful because the United States is the main support of the United Nations, and if it reverses itself on Palestine under pressure, many of the rest of the nations who voted partition would quickly follow. If they did, it would be the signal for the end of the United Nations, just as the Japanese walk-out on Manchuria was the signal for the end of the League of Nations.

For the issue in Palestine now is the continuance and survival as an instrument of peace of the United Nations. If after a two-thirds vote in the General Assembly, the United Nations cannot deal with five new Arab states which were vassals of the Ottoman Empire until after World War I, and were enabled to become states only by the actions of the victorious Allied Powers in World War I, it could hardly hope to be an effective force for peace in the world.

I think it will be useful, first, to be sure that we are all clear on the existing situation in Palestine. Britain administers that territory under a League of Nations mandate given to her in 1922. This followed a decision of the victorious Allied Powers in World War I taken at San Remo in 1920, which stated that the mandatory should put into effect the terms of the Balfour Declaration made by the British on November 2, 1917. According to this declaration, the British Government agreed to use their best endeavors to facilitate the establishment in Palestine of a national home for the Jewish people. This agreement was also contained in the Treaty of Sevres between the Allied Powers and Turkey, and finally in the covenant of the League of Nations. Though not a member of the League of Nations, the United States consented to this arrangement in the American-British-Palestine Mandate Convention of 1924 and stipulated that its assent should be required to any change. Britain has since administered the territory of Palestine, and one of the main objectives of its administration she agreed, was to have been to carry out the Balfour Declaration for the establishment of a Jewish national home.

As Britain's situation became more precarious internally, following World War II, and she could not maintain her imperial position; and as the pressures from the Jewish population in Palestine seeking to rescue the remains of their martyred brothers from the DP camps of Europe, upon her for more immigration increased, she finally turned to the United Nations for help.

It may be useful, too, at this point, to consider why the Jews fought for an independent state and did not believe that a true Jewish national home could be established in any other way. The reason was simply that Great Britain had used Palestine as a pawn in her own foreign policy and was not really administering it as a trustee. This was best shown by the decision of the British Government in 1939, made under Arab pressure and in order to gain what Britain thought would be Arab support for the coming war against the Axis, limiting the aggregate of Jewish immigration into Palestine to 75,000, and stopping it entirely after 5 years. The order came in May 1939, at a time when the urgent need for millions of Jews to escape from the Nazi executioners was the greatest. This MacDonald white paper of 1939 resulted, many believe, in the obliteration of a million or more Jews who might have been saved if they had been able to enter Palestine. There was no basis in law or justice for any such action by Great Britain and she needlessly spent the lives of unfortunates in an attempt to better her own political fortunes. Tragically, and perhaps with divine justice, the Arabs took the first opportunity to turn on Britain in the Iraqian revolt of 1941, of which one of the principal leaders was the Mufti of Palestine, the present leader of the Arabs against the Jews. This was the first experience of the Jews, the second came at the London Conference in 1946 where the British tried to arrive at a negotiated settlement with Jews and Arabs. There the Arab proposals and the British proposals in effect cut off any important Jewish immigration which was then continuing on an interim basis at 1,500 a month. The Jews realized by these hard experiences that there was no hope for immigration in a negotiated agreement with the British and Arabs.

Britain's appeal to the United Nations General Assembly in 1947 was for that body to recommend a solution so she could give up the Palestine mandate. The General Assembly of the United Nations—the twentieth committee to consider a solution for Palestine—decided on partition into Arab and Jewish states with economic union under United Nations auspices. Great Britain received this decision sullenly and stated that she would not cooperate in carrying it out, though she had asked for it, but would move her troops out of Palestine as soon as possible, beginning the movement not later than May 15. She has already shown her purpose to refuse to help implement the UN decision by refusing to comply with one of its early provisions to vacate a port in Palestine by February 1, 1948, which she could easily do, for the purpose of facilitating Jewish immigration. But she does give every indication of actually getting out of Palestine and at least leaving the country open to partition if anybody can effect it. This is the job which the United Nations has given to a commission appointed by the General Assembly under its decision—actually to bring about the partitioning of the country. The British still refuse to cooperate with this commission or even to admit it into Palestine until very close to the time when their troops will leave, although they know that this embarrasses the effort to effect partition very materially.

In order to have a suitable frame of reference, we should also consider the terms of the partition decision of the United Nations General Assembly.

Great Britain's Palestine mandate is to be ended not later than August 1, 1948, and the independent Jewish and Arab states are to come into existence not

later than October 1, 1948. In the meantime two critically important events are to take place: First, a provisional council of state is to be designated and recognized for each of the Jewish and Arab states by the United Nations Palestine Commission; and, second, within the shortest possible time the UN decision states that an armed militia composed of the residents of each state and sufficient in number to maintain internal order and prevent frontier clashes is to be recognized by the United Nations Commission.

The present situation finds the United Nations Commission just beginning its work; Arab guerrillas attacking the Jews to discredit partition, with widespread disorder and bloodshed in Palestine, and the Jews endeavoring to defend themselves; the British taking the position that all they need to do is see that none of their own troops get hurt before they can pull out; and the Arab states, member nations of the United Nations, almost openly supporting the guerrilla attacks on the Jews, persisting, to use their word, in defying the United Nations' decision and in the threat of an organized invasion of Palestine as soon as the British move out.

That is the present situation, plus one other very important factor—on December 5, 1947, there was announced by the United States a cessation of the licensing of arms shipments to the countries of the Middle East, including Palestine—in this way effectively cutting off the Haganah, the informal Jewish militia, from any arms, while leaving free the Arab guerrillas through the Arab countries, to obtain arms. For the British, with brutal callousness, confirm a report that they are continuing to sell and ship large quantities of arms admittedly not less than $25,000,000 to Iraq, Egypt, and Transjordan, as a continuing fulfillment of treaty obligations, which is in addition to the arms and armaments they have as organized states with standing armies.

The first of three major arguments now made against United States support of the Palestine decision, is that it may result in putting troops of the Red Army on the Mediterranean. This argument assumes that there will be so much disorder in Palestine created by the neighboring Arab nations, that the United Nations Security Council, to restore order, will have to call on the forces of the great powers, that this will mean that American troops must be sent to Palestine and that, the Soviets, too, will insist on sending troops with the result that the Soviets will have successfully arrived on the Mediterranean. The decisive fallacy in this argument is that no one, neither the Jews nor the United Nations has requested, or contemplates requesting, that the troops of any great power participate in implementing the Palestine decision; or possibly even that the troops of any power so participate. The Jews have expressed themselves decisively on the point that given arms—and it is clear that they cannot fight against the organized armies of the Arab nations, or against extensive guerrilla activities which they foment, with olive trees or with clandestinely obtained rifles—they will defend themselves to the last man and will seek no troops of any nation. Secondly, the United Nations Commission is contemplating an appeal for a token police force of small nations. In no case by any authoritative statement has there been any request for or indication of a request for the forces of any great power. The very organization of the United Nations Commission to implement the Palestine decision reflects the same end; the nations chosen are Bolivia, Czechoslovakia, Denmark, Panama, and the Philippines—not a single great power is represented. The argument, therefore, that the decision will result in the Red Army being on the Mediterranean, finds no basis in fact in the acts of the Jews or of the United Nations, and is created to further the effort to defeat the UN decision. But if the Arab nations are appeased, and the United States, by inaction or reversal of its position, lets the Arabs get away with defying the United Nations and thereby destroys the United Nations, we may again see Russian troops in northern Iraq without a UN to stop them.

There is, however, a grave danger of the revival of nazism in the Middle East, and that arises because the principal character, who is the leader of the Arab guerrillas, is the Grand Mufti of Palestine—Haj Amin El Husseini. There is no question about his leadership. It is widely advertised by him, by the Arab countries, and by the Arab press.

The Mufti is one of the most distinguished Nazi collaborators at large in the world today. Aside from leading the Arab riots which took a toll of hundreds of British, Jewish, and Arab lives in Palestine in 1936, as the head of the Arab Higher Committee there, he was an important factor in the organized revolt in Iraq in 1941, which sought to stab the British in the back. When he fled from Iraq to Hitler's Germany on the failure of the Iraqian revolt, he was responsible for organized Arab opposition to the British and ourselves throughout the war, for the sullen inaction or active opposition of certain of the Arab states during the war, and was one of the inciters to the extermination of millions of Jews by the Nazis during the war. As an agent of Hitler, he openly organized Moslems against the United Nations, including the United States, who were fighting the war, and preached the extermination of the Jews in meetings and over the radio. Yet, when the war was over, the British, into whose power the Mufti had fallen, refrained from trying him as a war criminal and, I believe, under pressure of the Arab states, permitted him a convenient escape from his forced residence in Paris to Egypt in June of 1946. There he promptly became head of the Arab Higher Committee for Palestine and has since been the head and front of Arab violence in resistance to the Palestine decision. It is his family, the Husseini family, which controls the Arab Higher Committee and is the backbone of the Arab position on Palestine.

I have a book which any interested Member may examine, which is a documentary record submitted to the United Nations in May 1947, and which contains the complete story of the intimate relationship of the Mufti with Adolf Hitler throughout the war. It contains pictures of the Mufti in close consultation with Heinrich Himmler, Hitler himself, and other Nazi bigwigs, as well as a mass of documentation showing his complicity in the Nazi war against us.

The Mufti is very ambitious and is already establishing a powerful influence on the Arab Governments of the Middle East due to the political explosiveness of the Palestine issue. But the Mufti is still only a religious leader; he needs a big political success with which to build up his prestige so high that he has not only influence but control over the Arab Governments. If he can successfully defy the United Nations, then he will indeed have established his position at the head of the Arabs in the Middle East and we shall have a disciple of Hitler to face there. In all the Mufti's plans and plotting, the Jews are in the way because they are a bridgehead of democracy in the Middle East—a window on the world. They have suffered enough from Nazi totalitarianism so that they do not want it in any form. It is for that reason that Soviet penetration, also, is very difficult in the Middle East with the Jews in it.

I might say to those who make sly intimations that communism exists in Palestine, not only that there is no Communist Party there, but that not a single Communist sits on the Jewish Agency or the Jewish community councils—Vaad Leumi. No; the Jews have had their fill of totalitarianism and know that to them, to exist at the will of some dictator is to live on the edge of death. Is it not unthinkable that the Jews of Palestine would exchange the concentration camps and gas chambers of Hitler and the Gestapo for the forced labor camps and inquisition chambers of the Soviet OGPU?

The alarmists who say there is communism in Palestine, and who add to the tortures of an already martyred and harassed people by this charge, have picked up the sailings of two vessels from Constantsa recently, the *Pan Crescent* and the *Pan York*, as evidence that Balkan Communists are going to Palestine. The charge is baseless. In the first place, it was a rumor story from London and the British certainly do not like Jewish emigrants to Palestine. But more important, I was in the DP camps of Austria this past summer, and saw the miserable condition of the refugees from Rumania and Hungary seeking to get to Palestine by the underground route through Italy. What was more logical than that, with the ability to argue that the U. S. S. R. now having voted partition for Palestine it should favor immigration there, the Zionist organizations should try to head off the movement of Jews, which was already in progress anyhow from Rumania to Palestine via the already overwhelmed DP and refugee facilities in Austria and Italy, by seeking the Rumanian Government's permission for direct sailings. This was exactly what happened. Is it not unthinkable that the Zionist organizations would openly get together thousands of people whom they knew would end up in Cyprus as detainees of the British, who

would be Communist infiltrees? Is it not clear that these could never get through the British screening and that if it was Communist workers that were to be gotten into Palestine, they would certainly be smuggled in by the Soviets much less obtrusively.

There are several hundred thousand Jews still in Rumania, most of whom want to go to Palestine. If they were Communists, they would certainly not want to move. The answer is that they are definitely not Communists, that they see no hope for themselves in Communist-dominated Rumania, but that they are nationalists for Palestine.

The second major argument made against the Palestine decision is that it is a threat to the peace. But is it not true that it will only result in extensive hostilities between Arabs and Jews, if the leading nations fail to show decisively that they will not tolerate it? Is it not true that widespread disorder and conflict in defiance of the United Nations is what will constitute a threat to the peace? Let us examine for a minute the Arab situation itself. It is the Mufti and his guerrillas who are attacking the Jews in Palestine and even press reports show that many of the Palestine Arabs resent it, as they have enjoyed excellent relations with the Jews. And indeed they might, for Arab improvement in Palestine during the period of the greatest Jewish settlement, from 1930 on has been enormous. The value of Arab land has gone up from $120 to $640 per acre. The Arab cattle population has increased by 60 percent. The Arab school population has risen from 20,000 to about 70,000, and the daily wages of Arab workmen in Palestine are generally five times what they are even in the more advanced Arab countries.

We should also bear in mind the condition of the Arab countries which persist in defying the United Nations and, indeed, the civilized world. The total population of Saudi Arabia, Egypt, Syria, Lebanon, Iraq, Yemen, and Transjordan is about 34,000,000. The total square miles occupied are 1,189,804. Compare this with 700,000 Jews in 5,500 square miles of partitioned Palestine. Who is the threat to the peace? Contrast the enlightenment, education, and economic progress the Jews have brought into the Arab world with the following record. Saudi Arabia and Yemen are absolute monarchies with the King holding the power of life and death over all his subjects. In Saudi Arabia slavery is recognized by law. In Egypt and Iraq, it is reported that about 85 percent of the men and well over 90 percent of the women are illiterate, and the infant mortality is 50 percent or higher. And even in the most advanced Arab country, Lebanon, 56 percent of the men and 77 percent of the women are illiterate. In the Arab countries, feudal landlords control the peasant in feudal ways, and types of disease which have been much reduced or have disappeared from westernized countries are rife.

Arab nations who propose war on the United Nations muster armed forces of 120,000 men, 35,000 of whom are in Egypt, but have no adequate mechanized means with which to cross the Sinai Desert to Palestine. The most effective force, Transjordan's Army of 25,000, is British trained and under British command. If the Arab armies are to invade Palestine, it would be because in the main the British arm and lead them. Should that happen, it will be the most sardonic joke the world has ever seen.

And what is the war record of the Arab countries? Iraq revolted and declared war on Great Britain on May 2, 1941, with the Mufti who is now the anti-United Nations leader as one of the chief conspirators, while Egypt, Saudi Arabia, Syria, and Lebanon declared war on the Axis in February 1945 in order to qualify to get into the United Nations, the last date for which was March 1, 1945. And with the Arab population in Palestine not less than two to one Arabs, one-half the number of Arabs volunteered for service in World War II, compared with the Jews. Montgomery said that the Jews of Palestine were heavily responsible for the equipment which won at Alamein, while the Egyptian Arabs were largely uncooperative. None of this is said critically, but we should know the facts. Much can and must be done to bring higher standards of living, education, and health to the Arab countries, and in encouraging democratic ideas, but the way to do this is not by exterminating the Jews, because they are the principal source for improvement in the Middle East.

Finally, one of the big hush-hush things about Palestine is Middle East oil, and while we are speaking frankly we should talk about that, too. It is said that the flow of Middle East oil is necessary to undertaking the European recovery program, but that is not the situation. Middle East oil is largely potential reserve, rather than present production, and right now the bulk of it is moving to Australia and the Far East to compensate for the cutting off of East Indies production. Europe is getting its oil from the Caribbean, in the main; 50 percent of Europe's supplies come from there, about 25 percent from the United States, which makes up for it through imports from the Caribbean, and only 25 percent from the Middle East. Though the Middle East's production is only about 9 percent of the world production right now, it does have estimated reserves in the ground of 27,000,000,000 barrels of crude, or 40 percent of the known crude reserves of the world, against 32 percent for North America. The situation, therefore, must be considered from the longer range.

Middle East oil is being developed on the American side by private companies, like the various Standard Oil companies, the Texas Co., and Socony Vacuum, who are paying for it in dollars. It is intimated that the Russians would like to get their hands on this oil. But nobody has as yet thought up a way for them to pay for it, for they have neither dollars nor manufactures to give Iraq and Saudi Arabia, and if anyone doubts that these countries are so dependent on this oil income, that they can neither sell it on credit nor, indeed, refrain from selling it, he need but examine the figures.

Secretary of the Interior Krug testified before the House Foreign Affairs Committee only the other day to his estimate that 90 percent of the Government revenues of Saudi Arabia come from oil payments. It is now getting oil royalties of seventeen to twenty-five million dollars a year against a last-known prewar budget of $4,500,000 a year. For Iraq, also, the oil income of about $10,000,000 a year now makes or unmakes the country's budget—and so it goes. Middle eastern oil and its possessors have been well compared to the cow and the calf. The cow will die if she doesn't give her milk, and the calf must have it, too.

Looking at the situation for the longer term, the large oil-royalty payments flowing to the Arab States tend to aid the Arabs who persist in resistance to the UN decision. Yet despite these large payments, the position of the oil companies is likely to prove very precarious as they run the serious risk of having to deal with fanatical followers of the Mufti after they have been intoxicated by success. For disorder in the Middle East and defiance of the United Nations will only lead to greater excesses of fanaticism and to intense nationalism there. Britain is learning it to her sorrow in negotiating her proposed treaty with Iraq, and the oil companies saw the result in the hold up of Syrian approval for the Transjordan oil pipe line. The oil companies are best served by tranquillity and by independent governments in each country and not by having to deal with the Mufti in all Arab countries. Besides, these companies are headed by Americans and I do not believe they would consciously want to frustrate United States foreign policy and the United Nations by their own operations.

Cooperation in strengthening, not weakening, the United Nations, and in suppressing rather than encouraging international lawlessness, will prove to be far more conducive to the effective utilization and continued availability of Middle East oil.

To sum up—there will be no danger of the Red Army being poised on the Mediterranean in Palestine, or of lighting the spark of war in the Middle East, or of the material cutting off of middle eastern oil, unless the Arab forces arrayed against the United Nations in its Palestine decision, prevail. The question now is, what can we do to hold up the hand of the United Nations, considering the three forces that threaten its Palestine decision—the British, the Arabs—oil. I do not put in this class the Mufti's guerrillas who will disappear in the night if the others fail to cooperate.

With respect to Great Britain, I believe we can act at once. She has already stated that she will not implement the first recommendation of the United Nations decision by vacating a port in Palestine to make it available for Jewish immigration, on February 1, 1948. It was one thing to deal with Britain when she claimed the right to exercise her judgment of how to keep order in Palestine while she was in undisputed control there. But it is quite another to deal with her when she ignores and in fact seeks to defeat the mandate of a United Nations which she has invited to prescribe what shall be the future government of Palestine. She asked for the

recommendations of the United Nations on Palestine and she got them. Her answer now is to "play horse" with the United Nations Palestine Commission, to arm the Arab states which tacitly admit that they are arming the Arab Palestine guerrillas, and to fail to protect life and property in Palestine while disarming the Jews who want to protect it. I think the time has come to call a decisive halt to Britain's double-dealing with the United Nations on Palestine, and it may prove necessary to cut her off from aid if she persists in acting so as to defeat the world's cooperative organization for peace.

Second, I believe we can act with regard to the Arab nations at once. For they have stated openly through the Syrian delegation on January 19, 1948, that they persist in their refusal to recognize the United Nation's General Assembly's decision on Palestine. United States policy on this point has already been made very clear. The United States delegate in his statement to the ad hoc committee of the UN General Assembly on the Palestine question said:

> We do not refer to the possibility of violations by any member of its obligations to refrain in its international relations from the threat or use of force. We assume that there will be Charter observance.

And on November 22, 1947, only a week before the partition vote, the same representative said before the same committee:

> The United States hopes to obtain a great majority for this plan—
>
> The Palestine partition plan—
>
> and expects loyal cooperation from all members of the United Nations once this plan has been approved.

It is time that the United States again declared to the Arab nations that we expect cooperation—that they have undertaken to give it under the United Nations Charter—and that we shall insist that they account before the Security Council for harboring Arab guerrillas conspiring to defeat the UN decision—we did no less in the matter of the Balkan Border Watch Commission regarding the guerrillas in northern Greece.

Finally, oil—I think it is high time, while we consider the European recovery program, to find out if and to what extent the oil reserves of the Middle East are and will be available for our national security, and if and to what extent the operations of American oil companies are helping or hindering American foreign policy. I appreciate fully their delicate position but I do not see why they should be on the defensive. I should think, for example, that the oil companies might be considering how they could curtail their payments to the Arab nations, with our support, so long as these nations flout the United Nations, rather than what measures they can take to please Arab rulers threatening them with retaliation for the United States vote on the Palestine question.

We come now to the last point of American implementation of the UN's decision—how can we appropriately help those who are laying down their lives to defend that decision—the Jews in Palestine? Right now they are fighting with clandestine rifles not only the Arab guerrillas, but in a cold war with the British, who disarm the Jews at every opportunity, leaving them defenseless before the Arabs. If we do not want armies of the big powers in Palestine and if we do want the United Nations to survive, we must put these valiant Jews in a position to fight the battle. They need machine guns, vehicles, light artillery, and liaison aircraft. Certainly we cannot ship these until an armed militia of the Provisional Council of Government of the Jewish state is recognized by the United Nations Commission, but we can lift our embargo and ship these arms and weapons immediately when that occurs. The path of policy is not to wait until there is the maximum of bloodshed, but to act before there is much bloodshed, or at least as early as possible. Therefore, the United States should announce now, that upon the recommendation of the United Nations Commission, it is prepared to lift its embargo on the shipment of arms to the Middle East so that they may be shipped to such armed militia whether Jewish or Arab, as is recognized by the United Nations Commission under the Palestine decision—for we must never forget that there are decent elements among the Arabs, and that the Palestinian Arabs who would set up a state pursuant to the United Nations decision, will themselves be subject to attack by the Mufti's guerrillas. The attitude of the bulk of responsible Arabs right now seems to be to let the Mufti beat the Jews and the United Nations if he can, but if he cannot then we should protect them against being terrorized in turn if they help to implement the decision.

Such an announcement by the United States would be notice to the Mufti and his friends that we mean business—will considerably depreciate the influence of the Mufti among the other Arabs and upon the middle eastern Arab nations—will fortify the United Nations Commission, and will be the greatest contribution we can make to avoiding the threat to the United Nations which exists in the Middle East.

We are now at the crossroads with the United Nations. If it is ineffectual, in the matter of a little country like Palestine, and permits itself to be successfully defied by a handful of small and recently created Arab states, then it, like the League of Nations, is finished. But if we as its greatest friend back it up, we have demonstrated more than a thousand speeches will demonstrate, no matter from how eminent the source, that we are determined to work out the problems of the world through international cooperation and not through international coercion.

I would like to emphasize that I am dealing here with a question of the bipartisan foreign policy of the United States and with no other question. I have stated before in the House in the course of a debate on Palestine that "I will be just as exercised, just as solicitous, just as vigilant of the rights and interests and security of the United States in respect to it (Palestine) as any other Member"—RECORD, page 11654, December 18, 1947. As a result my recommendations on the subject are based on thorough study and the most devoted consideration and are premised on the interests of our own country in world peace and prosperity and in justice. The measures I have suggested are entirely consistent with our bipartisan foreign policy and with the United Nations charter. They are temperate and objective. They could well result in the first great postwar victory of the rule of international law over the rule of international force.

EXTENSION OF REMARKS

Mr. SADLAK asked and was given permission to extend his remarks in the RECORD and include an address by his colleague the gentleman from Connecticut [Mr. FOOTE].

Mr. MILLER of Connecticut asked and was given permission to extend his remarks in the RECORD and include a resolution signed by several thousand members of the Connecticut National Guard in support of universal military training.

The SPEAKER pro tempore (Mr. LEMKE). Under previous order of the House, the gentleman from Texas [Mr. MAHON] is recognized for 30 minutes.

WAR DEPARTMENT

Mr. MAHON. Mr. Speaker, I must give a little background information as a preface for the remarks which I am about to make. Without doubt the question which I am soon to present to you is a fundamental question of democratic government which directly or indirectly affects every Member of Congress and every citizen of America, and the rights of members of parliamentary governments throughout the earth.

Now for the background. The House placed me on the Appropriations Committee 9 years ago. I have served for years on the subcommittee which handles appropriations for the War Department. The gentleman from Michigan [Mr. ENGEL] is the present chairman of the subcommittee.

I wish to emphasize the fact that I have no desire or disposition to make a personal attack on the gentleman from Michigan. We originally came to Congress together for the Seventy-fourth Congress. The gentleman has been most kind to me personally and our relations have always been most friendly and cordial. The matter involved is not a personal difference but a matter of congressional procedure and principle.

I had much preferred and hoped that it would not be necessary to present this matter to the House of Representatives, as I had hoped that the matter could be worked out in the Appropriations Committe, where I think it should and could have been worked out. However, the gentleman from Michigan presented the matter to the floor of the House of Representatives on Thursday last, and the issue has been widely discussed in the press, so there was no other alternative for me except to take the same forum to discuss the problem.

I am glad to work with the gentleman from Michigan on any project which promotes national defense and security, and I am glad to make any reduction in Government spending which can safely

be made. Moreover, I stand ready and anxious, as always, to cooperate with the chairman in uncovering and exposing to the sunlight any and all evidence of waste and extravagance by the War Department, General Richards, or any official or officer of the Army, or the Government.

Last Thursday the gentleman from Michigan made a speech in the House in which he bitterly attacked Kenneth C. Royall, Secretary of the Army, and Gen. George J. Richards, former budget officer and now Comptroller of the Army, branding the Secretary as Kenneth "Cover-up" Royall, and the general as George "Cover-up" Richards.

The gentleman referred to an experience which he had in India and Egypt in 1945. He complained of Army waste and mismanagement in those theaters of operations. I was present with the group in India and Cairo and I saw much evidence of bad management and waste which I condemned at the time and reported to high authorities in Washington, and I am glad to renew my condemnation now.

However, Mr. Stimson was then Secretary of War, and Secretary Royall and General Richards were not in command in India and Egypt and I did not personally blame them for the unhappy situation which all members of our group saw there.

It must be understood that General Richards was with our group at the time, he having accompanied us to that part of the world at the insistence of the then chairman of our subcommittee, Hon. J. Buell Snyder, now deceased.

The gentleman from Michigan in his talk in the House last week charged General Richards with having tried to cover up evidence of Army waste and mismanagement on the occasion of our visit some 2½ years ago. Every man is entitled to his own opinion. Insofar as I know, the gentleman from Michigan is the only Member of our group who has made this charge against General Richards. I would not defend General Richards or any other man who was guilty of improper conduct. Insofar as I know all members of our group except the gentleman from Michigan felt that General Richards was doing the best he could to be of service to the committee and follow the instruction of Congressman Snyder, the chairman of our group, whose lips have been sealed in death and he cannot report to you. Our understanding and interpretation of events on this particular point do not coincide with those of the gentleman from Michigan. It might be noted that Secretary Royall and General Richards do not have the privileges of the floor and they cannot arise in the House of Representatives and defend their good name. But I will not take your time to rehash the details of far away events. I have risen for a more important purpose.

Last Saturday I read in a Washington paper a United Press story, the Associated Press having carried a similar story, which shocked me very much. I quote it in part as follows:

RICHARDS BARRED BY HOUSE GROUP

Chairman ENGEL, Republican, of Michigan, said yesterday he had barred Maj. Gen. George C. Richards, the Army's budget officer, from appearing before the House Military Appropriations Subcommittee.

ENGEL said he has informed Secretary of Army Royall not to send Richards before his subcommittee. Royall gave no indication whether he would comply.

ENGEL, who vented his wrath on both Richards and Royall in a House speech Thursday, said he would make another speech Monday explaining why he was barring the budget officer.

He contended that the committee could get all the information it needed for consideration of Army appropriations from Richards' subordinates.

Now let me again read paragraph 1 of the press story:

Chairman ENGEL, Republican, of Michigan, said yesterday he had barred Maj. Gen. George C. Richards, the Army's budget officer, from appearing before the House Military Appropriations Subcommittee.

Now, I was present downstairs in the committee last Thursday when General Richards was barred. He had accompanied Secretary Royall, Gen. Lucius Clay, our military governor for Germany, and many others in a joint hearing before the Deficiency and War Department Subcommittees on Appropriations.

I saw General Richards come into the committee room where he belonged and where he had been brought by the Secretary of the Army as his chief fiscal adviser, to be at his side when he discussed an Army request for appropriations. Presently, I saw him leave the room and was told that he had been barred by the gentleman from Michigan. Mind you, that General Richards was not barred from the committee room by the joint action of the committee, after discussion and a vote on the question. Even then, such action would have been indefensible. He was barred by one man, and insofar as I know, without the approval of any other member of the committee. Most of the members of the committee were present at the time this unfortunate incident happened in this Capitol Building.

The gentleman from New York, Chairman JOHN TABER, was there but, in my opinion, he had no personal desire to bar General Richards. I am not authorized to speak for him, but I think that is a fair conclusion. Other members of the committee, excluding the gentleman from New York [Mr. TABER], the gentleman from Michigan [Mr. ENGEL], and myself, are as follows: Representatives WIGGLESWORTH, of Massachusetts; STEFAN, of Nebraska; CASE of South Dakota; KEEFE, of Wisconsin; TIBBOTT, of PENNSYLVANIA; SCRIVNER, of Kansas; and on the Democratic side, Representatives CANNON, of Missouri; KERR, of North Carolina; and NORRELL, of Arkansas; and myself, as I have said. In my opinion none of these men whose names I have called, with the exception of the gentleman from Michigan [Mr. ENGEL] wanted the Secretary of the Army and General Richards to be humiliated by the barring of General Richards from the room where he belonged and where he had come at the request of the Secretary of the Army to discuss an appropriation of over $1,000,000,000 of the taxpayers' money. There were 10 or 15 other officials of high or low rank who were in the committee room at the time. None of them were thrown out.

I want to quote again from the press statement:

ENGEL said he has informed Secretary Royall not to send Richards before his subcommittee.

He contended that the committee could get all the information it needed for consideration of Army appropriations from Richards' subordinates.

Mr. Speaker, for a committee chairman to independently bar a major witness of the executive branch of Government from the committee room and deny him the right to testify on matters presented to the Congress by the executive branch smacks of some form of government which is utterly foreign to democracy, and the principles of freedom. I do not expect to hear that statement challenged.

It is unbelievable that this thing should have happened under the dome of this Capitol, and under the direction of the Republican chairman of a Subcommittee on Appropriations. Under this procedure a subcommittee chairman could, if he wished, bar the testimony of all the witnesses with whom he disagreed—it is the inevitable next step—and stack the testimony according to his own personal whim and caprice. I do not say he would do it, but I say he could do it. Our liberties have been jeopardized and democratic government has been challenged.

Of a truth it has been said that "Eternal vigilance is the price of liberty," and I rise today not in defense of General Richards or Secretary Royall—they can defend themselves—but I rise in the defense of the democratic processes of government and in defense of the individual Members of the Congress who do not feel that a committee subchairman can by a personal edict deny committee members the right to hear witnesses and cross-examine witnesses, and the executive branch the right to present them.

If the gentleman from Michigan can bar from the committee and close the mouth of the chief financial officer of the Department of the Army when an appropriation bill is under consideration by your committee, he can bar the Secretary of the Army, he can bar the Secretary of State, or any other spokesman of the executive branch of the Government.

Mr. KNUTSON. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield briefly.

Mr. KNUTSON. Put that in the reverse: Suppose Secretary Royall should refuse to receive the gentleman?

Mr. MAHON. I think if Secretary Royall should refuse to receive the gentleman he would be guilty of a breach of comity between the branches of government that would be utterly inexcusable.

Mr. KNUTSON. I think so too.

Mr. MAHON. The question is not, Is General Richards good or bad? For the purpose of this discussion that question is unimportant. This question is bigger than General Richards, General Eisenhower, or any other official in America. It is a question of democratic government.

Let me read again from the press dispatch:

He—

Meaning the gentleman from Michigan, Congressman ENGEL—

contended that the committee could get all the information it needed for consideration of Army appropriations from Richards' subordinates.

In other words, the gentleman, in effect, proposes to suppress the testimony of General Richards, who is the responsible official as the Comptroller of the Army, and require members of the committee to hear the testimony of subordinates who are not responsible though, of course, the committee will be glad to hear subordinates too. He proposes to suppress the testimony of General Richards; suppress the information which only the chief fiscal officer of the Army is able to give.

Why all this effort to suppress and cover up evidence which our committee, the Congress, and the Nation are entitled to have? It seems that the contrary would be true, that witnesses would be haled, if there is something that should be uncovered to the shining light of day for 140,000,000 Americans to see, it seems that the contrary would be true, that witnesses would be haled ruthlessly before the committee, if necessary, and against their will, if necessary, and not only be permitted to testify, but required to testify, and not in a closed hearing, where even a Member of Congress who is not a member of the committee can appear if he desires to listen to the proceedings of government.

But the gentleman from Michigan, according to the press dispatch—and I looked in the Sunday and Monday papers for a denial—says the committee can get all the information it needs from General Richards' subordinates. Heaven forbid, Mr. Speaker. I did not come here from western Texas to serve on the Appropriations Committee as a representative of west Texans and the Nation to get evidence from subordinates, chosen by the whim of a subcommittee chairman, be he Democrat or Republican; and I do not think other Members came here for such a purpose. I do not want second-hand information from subordinates. The fact is, and you and I know it, that the best evidence you can get is often insufficient. We want first-hand information from the people who know—or should know—we want access in behalf of the taxpayers to the best sources. We do not want anything suppressed. All information from any source—from the top officials and from the subordinates and others should be available to Congress.

This astounding effort to suppress information from a witness which the committee needs cannot be allowed to succeed. The 435 Members of the House and 140,000,000 other Americans are entitled to have a chance to read, if they desire, the proceedings before the Appropriations Committee, especially from the chief fiscal officer of the War Department, about expenditures and requested funds. You are asked to appropriate many billions of dollars for military purposes. Certainly you should have the right to read a printed statement from the top fiscal officer of the War Department. And the people have a right to read it, and the world is entitled to know that part which is not secret. The chairman of the subcommittee, the gentleman from Michigan, is privileged to cross-examine General Richards, as are all other Members, and refute if he can the testimony which the General gives.

I now demand of the Speaker of the House, and will continue to demand, that General Richards, the chief fiscal officer of the Department of the Army, be called before the committee at the proper times in order that Members may hear his statements and have a chance to cross-examine him.

Let the American people have all the available facts in regard to Army spending. Let there be no effort to suppress or cover up evidence which Congress is entitled to have.

President Truman is asking Congress to appropriate this year about $11,000,000,000 for national defense—a staggering sum. As a member of the Committee on Appropriations I am required to act on that budget, as are other members of that committee and eventually every Member of the House, and I do not propose to be thwarted in my efforts to get the necessary information which all Members desire, deserve, and must have.

Some talk of the threat of war, and tension is running high.

Mr. Speaker, I serve notice now that nobody is going to suppress the public information which General Richards can give our committee or deny Members the right to cross-examine him. I say that with due modesty in behalf of all Members of Congress, having in mind our inherent prerogatives as Members sent here by our constituents to represent the Nation as a whole.

The chairman may be satisfied with subordinates but the times are too critical, adequate national defense is too important, liberty is too precious for me to agree to that. We want the facts, the people want the facts, not from subordinates but from the top officials of the Government.

Mr. Speaker, I repeat that I have not arisen to defend General Richards, but these few facts are in point.

General Richards is the former budget officer, and is now the fiscal Comptroller of the Department of the Army, and in such capacity he is the chief adviser of the Secretary of the Army and of General Eisenhower, Chief of Staff, in fiscal and budget matters. The General has held the position of budget officer for 4½ years. Prior to that time he was assistant budget officer for a number of years. Before the war, throughout the war, and since the war he has worked in close contact with the War Department and with the Congress.

He enjoyed the confidence and esteem of Secretary of War Henry L. Stimson, a Republican and a good one. He enjoyed the confidence and esteem of Secretary of War Patterson, another Republican and a good one. He enjoyed the confidence and esteem and worked closely with Gen. George Marshall, Chief of Staff, during the war. I should make it clear perhaps that it was General Marshall, that great American, who selected Richards as budget officer. He was later selected as budget officer by General Eisenhower, and a short time ago General Eisenhower selected him as Comptroller of all fiscal affairs of the Army. He has the confidence and esteem of the present Secretary of the Army, Secretary Royall. He has the confidence and esteem of the present Chief of Staff, Gen. Dwight Eisenhower, who selected him for his present job.

Insofar as I know, General Richards enjoys the confidence and esteem of all Members of Congress who have worked with him, with the exception of the gentleman from Michigan. Insofar as I know, he enjoys the respect and esteem of the gentleman from New York, Congressman JOHN TABER, chairman of the House Appropriations Committee.

Undoubtedly, I can say that General Richards enjoys the confidence and esteem of Senator STYLES BRIDGES, chairman of the Senate Appropriations Committee, for just a few weeks ago he was selected by Chairman BRIDGES, of the Senate Appropriations Committee, to accompany him and other Senators on an important mission overseas, where he joined with them in conferring with Prime Minister Attlee, Foreign Secretary Bevin, Mr. Schuman, now the Premier of France, Prime Minister de Gasperri, of Italy, and others. In passing, I might add that it is strange indeed that an official of our Army who joined Senator BRIDGES and other Senators in conferring with the heads of state in Europe, where we understand that democracy is on trial, should be barred from exercising his rights as a spokesman for the Army in appearing before a congressional committee in America where we had hoped that democracy was secure. Our country, the major democratic nation on earth, would thereby give to all the world a very poor lesson in American democracy.

Others accompanying Senator BRIDGES on the trip to Europe a few weeks ago were Senators BROOKS, KNOWLAND, YOUNG, SALTONSTALL, DWORSHAK, GORDON, GREEN, and RUSSELL. All of these Senators, insofar as I know, have a high regard and respect for General Richards.

In my humble opinion, and I base it upon years of observation, General Richards has the confidence and respect of Senator CHAN GURNEY, chairman of the Senate Armed Forces Committee, with whom we do battle every time we sit in on conference on an Army appropriation bill. In fact, only last week, January 23, the Senate approved unanimously the elevation of Gen. George Richards to the permanent rank of major general. He has held the temporary rank of major general for several years.

Members of the Senate must not have been impressed with the grave charges made on the House floor against General Richards last Thursday because it was on Friday, the day following, that the Senate took unanimous action in elevating General Richards to the permanent rank of major general.

Many officers are approved for high rank by the Senate who are practically unknown to the individual Senators. But General Richards has worked closely with both branches of the Congress for years and is well known to many individual Members. The fact that the Senators—men who have personally worked with him—unanimously approved his elevation in permanent rank is persuasive evidence that his work with that body had been highly acceptable.

As I have previously said, I have not risen to defend General Richards as the principle involved in this great issue is not dependent upon the merits or demerits of any individual. I take it for granted that the general is not perfect, and that he, like every other man in the world, may make mistakes from time to time. It would seem that the above facts which I have recited establish the fact that General Richards is an able officer who possesses an excellent reputation for honesty and public service. Were he permitted to take the floor and speak in his own behalf he could no doubt defend himself. But he is denied the forum of the House of Representatives and he is barred from speaking before the committee, and the committee members are barred from hearing him, in this land of the free and the home of the brave.

In conclusion, let me say, if any Member wishes to join the gentleman from Michigan in denying the right of the executive branch of the Government to present important Government witnesses before congressional committees in matters concerning which such witnesses have special information—thereby in effect suppressing important official testimony—I challenge that Member to state and defend his position on the floor of the House of Representatives.

Moreover, if any Member wishes to join the gentleman from Michigan in denying members of congressional committees the right to hear and cross-examine such witnesses and bring out their testimony to the committee, the Congress and the country, I challenge him to state and defend his position on the floor of the House of Representatives.

Mr. TABER. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I will gladly yield to the gentleman from New York.

Mr. TABER. At what time, and when, and where did the gentleman get the idea that the gentleman from Michigan [Mr. ENGEL] had ever taken a position that he would not allow General Richards to appear as a witness? I say this because the gentleman from Michigan [Mr. ENGEL] did not say that in his statement before the House the other day, nor did he say that in talking with me as late as yesterday.

Mr. MAHON. I take it that the gentleman from New York feels that General Richards has a perfect right to accompany Secretary Royall to our committee and to testify at any time.

Mr. TABER. As a witness, but not as a budget officer unless he is requested so to appear. There is a difference between testifying and coming there for some other purpose.

Mr. RAYBURN. Just a moment. Now, what other purpose does the gentleman from New York attribute to Secretary Royall for bringing General Richards there or General Richards being there?

Mr. TABER. He did not have any idea that General Richards was to testify. I can say that positively.

Mr. RAYBURN. The gentleman from Michigan announced to the papers, and it was not denied, that he was not going to allow General Richards to appear before his subcommittee. The gentleman from Michigan has not denied that.

Mr. MAHON. Does the gentleman from New York repudiate the action of the gentleman from Michigan if he did announce to the papers, as it was quoted in the Evening Star and other papers on Saturday and on Sunday, as follows:

> ENGEL says he has informed Secretary Royall not to send Richards before his committee. He contended that the committee could get all the information it needed for the consideration of Army appropriations from Richards' subordinates.
>
> Chairman ENGEL, Republican, of Michigan, said yesterday he had barred Maj. Gen. George C. Richards, the Army's budget officer, from appearing before the House Military Appropriations Subcommittee.

This is the press dispatch I previously quoted.

I did not understand the gentleman from Michigan [Mr. ENGEL] to say anything different, and I do not now understand that he takes any other position than that he will bar General Richards.

The statement appears——

Mr. TABER. I do not know what was in the papers, but I do know what he has told me, and told me repeatedly. I feel that that was an entirely different proposition than the one that has been described.

The SPEAKER. The time of the gentleman from Texas has expired.

Mr. RAYBURN. Mr. Speaker, since some of the gentleman's time has been taken up in colloquy, I ask unanimous consent that he be permitted to proceed for five additional minutes.

The SPEAKER. Is there objection to the request of the gentleman from Texas?

There was no objection.

Mr. RAYBURN. Mr. Speaker, will my colleague from Texas yield to me?

Mr. MAHON. I yield.

Mr. RAYBURN. I address this inquiry to the gentleman from New York [Mr. TABER]. Does the gentleman know or does he not know whether General Richards was asked to leave the hearing the other day?

Mr. TABER. Certainly he was. He was not there as a witness, he was there as a budget officer.

Mr. RAYBURN. He was there accompanying the Secretary of War at the request of the Secretary of War.

Mr. MAHON. I thank the gentleman.

The gentleman from New York [Mr. TABER] I am sure, has no relish for this, and I have nothing by way of criticism to offer to the gentleman from New York, but the gentleman and I both know that on Thursday when General Richards came into the committee with Secretary Royall, General Clay, and others, none of whom was barred, except General Richards. Secretary Royall came down to testify in regard to more than a billion dollars which he was requesting that we appropriate. He brought his comptroller, his chief fiscal officer there with him, as he always does; as General Marshall usually did; as General Eisenhower usually does, and as Secretary Patterson usually did. What happened? By a request which originally emanated from the gentleman from Michigan, as I am informed, he was asked to leave the room, not because the gentleman from New York [Mr. TABER] personally wanted him to leave—I do not think he did want him to leave—but because of the desire of the gentleman from Michigan.

Mr. WALTER. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Pennsylvania.

Mr. WALTER. Is it not a fact that General Richards prepared the estimates that the Secretary was called on to testify about?

Mr. MAHON. That is right; he certainly had some part in making up the budget estimates as the budget officer.

Mr. NORRELL. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to the gentleman from Arkansas.

Mr. NORRELL. May I say that I am a member of the War Department Appropriations Committee. I was a member of the committee when this little trouble arose between General Richards and the gentleman from Michigan, Chairman ENGEL. Chairman ENGEL is a good man, and I like him.

Mr. MAHON. So do I.

Mr. NORRELL. However, there is no Army officer in the Nation for whom I have a higher regard than General Richards. I feel that it is an unfortunate misunderstanding, and I subscribe to everything the gentleman has said.

Mr. MAHON. I thank the gentleman.

Mr. MACKINNON. Mr. Speaker, will the gentleman yield?

Mr. MAHON. The gentleman wishes, no doubt, to inject another subject into this discussion. If he will let me continue, at the end of my remarks we will discuss the other subject.

If the leaders of the Republican Party in the House wish to approve the position of the gentleman from Michigan in these matters, I challenge the leadership of the Republican Party to take the floor and state and defend their position.

The Congress and the country are entitled to an immediate statement from the Republican leadership in the House approving or disapproving and repudiating the position of the gentleman from Michigan in barring—as has been admitted on the floor by my friend, the gentleman from New York [Mr. TABER]—from the committee important witnesses from the executive branch, thereby in effect suppressing vital public information and in effect denying committee members the right to hear such testimony and cross-examine such witnesses presented by the executive branch.

Let me make it clear that I do not mean to make this matter a political or partisan issue at this time because the

rights of both Republicans and Democrats have been placed in equal jeopardy by the astounding events of the last few days.

However, failing to secure the rights which I am insisting upon for all Members of Congress—though the issue is not now on a partisan basis, the Democrats will have no other alternative than to stand up and fight. I hope the Democrats will not have to stand alone in defending the flickering torch of liberty from the gales which assail it.

The SPEAKER. The time of the gentleman from Texas has again expired.

Mr. HOFFMAN. Mr. Speaker, I ask unanimous consent that the gentleman be permitted to proceed for two additional minutes. I want to hear the last part of his statement. It is beginning to get good now.

The SPEAKER. Is there objection to the request of the gentleman from Michigan?

There was no objection.

Mr. MAHON. I hope the Democrats will not have to stand alone in defending the flickering torch of liberty from the gales which assail it, but if necessary, we are amply able to do so, and we do so with full confidence. There is no doubt in my mind but that American public opinion will be our ally, and that the battle in behalf of democracy will be won.

Mr. MACKINNON. Mr. Speaker, will the gentleman yield?

Mr. MAHON. I yield to my distinguished friend from Minnesota.

Mr. MACKINNON. I understand one of the main points of the gentleman's speech is that the top man in the War Department ought to be permitted to testify on this in preference to the subordinates in his own organization.

Mr. MAHON. We want the subordinates and we want the top men. We want all witnesses who have anything to say or any truth to reveal.

Mr. MACKINNON. But one of your main points was that the top man in this section of the Army knew what was going on in his own organization.

Mr. MAHON. I made no such claim. I said the top man should be called before the committee to testify and that his testimony should not be suppressed.

Mr. MACKINNON. The point I make is that Mr. Edwin W. Pauley who also is in the Army Department as special assistant on procurement and reparations to the Secretary of the Army in defense of his commodity speculations claims that he knew practically nothing of what was going on in his section of the War Department.

Mr. MAHON. I am not bringing other issues into this controversy. I do not defend Mr. Pauley. If he is guilty of any offense, he should be vigorously prosecuted. I defend no man of evil. I denounce him if he is guilty. Let all evidence of waste and improper conduct on the part of officials and others be brought out into the open so that the people may know the truth and justice may be done.

ELECTION TO COMMITTEE

Mr. RAYBURN. Mr. Speaker, I offer a resolution (H. Res. 449) and ask for its immediate consideration.

The Clerk read the resolution, as follows:

Resolved, That KEN REGAN, of Texas, be, and he is hereby, elected a member of the Joint Committee of Congress on the Library.

The resolution was agreed to.

EXTENSION OF REMARKS

Mr. SADLAK asked and was given permission to extend his remarks in the RECORD and include a speech by Admiral Kinkaid at the Australian Embassy on yesterday.

The SPEAKER. Under previous order of the House, the gentleman from Indiana [Mr. HARNESS] is recognized for 15 minutes.

PROPAGANDA BY GOVERNMENT AGENCIES

Mr. HARNESS of Indiana. Mr. Speaker, I shall intrude only very briefly upon our crowded time. But I wish to express the sincere appreciation of all Members of our Subcommittee on Publicity and Propaganda in the Executive Agencies for the many applauding and encouraging words communicated to us by so many Members of the House.

Our assignment is a challenging one, for often it is difficult to separate the merits of pending legislation from the larger question of Government propaganda designed to provide a system of national thought control. But we have set our course resolutely against the whole system and theory of Government-made public opinion; and we have attempted conscientiously and fairly to distinguish that great issue from all subsidiary questions touching the merits of various legislative proposals.

As we have stated in our several interim reports, our inquiry is not directed to the merits of this program or that, but solely to the question whether the Federal agencies are engaged in generating public opinion for or against pending legislation. Such activity by the Federal agencies, whether for or against any particular piece of legislation, is clearly beyond the law. And that is the beginning and end of our inquiry—whether the Government agencies are, in fact, making the public opinion which comes back upon Congress in the form of pressure-group activities.

We all recognize that the average American citizen is only vaguely aware of the fact that the Federal Government continuously touches and influences his daily thinking. But, when he stops to think about it, he must realize that a host of Federal agencies and activities exert a constant and often decisive influence upon his own and his neighbors' opinions. Yet, I doubt that any but the most thoughtful students of American Government understand how vast is the range of this influence; how tremendous is the machinery in our Federal establishment through which this influence of molding opinion is exercised.

Every one of us here in Congress ought to be keenly conscious of the tremendous, unmeasurable power of this machine, for he comes in direct, personal contact with it every day. He lives with the lobbies, good and bad, which constantly seek to influence the course of legislation; and he can hardly fail to know that the most powerful, most persistent of them all is the Federal lobby. It works around the clock, every day of the year.

I wonder how many among us actually realize the nature and extent of this threat to free representative government? The very range and intensity of official information can be confusing.

At the risk of repetition, I remind the House again that at the last official tabulation the executive agencies were spending annually some $75,000,000 in definitely identified publicity and propaganda activities.

Some 45,000 Federal employees devote their time wholly or in part to these definitely identified information activities. I use the term "definitely identified" advisedly, for we can be sure that other officials and employees, as well as funds from other sources, contribute directly or indirectly to the volume of Federal publicity and propaganda. What the total cost in money and manpower may be, we can only guess. However, we do know that it is tremendous.

But the tangible cost, large as it is, should be the least of our concern. Our real worry should be the direct violence which this phase of bureaucracy does to the very philosophy of our Constitution; the insidious threat it poses for our free institutions.

The first instinct of bureaucracy is self-preservation. The second is expansion. Just like any living organism, an administrative agency, once launched, seeks constantly to justify its existence, to perpetuate itself and to expand. In the salubrious climate of Government paternalism which has prevailed under this and the preceding administrations, bureaucracy has luxuriated into a tropical jungle. It has grown to the alarming extent that it touches and shadows the daily life and daily thinking of every citizen.

Now that we have a majority in Congress determined not merely to halt this bureaucratic growth, but to clear away the propaganda jungle which enmeshes us, the American people begin to see the true nature of big government. Bureaucracy fights not merely for existence. It battles for greater powers and constant expansion. Its most effective tools are publicity and propaganda.

Let me make it clear, as I have stated so often in our committee meetings, that I have no objection to the legitimate publicity functions of Federal agencies. In fact, it is a prime duty of free government to keep the people fully and accurately informed. Administrative officials at policy-making levels should be entirely free to express and discuss policy on any issue.

But beyond the routine duty of releasing such expressions to the regular news channels of press and radio, no agency may properly go. The information services of administrative agencies may not lawfully use public funds to "sell" ideas, to editorialize, or to influence public opinion on any issue. Federal officials and employees may not lawfully devote time and talents paid for from public funds to mold public thinking.

The sole legal and ethical function of a Federal information service is to issue factual, objective, and studiously unbiased information. Specific safeguards against the abuse of that function is provided in section 201, title 18, of the United States Code. Unfortunately, however, the law has been, and is being, repeatedly violated by numerous administrative agencies. In hundreds of ways, some devious, some blatantly open, Federal agencies, their officials and employees, are ignoring or flouting this legal safeguard, often for the deliberate purpose of fostering sentiment and support for administration policy or viewpoint.

Certainly no Member of Congress, no responsible administrative officer, no thoughtful individual anywhere, doubts the wisdom of this specific prohibition against Federal propaganda. Certainly it is unnecessary to argue that the citizen and taxpayer should not be forced by the Federal agencies to pay for publicity and propaganda designed to influence and direct his own thinking.

You can justify such tactics only if you belong to that school of thought dominant in Washington in recent years that Government must guide and direct the average American in everything because he is incapable of thinking and acting wisely or safely for himself. Or you might so thoroughly approve the policy being advanced by a particular Federal agency at the moment that you fall into the fatal error of believing the end justifies the means.

Actually, the merits of the immediate issue in any case should not concern our committee. We need only remember that if the power of Federal propaganda is applied for a good and wise purpose on one occasion it can be applied on another for a purpose mischievous and dangerous.

And whether the immediate purpose of Government propaganda is good or bad, the fact remains that individual liberty and free institutions cannot long survive when the vast power of Government can be marshaled against the people to perpetuate a given policy or a particular group of officeholders. Nor can freedom survive if all Government policies and programs are sustained by overwhelming Government propaganda.

The limited work our committee has done in the short time since its establishment last May convinces me that it can render a vital service.

Congress cannot, of course, remedy at once all the serious abuses which we are able to expose; for enforcement of the law is solely the responsibility of the executive. I hope, however, that we shall have the united support of the House, in our intention to employ all the facilities at our command to bring this grave danger to the attention of the Nation.

Thought control is a device of dictatorship. It has no place in free America.

Mr. COX. Mr. Speaker, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to the gentleman from Georgia.

Mr. COX. I certainly wish to thank the gentleman for the very excellent statement he has made.

Mr. HARNESS of Indiana. I thank the gentleman from Georgia.

Mr. BUFFETT. Mr. Speaker, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to the gentleman from Nebraska.

Mr. BUFFETT. May I say that there is nothing being done in this Congress more important than the committee's work on propaganda. A representative government can only function successfully if the people get information on both sides of every issue. The people's judgment is only as good as their information. For several years the people of America have been subjected to drenching propaganda for certain philosophies and certain policies that have made it impossible for either the people or the Congress to think through intelligently a decision on great issues. I hope this committee goes forward with its work.

Mr. HARNESS of Indiana. I assure the gentleman that with the support of the House this committee will continue to unfold and bring to public attention the many abuses I have discussed.

Mr. HOFFMAN. Mr. Speaker, will the gentleman yield?

Mr. HARNESS of Indiana. I yield to my distinguished chairman, the gentleman from Michigan.

Mr. HOFFMAN. As chairman of the full committee for which the gentleman has been acting, I know I express the appreciation of all members on the committee. I do not know that anyone on the committee objects. I know the gentleman's reports have been unanimously supported. They were signed by the minority members, as well as by those on the majority side.

Mr. HARNESS of Indiana. Thus far, they have been unanimous.

Mr. HOFFMAN. I want to thank the gentleman for the very careful and painstaking factual reports he has submitted. Certainly the subject needs further consideration by the gentleman's committee.

The SPEAKER pro tempore (Mr. SANBORN). The time of the gentleman from Indiana has expired.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Illinois [Mr. MASON] is recognized for 20 minutes.

PERTINENT OBSERVATIONS CONCERNING THE TAFT-HARTLEY LABOR LAW

Mr. MASON. Mr. Speaker, after spending considerable time and effort last spring in analyzing the so-called labor problem, I told the House that it was not a labor problem at all but rather a problem concerning the rights and interests of labor, of management, and of the public—the three essential factors that make up our economic life. I said then that the job confronting Congress, was one of clearing up and defining anew the rights and interests of labor, of management, and of the public; also, that in order to do that job properly Congress should pass legislation to accomplish four things, namely:

First. Clarify the legal status of labor and management that has been so beclouded by recent court decisions.

Second. Equalize as much as possible the collective-bargaining powers of labor and management.

Third. Require equal responsibility from labor and management for the carrying out of agreements or contracts entered into.

Fourth. Protect the welfare and health of the public whenever differences between labor and management threaten the general welfare and health of the public.

I gave warning then, however, that the right to work, the right not to work, the right of association for mutual advantage, the right to bargain as an individual or collectively are inherent in our American way of life and should not be limited or curtailed by legislative fiat.

Mr. Speaker, when the labor situation was before the Congress for action, much was said pro and con about the Taft-Hartley labor-management bill. Its backers claimed it was a bill of rights for labor. Its opponents called it a slave-labor bill. The truth is it was a labor bill that sought to place labor and management on a par as to their bargaining powers; to bring peace to the troubled field of labor relations; to eliminate many undesirable labor practices that had developed under the National Labor Relations Act; and to make paramount the interest of the general public over that of any minority group, whether employers or employees. The Taft-Hartley labor-management law does just that and nothing more.

The gentleman from Indiana, Representative CHARLES HALLECK, the majority leader of the House—an active, well-known champion of the rights of organized labor during his 13 years in Congress—said, during the debate in the House on the Taft-Hartley labor bill:

> It is sane, fair, decent, reasonable—yea, courageous—legislation dealing with the problems of labor-management relations. * * * It preserves the guaranty of the Wagner Act giving labor the right to organize and to bargain collectively. * * * It provides remedies for activities and practices by labor and by management that almost everyone condemns. It forbids boycotts, jurisdictional strikes, violence in strikes, strikes in violation of contracts, strikes to compel employers to break the law, coercion of employees by unions. It imposes upon unionism restrictions far less stringent than those in the Railway Labor Act, under which the railroad brotherhoods have flourished for years. It preserves the constitutional guaranty of free speech. It provides for separating the functions of the Labor Board, requires the Board to decide cases before it according to the facts, and gives to the courts real power to review the Board's decisions. And it puts the public interest, in maintaining output so essential to our national well-being, above the selfish interests of employers or of employees.
>
> Now these are not provisions that destroy unions. Those who say they will destroy unions say, in effect, that unions, in order to exist, must be free to coerce workers, to engage in violence, to break their contracts, and to break the law, even the very law that protects them. I say this is not true. The great trade-union movement, which protects so many of our people and which has contributed so greatly to raising their standard of living, can and will thrive under the bill now before us. That is my conviction.

Because I agreed with Congressman HALLECK's analysis of the bill, I voted for its passage.

Mr. Speaker, in order to understand the Taft-Hartley labor-management

law we must know something about the situation concerning labor that confronted the Congress last spring.

The Wagner Act, commonly known as the National Labor Relations Act, was passed in 1935. That act is the magna carta of American labor. It was passed to encourage and strengthen labor organizations so they could bargain collectively upon an equal footing with organized management. Under the Wagner Act labor organizations grew rapidly, both in power and in members. In a few years they grew from a membership of 4,000,000 to a membership of 15,000,000. As a result of this tremendous growth the labor-relations pendulum swung over from one extreme to the other. Instead of big-business barons dictating to and asserting their power over the laboring men of America and saying under their breath, "The public be damned," we now had labor czars dictating to and asserting their power over the rank and file of union members, and saying out loud, "The public be damned." As a result, jurisdictional strikes and secondary boycotts became common, with labor disturbances and physical violence everyday occurrences.

Mr. Speaker, some Congressmen said, "Repeal the Wagner Act and take away from labor organizations the powers they are now abusing." Others said, "We should not rob organized labor of the privileges and benefits of the Wagner Act just because some labor leaders have abused those powers. We should amend the act so as to curtail the powers of labor leaders and make them again responsible to the rank and file of their own membership and to the public in general." The latter program is what Congress set out to do, and that is exactly what the Taft-Hartley labor law does.

Boiled down, the law seeks to accomplish four things, namely:

First. Place labor and management on a par as to their bargaining powers, and make them both responsible for living up to their signed contracts.

Second. Bring peace to the troubled field of labor relations.

Third. Eliminate undesirable labor practices that have developed under the National Labor Relations Act.

Fourth. Make paramount the interest of the general public over that of any minority group, whether employers or employees.

The Taft-Hartley labor law does just that and nothing more.

Mr. Speaker, as I see it, the Wagner Act of 1935 was a private one-way street upon which organized labor could march forward to power and influence. The so-called Taft-Hartley law of 1947 is a public street upon which organized labor and organized management can each march forward under rules and regulations that protect the interests of organized labor, the interests of organized management, and the interests of the unorganized public. Instead of being a "slave-labor law," as it has been dubbed, it is a "save-labor law," a law designed to save the rank and file of organized labor from the dictatorial and domineering actions of such labor leaders as James Petrillo, John L. Lewis, and Harry Bridges.

Mr. Speaker, "the proof of the pudding is in the eating." Under the Taft-Hartley Act, and even before it was passed, we have had a greater degree of labor peace, more labor contracts signed without strikes or strife, and a greater degree of satisfaction among the rank and file of labor than at any time during the last 10 years. As proof of this, in the first quarter of 1946 work stoppages amounted to 54,700,000 man-days, the highest figure on record; while during the first quarter of 1947 work stoppages amounted to only 3,300,000 man-days, the lowest record for any quarter since the end of the war. At the same time, the industrial production index of the United States shot up by almost 30 points, and the national income was higher by over $22,000,000,000. Those are Government figures, not my figures. In addition, every single labor contract signed since the passage of the act has provided either better wages, better hours, or better working conditions, and quite often all three have been included.

Mr. Speaker, 2 years ago President Truman asked Congress to pass legislation giving him the power to conscript railroad workers. He asked for the passage of a resolution to draft all railroad men into the Army in peacetime and make them work under penalty of martial law. It was properly called Truman's slave-labor resolution. Congress refused to pass that resolution to give the President such power during peacetime. It was Senator TAFT, the author of the Taft-Hartley law, that blocked President Truman's draft-labor proposal. How times do change. Today President Truman condemns Congress for passing the Taft-Hartley labor bill. He tried to prevent it from becoming a law by using his veto power. He placed his judgment on the Taft-Hartley labor-management bill above the judgment of 80 percent of the 435 duly elected Members of the House of Representatives and 70 percent of the 96 duly elected Members of the United States Senate who voted for the bill.

Mr. Speaker, millions of the rank-and-file members of unions all over the Nation consider the Taft-Hartley Act good legislation because it has given the local unions greater control over their own affairs, and emphasizes the rights of the individual union worker as against the power of the union leaders. Union leaders call the Taft-Hartley labor bill a slave-labor bill, but the average union man today finds that he has been freed rather than enslaved. The Taft-Hartley labor bill certainly did not hinder or handicap John L. Lewis in his dealings with the coal operators.

Mr. Speaker, labor leaders are still screaming in public against the so-called Taft-Hartley Act, but in private they are beginning to acknowledge that it is not nearly as bad as they have painted it. They have been both shocked and sobered by the law just passed by the British Labor Government giving that government the power to direct where every man between 18 and 50 must work, and also every woman between 18 and 40 who is not tied down with children. The law carries a fine of $500 and 3 months in jail for refusal to obey. As one of our labor leaders put it, "We do not want our Government telling us where we must work as the labor government is now doing in England." The fact is the British Labor Government has imposed upon its people greater restrictions and more rigid controls over their everyday life than were in force during the war. Perhaps the idea that the Taft-Hartley law is a save-labor law instead of a slave-labor law is beginning to penetrate the hard heads of some of our labor leaders when they think about what has happened in England.

Mr. Speaker, Woodrow Wilson said:

> The history of liberty is the history of limitation of government power, not the increase of it. When we resist, therefore, the concentration of power, we are resisting the processes of death, because concentration of power is what always precedes the destruction of human liberties.

Whether the concentration of power is in the hands of bureaucrats in Washington, or in the hands of the labor czars of today, it is a bad thing for the rank and file of the people, and it must be restricted and curtailed. That is the purpose of the Taft-Hartley labor law. That is what the Taft-Hartley labor law does; it curtails the powers of the labor czars of today.

Mr. GEARHART. Mr. Speaker, will the gentleman yield?

Mr. MASON. I yield.

Mr. GEARHART. I congratulate the gentleman on his very fine address and wish to express to him the gratitude of the entire membership for having expressed himself so forthrightly. If I could use any word to describe that which the gentleman has done I would use the word "courage," a quality in the gentleman's character for which we all admire him.

Mr. MASON. The gentleman may be interested to know that I gave this speech with ramifications to 150 labor leaders of the State of Illinois who challenged me to come before them and explain the Taft-Hartley law or at least defend my attitude toward it, and my vote upon it, which I was glad to do.

Mr. GEARHART. I feel certain that after that presentation you won many an adherent in the camp of what some might be inclined to describe as the enemy.

Mr. MASON. I thank the gentleman.

The SPEAKER pro tempore (Mr. SANBORN). The time of the gentleman has expired.

VETERANS

Mr. MACKINNON. Mr. Speaker, I ask unanimous consent that my colleague the gentleman from Kentucky [Mr. MEADE] may have permission to extend his remarks in the RECORD at this point.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Minnesota?

There was no objection.

Mr. MEADE of Kentucky. Mr. Speaker, I have now served for a year on the Veterans' Affairs Committee, and, so serving, I have heard much testimony regarding the problems confronting the veterans of all wars.

The most worthy problem—and the one deserving immediate solution—is the

neglect that has thus far been shown the veterans of World War I.

The Congress has provided, for a number of years, for the veterans of the Spanish-American War and their widows and dependent children.

There are today some veterans of World War I who saw much greater service and made much greater sacrifices than did their brothers in the conflict with Spain, who are older than some of the Spanish-American War veterans who have been provided for by our Government.

Mr. Speaker, the average age of the veterans of World War I is now approaching 55. Many are much older than this; a few are younger.

The time has come when it is the duty of our Government to give the fullest consideration to these veterans, who have apparently been forgotten through the years.

At this point, I wish to say that we are proud of our Spanish-American War veterans, and we know that they are highly appreciative of the provisions that have been made for them and that every one of them will join with us in endorsing their program for the veterans of World War I.

I am today introducing a bill to provide for the granting of pensions to World War I veterans and their widows and dependent children equivalent to the pensions of the veterans of the war with Spain and their widows and children.

I urge the immediate enactment of this legislation, and I am confident that the Committee on Veterans' Affairs, of which I am proud to be a member, will immediately take this legislation under consideration. It is my sincere hope that all of my colleagues on both sides of the aisle will join with me in this effort to provide for the welfare of our aging veterans of our First World War conflict of 1917–18.

The SPEAKER pro tempore. Under previous order of the House, the gentleman from Michigan [Mr. SADOWSKI] is recognized for 15 minutes.

OLD-AGE PENSIONS

Mr. SADOWSKI. Mr. Speaker, on yesterday I introduced H. R. 5139, which provides for Federal payments for old-age assistance at the rate of $60 per month beginning April 1, 1949, to any individual who is 60 or more years of age, who has been a citizen and resident of the United States for 10 years, and whose gross income for the preceding tax year was less than $750. Last year a group of liberal progressive Members of Congress met on several occasions to discuss the matter of old-age pensions. At that time we came to certain definite conclusions which were embodied in a resolution addressed to the Committee on Ways and Means. There was a general meeting of the minds on the basic problems involved. This original group of 25 or 30 Congressmen prepared the following resolution, or as we termed it, a friendly letter. Today there are over 120 Members of Congress who have joined as cosponsors for an equitable and reasonable old-age pension bill. The letter reads as follows:

A FRIENDLY REQUEST TO THE HONORABLE COMMITTEE ON WAYS AND MEANS, UNITED STATES HOUSE OF REPRESENTATIVES, EIGHTIETH CONGRESS, WASHINGTON, D. C.

Subject: Old-age pensions.

Mr. Chairman and gentlemen of the committee:

We, the undersigned Members of the Eightieth Congress, respectfully represent:

1. That our present pensions for the aged are inadequate.

2. We feel they should be increased to at least $60 per month.

3. The age of the availability should be reduced from 65 to 60 years.

4. That the Federal appropriation should be available uniformly in all the States, irrespective of whether the various States find themselves in position to match the Federal grant.

5. We feel there is abundant evidence in the records of this and previous sessions of Congress to support these statements.

Will you therefore report to the floor an open bill that will accomplish these very reasonable objectives? May we also ask that the said bill may be reported far enough in advance of any recess that it may have thorough consideration and vote?

We have, as we should, found the time and the means to legislate and appropriate funds liberally for the relief of needy people in other lands. Millions of our deserving elders are now in dire need. In fact, with the increased costs of living, many are in desperate circumstances. Many of us have promised them we would do our best to secure for them a reasonable pension, and during this session of the Congress. We trust your honorable committee will cooperate with us to this end.

Respectfully,

(120 signers.)

Various old-age pension bills have been introduced by Members of Congress requesting revisions and changes in the present old-age pension laws. For myself, I may state that I have also signed the petition to bring out H. R. 16, introduced by the gentleman from Oregon, Congressman HOMER D. ANGELL, the bill that provides for the Townsend plan. Many other Members have done likewise. Let me say at the outset that the sincere and honest Members of Congress who truly are fighting for an adequate old-age pension payment are first of all interested in the primary objective, and that is to give full and adequate assistance to the aged. No one is looking for glory, no one is looking for credit. We are all fighting for a cause, a cause which we think is of first and paramount importance. If there is anyone in the United States of America who will stand up and say that we have already taken care of our aged, disabled, and incapacitated, in a proper American way, let him stand up and say so now but let him not carp and criticize any Member of Congress who is sincerely trying to solve a most important problem.

My bill, H. R. 5139, which I shall call the 60–60 old-age pension bill, reads as follows:

A bill providing direct Federal old-age assistance at the rate of $60 per month to needy citizens 60 years of age or over

Be it enacted, etc., That (a) the Social Security Board (hereinafter called the Board) shall pay, out of any funds hereafter appropriated for such purpose, old-age assistance to qualified individuals at the rate of $60 per month.

(b) For the purposes of this act an individual shall be deemed to be a qualified individual—

(1) who is 60 years of age or over on the first day of the payment year;

(2) who has been a citizen and resident of the United States for not less than 10 years;

(3) whose gross annual income is not more than $750, or whose gross income combined with the gross income of a spouse, as the case may be, for the tax year preceding the year in which the payment year begins is less than $1,500; and

(4) who makes timely application for the benefits of this act.

(c) Payments to qualified individuals shall be made monthly for each month during a payment year. A "payment year" shall begin April 1 and end March 31. Application for the benefits of this act during any payment year shall be made on or before March 15 of the calendar year in which the payment year begins.

SEC. 2. Any individual making application for the benefits of this act shall furnish such evidence of age and citizenship as the board may by regulation prescribe. The gross income of any individual for the purposes of this act shall be established from records and data in the possession of the Secretary of the Treasury. The Secretary of the Treasury shall upon request furnish to the board any documents, records, or information which he may have relating to the gross income of any applicant for the benefits of this act.

SEC. 3. The first payment year under this act shall begin April 1, 1949. No payment to any State under title I of the Social Security Act, as amended, shall be made for any quarter beginning on or after such date. .

SEC. 4. The Board shall prescribe such rules and regulations as may be necessary to carry out the provisions of this act.

SEC. 5. As used in this act the term "United States" shall include the Territories of Alaska and Hawaii.

SEC. 6. There are authorized to be appropriated such amounts as may be necessary to carry out the provisions of this act.

The bill that I have introduced takes care of the basic problem; it takes care of the aged who have lost their earning power. It provides for a Federal pension of $60 per month to persons over 60 years of age who earn less than $750 per year. Of course, I shall be willing to accept amendments that will provide for pension assistance for the aged in the income class of people earning a little more than $750—say, up to $1,000—annually. Any reasonable adjustment which will bring the income of every aged citizen up to at least $100 a month is necessary and will be worked out.

I am positively and definitely opposed to any old-age-pension legislation which will becloud the issue by restricting an aged person to the type of a home that he can own, or would restrict his capital assets to any particular sum, or compels him to take the pauper's oath. After all, let us be reasonable. A man cannot eat his house, or some stocks or bonds that he may own. When we talk about old-age assistance, the only thing that we should take into consideration is the individual's income. His house, his lots, his little farm, his few shares of stocks and bonds should not disqualify him from old-age benefits. His income is the only fair method that we can use to

arrive at an honest conclusion as to whether the aged person should receive a pension or not.

At this point I want to include a recent statement on old-age-assistance payments:

	State maximums on OAA payments			Average OAA payment per recipient		
	September 1942	September 1946	September 1947	September 1942	September 1946	September 1947

[1] Assistance plus income.
[2] Minimums.
[3] Minimum, $30.
[4] $240 per year.
[5] Minimum, $40.
[6] Minimum, $40 less income and resources.
[7] Effective Nov. 1, 1947, maximum is $55.
[8] Maximum on budgetary need.
[9] Minimum, $50 per month, less income and resources.

Mr. Speaker, you will note from this schedule that Michigan could have paid a maximum of $40 in 1942, but it only paid an average of $20.15; in 1946, Michigan could have paid a maximum of $40, but only paid an average of $34.24; in 1947, Michigan could have paid a maximum of $45, but only paid $37.57.

Now let us look at California—of course, they have a slightly different State formula or law than Michigan has—they include assistance plus income, but their average old-age pension for September 1942 was $36.49; for September 1946, $47.72; for September 1947, $57.04. Now, of course, everybody knows that the climate in California is milder than it is in Michigan; you do not need as much fuel or warm clothing—fresh vegetables and fruits, which are most essential, are cheaper and more abundant in California than in Michigan. And then there is the State of Colorado, which in September 1947 gave an average old-age-assistance payment per recipient of $64.93 per month. Has not our State administration been lacking in making the same equitable and ample provisions for our old people?

Now, of course, you can look down this list and find many States which gave far less than Michigan, such as Alabama, Georgia, Kentucky, Mississippi, North Carolina, South Carolina, Virginia, and several others. But what does this prove? Certainly, no one will say that the old and aged citizens of our State should be dragged down to the poverty and pauperism that these few States practice. But on the other hand, if you will examine this schedule you will find that not only do California and Colorado pay more than Michigan, but also that the States of Arizona, Connecticut, District of Columbia, Idaho, Illinois, Iowa, Kansas, Massachusetts, Minnesota, Montana, Nevada, New Hampshire, New Jersey, New York, North Dakota, Ohio, Oklahoma, Oregon, Rhode Island, Utah, Washington, and Wyoming, give greater assistance to the aged.

Yes; all of these States take better care of the needs of their aged citizens than does our great State of Michigan.

Now, in my bill I propose to take care of those over 60 years of age and have incomes of less than $750 a year by giving them an additional $60 per month. This is approximately $2 a day. Now, the great State of Michigan can supplement this by whatever amount it would desire. It will be up to the good Governors and the legislatures to measure the charity in their hearts toward the aged in their States. They likewise could give additional State assistance to those earning more than $750 a year, if they would desire to do so.

Every last human being has a longing in his heart for security. All of us at some time have thought about the evening of life. We look forward to those days of happiness with our life companions, when we will be able to reflect on the active days of the past, enjoy the quiet hours of the present, and think of the blessed days which shall come on the morrow. Some in life are more fortunate than others in acquiring the material things of this earth. For the most part every man is active and considered a worker in the best days of his younger and middle life. In this great country of ours few are lazy and still fewer are without ambition to attain all that is necessary for the protection of himself and those whom he loves; but all of us in this great country must have an appreciation of the beauty and wholesomeness which comes with age. We must prepare the economy of this Government and of this rich Nation to accommodate the needs of those who have grown old. We have too long been thinking of self in the active days and have failed to account for the coming of the winter of life. I propose in my bill to approach this whole question of care realistically, practically, and with a basis of sound economy. We have the wealth—we are motivated by the highest of impulses, and we must translate our wealth and our human motives into practical intention to this important matter.

Would it not be a great sense of satisfaction to us all to feel that we have contributed in a measure to assuring the old men and women of this country security in the latter days of life? Back in the Old Testament somewhere there is written:

> When ye gather the harvest of your lands, ye shall not wholly glean the corners of thy fields, thou shalt leave them for the poor and needy.

Today we are the richest nation of all the nations of the world. We must remain strong—we intend to remain strong. We have shared our wealth with those who have been struck with the horror of a shooting war. We recognize that their homes have been burned, their barns have been knocked down, their factories have been destroyed, and their businesses wrecked.

We have not failed the peoples of the world, but I am insisting that we shall not fail the old people in our own country. To have the greatest degree of happiness, and to be able to contribute to the greatest degree of that happiness to the world, we must not overlook a great segment of our own population. We must not forget that many who have reached 60 years of age or more have, in their quiet, unassuming, honest way, worked hard to produce the very wealth

that we are now able to share with the world.

In working for an adequate old-age pension program we are striving for a very noble, humanitarian objective. Today we are faced with communistic and socialistic philosophies. Now is the time that we must demonstrate to other political philosophies that ours is the best. We must demonstrate by positive action that we do take care of our aged, infirm, and disabled better than any other government, or political philosophy, in the whole world. We must not be weighed in the balances and found wanting. After all, we are the richest nation, we are the people that are economically best able to do so. We must do the same thing for our own people that we ask and encourage the rest of the world to do for their own. Democracy will fail if we do not maintain happiness and security for our citizens in their later days.

We have demonstrated that we have the strength and power and inventive genius to mobilize our resources, our wealth, our industry, our agriculture, and our labor; to build up a fighting force of 11,000,000 men and women to win a world war. Now, with this evidence of our power and our might, will it be said of us that we failed in time of peace to win the war against fear which faces the aged of these United States?

SENATE BILLS REFERRED

Bills of the Senate of the following titles were taken from the Speaker's table and, under the rule, referred as follows:

S. 400. An act authorizing the issuance of a patent in fee to Mabel Townsend Pretty on Top; to the Committee on Public Lands.

S. 401. An act authorizing the Secretary of the Interior to issue a patent in fee to Clarence M. Scott; to the Committee on Public Lands.

S. 773. An act authorizing the issuance of a patent in fee to Mrs. Mary E. Leaf; to the Committee on Public Lands.

S. 1214. An act to amend the act entitled "An act to provide for the training of officers for the naval service, and for other purposes," approved August 13, 1946, as amended; to the Committee on Armed Services.

S. 1298. An act to validate payments heretofore made by disbursing officers of the United States Government covering cost of shipment of household effects of civilian employees, and for other purposes; to the Committee on the Judiciary.

S. 1407. An act authorizing the issuance of a patent in fee to Robert E. Doyle; to the Committee on Public Lands.

S. 1470. An act to amend the act entitled "An act to make provision for the care and treatment of members of the National Guard, Organized Reserves, Reserve Officers' Training Corps, and Citizens' Military Training Camps who are injured or contract diseases while engaged in military training, and for other purposes," approved June 15, 1936, as amended, and for other purposes; to the Committee on Armed Services.

S. 1485. An act to authorize the Secretary of the Interior to dispose of certain lands heretofore acquired for the Albuquerque Indian School, New Mexico; to the Committee on Public Lands.

S. 1517. An act authorizing the issuance to James Perry Doyle of a patent in fee to certain lands in Big Horn County, Mont.; to the Committee on Public Lands.

S. 1521. An act to authorize the Secretary of Defense, the Secretary of the Army, the Secretary of the Navy, the Secretary of the Air Force, and the Secretary of the Treasury to detail certain scientific and technical personnel employed by or within the National Military Establishment or the United States Coast Guard to duty in privately owned plants and laboratories; to the Committee on Armed Services.

S. 1545. An act to authorize a bridge, roads and approaches, supports and bents, or other structures, across, over, or upon lands of the United States within the limits of the Colonial National Historical Park at or near Yorktown, Va.; to the Committee on Public Works.

S. 1591. An act to transfer certain transmission lines, substations, appurtenances, and equipment in connection with the sale and disposition of electric energy generated at the Fort Peck project, Montana, and for other purposes; to the Committee on Public Lands.

S. 1611. An act to extend the time for completing the construction of a bridge across the Mississippi River at or near Sauk Rapids, Minn.; to the Committee on Public Works.

S. 1673. An act to authorize the promotion of James Y. Parker, Army serial No. O20712, as a major, Army of the United States, as of March 1, 1942, under the act of February 16, 1942 (56 Stat. 94), and for other purposes; to the Committee on Armed Services.

S. 1733. An act to authorize payment to certain enrolled members of the Seminole Tribe of Indians under act of July 2, 1942 (Public, No. 645, 77th Cong.); to the Committee on Public Lands.

S. 1783. An act to provide for retention in the service of certain disabled Army and Air Force personnel, and for other purposes; to the Committee on Armed Services.

S. 1791. An act to transfer certain lands at Camp Phillips, Kans., to the Department of the Army; to the Committee on Veterans' Affairs.

S. 1794. An act to authorize the Houston council, Navy League of the United States, to construct a reflecting pool at the United States naval hospital, Houston, Tex.; to the Committee on Armed Services.

S. 1799. An act to amend the act of June 3, 1916, as amended, to make it applicable to the Canal Zone, Guam, American Samoa, and the Virgin Islands; to the Committee on Armed Services.

S. 1800. An act relating to the restrictions on the use of crypt and window spaces of the United States Naval Academy Chapel; to the Committee on Armed Services.

S. 1802. An act to authorize the President to award the Medal of Honor to the unknown American who lost his life while serving overseas in the armed forces of the United States during the Second World War; to the Committee on Armed Services.

S. 1961. An act to amend the act of December 3, 1945, so as to extend the exemption of Navy or Coast Guard vessels of special construction from the requirements as to the number, position, range, or arc of visibility of lights, and for other purposes; to the Committee on Armed Services.

ENROLLED BILL SIGNED

Mr. LECOMPTE, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill of the House of the following title, which was thereupon signed by the Speaker:

H. R. 3645. An act relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes.

ADJOURNMENT

Mr. WIGGLESWORTH. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 2 o'clock and 42 minutes p. m.), under its previous order, the House adjourned until Thursday, January 29, 1948, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1258. A letter from the Secretary of the Army, transmitting a draft of a proposed bill to amend section 4 of the act of March 1, 1911 (36 Stat. 961, 16 U. S. C. 513), to relieve the Secretary from serving as a member of the National Forest Reservation Commission; to the Committee on Agriculture.

1259. A letter from the Secretary of the Army, transmitting a draft of a proposed bill to authorize the Secretary of the Army to exchange certain property with the city of Kearney, Nebr.; to the Committee on Armed Services.

1260. A letter from the Acting Secretary of the Treasury, transmitting a draft of a proposed bill for the relief of certain officers and employees of the Department of the Treasury who, while in the course of their respective duties, suffered losses of personal property by reason of war conditions and whose claims for such losses have been considered and approved by the Secretary of the Treasury upon the recommendations of a Treasury Claim Board; to the Committee on the Judiciary.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. WOLVERTON: Committee on Interstate and Foreign Commerce. Report pursuant to House Resolution 318, Seventy-ninth Congress, and House Resolution 153, Eightieth Congress, on transportation in Alaska; without amendment (Rept. No. 1272). Referred to the Committee of the Whole House on the State of the Union.

Mr. KNUTSON: Committee on Ways and Means. H. R. 4790. A bill to reduce individual income tax payments, and for other purposes; with amendments (Rept. No. 1274). Referred to the Committee of the Whole House on the State of the Union.

Mr. LEWIS: Committee on the Judiciary. H. R. 3366. A bill to amend section 4934 of the Revised Statutes (U. S. C., title 35, sec. 78), as amended, to permit public libraries of the United States to acquire back copies of United States letters patent, and for other purposes; with an amendment (Rept. No. 1275). Referred to the Committee of the Whole House on the State of the Union.

REPORTS OF COMMITTEES ON PRIVATE BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. FELLOWS: Committee on the Judiciary. H. R. 1915. A bill for the relief of Ezra Butler Eddy, Jr., and wife, Marie Claire Lord Eddy; without amendment (Rept. No. 1273). Referred to the Committee of the Whole House.

PUBLIC BILLS AND RESOLUTIONS

Under clause 3 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. H. CARL ANDERSEN:

H. R. 5152. A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation; to the Committee on Banking and Currency.

By Mr. GRIFFITHS:

H. R. 5153. A bill to provide for the establishment and operation of an experiment

station in the Appalachian region for research on the production, refining, transportation, and use of petroleum and natural gas; to the Committee on Public Lands.

By Mr. HOPE:

H. R. 5154. A bill to extend the period within which the Secretary of Agriculture may carry out the purposes of the Soil Conservation and Domestic Allotment Act by making payments to agricultural producers; to the Committee on Agriculture.

By Mr. BEALL:

H. R. 5155. A bill to authorize the Secretary of the Interior to have made by the Public Roads Administration and the National Park Service a joint reconnaissance survey of the Chesapeake and Ohio Canal between Great Falls, Md., and Cumberland, Md., and to report to the Congress upon the advisability and practicability of constructing thereon a parkway, and for other purposes; to the Committee on Public Lands.

By Mr. CURTIS:

H. R. 5156. A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation; to the Committee on Banking and Currency.

By Mr. MILLER of Nebraska:

H. R. 5157. A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation; to the Committee on Banking and Currency.

By Mr. REED of New York:

H. R. 5158. A bill to authorize payment of benefits for injuries or death incurred by veterans as a result of training under part VIII of Veterans Regulation No. 1 (a); to the Committee on Veterans' Affairs.

By Mr. SMATHERS:

H. R. 5159. A bill to provide for research relating to diseases of the heart and circulation, including high blood pressure, in a supreme endeavor to develop speedily more effective methods of prevention, diagnosis, and treatment of such diseases, and for other purposes; to the Committee on Interstate and Foreign Commerce.

By Mr. STEFAN:

H. R. 5160. A bill to extend the applicability of certain provisions affecting the price-support program for agricultural commodities, and to extend the life of the Commodity Credit Corporation; to the Committee on Banking and Currency.

By Mr. ALLEN of Louisiana:

H. R. 5161. A bill to amend the Servicemen's Readjustment Act of 1944, as amended, to provide homes for veterans, through veterans' homestead associations, and the public facilities essential therefor; to the Committee on Veterans' Affairs.

H. R. 5162. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. BYRNES of Wisconsin:

H. R. 5163. A bill to provide for the acquisition of site and preparation of plans and specifications for a new Federal building and post office in Green Bay, Wis.; to the Committee on Public Works.

H. R. 5164. A bill to provide for the acquisition of site and preparation of plans and specifications for a new Federal building and post office in Manitowoc, Wis.; to the Committee on Public Works.

By Mr. CHELF:

H. R. 5165. A bill to confer concurrent jurisdiction upon the Commonwealth of Kentucky over certain highways; to the Committee on the Judiciary.

By Mr. MEADE of Kentucky:

H. R. 5166. A bill granting pensions to veterans of World War I and their widows and dependent children equivalent to the pensions granted to veterans of the war with Spain and their widows and dependent children; to the Committee on Veterans' Affairs.

By Mr. POULSON:

H. R. 5167. A bill to confirm and establish the titles of the States to lands and resources in and beneath navigable waters within State boundaries and to provide for the use and control of said lands and resources; to the Committee on the Judiciary.

By Mr. O'TOOLE:

H. Res. 448. Resolution to create a special committee to investigate lawlessness in Palestine and activities and intentions in the Middle East of United Nations, United Kingdom, Union of Soviet Socialist Republics, and United States of America; to the Committee on Rules.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. DELANEY:

H. R. 5168. A bill for the relief of Louis Kesselman; to the Committee on the Judiciary.

By Mr. GATHINGS:

H. R. 5169. A bill for the relief of Mrs. Harriett Patterson Rogers; to the Committee on the Judiciary.

By Mr. REED of Illinois:

H. R. 5170. A bill to authorize the payment of additional compensation to special assistants to the Attorney General in the case of United States against Doheny Executors; to the Committee on the Judiciary.

By Mr. SASSCER:

H. R. 5171. A bill for the relief of John G. Johnson; to the Committee on the Judiciary.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

1210. By Mr. HESELTON: Petition signed by 59 members of the Clarence W. Allen Post, No. 178, American Legion Auxiliary, Turner Falls, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Military Training; to the Committee on Armed Services.

1211. Also, petition signed by 26 members of the American Legion Auxiliary post, Adams, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Military Training; to the Committee on Armed Services.

1212. Also, petition signed by 26 members of American Legion Post, No. 172, Orange, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Military Training; to the Committee on Armed Services.

1213. Also, petition signed by 15 members of Lieutenant Roger B. Warfield Post, American Legion, Templeton, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Military Training; to the Committee on Armed Services.

1214. Also, petition signed by 11 members of the American Legion Auxiliary post, Ashfield, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Military Training; to the Committee on Armed Services.

1215. Also, petition signed by 15 members of Holyoke Post, No. 25, American Legion Auxiliary, Holyoke, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Military Training; to the Committee on Armed Services.

1216. Also, petition signed by 63 members of Colrain Post, No. 43, American Legion, Colrain, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1217. Also, petition signed by nine residents of North Adams, Mass., in favor of legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1218. Also, petition of Miss Arlene Miller and sundry citizens of Huntington, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1219. Also, petition signed by 11 residents of Housatonic, State Line, and West Stockbridge, Mass., in favor of legislation establishing a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

1220. By Mr. HARDIE SCOTT: Petition of 18 members of Frankford Post, No. 68, American Legion, Philadelphia, Pa., urging passage of legislation to establish a system of universal military training; to the Committee on Armed Services.

1221. By Mr. HESELTON: Petition signed by 15 members of the American Legion Post, Adams, Mass., favoring a system of universal military training as recommended by the President's Advisory Commission on Universal Training; to the Committee on Armed Services.

SENATE

WEDNESDAY, JANUARY 28, 1948

(Legislative day of Monday, January 26, 1948)

The Senate met at 12 o'clock meridian, on the expiration of the recess.

The Chaplain, Rev. Peter Marshall, D. D., offered the following prayer:

Our Father, it seems hard to care for those we find it far easier to hate, to love those whom we regard as unlovely, to spend our lives for those who are so ungrateful.

If we are to learn, Thou must be our teacher.

Since we will be criticized, let it be for doing too much or too little, rather than for doing nothing.

Teach us to trust not to cleverness or learning, but to that inward faith which can never be denied.

Lead us out of confusion to simplicity. In the name of Jesus Christ. Amen.

DESIGNATION OF ACTING PRESIDENT PRO TEMPORE

The Chief Clerk read the following letter:

UNITED STATES SENATE,
PRESIDENT PRO TEMPORE,
Washington, D. C., January 28, 1948.

To the Senate:

Being temporarily absent from the Senate, I appoint Hon. IRVING M. IVES, a Senator from the State of New York, to perform the duties of the Chair during my absence.

A. H. VANDENBERG,
President pro tempore.

Mr. IVES thereupon took the chair as Acting President pro tempore.

THE JOURNAL

On request of Mr. WHERRY, and by unanimous consent, the reading of the Journal of the proceedings of Monday, January 26, 1948, was dispensed with, and the Journal was approved.

MESSAGES FROM THE PRESIDENT—APPROVAL OF BILLS

Messages in writing from the President of the United States were communicated to the Senate by Mr. Miller, one of his secretaries, and he announced that the President had approved and signed the following acts:

On January 26, 1948:

S. 84. An act for the relief of Mrs. Clinton R. Sharp;

S. 136. An act for the relief of Ioannis Stephanes;

S. 166. An act for the relief of Anna M. Kinat (Mrs. John P. Taylor);

S. 167. An act for the relief of Mrs. Yoneko Nakazawa;

S. 185. An act for the relief of Thomas Abadia;

S. 186. An act for the relief of Santiago Naveran;

S. 187. An act for the relief of Antonio Arguinzonis;

S. 189. An act for the relief of Simon Fermin Ibarra;

S. 190. An act for the relief of Pedro Ugalde;

S. 191. An act for the relief of Julian Uriarte;

S. 192. An act for the relief of Juan Llona;

S. 258. An act for the relief of Troy Charles Davis, Jr.;

S. 298. An act for the relief of certain Basque aliens;

S. 1020. An act to amend the Philippine Rehabilitation Act of 1946, as amended;

S. 1039. An act for the relief of Ada B. Foss;

S. 1324. An act to amend the Civil Service Retirement Act so as to make such act applicable to the officers and employees of the National Library for the Blind; and

S. 1579. An act for the relief of Damian Gandiaga.

On January 27, 1948:

S. 339. An act for the relief of Lucy Jefferson Weil;

S. 851. An act for the relief of Belmont Properties Corp.;

S. 929. An act to amend section 2 of the act prescribing regulations for the Soldiers' Home located at Washington, in the District of Columbia, and for other purposes, approved March 3, 1883 (22 Stat. 564); and

S. 957. An act for the relief of Col. William J. Kennard.

MESSAGE FROM THE HOUSE

A message from the House of Representatives, by Mr. Maurer, one of its reading clerks, announced that the House had agreed to the amendment of the Senate to the bill (H. R. 3326) to provide for the granting of certificates of competency to certain members of the Osage Indian Tribe in Oklahoma, and for other purposes.

The message also announced that the House had severally agreed to the amendments of the Senate to the following bills of the House:

H. R. 2361. An act to authorize the filing of actions in State courts to quiet title to lands described in a treaty between the United States and the Delaware Indians, dated October 3, 1818;

H. R. 3153. An act to provide for the sale or other disposal of certain submarginal lands located within the boundaries of Indian reservations in the States of Montana, North Dakota, and South Dakota; and

H. R. 3322. An act to facilitate rights-of-way through restricted Osage Indian land, and for other purposes.

The message further announced that the House had passed a bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases, in which it requested the concurrence of the Senate.

The message also announced that the Speaker had affixed his signature to the enrolled bill (H. R. 3645) relating to the exchange of certain private and Federal properties within Gettysburg National Military Park, Pa., and for other purposes, and it was signed by the Acting President pro tempore.

LEAVE OF ABSENCE

Mr. ROBERTSON of Virginia asked and obtained consent to be excused from attendance on the session of the Senate on Friday next.

TRANSACTION OF ROUTINE BUSINESS

By unanimous consent, the following routine business was transacted:

EXECUTIVE COMMUNICATIONS, ETC.

The ACTING PRESIDENT pro tempore laid before the Senate the following letters, which were referred as indicated:

RELIEF OF CERTAIN OFFICERS AND EMPLOYEES OF TREASURY DEPARTMENT

A letter from the Acting Secretary of the Treasury, transmitting a draft of proposed legislation for the relief of certain officers and employees of the Department of the Treasury who, while in the course of their respective duties, suffered losses of personal property by reason of war conditions and whose claims for such losses have been considered and approved by the Secretary of the Treasury upon the recommendations of a Treasury Claim Board (with accompanying papers); to the Committee on the Judiciary.

REPORT OF COMPTROLLER GENERAL

A letter from the Acting Comptroller General of the United States, transmitting, pursuant to law, the report of the Comptroller General of the work of the General Accounting Office, for the fiscal year 1947 (with an accompanying report); to the Committee on Expenditures in the Executive Departments.

STATEMENT BY NEBRASKA SOIL CONSERVATION DISTRICT SUPERVISORS

Mr. BUTLER. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a statement prepared and unanimously adopted by the soil conservation district supervisors of Nebraska, assembled in annual meeting at Lincoln, on January 7 and 8, 1948.

There being no objection, the statement was referred to the Committee on Public Lands and ordered to be printed in the RECORD, as follows:

To the Members of the Congress of the United States:

We, the supervisors of the soil conservation districts of the State of Nebraska, being subdivisions of the State and the agency charged under the laws of the State of Nebraska with local guidance of the action program of conservation on the land, respectfully submit for your consideration the following recommendations:

We urge that the conservation districts of the various States be delegated by the Federal Government with the same responsibilities they have under State laws so that there will be no misinterpretations of functions.

We wish to call to your attention that the number of soil conservation districts in the United States has increased from 826 to 2,000 in the past 5 years and now covers most of the agricultural areas of our States. Of these districts there are 82 in Nebraska including 97 percent of the farms of the State. The land owners of the Nebraska districts are deeply interested in the program but are not receiving this technical service nearly as fast as they desire, consequently we urge that an adequate appropriation be made to the Soil Conservation Service to staff the various districts with technical help so that a high standard of work may be maintained and carried on more rapidly.

We, the members of the Nebraska State Association of Soil Conservation Districts, wish to go on record as being ready and willing to fully assume all responsibilities properly delegated to us by State and Federal law.

We favor a national land-use policy based on sound principles.

RESOLUTION OF NATIONAL COUNCIL OF FARMER COOPERATIVES

Mr. CAPPER. Mr. President, I ask unanimous consent to present for appropriate reference and to have printed in the RECORD a resolution adopted by the National Council of Farmer Cooperatives at a recent meeting in Chicago, Ill.

There being no objection, the resolution was received, referred to the Committee on Agriculture and Forestry, and ordered to be printed in the RECORD, as follows:

PLANKS IN PARTY PLATFORM

Whereas farmer cooperative associations have been recognized and encouraged by the American people, in the public interest, under the administration of the Federal Government, by both the great political parties of the United States; and

Whereas for many years the Democratic and Republican parties have recognized by their actions the fundamental right of farmers to cooperatively market their own farm products and cooperatively purchase their own farm supplies: Now, therefore, be it

Resolved, That the National Council of Farmer Cooperatives hereby calls upon the leadership of both great political parties to reaffirm by platform pledge and prompt affirmative action their belief and faith in farmer cooperative associations. This council to denounce the activities of those individuals who have violated the pledges of their parties by attempting to cripple agricultural credit and seeking to destroy the right of farmers to cooperatively market their own products and to cooperatively purchase their own farm supplies.

REPORT OF A COMMITTEE

The following report of a committee was submitted:

By Mr. TOBEY, from the Committee on Interstate and Foreign Commerce:

S. J. Res. 172. Joint resolution to authorize vessels of Canadian registry to transport iron ore between United States ports on the Great Lakes during 1948; without amendment (Rept. No. 846).

CHANGE OF NAME OF COMMITTEE ON PUBLIC LANDS TO COMMITTEE ON INTERIOR AND INSULAR AFFAIRS

Mr. BROOKS. Mr. President, from the Committee on Rules and Administration, I ask unanimous consent to report four resolutions, and request their immediate consideration.

Mr. TYDINGS. Mr. President, reserving the right to object, do I under-

stand that all the resolutions were ordered unanimously reported by the Rules and Administration Committee?

Mr. BROOKS. The Senator is correct.

Mr. TYDINGS. I have no objection.

Mr. BROOKS. Mr. President, from the Committee on Rules and Administration, I ask unanimous consent to report favorably without amendment Senate Resolution 179, submitted by the Senater from Nebraska [Mr. BUTLER] on December 18, 1947, and I request its immediate consideration.

There being no objection, the resolution was considered and agreed to, as follows:

Resolved, That paragraph (1) (m) of rule XXV of the Standing Rules of the Senate is amended by striking out "Committee on Public Lands" and inserting in lieu thereof "Committee on Interior and Insular Affairs."

INCREASE IN EXPENDITURES BY COMMITTEE ON BANKING AND CURRENCY

Mr. BROOKS. From the Committee on Rules and Administration, I also ask unanimous consent to report favorably without amendment Senate Resolution 185, submitted by the Senator from New Hampshire [Mr. TOBEY] on January 7, 1948, and I request its immediate consideration.

There being no objection, the resolution was considered and agreed to, as follows:

Resolved, That the Committee on Banking and Currency is hereby authorized to expend from the contingent fund of the Senate during the Eightieth Congress $10,000 in addition to the amount, and for the same purposes, specified in section 134 (a) of the Legislative Reorganization Act of 1946, approved August 2, 1946.

AUTHORIZATION FOR COMMITTEE ON EXPENDITURES IN THE EXECUTIVE DEPARTMENTS TO MAKE CERTAIN EXPENDITURES, ETC.

Mr. BROOKS. Mr. President, from the Committee on Rules and Administration, I also ask unanimous consent to report favorably, with an amendment, Senate Resolution 189, submitted by Mr. AIKEN on January 14, 1948, and I request its immediate consideration.

There being no objection, the Senate proceeded to consider the resolution.

The amendment of the Committee on Rules and Administration was, in line 6, after the word "authorized", to insert "during the sessions, recesses, and adjourned periods of the Eightieth Congress."

The amendment was agreed to.

The resolution, as amended, was agreed to, as follows:

Resolved, That in carrying out the duties imposed upon it by subsection (g) (2) (B) of rule XXV of the Standing Rules of the Senate, or any other duties imposed upon it, the Committee on Expenditures in the Executive Departments, or any duly authorized subcommittee thereof, is authorized during the sessions, recesses, and adjourned periods of the Eightieth Congress to make such expenditures, and to employ upon a temporary basis such investigators and such technical, clerical, and other assistants, as it deems advisable.

SEC. 2. The expenses of the committee under this resolution, which shall not exceed $125,000, in addition to any unexpended balance under Senate Resolution 75, Eightieth Congress, agreed to February 21, 1947, which is hereby made available for the purposes of this resolution, shall be paid from the contingent fund of the Senate upon vouchers approved by the chairman of the committee or subcommittee as the case may be.

PRINTING OF FIFTIETH ANNUAL REPORT OF SOCIETY OF DAUGHTERS OF THE AMERICAN REVOLUTION

Mr. BROOKS. From the Committee on Rules and Administration, I also ask unanimous consent to report favorably, without amendment, Senate Resolution 190, submitted by the Senator from Indiana [Mr. JENNER] on January 16, 1948, and I request its immediate consideration.

There being no objection, the resolution was considered and agreed to, as follows:

Resolved, That the Fiftieth Annual Report of the National Society of the Daughters of the American Revolution for the year ended April 1, 1947, be printed as a Senate document.

BILLS AND JOINT RESOLUTIONS INTRODUCED

Bills and joint resolutions were introduced, read the first time, and, by unanimous consent, the second time, and referred as follows:

By Mr. JENNER:

S. 2074. A bill to record the lawful admission of Ernest J. Hoffmann to the United States for permanent residence; to the Committee on the Judiciary.

By Mr. JOHNSON of Colorado:

S. 2075. A bill for the relief of Wisia Paryzenberg; to the Committee on the Judiciary.

By Mr. BARKLEY:

S. 2076. A bill to authorize Defense Homes Corporation to convey to Howard University certain lands in the District of Columbia, and for other purposes; to the Committee on Banking and Currency.

By Mr. GURNEY:

S. 2077. A bill to authorize the Secretary of the Army to exchange certain property with the city of Kearney, Nebr.; to the Committee on Armed Services.

S. 2078. A bill to amend section 4 of the act of March 1, 1911 (36 Stat. 961; 16 U. S. C. 513), to relieve the Secretary of the Army from serving as a member of the National Forest Reservation Commission; to the Committee on Agriculture and Forestry.

By Mr. MYERS:

S. 2079. A bill conferring jurisdiction upon the United States District Court for the Eastern District of Pennsylvania to hear, determine, and render judgment upon the claims of the estate of Archangelo Straneri; to the Committee on the Judiciary.

By Mr. MYERS (for himself and Mr. MARTIN):

S. 2080. A bill to provide for the establishment of the Philadelphia National Historical Park, and for other purposes; to the Committee on Public Lands.

By Mr. BUTLER (by request):

S. 2081. A bill to extend the provisions of the Federal Airport Act of 1946 to the Virgin Islands; to the Committee on Public Lands.

By Mr. ECTON:

S. 2082. A bill for the relief of H. R. Barney; to the Committee on the Judiciary.

By Mr. LANGER:

S. 2083. A bill for the relief of certain Latvians and Estonians; to the Committee on the Judiciary.

By Mr. GREEN:

S. 2084. A bill to provide for a national cemetery in the State of Rhode Island; to the Committee on Public Lands.

By Mr. MAGNUSON:

S. 2085. A bill for the purpose of erecting a Federal building at Enumclaw, Wash.; to the Committee on Public Works.

(Mr. TAYLOR (for himself and Mr. MORSE) introduced Senate bill 2086, to require certain members of the legislative, judicial, and executive branches of the Government to file statements relating to amount and sources of income, and dealings in securities and commodities, which was referred to the Committee on Rules and Administration, and appears under a separate heading.)

By Mr. PEPPER (for himself and Mr. HOLLAND):

S. 2087. A bill to authorize the refund to the Florida Keys Aqueduct Commission of the sum advanced for certain water facilities, and for other purposes; to the Committee on Armed Services.

(Mr. THYE introduced Senate Joint Resolution 178, to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the creation of the Territory of Minnesota, which was referred to the Committee on Post Office and Civil Service, and appears under a separate heading.)

(Mr. WHERRY, from the Committee on Rules and Administration, reported an original joint resolution (S. J. Res. 179) to change the date for filing the report of the Joint Committee on the Economic Report, which was passed, and appears under a separate heading.)

FILING OF REPORT ON SOURCES OF OUTSIDE INCOME BY CERTAIN GOVERNMENT OFFICIALS

Mr. TAYLOR. Mr. President, on behalf of the Senator from Oregon [Mr. MORSE] and myself, I ask unanimous consent to introduce for appropriate reference a bill; and I should like to make a brief statement in connection with the bill.

The ACTING PRESIDENT pro tempore. Without objection, the bill will be received and appropriately referred and, without objection, the Senator may proceed.

There being no objection, the bill (S. 2086) to require certain members of the legislative, judicial, and executive branches of the Government to file statements relating to amount and sources of income, and dealings in securities and commodities, introduced by Mr. TAYLOR (for himself and Mr. MORSE), was received, read twice by its title, and referred to the Committee on Rules and Administration.

Mr. TAYLOR. Mr. President, the recent disclosures of speculation on the commodity market by Government employees who were alleged to have inside information have again highlighted the need for full disclosure of outside financial activities of policymaking officials in all branches of the Government. The public has a right to know something about the financial interests of the men who write laws, who execute them, and who interpret them.

A year ago, when newspapers were alleging improper market deals by Members of Congress, the Senator from Oregon [Mr. MORSE] and I proposed an amendment to the rules of the Senate which would require all Senators to make such disclosures. That bill has not even been given a committee hearing, let alone discussion or vote on the floor. Nevertheless, many Members of the Senate felt the need for searching investigation of Government employees.

I feel that all of us—Senators, Representatives, judges, and all employees of the executive branch—earning $9,000

per year or more should file an annual statement setting forth the amounts and sources of all income received during the preceding year, including all fees, salaries, income from law partnerships, trusts, estates, and so forth. We should further be required to give a full description of all dealings in securities and commodities in which we may have engaged.

This method would put all of us on the spot equally. It would eliminate the present unfair system of selecting special goats. It would enable the public to know if and when the judgment of their elected representatives and their other public servants was being affected by their outside interests.

ISSUANCE OF MINNESOTA'S CENTENNIAL COMMEMORATIVE STAMP

Mr. THYE. Mr. President, I ask unanimous consent to introduce for appropriate reference a joint resolution to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the creation of the Territory of Minnesota.

In approximately a year Minnesota will celebrate its one hundredth birthday, for it was on March 3, 1849, that the organic act establishing the Territory of Minnesota, became law. With the establishment of that government in 1849 began the growth of the farms and towns and cities, the organization of counties, the development of Minnesota's great natural resources, the expansion of industry, the establishment of newspapers, the building of schools and churches, the movement of organized civilization and culture into an Indian wilderness.

So significant was the development of Minnesota in those years when these foundations were laid that the establishment of the Territory has even more significance historically than the admission of the State to the Union, which came 9 years later, in 1858.

Plans are already being made for the centennial observance. The Minnesota Historical Society, established in Territorial days and thus an organization which is older than the State itself, has been designated as the official agency to prepare for commemoration of the one-hundredth anniversary next year.

The Minnesota centennial is worthy of the national recognition which a distinctive commemorative stamp affords, and it is for that reason that I offer this bill for the issuance of such a stamp on the date of the one hundredth anniversary of the creation of the Territory of Minnesota, namely, March 3, 1949.

There being no objection, the joint resolution (S. J. Res. 178) to authorize the issuance of a special series of stamps commemorative of the one hundredth anniversary of the creation of the Territory of Minnesota, introduced by Mr. THYE, was received, read twice by its title, and referred to the Committee on Post Office and Civil Service.

DATE FOR FILING REPORT OF JOINT COMMITTEE ON THE ECONOMIC REPORT

Mr. WHERRY. Mr. President, from the Committee on Rules and Administration I ask unanimous consent to report an original joint resolution, and I request its present consideration.

The ACTING PRESIDENT pro tempore. The joint resolution will be read for the information of the Senate.

There being no objection, the joint resolution (S. J. Res. 179) to change the date for filing the report of the Joint Committee on the Economic Report was read the first time by its title, and the second time at length, as follows:

Resolved, etc., That section 5 (b) (3) of the Employment Act of 1946, as amended, is amended by striking out "February 1" and inserting in lieu thereof "March 1."

Mr. WHERRY. Mr. President, the report is signed by all the members of the Committee on Rules and Administration.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Nebraska to proceed to the consideration of the joint resolution?

Mr. LUCAS. Mr. President, will the Senator give us a brief explanation of the joint resolution?

Mr. WHERRY. Mr. President, the joint resolution merely changes the date from February 1 to March 1, to give the committees time to make their reports to the Joint Committee on the Economic Report.

Mr. TAFT. Mr. President, will the Senator yield?

Mr. WHERRY. I yield.

Mr. TAFT. The joint resolution relates to the report of the Committee on the President's Economic Report. The President's Economic Report was not received until January 13, so we have had only a little more than 2 weeks to meet the statutory date of February 1. The date will always be too short. This is a provision that the statute be changed to permit the report to be made on March 1 instead of February 1.

Mr. LUCAS. Am I to understand that the joint resolution was unanimously reported from the Committee on Rules and Administration?

Mr. WHERRY. All members of the committee have signed the report.

Mr. LUCAS. I have no objection.

Mr. WHERRY. Mr. President, this is the second section of Senate Joint Resolution 116, which was submitted by the distinguished junior Senator from Oregon [Mr. MORSE]. I should like to have him make a brief statement about it.

Mr. MORSE. Mr. President, I am happy to join with the Senator from Ohio and the Senator from Nebraska in recommending the second part of my joint resolution of May 19 of last year, which extended the date for filing the report of the Joint Committee on the Economic Report. We still have before us, of course, the problem inherent in the first part of the resolution, namely, whether or not there should be an extension in connection with the legislative budget. I understand that that question is under advisement in connection with either a further amendment to the Reorganization Act, or an agreement on a legislative budget prior to the date now set out in the act.

I want to say that I think the problem of the budget, like the poor, will always be with us until we know what the appropriation problems and the needs of the various sections of our appropriation bills as represented by the various departments thereunder will be.

The only purpose of the first part of my resolution, which we are not acting upon today, is to give us enough time so that if we are to have a legislative budget, it shall not become a guessing budget, because I do not think we can possibly have a scientific budget based even on intelligent guesses.

I am very happy to join at this time in the passage of at least the second part of the joint resolution.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the joint resolution?

There being no objection, the joint resolution was considered, ordered to be engrossed for a third reading, read the third time, and passed.

CONTINUATION OF RENT CONTROL—AMENDMENTS

Mr. PEPPER submitted amendments intended to be proposed by him to the bill (S. 2014) to establish effective rent control until June 30, 1950, and for other purposes, which were referred to the Committee on Banking and Currency, and ordered to be printed.

HOUSE BILL REFERRED

The bill (H. R. 4044) to amend the Trading With the Enemy Act, as amended; to create a commission to make an inquiry and report with respect to war claims; and to provide for relief for internees in certain cases was read twice by its title, and referred to the Committee on the Judiciary.

THE ST. LAWRENCE SEAWAY—STATEMENT BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD a statement by him regarding the St. Lawrence waterway, which appears in the Appendix.]

CONDITIONS IN PALESTINE

[Mr. BREWSTER asked and obtained leave to have printed in the RECORD a statement by him; memoranda dealing with the statutory and constitutional situation in Palestine, and clippings from sundry newspapers dealing with conditions in Palestine, which appear in the Appendix.]

THE ST. LAWRENCE SEAWAY—STATEMENTS BY SENATOR WILEY

[Mr. WILEY asked and obtained leave to have printed in the RECORD two statements on the St. Lawrence waterway issued by him January 28, 1948, together with an editorial from the Detroit News of January 26, 1948, which appear in the Appendix.]

PRESENTATION OF GOLD MEDAL TO DR. ARCHER CHESTER SUDAN—ADDRESS BY FEDERAL SECURITY ADMINISTRATOR

[Mr. HILL asked and obtained leave to have printed in the RECORD an address delivered by Hon. Oscar R. Ewing, Federal Security Administrator, before the house of delegates of the American Medical Association at Cleveland, Ohio, on January 7, 1948, on the occasion of the presentation of a gold medal to Dr. Archer Chester Sudan, of Kremmling, Colo., which appears in the Appendix.]

THE MARSHALL PLAN AND THE PRICE OF GOLD—LETTER FROM J. F. LITTLE

[Mr. JOHNSON of Colorado asked and obtained leave to have printed in the RECORD a letter from J. F. Little, of Denver, Colo., dealing with the Marshall plan, which appears in the Appendix.]

UNITED NATIONS IN 1948—ADDRESS BY ARTHUR GAETH

[Mr. TAYLOR asked and obtained leave to have printed in the RECORD an address on the subject, United Nations in 1948, broadcast December 31, 1947, by Mr. Arthur Gaeth, which appears in the Appendix.]

PRIDE IN SERVICE—EDITORIAL FROM THE NATIONAL TRIBUNE AND STARS AND STRIPES

[Mr. COOPER asked and obtained leave to have printed in the RECORD an editorial entitled "Pride in Service," from the November 27, 1947, edition of the National Tribune and Stars and Stripes, which appears in the Appendix.]

THE FARM PROGRAM OF THE AMERICAN FARM BUREAU FEDERATION—STATEMENT BY ALLAN W. KLINE

[Mr. CAPPER asked and obtained leave to have printed in the RECORD a statement regarding the farm program of the American Farm Bureau Federation, by Mr. Allan W. Kline, president of the American Farm Bureau Federation, before the Senate Committee on Agriculture and Forestry, January 28, 1948, which appears in the Appendix.]

PHILOSOPHY OF CYRUS P. CHING—ARTICLE BY LOUIS STARK

[Mr. THOMAS of Utah asked and obtained leave to have printed in the RECORD an article entitled "Our No. 1 Labor Catalyst," by Louis Stark, from the New York Times magazine, which appears in the Appendix.]

PUBLIC OPINION POLLS—ARTICLE BY HARVEY M. BROWN

[Mr. GREEN asked and obtained leave to have printed in the RECORD an article entitled "There Are Jokers in Opinion Polls," written by Harvey M. Brown, president of the International Association of Machinists, and published in The Machinist, which appears in the Appendix.]

NOMINATION OF GEN. OMAR NELSON BRADLEY TO BE CHIEF OF STAFF

Mr. GURNEY. Mr. President, the Senate Armed Services Committee has acted favorably upon the nomination of Gen. Omar Nelson Bradley to be Chief of Staff. Believing it to be a fine gesture and a recognition of the high esteem in which the Congress holds General Bradley, I at this time ask unanimous consent that I be authorized, as in executive session, to report the nomination from the Armed Services Committee, and I further ask unanimous consent that the Senate proceed to the consideration of the nomination at this time.

Mr. WHERRY. Mr. President, will the Senator yield?

Mr. GURNEY. I yield.

Mr. WHERRY. Reserving the right to object—and I will say now that I am not going to object, because I know the general personally—I merely wish to say that it is an unusual procedure for the Senate to consider a nomination immediately after it has been reported from committee. I wish to join with the distinguished Senator from South Dakota, however, in asking that the Senate confirm the nomination now as an indication of the high esteem in which it holds General Bradley. I feel that this is one time when the Senate rule should be suspended. I believe all Members of the Senate will be glad to join in confirming General Bradley for the high post of Chief of Staff at this time.

The ACTING PRESIDENT pro tempore. Without objection, the report submitted by the Senator from South Dakota will be received and placed upon the Executive Calendar.

The nomination will be stated.

The legislative clerk read the nomination of Gen. Omar Nelson Bradley to be Chief of Staff, United States Army.

The ACTING PRESIDENT pro tempore. Is there objection to the present consideration of the nomination? The Chair hears none, and, without objection, the nomination is confirmed.

Mr. GURNEY. Mr. President, I ask that the President be immediately notified of the confirmation of the nomination.

The ACTING PRESIDENT pro tempore. Without objection, the President will be so notified.

REPORT BY THE OIL INDUSTRY ADVISORY COMMITTEE TO THE OIL SUBCOMMITTEE OF THE SENATE INTERSTATE AND FOREIGN COMMERCE COMMITTEE

Mr. TOBEY. Mr. President, I ask unanimous consent to have printed in the RECORD at this point the second report submitted by the Oil Industry Advisory Committee, a special committee of oil producers appointed by the Senate Interstate and Foreign Commerce Committee to investigate the oil shortage, especially in the Atlantic coast area. The report is submitted by J. C. Richdale, chairman of the Oil Industry Advisory Committee.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

REPORT TO SENATOR TOBEY FOR OIL SUBCOMMITTEE OF SENATE INTERSTATE AND FOREIGN COMMERCE COMMITTEE BY OIL INDUSTRY ADVISORY COMMITTEE

The Oil Industry Advisory Committee has had two meetings since our last report to you, one on January 16 and the other on January 26. The following topics were discussed:

1. Tanker situation: Insofar as the tanker situation is concerned, from the best information available approximately 15 to 16 additional tankers have already been placed in the service of moving oil to Atlantic coast ports since our first report. Within the next 30 days we feel that a substantial additional number will be made available from industry and Maritime Commission sources. However, we wish to reiterate the comment made in our report of December 17, that we consider it highly important that the Navy endeavor to place in the Atlantic coast service tankers which are under repair as soon as such vessels come out of repair yards. This would merely be a temporary measure until the present emergency situation has been alleviated and would eliminate long trips in ballast to replace other tankers which they are using at present in the South Pacific and Far East service. We feel that approximately 20 additional ships from this source would give all the necessary transportation to straighten out the transportation shortage which has obtained up to now.

In addition, we also strongly urge that necessary legislation be passed to permit the Maritime Commission to continue their present functions beyond February 29, 1948, on which date their present authority expires.

2. Tank-car transportation: The committee considered the correspondence exchanged between you and Col. J. M. Johnson, Director of Office of Defense Transportation, and Mr. W. T. Faricy, President of the Association of American Railroads, in which it was recommended that a committee be set up including representatives of the oil industry, the Office of Defense Transportation, the tank-car owners and the Association of American Railroads to review and make recommendations regarding tank-car transportation problems. The committee endorses this recommendation and suggests that the appropriate subcommittee of the National Petroleum Council be requested by Secretary Krug to work out the organization and functioning of this over-all tank-car committee.

3. The committee received a report on the meeting which had been held in Washington, called by Secretary Krug, of the fuel coordinators of 22 States. It appears from this report that practically every State in the shortage areas has acted on your suggestion to establish State emergency fuel coordination organizations. Some States have very comprehensive and well-organized activities under way, others have barely started and are yet not too well equipped to deal with the situation. In general, however, it is felt that the various affected States have accepted the principles of dealing with their situations on a local basis, and their work will be appreciably effective in meeting the problem. Certainly the presentation of this plan to the various State governors constituted a definite contribution toward the handling of this difficult situation.

There have been numerous variations of the original so-called Tobey plan as set up in the various States. These have been made to suit best the geographical, political, and administrative factors affecting each State, and there is little doubt that as time goes on each will become better organized and more effective. We are convinced that this approach to the handling of emergency fuel distribution and supply problems is a sound one.

4. Refinery yields: The committee had before it the refinery yield data which you forwarded to me. Some of our members have been advised by their counsel that the anti-trust laws make it impossible for the committee to inquire into the operations of individual companies or attempt to secure their agreement to make changes in their refinery operations. If anything is to be done along this line, it would appear that it should be done by your Senate committee. Our discussions and recommendations on the question of refinery yields have therefore been confined to a general over-all basis, although you will note later a suggestion as to an individual company follow-up which can be made by your office.

The attached compilation of the individual company yield figures furnished by you has been handicapped by a lack of comparability. This must be kept in mind when interpreting the figures. You will also see that the tables are incomplete, since the data from some companies have not been received.

Some companies have reported their product yields on crude-oil runs and have shown the totals for districts I and III only. Others

have reported for all their refineries throughout the whole United States. Still others have shown their production of each principal product as a percentage of the production of the total of four principal products only. That leaves out all the production of specialty products, and thus inflates the magnitude of the percentage figures shown. These and other differences are noted in the column under "Remarks."

In spite of these limitations it is possible to get some pertinent ideas by comparing the individual figures with the very first line of the tables, which first line shows the over-all industry performance in districts I and III as reported by the American Petroleum Institute. The trend or rate of change in the various product yields over a period of time is indicative of efforts to maximize the output of any particular product. In recognition of this the data in the accompanying tables have been prepared on a 4 weeks' running average basis, since the individual week's yields are not trustworthy in determining trends. It should be emphasized that the real value of these figures is to compare any particular company's performance with itself over a period of time and that cross comparison between companies' yields cannot be made properly from these figures.

By using a 4-week running average we mean that the yield figure given in the table under date of November 22, for example, is the average yield for the 4 weeks ending on that date, and the yield figure given under the date of November 29 is the average yield for the 4 weeks ending on November 29. The second figure would thus include 3 weekly yield figures included in the November 22 average and the fourth weekly figure for the period November 22 to 29. This method of presentation tends to average out weekly fluctuations and is the best method of determining trends.

You will see that the industry over-all in districts I and III has accomplished a gain in distillate fuel yields of 2.4 percentage points, or from 18.9 to 21.3 percent between the 4-week period ended November 22, 1947, and that of January 17, 1948. With one exception, the 4-week period ended November 29, the improvement in yield has been continuous. The 2.4-percent yield increase represents an improvement of 12.7 percent in the 18.9-percent yield from crude in effect at the start of the period covered by the figures in early November.

You will recall our original report expressed the thought that a 5- to 7-percent increase in the volume of distillate fuel production could be secured by adjusting refinery yields. This forecast has already been exceeded by industry in districts I and III on an over-all basis. Recent severe weather, however, points toward the need for a still further shift in refinery yields toward distillate fuel oil than was originally anticipated necessary to meet consumer demands.

Not apparent from these tables, but important to the problem of increased supplies, is the increase in the amount of crude run to stills that has occurred concurrently with this achievement of higher heating-oil yields. Crude-oil runs in districts I and III averaged 2,875,000 barrels daily in the 4 weeks ended November 22, with distillate production at 542,000 barrels daily. For the 4-week period ended January 17, runs averaged 3,021,000 barrels daily and distillate production 644,000 barrels daily. This record shows that the contribution of an additional 102,000 barrels daily in distillate output was made up of 70,000 barrels daily from increased yield, and 32,000 barrels daily from increased runs. It is of great interest to note that the cumulative effect of increased distillate yields on increased crude runs has resulted in an over-all increase in the production of distillate fuel of 18.8 percent since November 1947.

In spite of this commendable achievement, your committee feels that it is both desirable and possible for the industry to get still more distillate production by some further adjustment in refinery yields.

Review of the individual company yields shows that some companies' distillate-fuel yields have shown a definite upward trend indicative of efforts to increase distillate-fuel production. Nine of the 16 companies included in the tabulation show a definite upward trend in distillate-fuel yields over the period. Four of the companies show no change in yields and two show a downward trend. The sixteenth company's figures are impossible to interpret as this company apparently operates in a rather unusual manner which it is difficult to judge through the figures as presently presented. It seems reasonable to conclude, however, that it may well be possible to secure an additional increase in distillate-fuel yields in the industry. It is recognized that equipment limitations, variations in crude supply, and other factors may influence materially each refiner's ability to increase heating-oil yields, but even allowing for this the committee feels it is possible for the industry to achieve a further yield increase.

The kerosene yield has shown no significant change in the period. There has been some increase in the production of kerosene along with total crude runs. It is not likely that a great deal more can be done to improve that situation without still further increases in crude runs. Kerosene yield is governed largely by the type of crude run and little flexibility in the output of this product can be obtained from present refinery plants so that current yields approximating 7.5 percent may represent pretty close to maximum for kerosene so far as the industry is concerned. This can only be ascertained by a specific review by each company of that particular problem. However, there have been some few increases and decreases in the kerosene yield of some companies which may indicate that if all companies press for maximum kerosene yield some over-all increase in production of this particularly critical product may be achieved.

The production of residual fuel oil has increased somewhat, again due more to increased total runs, although you will see that there also has been an improvement in yields of this product. Not much further improvement can be expected from increasing yields of residual fuel, since it would have to be at the expense of distillate fuel production, that is, home-heating oil, which is likewise in a critical supply position. It is not always realized that a large part of our residual fuel-oil requirements along the Atlantic seaboard are supplied from imports. There has been some improvement in receipts of imported fuel oil in recent months, and that has helped the situation, but the residual picture is still one of the tightest of all the major products.

The gasoline yield was practically unchanged during the period reviewed, although barrels of total production increased because of higher crude runs. The important thing is that in general the industry has resisted the inducements to make larger quantities of gasoline from a barrel of crude, and has thus obtained increasing fuel supplies that might have been put into gasoline.

While this performance of the industry in the voluntary production of more heating oils is indeed encouraging, your committee reiterates that there is room for still more improvement. Even though the individual company figures reported in the attached tables possess the limitations of comparison noted above, we believe that it may be appropriate for you to direct a further inquiry to each of the reporting companies to ascertain (a) whether it is possible to produce still more kerosene and heating oil through yield adjustments or otherwise, and (b) if not, to request the reasons for that inability. We suggest that you direct the inquiry to all companies because there are too many unknown factors to justify a precise interpretation of the company versus industry comparisons contained in the attached tables.

For any short period of time the relative yields may be misleading in that they might reflect operations that result from circumstances peculiar either to the timing or historical pattern of a company's business. There are limitations on the ability to shift yields, e. g., type of equipment, type of crude, ability to finish fully all production in a given period, timing of receipts of raw materials, storage problems, etc. Explanations of individual company performance in many cases are contained in the replies transmitting the data. It is suggested that reference be made to these explanations before conclusions are drawn regarding respective company performances.

5. Comments on industry stocks in districts I, II, and III: The industry does not have information on all the storage of petroleum products from the customers' household tanks back through various distribution steps to the refinery, but it does get weekly reports of supplies held in primary tanks at refineries and at major bulk terminals.

The attached table shows what has been happening to those stocks during the past month. On January 17 there were 66,296,000 barrels of the three heating oils in primary storage in districts I, II, and III. That was 11,322,000 barrels less than was on hand a year ago on the same date, but it was 15,736,000 barrels more than 2 years ago when demands for heating oils were considerably less. Primary gasoline stocks in the three districts were 79,792,000 barrels on January 17, which was 1,770,000 barrels more than a year ago.

It is worth noting that the unfavorable position of the three burning oils results entirely from the depleted stocks in districts I and III. District II, which is the Midwest, had more of each of the heating oils in primary storage than a year ago. Districts I and III had slightly more residual in each case, but the kerosene and distillate oils were both very much below a year ago. That is the difficulty the industry has been compelled to face for most of the current heating season.

The extent of its recent success can be best measured by the rate of depletion shown under the column headed "Four weeks' change." The kerosene position has deteriorated relative to a year ago, and the situation is anything but comfortable. A 3,855,000-barrel draft in the last month compares with a draft of less than 3,000,000 barrels a year ago in the same period. The present level in district I is almost 2,500,000 barrels less than on the same date in 1947.

By way of contrast, the draft on distillate stocks was about 2,000,000 barrels greater last year than this year, which suggests that in spite of the very large demands that are being made against the industry, production efforts have resulted in the industry more than holding its own.

On both kerosene and distillate renewed efforts must be made to expand production still further. Stocks are uncomfortably low for this time of the year, even though they are above the level of 2 years ago in each case. An extension of very cold weather for

another month could make inroads that would be difficult to cope with.

The residual fuel picture is a little bit better. Primary stocks have been drafted in the 4 weeks ended January 17 at a slower pace this year than last year—1,212,000 barrels against 3,962,000 barrels. Stocks of residual fuel in each of the three districts are slightly better than a year ago. The residual situation has been helped both by increased imports and by the high level of crude runs of the industry, but it is still a tight position relative to demands.

The weather has not been any help. On a degree-day basis in New York City, the first 17 days of January were 2 percent colder than normal, and nearly 12 percent colder than a year ago. For the heating season to date the weather in New York has been about 17 percent colder than last year, even though about 5 percent warmer than normal. The latter figure is likely to be misleading, however, since October was a very warm month, and that is a time when limited quantities of heating oil are required in any event.

6. Press reports today indicate that the National Petroleum Council has recommended to Secretary Krug that oil industry advisory committees be established in each district over the country and their activities in respect to advising local, State, and Federal officials and authorities regarding the status and solution of oil industry and oil consumer problems be certified by the Department of Justice as legal. If this recommendation is accepted and acted upon it seems likely that such committees will be able to perform the services which your oil industry committee has been performing. Your attention is directed to this possibility.

Respectfully submitted.

J. C. RICHDALE,
Chairman.

JANUARY 26, 1948.

ECONOMIC REPORTS OF THE PRESIDENT

Mr. MURRAY. Mr. President, as sponsor of the Employment Act of 1946, I am gratified to note the widespread attention that has been given throughout the country to the Economic Reports of the President.

It has just come to my attention that a private publishing firm, Reynal and Hitchcock, has seen fit to reprint these economic reports of the President in book form. This is a tribute not only to the enterprise of the publishers, who have indeed performed a public service, but also to the high quality of the documents themselves.

The Economic Reports of the President brings together in one volume the best information obtainable on the present condition of our economy. They chart the goals toward which we should strive. They map out the broad principles of a concrete program for achieving these goals. Above all, the reports are written in simple, direct language—with an abundance of striking charts and informative tables.

It is my hope that proper attention will be given the Economic Reports of the President not only by the reading public, but also by the Congress. It was the clear intent of the Employment Act that the Congress, with the aid of its Joint Committee on the Economic Report, would use the Economic Reports of the President as the basis for its action on economic affairs.

Let me quote from what the President's Council of Economic Advisers has said on this matter in its introduction to this recently published volume, the Economic Reports of the President:

These reports are referred, as soon as received by the Congress, to its Joint Committee on the Economic Report of the President, where they become the subject of critical reexamination and the basis of formulation of a legislative program and the coordination of the work of the various committees of both Houses. After analyzing the President's program, the joint committee is to report to the Congress its findings and recommendations with respect to each of the main recommendations made by the President in the Economic Report. This is the first time in the history of the Congress that any congressional committee has been given the task of appraising the President's economic program as a whole and of developing economic policies to serve as a guide to the many individual committees of Congress dealing with legislative matters. To those Members of the Congress who agree with the President's point of view, they are a stimulus to translating general economic principles into the specifics of feasible and workable legislation. To those who take issue with the President's analysis of the economy or with his legislative proposals—and there will always be diverse viewpoints in a democracy—they are a call to produce a preferable alternative. To all Members of the Congress, whatever their party or personal point of view, it is a challenge to spare no pains in broadening the area within which the President and the Congress can work together harmoniously toward attaining the objectives of the Employment Act.

Last year, unfortunately, the joint committee failed to hold public hearings on the President's economic reports. Still more important, the committee failed to formulate its own conclusions on the President's major recommendations, as it was required to do under the act.

It is my sincere hope that this year the joint committee will hold public hearings on the President's Economic Report, with full testimony from the executive branch, from business, from labor, from agriculture, and from consumers. The committee should then bring forth its own conclusions on the President's analysis of the economy, on the President's goals for the future, and on the President's proposals for congressional action.

Mr. President, I ask unanimous consent to have printed in the RECORD as part of my remarks the introduction prepared by the Council of Economic Advisers to the privately printed volume of the Economic Reports of the President.

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

INTRODUCTION TO THE ECONOMIC REPORTS OF THE PRESIDENT (JANUARY 1948, JANUARY 1947, JULY 1947)

(As published by Reynal & Hitchcock)

Since 1789, when President Washington appeared in person before the first session of the First Congress, hundreds of Presidential messages have been carried down Pennsylvania Avenue from the White House to the Capitol. But in January 1947 America saw a new type of Presidential message—the Economic Report of the President. For the first time in the history of the country, the President placed before the Congress at the beginning of its session a comprehensive picture of the state of the economy and an integrated program for promoting national prosperity and soundness in the year ahead. It embraced also the outlines of a longer-term program.

This first annual Economic Report was followed on January 14, 1948, by a second report, addressed to a somewhat different short-run situation, since in the intervening year adverse weather conditions had been encountered, political developments abroad had followed a disappointing course, and some unexpected limitations in domestic reconversion had revealed themselves. These developments pointed all the more surely to the need of periodic reviews and projections by the President as a lead and supplement to the thinking of the public and the action of the Congress. The second Economic Report placed more emphasis upon longer-range analyses, objectives, and programs.

The annual economic reports are submitted in accordance with a specific requirement of the Employment Act of 1946 that—

"The President shall transmit to the Congress at the beginning of each regular session (commencing with the year 1947) an economic report (hereinafter called the Economic Report) setting forth (1) the levels of employment, production, and purchasing power obtaining in the United States and such levels needed to carry out the policy declared in section 2; (2) current and foreseeable trends in the levels of employment, production, and purchasing power; (3) a review of the economic program of the Federal Government and a review of economic conditions affecting employment in the United States or any considerable portion thereof during the preceding year and of their effect upon employment, production, and purchasing power; and (4) a program for carrying out the policy declared in section 2, together with such recommendations for legislation as he may deem necessary or desirable."

But a year is a long time in the fast-moving national life of today. Section 3

(b) of the Employment Act also provided that "The President may transmit from time to time to the Congress reports supplementary to the Economic Report." It early became evident that a midyear recheck would be desirable. Accordingly, on July 21, 1947, the President sent to the Congress a midyear Economic Report. With the legislative session near an end, this report naturally did not present a formal set of recommendations for legislative action. It reviewed the state of employment, production, and purchasing power; analyzed the trends in various parts of the process of economic adjustment to peacetime conditions; and focused attention on four outstanding problems that were receiving immediate study and that would probably be the occasion for later recommendations for congressional action.

These first economic reports of the President have received widespread attention in news stories, editorials, columnist comment, and radio and platform discussion. They have been circulated by study clubs and by business, labor, agricultural, and consumer organizations. They have been assigned work in university classes and graduate seminars. Many individual citizens have purchased copies from the Government Printing Office, but many more, no doubt, have found this procedure too inconvenient. They thus have had only a fragmentary impression of what is, in fact, a comprehensive and continuously developing diagnosis of the state of the Nation's economic health and counsel for its treatment.

Since the Council of Economic Advisers is the professionally equipped agency of nonpolitical character established under the Employment Act to "assist and advise the President in the preparation of the Economic Report," we naturally are gratified that the publishers of the present volume have turned private enterprise to public service by seeing that the Economic Reports of the President may be made promptly and easily accessible to all citizens who wish to keep informed as to how the thinking of Government officials, our congressional representatives, and business, labor, agricultural, and other leaders of thought and action is being marshaled to the winning of maximum well-being under methods of private enterprise and free government.

To understand the governmental process of which these reports constitute an important part, the reader should remember two things.

First, in preparing them, the President has drawn to the fullest extent upon the resources of the Federal Government. Besides the continuous and immediate service of his Council of Economic Advisers, he has had the assistance and advice of the members of his Cabinet and the heads of the various independent agencies, boards, and commissions. Through these agency heads and through the Council of Economic Advisers, he draws upon the rich resources of statistical fact and economic analysis available throughout the Federal establishment. Furthermore, through the medium of the Council and its broad framework of advisory committees, he has been able to draw upon the experience and viewpoints of representatives of industry, agriculture, labor, consumers, educational and research institutions, and State and local governments. Needless to say, the ultimate judgments entering into the Economic Reports to the Congress rest with the President.

Second, these reports are referred, as soon as received by the Congress, to its Joint Committee on the Economic Report of the President, where they become the subject of critical reexamination and the basis of formulation of a legislative program and the coordination of the work of the various committees of both Houses. After analyzing the President's program, the Joint Committee is to report to the Congress its "findings and recommendations with respect to each of the main recommendations made by the President in the Economic Report." This is the first time in the history of the Congress that any congressional committee has been given the task of appraising the President's economic program as a whole and of developing economic policies to serve as a guide to the many individual committees of Congress dealing with legislative matters. To those Members of the Congress who agree wth the President's point of view, they are a stimulus to translating general economic principles into the specifics of feasible and workable legislation. To those who take issue with the President's analysis of the economy or with his legislative proposals—and there will always be diverse viewpoints in a democracy—they are a call to produce a preferable alternative. To all Members of the Congress, whatever their party or personal point of view, it is a challenge to spare no pains in broadening the area within which the President and the Congress can work together harmoniously toward attaining the objectives of the Employment Act.

Those objectives, as stated in the declaration of policy in the act, may well serve as the concluding paragraph of this introduction to the initial volume of the Economic Reports of the President:

"SEC. 2. The Congress hereby declares that it is the continuing policy and responsibility of the Federal Government to use all practicable means consistent with its needs and obligations and other essential considerations of national policy, with the assistance and cooperation of industry, agriculture, labor, and State and local governments, to coordinate and utilize all its plans, functions, and resources for the purpose of creating and maintaining in a manner calculated to foster and promote free competitive enterprise and the general welfare, conditions under which there will be afforded useful employment opportunities, including self-employment, for those able, willing, and seeking to work, and to promote maximum employment, production, and purchasing power."

EDWIN G. NOURSE,
Chairman.
LEON H. KEYSERLING,
Vice Chairman.
JOHN D. CLARK.

FOREIGN AID AS IT AFFECTS INDIANA—TABLE PREPARED BY SENATOR JENNER

Mr. JENNER. Mr. President, at this time in world history I feel it is my duty, not only as a Member of the Senate representing this Nation, but as representing the people of my own State of Indiana, almost 4,000,000 of them, to give some facts and figures showing how our contributions to foreign aid under the Marshall plan, which is pending before the Congress at this session, will affect the people of Indiana and their future lives.

I have had prepared figures showing that Indiana's share of the cost of United States foreign aid granted for the 2-year period ended last June 30, plus aid proposed under the Marshall plan, totals approximately $1,069,849,410.

What does this mean in tax terms that Hoosiers can readily understand?

It means that the presently estimated foreign-aid program for this period is equal to seven and one-half times the total of all property and poll taxes levied in Indiana for collection in 1947, for support of township, town, city, county, and State governments.

To illustrate the portent of this comparison, it should be pointed out that property taxes in Indiana are by far the largest source of revenue—some two and one-half times greater than our next largest revenue producer, the State gross income tax.

If the people of Indiana, on the other hand, had to pay their share of the foreign-aid program through the gross-income tax, it would take more than all the collections from this tax for the next 18 years, even at the current peak of annual gross income-tax collections of about $58,000,000. If we had to pay our share in 1 year we would have to raise gross income-tax rates by 1,755 percent.

Indiana's $1,069,849,410 share of foreign-aid cost would pay for maintaining Indiana's public schools for a period of more than 11 years at the 1946–47 level of school expenditures, $95,310,000.

Indiana's foreign-aid share is $164,584,521 greater than all Federal Government taxes collected in Indiana during the 1947 fiscal year.

These are but a few of the many comparisons which could be made to illustrate, in easy-to-understand terms, the weight of the financial burden of foreign aid.

The Nation-wide per capita share of foreign aid granted from July 1, 1945, to June 30, 1947, based on the 1940 census, was $183. The per capita share of the $17,000,000,000 expenditures proposed under the Marshall plan is $129.11. The total average cost per family of four persons would be $1,248.

A table shows how these foreign-aid expenditures affect every county in Indiana and each community of over 1,000 population.

In my own county of Lawrence, it would require all our property-tax collections for more than 11 years to pay our per capita share of foreign aid. In my home city of Bedford nearly 8 years of property-tax collections would be necessary.

Indiana's share of foreign-aid cost would remain at about $1,070,000,000 if the income of its citizens, rather than a flat per capita, were used as a basis for computation. "Indiana had approximately 2.6 percent of the Nation's population in 1940, and received approximately 2.6 percent of income paid to individuals" according to the United States Department of Commerce figures for 1946.

Mr. President, I ask unanimous consent that the table I have had prepared and to which I have referred be incorporated in the RECORD as a part of my remarks.

The ACTING PRESIDENT pro tempore. Is there objection?

There being no objection, the table was ordered to be printed in the RECORD, as follows:

United States foreign aid provided from July 1, 1945, to June 30, 1947, and aid proposed under Marshall plan, in terms of shares to be borne by each county and by cities and towns over 1,000 population in Indiana, estimated on per capita basis

[County figures represent total for county, including city and town figures shown, plus amounts for all other governmental units in county]

Counties and cities	Share of cost of foreign aid, July 1, 1945, to June 30, 1947 [1]	Share of cost of foreign aid program under Marshall plan [2]	Share of cost of total foreign aid provided and proposed (for 6 years)	Total local and State property taxes levied, 1946, payable, 1947	Number of years required to pay share of foreign aid with property taxes

SALARIES OF FEDERAL EMPLOYEES

Mr. LANGER. Mr. President, I ask unanimous consent to have printed in the body of the RECORD a statement which I consider to be one of the most statesmanlike utterances ever made before any committee in connection with Federal employees, dealing particularly with the bill introduced by the Senator from Connecticut [Mr. BALDWIN] and other Senators.

There is a general impression upon the part of some persons, including the administration itself, that Federal employees are now receiving enough pay, but investigation shows conclusively, Mr. President, that even if the $800 salary measure be enacted it will increase the average weekly wage received in 1948 to approximately $40.61, or $1.02 a week less than the 1939 wage. In other words, if that bill should pass, a Federal employee will still be taking home $1.02 less than he took home in 1939.

I suggest, Mr. President, that particularly my colleagues on this side of the Chamber read the article by the Guaranty Trust Co. of New York City published in the New York Times.

There being no objection, the statement referred to was ordered to be printed in the RECORD, as follows:

STATEMENT OF E. C. HALLBECK, LEGISLATIVE REPRESENTATIVE, NATIONAL FEDERATION OF POST OFFICE CLERKS, ON PENDING POSTAL SALARY BILLS, TO SUBCOMMITTEE OF THE SENATE COMMITTEE ON POST OFFICE AND CIVIL SERVICE, JANUARY 15, 1948

Senator LANGER and members of the committee, at the outset I want to commend the chairman and the members of this committee for the promptness with which they have moved to consideration of one of the most important subjects likely to come before this session of Congress. Speaking for the membership of the National Federation of Post Office Clerks, I know that this evidence of your concern for their welfare is sincerely appreciated.

Several members of this committee, and other Senators as well, have already introduced bills designed to bring about an increase in the salaries paid to the employees in the field service of the Post Office Department, and it is my intention to set forth certain facts in support of that objective. Each of us, in our daily lives, has become increasingly aware of the changes that continue to take place in our economic conditions. To some, the burden is perhaps greater than to others, but no person or family is totally exempt. All of us have suffered in some degree.

Statistically, of course, there is ample evidence that the increase in the cost of basic commodities throughout the country has been such as to make totally inadequate wage increases granted by Public Laws 134 and 386 of the Seventy-ninth Congress. The figures of the Bureau of Labor Statistics, United States Department of Labor, will be cited many times during these hearings, and there can be no doubt that those statistics prove the need for salary increases. The special report, City Worker's Family Budget, prepared at the request of a subcommittee of the House Committee on Appropriations, is designed to show the relative differences in living costs between cities, and in addition, the total number of dollars required for the average worker in overalls to live in these cities. In a forepiece it is stated that this budget is not a subsistence budget, nor yet a

luxury budget, but anyone who takes the time to review it carefully cannot fail to note that in many aspects the allowances upon which the budget is predicated are ridiculous. Take the item of clothing, for example. Under the item of hats for the husband and boy, we note that the husband is allowed 0.76 of a felt hat each year, or about three hats every 4 years, and 0.16 of a straw hat each year, or approximately one straw hat every 6 years. For a boy 13 years they allow 0.29 of a felt hat and 0.30 of a wool cap and 0.08 of a cotton cap each year. Every Senator knows that there has never been an American boy that didn't lose at least one hat or cap each year, and a figure based on one hat and one cap every 3 years is sheer nonsense. The same thing is true of virtually every single item in the clothing budget. The quantity per year bears absolutely no relationship to the amount of clothing needed by the average American family. Imagine a man who is allowed one pair of pants, a light weight, and a winter weight, wool suit each 3 years. If he were a postal clerk working at a window, after the second year he would need a counter high enough to cover him up to the neck or face arrest for indecent exposure. A boy 13 years old is allowed 2.32 cotton undershirts and 2.77 cotton shorts each year. Why, boys 13 years old outgrow underwear faster than that. The clothing allowance for the feminine side of the family is even more ridiculous. Not being qualified as an expert on this subject, I asked my wife to give me her opinion on the quantities allowed in this budget. She told me that "that budget could only have been prepared by a man, and a bachelor at that." The item of underwear seemed to agitate her most. In her opinion, an allowance for cotton, rayon, and woolen union suits for any modern American woman is positive evidence that the person who prepared the allowance didn't know what he was talking about, since to her knowledge garments of that sort are not worn by women of any age. And sportswear—can any of you imagine a woman wearing one bathing suit for 7 years and 9 months, or appearing on a bathing beach in 0.13 of a bathing suit, or 0.11 of a pair of shorts?

The faults to be found with the budget prepared by the Bureau of Labor Statistics are to be found in almost every scientific budget prepared for studies of this sort. While the white-collar workers' budget of the Heller Committee for Research in Social Economics is a whole lot more liberal, showing an addition of $1,666 over the BLS study for San Francisco, it, too, is open to valid criticism. There just isn't an acceptable average that will hold true in all cases, and the margin of error that is necessarily allowed works to prevent the final figures from having any degree of authenticity. For that reason, I have come to the conclusion that the truth has to be shown in another way. A way that will reflect actual existing conditions in terms readily understandable. It seems to me that the problem is best explained in terms of the purchasing power of the dollar. If we are to accept the average of wages for the years 1935–39 as representative of the normal American way of life, then the average post-office employee is today suffering a dollar deficiency of $10.01 per week.

I have chosen to illustrate my position with figures supplied by the Guarantee Survey (Guarantee Trust Co., New York, N. Y.), a thoroughly reputable business survey prepared for the information of the clients of a banking institution, with assets in excess of $2,000,000,000. This, bear in mind, is not a group hired to prove a particular point, but a regular financial service for men who must be abreast of business conditions and trends. According to this survey, "The average weekly earnings of factory workers rose from $24.54 in 1939 to $46.32 in June 1945, but that the benefit to workers was halved by the rise that took place in the cost of living during the same period, despite wartime price controls. In terms of 1939 dollars, the average rose from $24.54 to $34.10. Between June 1945 and September 1947 money wages increased further from $46.32 to $50.42; but the cost of living rose more rapidly, with the result that wages in terms of 1939 dollars declined from $34.10 to $29.46. During the entire period from 1939 to September, of this year, money wages more than doubled; but four-fifths of the increase was offset by the rise in the cost of living, leaving an advance of 20 percent, in real wages or purchasing power." That statement is from the Guarantee Survey for November 26, 1947.

The purchasing power of a single dollar is exactly the same in the hands of a factory worker, a postal employee, or a Senator; so I think it fair to assume that what has happened to the factory worker's dollar, according to the Guarantee Survey, has also happened to the dollar of a post-office clerk. The average wage of post-office clerks and supervisors for the year ending June 30, 1939, according to the reports of the Postmaster General, was $2,165.21, or an average weekly wage of $41.63.

Due to the enactment of Public Law 134, effective July 1, 1945, and Public Law 386, effective January 1, 1946, the average wage of post-office clerks and supervisors for the fiscal year ending June 30, 1946, was $2,735, or an average weekly wage of $52.59. Parenthetically, I might add here, Senator, that one of the salary increases referred to was followed by the elimination of overtime, which, of course, nullified the increase insofar as take-home pay was concerned. For the fiscal year ending June 30, 1946, the average annual salary was $2,816, and the average weekly wage, therefore, had risen to $54.15. Both annual wage figures were taken from the reports of the Postmaster General. Since the purchasing power of the dollar is the same, regardless of who spends it, it therefore follows that post-office clerks who had a purchasing power of $41.63 as of June 1939 had a purchasing power of $38.70 as of June 1946, and as of June 30, 1947, this purchasing power had declined to $31.62, or exactly $10.01 per week less than they had in 1939, despite two salary increases in 1945–46.

For purposes of illustration, these changes may best be shown as follows:

	1939	1945	1946	1947
Factory workers' dollar wage	$24.54	$46.32	[1] $43.31	$50.42
Factory workers' real wage	24.54	34.10	31.88	29.46
Post-office clerks' and supervisors' dollar wage	41.63	[2] 41.04	52.59	54.15
Post-office clerks' and supervisors' real wage	41.63	[2] 30.20	38.70	31.62

[1] Figure supplied by U. S. Department of Labor.
[2] Does not include $300 per annum temporary increase.

The November-December issue of the Republic News, published by the Republican National Committee, contains a table showing the total 1947 income needed to equal 1939. According to that table, a post-office clerk with an average salary of $2,165.21, as reported by the Annual Report of the Postmaster General for 1939, would require a salary of $3,906.90 in 1947 as against an average actual salary of $2,816, or exactly $1,090.90 more than he is presently receiving. A statement on the same page reads, "It's a pity that $2 bills are so scarce these days when they would be so convenient for buying a dollar's worth of almost everything."

The wholesale-price index indicates that the trend toward increasing prices has not diminished and the figures given above, therefore, are susceptible of adjustment on the basis of an even higher living cost than that which prevailed on the dates given.

There are present here today any number of post-office employees who can furnish expert testimony to the fact that those figures are correct. They know they are correct because conditions are such that many of them, of necessity, have been forced to seek additional employment in private industry in order to try and make both ends meet. In the case of the junior employees, many of them veterans who have entered the postal service following their honorable discharge from the armed services, the situation is even worse. Their salary of $2,100 per annum, based on 1939 purchasing power, is worth about $1,226.40 a year, or $23.58 per week before withholding tax and retirement deductions.

The several bills pending before this committee propose salary increases ranging from $800 to $1,000 a year. Should the committee report, and the Congress enact, S. 1849, the average weekly wage of post-office clerks and supervisors, expressed in terms of the 1939 dollar, will become $42.80, or exactly $1.17 per week more than the 1939 wage. Should the $800 measure be enacted, it will increase the average weekly wage in 1939 dollars to $40.61, or $1.02 per week less than the 1939 wage. We feel that postal employees are entitled to some of the joys and benefits of technological and scientific advancement and have a right to expect a wage far enough in advance of the 1939 standard to make such benefits possible. We feel, therefore, that we are justified in seeking the higher figure.

At a special national legislative conference held in Chicago, Ill., November 21 and 22, 1947, the National Federation of Post Office Clerks, following the unanimous recommendation of our executive committee, adopted a resolution embodying a permanent salary increase of $1,000 per annum effective January 1, 1948.

I know that the cost of a measure of this sort has a considerable influence on its chance of enactment and, in this connection, I want to quote very briefly from an editorial in the New York Times for December 19, 1947, entitled "Justice to Civil Servants." This editorial states, in part:

"When the New York Legislature completed action last March on the bill to forbid strikes by public employees this newspaper said: 'This new measure * * * puts the State, this city, and all other municipal government under a solemn obligation. We must see to it that our conduct as an employer of these civil servants is always just and generous, that we never fail to take note of changes in the cost of living that make a change in compensation appropriate, that we never plead poverty as an excuse for pauperizing these, our faithful representatives. That is the bill we pay for exacting this extraordinary but essential obligation from public employees that they will, on no account, abandon their sworn duty.'

"The city is hard pressed for money. The State, too, is wondering how it can keep its budget from exceeding present tax revenues. But we must not plead poverty or balance budgets at the expense of a civil servant who has no recourse against personal bankruptcy except to resign."

Though that editorial referred only to State and municipal employees, it is equally applicable to the Federal Government and to Federal and postal employees. They, too, have only resignation as recourse against personal bankruptcy.

We could not fail to note that in his budget message to the Congress, President Truman was none too encouraging on the subject of postal and Federal employees' salaries. While admitting the need for correction in these words, "The rapid increase in living costs during the last 18 months has placed a serious burden on these groups," the President told the Congress, "I am not recommending at this time cost-of-living increases in pay for military and civilian government personnel * * *." He gave as his reason the belief that such increases would add greatly to the inflationary pressures in our economy, adding, "The wiser approach, which I have

proposed to Congress, is to enact a comprehensive program to hold living costs down."

With the general thought that postal employees have more to gain from a stable economy than they have from a continuing spiral of price, wage, price, wage, and again price, increases, we are in substantial agreement. If it were now a question of raising prices and income together, we would favor the status quo. But prices have already gone up, and, unless wages first catch up to prices, there can be no true stabilization. We submit that there is now no sign on the horizon that such stabilization is likely to be achieved in the near future. In the meantime, post-office clerks are trying to stretch an income that is at least $10 less per week than they enjoyed 10 years ago to cover present prices. Gentlemen, it just can't be done.

In conclusion, let me say that I know that the committee will consider this subject on its merits. Let me suggest also that the President's statement, "In the event that the Congress does not provide controls adequate for this purpose, I may have to recommend further adjustments in pay and benefit rates," be kept in mind. That such a recommendation will be necessary before this Congress adjourns is a reasonable conclusion at this time. The danger to postal employees lies in the fact that there may not then be sufficient time to enact such legislation prior to the adjournment of Congress unless this committee acts beforehand. For that reason, I hope action will be taken leading to an early and favorable report of a measure to provide an adequate upward revision of postal salaries.

Thank you, Mr. Chairman.

THE ST. LAWRENCE SEAWAY

The Senate resumed the consideration of the resolution (S. J. Res. 111) approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof.

The ACTING PRESIDENT pro tempore. The business before the Senate is the consideration of Senate Joint Resolution 111, and by unanimous consent agreement entered into at the last session of the Senate the junior Senator from Massachusetts [Mr. LODGE] was to be granted the floor at the opening of the session today. The Senator from Massachusetts is recognized.

Mr. WHERRY. Mr. President, will the Senator from Massachusetts yield?

Mr. LODGE. I yield to the Senator from Nebraska.

Mr. WHERRY. I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The Chief Clerk called the roll, and the following Senators answered to their names:

Aiken	Ellender	McCarthy
Baldwin	Fulbright	McClellan
Ball	George	McFarland
Barkley	Green	McGrath
Brewster	Gurney	McKellar
Bricker	Hatch	McMahon
Brooks	Hayden	Magnuson
Buck	Hickenlooper	Malone
Bushfield	Hill	Martin
Butler	Hoey	Maybank
Byrd	Holland	Millikin
Cain	Ives	Moore
Capehart	Jenner	Morse
Capper	Johnson, Colo.	Murray
Chavez	Johnston, S. C.	Myers
Connally	Kem	O'Conor
Cooper	Kilgore	O'Daniel
Cordon	Knowland	O'Mahoney
Donnell	Langer	Overton
Downey	Lodge	Pepper
Dworshak	Lucas	Reed
Ecton	McCarran	Revercomb
Robertson, Va.	Taft	Vandenberg
Russell	Taylor	Watkins
Saltonstall	Thomas, Okla.	Wherry
Smith	Thomas, Utah	Wiley
Sparkman	Thye	Williams
Stennis	Tobey	Young
Stewart	Tydings	

Mr. WHERRY. I announce that the Senator from Vermont [Mr. FLANDERS] is absent by leave of the Senate.

The Senator from New Hampshire [Mr. BRIDGES], the Senator from Michigan [Mr. FERGUSON], the Senator from New Jersey [Mr. HAWKES], and the Senator from Iowa [Mr. WILSON] are necessarily absent.

The Senator from Wyoming [Mr. ROBERTSON] is absent on official business.

Mr. LUCAS. I announce that the Senator from Mississippi [Mr. EASTLAND] is absent on public business.

The Senator from North Carolina [Mr. UMSTEAD] and the Senator from New York [Mr. WAGNER] are necessarily absent.

The ACTING PRESIDENT pro tempore. Eighty-six Senators having responded to their names, a quorum is present.

Mr. LODGE. Mr. President, my address falls into four major subdivisions, and it is my intention to decline to yield while I am making one of these four major arguments. At the conclusion of each phase of the subject I shall be glad to yield for questions. As a rule I am eager to yield at any time. However, I think it is important that the RECORD show the argument in connected form. So, after a great deal of thought, I have decided not to yield during the argument, but to yield when I reach a natural stopping place in the speech.

As I entered the Chamber I was handed a very fervent telegram from the National Brotherhood of Railroad Trainmen, expressing opposition to the pending proposal, as well as a telegram from the Massachusetts branch of the organization. I ask unanimous consent that the telegrams be printed in the RECORD at this point as a part of my remarks.

There being no objection, the telegrams were ordered to be printed in the RECORD, as follows:

WASHINGTON, D. C.,
January 28, 1948.

Hon. HENRY CABOT LODGE, Jr.,
United States Senate:

The Brotherhood of Railroad Trainmen appreciates your opposition to the St. Lawrence seaway and wants you to know that our membership throughout the United States, and particularly between the Atlantic seaboard and points west of Chicago and Duluth, are very much concerned. Many of our men now employed on full-time basis would be employed only a few months of the year if this resolution were adopted and the project completed. Past conventions of the brotherhood have taken action in opposition to this project and statements that it would be of benefit to railroad employees or that railroad employees should support it are entirely wrong.

HARRY SEE.

BRIGHTON, MASS.,
January 27, 1948.

Senator HENRY CABOT LODGE, Jr.,
Washington, D. C.:

All members of the Brotherhood of Railroad Trainmen in Massachusetts deeply appreciate your opposition to the St. Lawrence seaway project. And believe that your opposition to this project will cause its defeat in the Senate.

J. R. MCISAAC,
State Legislative Representative,
Brotherhood of Railroad Trainmen.

Mr. LODGE. Mr. President, at the outset of these remarks let me say that I shall not make any one of the arguments of a sectional nature which my able friend the Senator from Wisconsin [Mr. WILEY] stated on Monday at considerable length the opposition would make. Indeed, I wish that he had given a little more time to speaking for the seaway and less to what must in all candor be called a misrepresentation of the arguments in the minority report. Perhaps I am wrong, but it seems to me that it would be more helpful to the Senate for the proponents to concentrate on giving the arguments for the project, allowing the opponents to give the arguments against it.

I agree with the Senator that we must take Daniel Webster's view that we are one country. I deeply regret that already, before I have even opened my mouth to begin the presentation for the opposition, the insinuation should be made that I am engaged in a nefarious conspiracy to move the steel industry to Boston, or that it is desired to "cut the throat of the Middle West."

Let me say frankly that I have been a citizen of Massachusetts all my life. I have worked as a student, newspaperman, and public official, but no one has ever spoken to me about moving the steel industry to Boston. That, I think, is what the late great Alfred E. Smith would have called a "phonus balonus." So far as cutting the throat of the Middle West is concerned, I hope I do not need enter a denial to a charge of that kind. Ever since I have been a Member of this body I have tried to vote and conduct myself as a servant of the United States. I believe the RECORD will show many occasions when I have voted for projects, policies, and measures which benefited some particular section other than that where I live, or some group from another section, but which I thought were of ultimate benefit to the Nation as a whole.

Mr. President, my life has been too intimately tied up with and too much lived in the whole of America; I have made too close friendships in college, in Congress, and in the press; I have had too many close, unforgettable brotherly contacts in the Army with men from the Middle West and from every other part of this country, to feel that I am anything other than an American. I shall not impute sectional motives to the proponents, and I hope they will not impute them to me. In the remarks which I shall make I shall not utter one single sectional argument. I shall speak in national terms, and shall present nothing but national arguments.

I agree that there are sectional and local interests opposed to the project we are considering. That has been said very often. I think it is also true that there are local and sectional interests in favor of it. But let us lay those considerations to one side, and consider the problem on a high plane.

First, a word as to the legislative history of this proposal. The movement

to create a deep waterway of 1,194 statute miles from Montreal to the lower end of Lake Ontario and thence for some 1,164 statute miles through the Great Lakes to Duluth gained its initial impetus in 1919. In that year the Great Lakes-St. Lawrence Tidewater Association was formed to promote the project, and since that time various national and international commissions, committees, boards, and departments have been appointed to investigate and report on the feasibility of the scheme.

The first great result of all this activity and study was reached in the form of a treaty between the United States and Canada for the joint development and utilization of the St. Lawrence. This treaty was signed on July 18, 1932, and was submitted to the Senate for ratification on January 19, 1933. It was the subject of extended hearings before a Senate committee, followed by a long debate on the floor of the Senate.

The treaty came to a vote on March 13, 1934, but failed to muster the necessary support of two-thirds of the Senators present, as required by the Constitution. It might be noted in passing that the 1932 treaty was never submitted to the Parliament of Canada for ratification. There is nothing on the record to indicate that the Canadian Parliament was favorably disposed toward the undertaking, either then or now, or that it would be willing to ratify a treaty in the event of ratification by the United States Senate.

After what might be described as quite a definite set-back, the administration submitted new proposals to Canada in 1936 and in 1938. There were consultations with Canadian officials in December of 1940. Shortly after this conference, Mackenzie King, as Secretary of State for External Affairs of Canada, raised a question whether the St. Lawrence project, as then being discussed, was necessary or desirable. Mr. King seemed to have some doubt whether the project warranted the great expenditure of funds required, and was concerned with possible interference with the war effort. The United States, however, advised Mr. King that it regarded the project as vital, and that its construction should be immediately undertaken. As a consequence, a so-called executive agreement between the United States and Canada providing for the construction of the hydroelectric power facilities at the International Rapids Section, and their operation and maintenance, and for the completion not later than December 31, 1948, of the essential links in the deep waterway, was signed on March 19, 1941. This so-called executive agreement could not become effective until approved by the Congress of the United States and by the Parliament of Canada, and thereafter by the exchange of instruments of ratification.

This executive agreement, which in form and substance is almost identical with the 1932 treaty, was sent to Congress by the President on March 21, 1941. The executive-agreement device was, I believe—and this belief is shared by a great many other people—employed for the purpose of bypassing the constitutional requirement that a treaty to be valid must receive affirmative approval of the Senate by a vote of two-thirds of its Members present.

Thereafter, a Great Lakes-St. Lawrence Basin bill was introduced in the House of Representatives during the first session of the Seventy-seventh Congress, and was later incorporated in an omnibus rivers and harbors bill. It undertook to validate the agreement, to authorize the commencement of construction, and to authorize the President to enter into an agreement with the State of New York, whereby the power authority of the State would take over and dispose of the United States share of the hydroelectric power that prospectively was to result from the project. The bill failed of passage; in fact, it never came to a vote in the House at all.

In the Seventy-eighth Congress, the proponents of this project introduced similar authorization bills in both the House and the Senate. In the Senate the bill was numbered S. 1385, and in November of 1944, hearings were held before a subcommittee of the Senate Commerce Committee with a view to determining whether an agreement between the United States and Canada to consummate the St. Lawrence seaway project was of such a nature that it would, in fact, require a treaty. The weight of the testimony before the subcommittee was definitely that a treaty would be necessary and that the executive agreement to which Senate bill 1385 sought to give congressional approval was an obvious subterfuge. In the closing days of the Seventy-eighth Congress this bill was offered as an amendment to the rivers and harbors bill then pending before the Senate. The Senate rejected this amendment by a vote of 56 against to 25 for. Thus, for the second time the St. Lawrence project was rejected on the floor of the Senate.

But the St. Lawrence seaway and power project is like a cat with nine lives. It dies very hard. A resolution in the Seventy-ninth Congress, calling for an authorization of the executive agreement of 1941, was the subject of hearings before the Senate Foreign Relations Committee, but never came to a vote in the Senate. During the first session of the Eightieth Congress a similar resolution was introduced with modifications, but with exactly the same purport and this is the resolution now before us.

The hearings this year before a special subcommittee of the Foreign Relations Committee were, by the direction of the chairman of the subcommittee, limited to two aspects of the project: First, the question whether the project can be justified from a national defense point of view; and second, the new self-liquidating feature incorporated for the first time in Senate Joint Resolution 111. With a view to conserving paper and space, this year's majority and minority reports are both limited in general to these two aspects. In dealing with this matter on the floor of the Senate, however, I do not propose so to limit myself. The national defense and self-liquidating features of the project merit extended attention, but many other important factors must be discussed if we are to see this project in its true colors.

My first consideration, therefore, goes to the basic question, May such an executive agreement, as is here before us, be concluded by executive action only, supplemented by legislative bill, or does it require a treaty submitted to the Senate for its advice and consent? My conclusion is that it definitely does call for Senate ratification by the constitutional method and that the resolution, if for no other reason, should be rejected on that ground alone.

TREATY VERSUS AGREEMENT ASPECT

In dealing with what might be called the treaty versus the executive agreement aspect of the St. Lawrence project, I want to make it absolutely plain that I do not intend to deal with the question of whether we can sanction a so-called executive agreement by the method here proposed rather than ratify a treaty as a matter of law, but rather whether we should do so as a matter of policy. Whether the so-called executive agreement which is before us can constitutionally be legalized by the procedure of a simple majority vote is in my opinion entirely a matter of law. I am not a lawyer and I would not presume to say with any pretense of authority whether this is the constitutional procedure or not. Others will discuss this particular question. Of course, we must bear in mind—and I submit that this is a perfectly reasonable conclusion—that serious differences of opinion do exist among legal experts as to whether an executive agreement of this kind can be approved by simple majority vote in each House as an alternative to ratification of a treaty submitted for advice and consent of the Senate and ratified by two-thirds of the Senators present. No one can deny that a very controversial doubt exists, but I am not here today to resolve that doubt one way or the other. This appears to be a very cloudy area, indeed, from a legal standpoint.

My concern, in brief, is not whether the Constitution permits us to do this, but whether as a matter of policy and as a matter of precedent, we should permit what I have described elsewhere as a palpable invasion of the Senate's treaty-making powers. This is a question which each Senator must ponder very seriously and must decide as his own conscience dictates. It cannot be lightly brushed aside. We are sworn to uphold the Constitution of the United States and certainly there is implicit in that obligation a responsibility not to take any steps which may circumvent the Constitution. Please notice that I use the word "circumvent" and not the word "violate." The Constitution under which we live and in which we take such deep pride is not a document that says "do this" or "you cannot do that." It was not intended as such. It is certainly among the most flexible documents of government ever devised by man, but its meaning and its spirit are clear; its signposts are definite and we cannot close our eyes to these signposts.

Let us have a look at the Constitution. Section 2 of article II states:

He—

That is, the President—

shall have power, by and with the advice and consent of the Senate, to make treaties, pro-

vided two-thirds of the Senators present concur.

A brief consideration of the background of the Constitutional Convention makes it clear beyond any question that the founding fathers were well aware of the distinction between treaties and agreements. Indeed, there is within the Constitution itself a distinction between these two types of compacts. I refer to section 10 of article I which states in part that—

> No State shall enter into treaties, alliance, or confederation * * * no State shall, without the consent of Congress * * * enter into agreement or compact with another State or with a foreign power.

Moreover, the framers of both the Articles of Confederation of 1777 and the Constitution of 1787 had before them the book of the great authority in international law, the Swiss writer, Emeric de Vattel, who distinguished between agreements embracing continuous executory obligations of projected future duration, which he considered properly the subject of treaties, and compacts which have, for their subject, matters of temporary interest or of a single act performed once and for all. This general distinction between an agreement and a treaty, which the framers of the Constitution had before them, and which history tells us they were well acquainted with, is a classic distinction. While it is true that the precise dividing line between the subject matter of treaties and of executive agreements has never authoritatively been determined by the courts of this country, to state it succinctly, the difference has always been that a treaty deals with important matters and an agreement deals with less important and transitory matters. The late Supreme Court Justice Sutherland, in his book, Constitutional Power and World Affairs, declares that the precedents indicate that—

> International agreements which are not treaties in the full constitutional sense are perhaps confined to such as affect administrative matters, as distinguished from policies, and those which are of only individual concern, or limited scope and duration, as distinguished from those of general consequence and permanent character.

It will be remembered that Justice Sutherland is generally considered as one of the most careful scholars of international affairs ever to sit on the Supreme Court.

Another very learned scholar who has studied this matter, Prof. Charles Scheney Hyde, stated:

> From examination of the various permitted modes of agreement-making to which the United States has had recourse, it will be found that in practice the test of whether it is obligatory for the President to work with the Senate, or, to put it differently, whether there has been imposed through the Constitution a duty to make use of a treaty as the instrumentality of agreement, has in the particular case usually been deemed to rest upon the character of the objectives sought to be accomplished. It has not been supposed, for example, that the Executive, with or without the aid of Congress, was free to dispense with treaty-making whenever he might desire to avoid difficulties to be encountered in obtaining the senatorial approval of a desired compact. Deference for the constitutional privilege of the Senate has been constantly manifested in the making of certain well-defined classes of international arrangements; and that deference has revealed a seeming acknowledgment that the constitutional provisions in relation to treaty-making were far more than indicia of a procedure to be followed in case the Executive chose to employ a treaty as a pleasing setting for an agreement, and that the provisions in that instrument were rather to be regarded as declaratory of a constitutional duty on the part of the Executive invariably to submit agreements within a broad and fairly well-defined field to the Senate for its approval. The practice of the United States throughout its life reveals respect for this ideal.

It is quite true that the force of circumstances has made it necessary and indeed entirely desirable for the President in the conduct of military affairs and certain aspects of foreign relations to conclude either with or without congressional authorization various agreements with foreign countries covering such matters as the movement of armed forces, the adjustment of claims, protocols, tariff agreements, postal agreements, and even armistices. All of these may be classed as being either of a routine nature within the President's admitted constitutional powers, or else relating to matters which the Senate has deemed either too unimportant for treaty procedure or which Congress has authorized, or as to which, in certain isolated and quite individual cases, it may be said that the Senate has acquiesced as not requiring the exercise of its senatorial prerogatives under the Constitution. But it must be borne in mind that the treaty-making power of the Senate which is found in article II, section 2, of the Constitution is designed as a definite check upon the Chief Executive's unlimited power to enter into permanent and continuing arrangements with foreign countries, commonly the subject of treaties. And this is to be a permanent arrangement with a foreign country.

As stated before, it is quite true that the Constitution makes no clear definition of what shall be the subject matter of a treaty. It also fails to provide for executive agreements, as they have come to be called. Time and circumstance, however, have given us a guide on these questions, so that we know approximately what types of subjects have been covered by each form.

There are very sound reasons for the rule which provides that two-thirds of the Senators present must advise and consent to a treaty. Certainly this provision did not come into the Constitution by accident. Before the Articles of Confederation, the States by their delegates had to be unanimous in binding the United States to a treaty. Under the Articles, 9 States out of 13 were necessary.

Under the Constitution, the small States insisted upon a preponderant majority as necessary to bind the United States and constitute the supreme law of the land binding the States. In other words, it was strenuously believed and, of course, adopted that a treaty had to be good enough and convincing enough to command a two-thirds vote. Then there arose the question of the participation of the House of Representatives in the treaty-making power. This was very carefully considered, and was expressly rejected by an overwhelming vote. While the House of Representatives is undoubtedly as competent and as patriotic as the Senate, there were reasons why the House was not joined as a treaty partner. Among the historical reasons, as described by Mr. W. Stull Holt in a scholarly study entitled "Treaties Defeated by the Senate," were: the necessity for secrecy, the necessity for quick action, the fact that the House would be in session only for several months of the year, the short terms of the members of the House which would prevent them from mastering the intricacies of foreign relations, and the fluctuating membership of the House. These are the historical reasons.

In the Constitutional Convention a further discussion arose as to whether the treaty-making powers should be placed solely in the hands of the Senate or in the hands of the Executive alone.

Mr. Holt thus describes the compromise which was reached:

> Obviously the treaty-making powers had to be lodged somewhere. With the House of Representatives disqualified for what seemed, at least to the vast majority of the members of the Convention, to be sufficient reasons, with one group opposed to putting the power solely in the hands of the Senate and another group insisting that it should not be given to the President alone, the compromise giving it jointly to the President and the Senate was almost inevitable. Such settlement was particularly satisfying to the members as it exemplified so well the dominant political belief that liberties and good government could be preserved if each branch of the Government could be checked by the others.

The late Senator Bailey, of North Carolina, whom many of us remember with so much admiration and affection, put it this way:

> We must all bear in mind there is a great difference between the House and the Senate. The Senate is a continuing body that is always in existence; it has been in existence since 1785 without a break, while the House ceases to exist every 2 years and starts de novo. We do not have to adopt our rules each 2 years—the House does. We do not have to organize every 2 years—the House does. We are in continuous existence and, for matters relating to treaties with other nations, that continuity is very important. We are bound, but the future House is not bound at all. If Canada goes into this—

And Senator Bailey was here referring to the St. Lawrence agreement—

> and it turns out to be just an agreement based on the action of Congress, Canada would take notice at once that the Representatives could change their minds every 2 years. It is presumed that a future Senate will respect the actions or the agreements of past Senates because it has a continuity of existence. But the next House of Representatives is not bound by anything done by the present House. I think that is the basis for the two-thirds rule in the Senate for ratification.

While it is certainly true that some of the original reasons for the adoption of the constitutional rule may no longer seem to us as forceful as they seemed in 1787, there are additional sound, modern reasons to support this rule, most notably the recognized rise in Executive power and the complexity of our inter-

national relations. These historical factors form an indispensable background against which we must consider the agreement now before us. I have only sketched in this background, but I ask Senators to bear it in mind as I move along to an examination of the St. Lawrence project itself.

On page 82 of the majority report, the statement is made:

Reciprocal legislation has long been recognized as a method of concluding agreements between the United States and Canada.

On the contrary, Mr. President, treaties have been consistently used for this purpose. Boundaries, rights of navigation, and use of contiguous waters have been agreed upon by way of treaty, the most comprehensive of which is the treaty of 1909. Numerous treaties on a variety of subjects have since been concluded. This list includes the fishery treaties of 1924, 1931, and 1937; the antismuggling treaty of 1925; the liquor treaties with Great Britain of 1924, largely affecting Canada; the boundary treaty of 1925; the Lake of the Woods treaty of 1925; the treaty governing salmon in the Fraser River in 1937; the Loadline treaty of 1934; and the income-tax treaty of 1936. All those are treaties which we have concluded with Canada. I would vigorously emphasize that the record shows that matters far less significant than the St. Lawrence seaway project have been dealt with by treaty.

It also should be noted that on our southern boundary, international agreements with Mexico concerning the utilization of the Rio Grande and the Colorado Rivers have always been the subject of treaty settlement, and not of so-called executive agreement.

Referring to the treaty of 1909, which is the comprehensive boundary waters treaty, it is true that some collateral supplemental agreements contemplated in that treaty were subsequently entered into. From this the majority seem to conclude that the provision of the 1909 treaty establishing the International Joint Commission and those provisions of article III providing for special agreement concerning the "uses, obstructions, and diversions" of boundary waters, entrusted to the International Joint Commission or to special agreement or concurrent legislation, constitute authority for the promulgation of the St. Lawrence navigation and power project by executive agreement rather than treaty. In other words, the inference is made that the St. Lawrence navigation and power project is an obstruction or diversion, or is in that category. The majority report recognizes that it is the view of the Canadian Government that the St. Lawrence agreement does not flow out of the 1909 treaty; if the St. Lawrence agreement is supposedly based on the 1909 treaty, is it not most significant that the 1941 agreement is entirely silent with respect to the treaty of 1909?

Just to refresh the memory of the Senate, let me run over briefly the provisions of the 1942 so-called executive agreement concluded with Canada. It provides for a deep waterway, dams, and power works in the St. Lawrence River, and the agreement creates a Great Lakes-St. Lawrence Basin Commission to be composed of not more than 10 persons, the total number of whom shall be determined by an exchange of notes and an equal part of whom shall be selected by each Government. The Commission is to allocate construction costs in the international section between the Governments, is to approve all construction contracts, supervise construction, and report upon the desirability of compensating works in the Great Lakes System, these reports being approved by exchange of notes to be acted upon by the Governments.

Canada agrees, first, to construct—with funds furnished by the United States—operate, and maintain the works situated within Canada in the International Section; second, to construct Canadian links in the seaway, including the deepening of the Welland Canal. The completion date for these latter works is December 31, 1948, which may be modified by an exchange of notes.

The United States agrees, first, to furnish funds to Canada for construction in the international section; second, to construct, operate, and maintain works situated in the United States in the international section; third, to provide, not later than the date of completion of the Canadian links, for completion of works in the Great Lakes system above Lake Erie. It should be noted at this point that the so-called self-liquidation feature of the St. Lawrence project, to which I shall come later, is not provided for in the 1941 executive agreement. This feature, indeed, I want to underline, has not been the subject of any formal negotiation at all between the United States and Canada. In sections 1 and 3 of Senate Joint Resolution 111, the resolution now before us, it will be found that the President is authorized and directed, during the period of construction of this seaway, to negotiate a further agreement with the Government in Canada defining the rates of charges or tolls to be levied for the use of the new deep-water navigation facilities on the St. Lawrence River. I shall return to this point later on in my argument, but I think it should be noted here that the self-liquidation provisions do not appear in any existing treaty or formal agreement between this country and the Government of Canada. That will all have to come up here later at some time, assuming that we decide to construct the seaway.

Reverting to the 1941 compact itself, Prof. Edwin Borchard prepared in 1944 a very informative analysis of the 1941 agreement. It will be recalled that Professor Borchard has had wide experience as an official of the Department of State, a practitioner in many important cases before the Supreme Court and other Federal and State courts, was counsel for the United States and for other governments in outstanding international arbitration, was representative of the United States on international legal commissions, and for 29 years was professor of constitutional and international law at one of our leading university law schools. He is also the author of several recognized standard works on constitutional and international law. Professor Borchard took a copy of the 1941 executive agreement between the United States and Canada and underlined in that agreement those provisions which he believed, in his considered opinion, were properly the subject matter of a treaty rather than an agreement. I do not have the time and I do not want to take the time of the Senate to go through this agreement line by line, pointing out Professor Borchard's emphasis. Therefore, I ask unanimous consent to have inserted at this point in my remarks a copy of the 1941 agreement between the United States and Canada, with Professor Borchard's underlinings included therein. I think that if Senators will take a look at this document, as analyzed by Professor Borchard, they will be impressed, as I am, with the fact that by every test of form, substance, and magnitude the St. Lawrence seaway and power project are most certainly well within our traditional concept of a treaty.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

OPINION

On March 19, 1941, the President of the United States and His Majesty, the King of Great Britain, etc., concluded an Executive Agreement known as the Great Lakes-St. Lawrence Agreement, March 19, 1941.[1] It reads as follows:

"The President of the United States of America and His Majesty the King of Great Britain, Ireland, and the British dominions beyond the Seas, Emperor of India, *in respect of Canada*, have decided to conclude an Agreement in relation to the *utilization of the water in the Great Lakes-St. Lawrence Basin* and to that end have named as their respective plenipotentiaries:

"The President of the United States of America:

"His Majesty the King of Great Britain, Ireland, and the British dominions beyond the Seas, Emperor of India, *for Canada:*

"Who, after having communicated to each other their full powers, found in good and due form, have agreed upon the following Articles:

"PRELIMINARY ARTICLE

"For the purposes of the present Agreement, unless other expressly provided, the expression—

"(a) *'Joint Board of Engineers'* means the board appointed pursuant to an agreement between the Governments following the recommendation of the *International Joint Commission*, dated December 19, 1921;

"(b) *'Great Lakes System'* means Lakes Superior, Michigan, Huron, (including Georgian Bay), Erie, and Ontario, and the connecting waters, including Lake St. Clair;

"(c) *'St. Lawrence River' includes the river channels and the lakes forming parts of the river channels* from the outlet of Lake Ontario *to the sea;*

"(d) *'International Section'* means that part of the St. Lawrence River through which the international boundary line runs;

"(e) *'Canadian Section'* means that part of the St. Lawrence River which lies wholly within Canada and which extends from the easterly limit of the International Section to Montreal Harbor;

"(f) *'International Rapids Section'* means that part of the International Section which extends from Chimney Point to the village of St. Regis;

[1] Dept. of State Bulletin, March 22, 1941, Vol. IV, No. 91, p. 307; United States Dept. of Commerce, "The St. Lawrence Survey," N. R. Danielian, Director. Washington, Government Printing Office, 1941 Part VII, p. 138.

"(g) 'Governments' means the Government of the United States of America and the Government of Canada;

"(h) 'countries' means the United States of America and Canada;

"(i) *'Special International Niagara Board'* means the board appointed by the Governments in 1926 to ascertain and recommend ways and means to preserve the scenic beauty of the Niagara Falls;

"(j) 'deep waterway' means adequate provision for navigation requiring a *controlling channel depth of 27 feet with a depth of 30 feet over lock sills, from the head of the Great Lakes to Montreal Harbor* via the Great Lakes System and St. Lawrence River, in general accordance *with the specifications* set forth in the *Report of the Joint Board of Engineers,* dated November 16, 1926.

"ARTICLE I

"1. The Governments agree to establish and maintain a *Great Lakes-St. Lawrence Basin Commission,* hereinafter referred to as the Commission, consisting of not more than ten members of whom an equal number shall be appointed by *each* Government. The duties of the Commission shall be—

"(a) to prepare and to recommend *plans and specifications for the construction of works in the International Rapids Section* in accordance with and containing the features described in the *Annex attached to* and made part of this Agreement, *with such modifications as may be agreed upon by the Governments;*

"(b) *upon approval* of the plans and specifications *by the Governments,* to prepare a schedule *allocating the construction* of the works in the International Rapids section on such a basis that each Government shall construct the works *within its own territory or an equivalent proportion of the works so approved;*

"(c) *to approve all contracts* entered into on behalf of either Government for the works in the International Rapids Section;

"(d) *to supervise the construction of the works* and to submit reports *to the Governments* from time to time, and at least once each calendar year, on the progress of the works;

"(e) upon satisfactory completion of the works, *to certify to the Governments that* they meet the plans and specifications drawn up by the Commission and *approved by the Governments;*

"(f) to perform the other duties assigned to it in this Agreement.

"2. The Commission shall have the authority *to employ such persons and to make such expenditures as may be necessary* to carry out the duties set forth in this Agreement. It shall have the authority to avail itself of the services of such governmental agencies, officers, and employees *of either country* as may be made available. The *remuneration, general expenses,* and *all other expenses* of its members shall be regulated and paid by their respective Governments; and the *other expenses of the Commission,* except as provided for under Article III, paragraph (b) of this Agreement, shall be *borne by the Governments in equal moieties.*

"3. The Governments agree *to permit the entry into their respective countries* within areas immediately adjacent to the Niagara River and the International Section to be delimited by exchange of notes, *of personnel employed by the Commission* or employed in the construction of the works, and *to exempt such personnel from the operation of their immigration laws* and regulations within the areas so delimited. *In the event that the Commission,* pursuant to the provisions of paragraph 1 (b) of this article, *allocates to either of the Governments the construction of works, any part of which is within the territory of the other Government, the latter Government shall make provision for the according,* within the area in which such a part is situated, *of such exemption from customs, excise, and other imposts, federal, state, and provincial, as may be reasonably practicable* for the effective and economical prosecution of the work. Regulations providing for such exemptions may be *settled by the Governments by exchange of notes.*

"4. The Governments shall, by exchange of notes, prescribe rules and *regulations for the conduct of the Commission.* They may by the same means *extend or abridge its powers and duties;* and *reduce* or after reduction *increase* the number of members (provided that there must always be an equal number appointed by each Government and that the *total number of members* shall at no time exceed 10); and upon completion of its duties, the Governments may terminate its existence.

"ARTICLE II

"The Government of Canada *agrees:*

"(a) in accordance with the plans and specifications prepared by the Commission and approved by the Governments, *to construct the works in the International Rapids section allocated to Canada* by the Commission; and to operate and maintain or arrange for the operation and maintenance of the works situated in the territory of Canada;

"(b) to complete not later than December 31, 1948, the essential Canadian links in the deep waterway, including the necessary deepening of the new Welland Ship Canal and the construction of canals and other works *to provide the necessary depth* in the Canadian section of the St. Lawrence River; provided that, if the continuance of war conditions or the requirements of defense justify a modification of the period within which such works shall be completed, *the Governments may, by exchange of notes, arrange to defer or expedite their completion* as circumstances may require.

"ARTICLE III

"The Government of the United States of America agrees:

"(a) in accordance with the plans and specifications prepared by the Commission and approved by the Governments *to construct the works* in the International Rapids section *allocated to the United States* of America by the Commission; and to operate and maintain or arrange for the operation and maintenance of the works situated in the territory of the United States of America;

"(b) *to provide,* as required by the progress of the works, *funds for the construction, including design and supervision, of all works in the International Rapids section* except (1) machinery and equipment for the development of power, and (2) works required for rehabilitation on the Canadian side of the international boundary;

"(c) not later than the date of completion of the essential Canadian links in the deep waterway, *to complete the works allocated to it in the International Rapids section* and the *works* in the Great Lakes System above Lake Erie *required to create essential links* in the deep waterway.

"ARTICLE IV

"The *Governments agree that:*

"(a) *they may,* in their respective territories, in conformity with the general plans for the project in the International Rapids Section, *install* or arrange for the installation of such *machinery* and equipment *as may be desired for the development of power* and as such time or times as may be most suitable in terms of their respective power requirements;

"(b) in view of the need *for coordination of the plans* and specifications prepared by the Commission *for general works in the International Rapids section* with plans for the development of power in the respective countries, *the Commission may arrange for engineering services with any agency in either country,* which may be authorized to develop *power in the International Rapids Section;*

"(c) except as modified by the provisions of Article VIII, paragraph (b) of this Agreement, each country shall be entitled to *utilize one-half of the water available for power purposes in the International Rapids Section;*

"(d) during the construction and upon the completion of the works provided for the International Rapids section, *the flow of water out of Lake Ontario* into the St. Lawrence River shall be controlled and the flow of water through the International section *shall be regulated so that the navigable depths of water for shipping in the Harbor of Montreal* and throughout the navigable channel of the St. Lawrence River below Montreal, as such depths now exist or may hereafter be increased by dredging or other harbor or channel improvements, *shall not be injuriously affected by the construction or operation of such works,* and the *power developments in the Canadian section* of the St. Lawrence River shall *not be adversely affected;*

"(e) upon the completion of the works provided for in the International Rapids section, the power works shall be operated, initially, with the water level at the powerhouses held at a maximum elevation 238.0, sea level datum *as defined in the Report of the Joint Board of Engineers,* for a test period of 10 years or such shorter period *as may be approved by any board or authority designated or established under the provisions of paragraph (f)* of this article; and, in the event that such board or authority considers that operation with the water level at the powerhouses held to a maximum elevation exceeding 238.0 would be practicable and could be made effective within the limitations prescribed by *paragraphs (c) and (d) of this article,* the *Governments may, by exchange of notes, authorize operation,* subject to the provisions of this article, and for such times and subject to such terms as may be prescribed in the notes, at a maximum elevation exceeding 238.0;

"(f) *the Governments may, by exchange of notes,* make provision for giving effect to paragraphs (c), (d), and (e) of this article;

"(g) during the construction of the works *provided for in the International Rapids section,* facilities for 14-foot navigation in that section shall be maintained.

"ARTICLE V

"The Governments agree that *nothing done under the authority of this agreement shall confer upon either of them proprietary rights, or legislative, administrative,* or *other jurisdiction* in the territory of the other, and that the works constructed under the provisions of this agreement shall constitute a part of the territory of the country in which they are situated.

"ARTICLE VI

"The Governments agree that *either* of them may proceed at any time to construct, within its own territory and at its own cost, alternative canal and channel facilities for navigation in the International section or in waters connecting the Great Lakes, and to utilize the water necessary for the operation of such facilities.

* * * * *

"ARTICLE VIII

"The Governments, recognizing their common interest in the preservation of the levels of the Great Lakes System, agree that:

"(a) each Government in its own territory shall measure the quantities of water which at any point are diverted from or added to the Great Lakes System, and *shall place such measures on record with the other Government semi-annually;*

"(b) in the event of diversions being made into the Great Lakes System from other watersheds lying wholly within the borders of either country, *the exclusive rights to the use of waters which are determined by the Governments to be equivalent* in quantity to any waters so diverted shall, notwithstanding the provisions of Article IV, paragraph

(c) of this Agreement, *be vested in the country diverting such waters, and the quantity of water* so diverted shall be at all times available to that country for use for power below the point of entry, so long as it constitutes a part of boundary waters.

* * * * *

"ARTICLE X

"*The Governments* agree that:

"(a) *each Government* undertakes to make provision for the disposition *of claims and for the satisfaction of any valid claims arising out of damage or injury to persons or property* occurring in the territory of the other in the course of and in connection with construction by such Government *of any of the works authorized* or provided for *by this Agreement:*

"(b) *each Government is hereby released from responsibility for any damage or injury to persons* or property *in the territory of the other, which may be caused by any action authorized or provided for by this Agreement,* other than damage or injury covered by the provisions of paragraph (a) of this Article:

"(c) each Government will assume the responsibility for and the expense involved in the acquisition of any lands or interests in land in its own territory which may be necessary to give effect to the provisions of this Agreement.

"ARTICLE XI

"This Agreement shall *be subject to approval by the Congress of the United States* of America and *the Parliament* of Canada. Following such approval it shall be *proclaimed by the President* of the United States of America and *ratified by His Majesty* the King of Great Britain, Ireland, and the British dominions beyond the Seas, Emperor of India, in *respect of Canada.* It shall *enter into force on the day of the exchange of the instrument of ratification* and a copy of the proclamation which shall take place at Washington.

"In witness whereof the respective plenipotentiaries have signed this Agreement in duplicate and have hereunto affixed their seals.

"Done at Ottawa, the ____ day of March in the year of our Lord one thousand nine hundred and forty-one."

Mr. LODGE. Mr. President, the magnitude of this enterprise, the fact that it involves future obligations on this Congress and on future Congresses, the fact that it involves a subject matter which has never been dealt with by executive agreement and is outside the scope of the diplomatic or military functions of the President, all combine to indicate that this St. Lawrence seaway project is not properly the subject of an executive agreement.

Let it be emphasized that the performance of the so-called executive agreement is entirely prospective. It does not have, for its subject, matters of temporary interest, nor is it to be fulfilled by a single act. It calls for the political cooperation of the United States and Canada. It deeply affects the political, economic, and social life of the citizens of both countries. It encompasses commitments requiring for all time the performance of numerous and continuous acts.

Of course one of the very strongest arguments, if not the strongest argument, requiring us to regard the St. Lawrence project as properly the subject of a treaty rather than an agreement, is the very attitude of the administration itself. Is it not highly significant, if indeed not conclusive, that this matter was first submitted to the Senate in the form of a treaty for ratification under constitutional procedure? We have there the strongest possible argument for saying that this is something which should be done by treaty and not by executive agreement. The majority cannot help notice the force of this argument, and let me just read their answer. I read from page 81 of the majority report:

In particular we hav in mind that the negotiation of the 1941 agreement with Canada subject to approval by legislation, followed by less than 10 years the defeat of the treaty with Canada on the same subject and that these facts might at least raise an inference of avoidance by the Executive of a senatorial prerogative of advising and consenting to a treaty by a two-thirds vote of the Members present and voting.

That is all the majority have to say on this particular aspect. They recognize that an inference of avoidance is raised, and they are happy to let it go at that. There is certainly more than an inference here. The majority are walking on ice when they deal with this point, and they realize it. But if there is any doubt as to whether an inference is raised or not, let me read a brief extract from the testimony of the then Assistant Secretary of State, Adolf A. Berle, testifying before the Committee on Rivers and Harbors on June 17, 1941. I quote, and I ask my colleagues to give heed to this:

I propose to close this phase of the subject by saying that it did seem that in an issue of this size and this importance it was hardly fair to place in the hands of the minority of one House the ultimate decision of a measure of very great importance to the entire country. For that reason the agreement form was selected, and it is in that form that it is here.

Just ponder those words. The State Department thought the decision was important; therefore, they did not think the Senate ought to exercise its constitutional prerogatives with regard to it. Because they thought it was very important, the State Deparment decided it was to be an agreement rather than a treaty.

It was the position of the State Department in 1941—and I know of no reason for believing that their position is any different today—that we must have an invasion of the Senate's treaty-making powers, because it is not "fair"—and I quote "fair"—to permit a minority of the Senate to exercise its constitutional privilege of rejecting a treaty. Just bear that in mind.

This is, of course, a perhaps unintentionally frank admission by the executive branch of the reason why this St. Lawrence matter is here today as an executive agreement where only a few short years ago it was a treaty. The only difference between the 1933 treaty and the 1941 agreement, as it is here before us, is the elimination of articles VII and IX of the 1941 agreement. Even the majority have to admit that the undertakings of the obligations in those two articles were too much for an executive agreement, and the present resolution says that they shall be dealt with by treaty. But I submit most vigorously that the treaty which is here before us masquerading as an agreement is not cured by the elimination of these two articles dealing principally with the diversion of water from Lake Michigan. It is rendered perhaps a shade less offensive, but that is about the most charitable thing one can say.

The issue, then, as I am discussing it here, resolves itself down to the fundamental question of whether we ought to set a precedent that the Chief Executive can, when it suits his purpose, ignore the treaty-making powers of the Senate and resort to the circumvention of the executive agreement. In an editorial on May 22, 1944, the New York Times put the issue in a nutshell when it said:

This ignoring of a plain constitutional requirement would be a d ngerous precedent. It would put in doubt the validity of treaties and international agreements not ratified in the constitutionally prescribed manner.

And the New York Herald Tribune remarked in an editorial on April 17, 1944:

The Senate's real power in treaty-making is not merely a mechanical one; it resides in the Senate's ability to force public debate, awake doubts and secure popular support for other courses than those proposed by the Executive. The power is anything but anachronistic, nor is it easily waved aside by juggling precedents or calling treaties by some other name.

I can do no better in concluding what I am frank to confess is only a very superficial treatment of this question than to quote the words of the Senator from Maine [Mr. WHITE] appearing in the appendix of the minority views.

The Senator from Maine said this, and I urge every Senator to study and ponder his words with the deepest seriousness:

I insist that a project calling for the expenditure of hundreds of millions of dollars, which it will take from 4 to 6 years to complete; which involves long-term obligations by both governments; which gives to each government sovereign rights in the other country, is by every test a treaty and not an agreement and always heretofore, the President and the Senate have held this view. Now we witness the challenge by an executive department of the constitutional right of the Senate of ratification, and in its stead acceptance of this new theory that the President may enter into agreements of any and every nature with foreign governments and that Congress may from the majority vote give its consent thereto and effectuate the same. In what is here proposed is bold evasion of constitutional procedure, and the elimination of the Senate as a part of the treaty-making power under our Constitution. It is an effort to accomplish by indirection what the Senate has twice refused to sanction. This constitutional issue is before us. It should be decided, for if the State Department's conception of executive authority prevails, if the Senate yields thereto, then the Senate abandons to the executive branch this right to consent or to refuse consent to foreign commitments of the most solemn character. I am unwilling to be a party to this threatened liquidation of the Senate in this field of foreign relations.

Even if the St. Lawrence seaway project were worth while and meritorious, even if the best interests of the United States would be served by the construction of the seaway, even if no argument could be mustered against its authorization, I would still urge that it be defeated solely on the grounds of the issue which I have placed before the Senate. When the Senator from Maine stated

that he did not desire to be a party to the threatened liquidation of the Senate in the field of foreign relations, he was giving eloquent voice to a profound conviction to which I subscribe with all my heart and mind. No one has deeper respect than I for the high and dignified powers of this body of which I am proud to be a Member. Because of this pride, I am jealous of our powers. I for one cannot stand by, idle and silent, in the face of a threat to a constitutional power. On this ground alone I submit that the joint resolution should be emphatically and decisively rejected.

Mr. President, that concludes the portion of my remarks dealing with the question of whether we should have a treaty or an agreement. I next plan to discuss the self-liquidating aspects. I now yield for any questions which may be asked me.

Mr. WILEY. Mr. President——

The ACTING PRESIDENT pro tempore. Does the Senater from Massachusetts yield to the Senator from Wisconsin?

Mr. LODGE. I yield.

Mr. WILEY. I want to compliment the distinguished Senator on his statement respecting the general aspects of the question, and his discussion of the constitutional question. I am sure he has raised every point which has been raised in the past. I understand his constitutional argument is based upon two bases, and I ask him to state whether I am correct. First, he asserts that the proposed agreement is not an implementation of the Boundary Waters Treaty of 1909. Is that correct?

Mr. LODGE. I think that is approximately correct; yes.

Mr. WILEY. Then I understand also that, irrespective of the 1909 treaty, the Senator takes the position that the matter under discussion is not a subject for international agreement.

Mr. LODGE. I think it is clearly a subject for international treaty. I think it is too big a subject and too far-reaching a subject to be dealt with in a mere executive agreement.

Mr. WILEY. That subject was thoroughly thrashed out in the hearing last year, was it not?

Mr. LODGE. I was not then a member of the subcommittee, I will say to the Senator. I do not know whether it was or not. I was not present at the meeting. The records which have been made in previous studies which were had have brought out the evidence, which I have adduced here, from all the leading authorities, that this matter should be dealt with in a treaty.

Mr. WILEY. I am sure the Senator is not ignorant of the legal opinion by Under Secretary Acheson, and also by the Legal Division of the Department.

Mr. LODGE. I certainly am not ignorant of the fact that the State Department wanted then, and wants now, to have the right to say whether a thing should be a treaty or an agreement; that the State Department wanted then and wants now to be allowed to make up its mind as to whether a proposition in which it is interested should be ratified by a two-thirds vote of the Senate, or by a majority vote of both Houses. Of course, all departments of the Government have what might be termed an aggravated case of "grabitis." I have no doubt that the State Department today goes along on the same basis assumed by the State Department when Mr. Berle was Under Secretary.

Mr. WILEY. Did the Senator vote for Bretton Woods agreement?

Mr. LODGE. I was not a Senator at that time.

Mr. WILEY. Did the Senator vote for the Greek loan?

Mr. LODGE. Yes.

Mr. WILEY. Was that provided for in a treaty?

Mr. LODGE. The Senator from Massachusetts does not consider that the State Department is always wrong.

Mr. WILEY. He does not?

Mr. LODGE. No; certainly not. Far from it. But I think it is entirely beyond the scope of any Government department to decide a matter which is up to the Senate to decide. I think we are the ones to decide whether a matter should be taken care of by way of a treaty or an agreement. I think the department has transgressed and has trespassed into a field which is not theirs when they undertake to do that.

Mr. WILEY. We are discussing the legal phases of the question. Would the Senator from Massachusetts object to having introduced into the RECORD at this time the opinion which last year guided the committee on which there were three lawyers?

Mr. LODGE. Whose opinion is it?

Mr. WILEY. The opinion is by Under Secretary Acheson, of the State Department.

Mr. LODGE. No; I should rather have the opinion of the State Department dealing with this matter printed in the Appendix, or after the conclusion of my speech. I do not believe they belong right in the middle of my speech.

Mr. WILEY. Mr. President, then I ask that the memorandum submitted by Under Secretary Acheson on behalf of the Department of State to a Subcommittee of the Committee on Foreign Relations, United States Senate, on Senate Joint Resolution 104, Seventy-ninth Congress, first session, be printed at the conclusion of the remarks of the Senator from Massachusetts today.

Mr. LODGE. I certainly should be glad to have that done.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. WILEY. Mr. President, may I ask what the second subject is which the Senator from Massachusetts proposes to discuss?

Mr. LODGE. The self-liquidation aspect.

Mr. WHERRY. Mr. President, will the Senator yield for a question?

Mr. LODGE. I am certainly delighted to yield to my friend the Senator from Nebraska.

Mr. WHERRY. Again asserting my open-mindedness on the question, I should like to call to the attention of the Senator from Massachusetts, and also to the attention of the distinguished chairman of the Committee on the Judiciary, the senior Senator from Wisconsin [Mr. WILEY], what is labeled "Minority Report of Mr. WHITE," which appears in the minority views submitted by the Senator from Massachusetts [Mr. LODGE]. I should like to ask if either Senator has called attention to the minority report presented by the majority leader, the Senator from Maine [Mr. WHITE], relative to executive agreements and treaties. I ask the Senator from Massachusetts first whether he has called attention to that minority report.

Mr. LODGE. Mr. President, I conclude my remarks on this phase with a quotation from the Senator from Maine, which I think is very eloquently written. The Senator from Maine said:

> I am unwilling to be a party to this threatened liquidation of the Senate in this field of foreign relations.

Mr. WHERRY. Mr. President, inasmuch as the constitutional question has been raised, I ask that the portion of the minority report submitted by the Senator from Maine, appearing on pages 44 and 45, be included as a part of my remarks at this point. The majority leader there discusses the question of whether the problem should be settled by a treaty or executive agreement. I think what the Senator from Maine says should be considered by the Senate as we make up our minds as to the constitutionality of this question. Certainly this phase of the matter should be mentioned at this time. I should like to read from the report. The majority leader said in his report:

> The growing resort in late years of the State Department to agreements, so-called, in the stead of treaties to be ratified by the Senate, in itself demands the consideration of this committee, for it marks a bold assertion of Executive authority and of waning Senate importance in the foreign field. From 1940 to 1944, inclusive, there have been but 38 treaties submitted to the Senate as against 256 agreements, of which we have knowledge, not submitted to the Senate. This tendency warns that we of the Senate must assert our rights in this field, or we shall be guilty of acquiescence in their loss.

I think those are powerful words, and I think that statement requires to be reflected upon. If we were carrying out the province of the Senate in respect to the negotiation of a treaty, that would be one thing, but an almost complete surrender to the Department of State respecting an executive agreement is another thing. I certainly do not subscribe to such a theory. I think it is a point which should be considered, and I think that the remainder of the minority report on this question, from the point at which I read, should be inserted at this point in the RECORD for the benefit of Members of the Senate, because it brings up the whole subject, and deals with matters other than the one particularly involved in the discussion at the moment. The State Department proposal would represent an encroachment upon the Senate of the United States in its treaty-making power.

The ACTING PRESIDENT pro tempore. Is there objection to the request of the Senator from Nebraska?

There being no objection, the matter was ordered to be printed in the RECORD, as follows:

> The growing resort in late years of the State Department to agreements, so-called,

in the stead of treaties to be ratified by the Senate, in itself demands the consideration of this committee, for it marks a bold assertion of Executive authority and of waning Senate importance in the foreign field. From 1940 to 1944, inclusive, there have been but 38 treaties submitted to the Senate as against 256 agreements, of which we have knowledge, not submitted to the Senate. This tendency warns that we of the Senate must assert our rights in this field, or we shall be guilty of acquiescence in their loss.

History and practice distinguish between treaties and agreements. Our Constitution provides for treaties. It is silent as to agreements save those which our States are permitted to enter into with consent of the Congress. I do not propose to argue this technical question. I do urge this full committee to give it study before we sanction further abandonment of the Senate's constitutional powers. In this connection, I call attention to the long and patient study given this subject by the Commerce Committee of the Senate and its formal conclusion that certain aviation agreements should have been submitted to the Senate as treaties to be considered and ratified as such; that any executive agreements purporting to grant to a foreign country the right to have air lines nominated by it to operate to or from United States territory without hearings as provided for in the Civil Aeronautics Acts, were illegal and void and that this Government is not bound by such agreements so long as they have not been ratified as treaties. The Foreign Relations Committee of the Senate may well heed this opinion of the Commerce Committee expressed in formal resolution.

I would concede that there are executive agreements which do not require Senate ratification but authority for which reposes in the Presidential office. Such are agreements made as the diplomatic representative of the United States. As Commander in Chief, the President may enter into armistice and military protocols and arrangements. He may adjust claims against foreign states. Such agreements are generally temporary in time and of relatively minor importance. I do not attempt a more definite statement of what agreements the President may enter into by virtue of his constitutional authorities for manifestly the present agreement is not such an arrangement. It is conceded that at least congressional approval is required.

There is also a class of agreements which the President may enter into under express congressional authorization. This right rests in practice not challenged rather than in express constitutional sanction. In this class of agreements, the President acts as the agent of the Congress and not as an independent Executive. There are many examples of this type of agreement. International organizations such as postal agreements, UN, ILO, UNRRA, food and agricultural organizations, Bretton Woods, reciprocal tariffs, are all within this class. As to some of these the Senate waived its functions.

There is, however, no constitutional warrant for an executive agreement subject to later congressional approval. It is sometimes thoughtlessly contended that if the President may enter into agreements with congressional approval first given, the Congress may approve an agreement already made by the President without its sanction. The answer to this argument is, that the latter procedure is an exercise of the treaty-making power and Congress cannot be substituted for the Senate by the mere calling of the original instrument an executive agreement instead of a treaty. The State Department cannot take from the Senate its constitutional rights by calling a treaty something else.

I insist that a project calling for the expenditure of hundreds of millions of dollars, which it will take from 4 to 6 years to complete; which involves long-term obligations by both Governments; which gives to each Government sovereign rights in the other country, is by every test a treaty and not an agreement and always heretofore, the President and the Senate have held this view. Now we witness the challenge by an executive department of the constitutional right of the Senate of ratification, and in its stead, acceptance of this new theory that the President may enter into agreements of any and every nature with foreign governments and that Congress may by majority vote give its consent thereto and effectuate the same. In what is here proposed is bold evasion of constitutional procedure, and the elimination of the Senate as a part of the treaty-making power under our Constitution. It is an effort to accomplish by indirection what the Senate has twice refused to sanction, first by refusing consent to the proposal in treaty form and later by rejection of an amendment to a river and harbor bill.

I recommend (1) that this Senate Joint Resolution 104 be not approved by this committee; (2) that the full committee undertake a study of the constitutional right of the executive branch of the Government to negotiate an agreement having the essential elements of a treaty, but of which approval is sought by a majority of the Congress and not by ratification by the Senate; and that before action is had upon any other phase of this problem, the committee undertake to consider and reach a conclusion as to this constitutional question. This constitutional issue is before us. It should be decided, for if the State Department's conception of Executive authority prevails, if the Senate yields thereto, then the Senate abandons to the executive branch its right to consent or refuse consent to foreign commitments of the most solemn character. I am unwilling to be a party to this threatened liquidation of the Senate in this field of foreign relations.

Mr. VANDENBERG. Mr. President, will the Senator from Massachusetts yield?

Mr. LODGE. I yield to the Senator from Michigan.

Mr. VANDENBERG. I am not prepared to discuss the thesis of the Senator from Nebraska that this represents one of those "complete surrenders" by the Congress to the disposition and autocracy of the State Department. But I should like to make a very brief suggestion to my able friend from Massachusetts—"God bless her; there she stands."

Mr. LODGE. I thank the Senator for those kind words.

Mr. VANDENBERG. My suggestion is in respect to the very sincere and earnest and conscientious effort which has been made historically in connection with this enterprise, to evade, and justify assault upon the constitutional point which the Senator submits. I concede that the point is of very fundamental importance. It is of great importance not only in respect to this particular pending proposal, but it is fundamentally important, as the Senator from Nebraska has indicated. When the St. Lawrence seaway was proposed as an agreement in 1941 it was before the Commerce Committee. My able friend, the senior Senator from Louisiana [Mr. OVERTON], was a member of the committee at that time. I do not see any other Senators present who were. As the Senator will remember, with respect to the question raised by the Senator from Massachusetts, we spent many days on the question of constitutionality.

At that time the Commerce Committee resolved the argument in favor of an agreement, and I was one of those who voted that it could be an agreement instead of a treaty. However, I did so with the greatest reluctance, and with a very considerable doubt as to whether my position was entirely justified. But it seemed to me at the time that the scales were so evenly weighted that I could give the benefit of the doubt to the decision to which I was attached in respect to the merits of the project.

Immediately after the failure of the agreement of 1941 to come to a final show-down, I took it upon myself personally to pursue with the State Department the question of the constitutionality of an approach by the agreement route. In company with several other Senators who shared my feeling about the matter, we had long discussions on the subject with representatives of the State Department. Those of us who were favorable to the St. Lawrence seaway from the standpoint of merit, and who yet shared the fear that perhaps in the form then submitted it could not qualify as the appropriate subject of an agreement, insisted—and I was one of those who insisted—that the questionable points in respect to the agreement of 1941 should be eliminated before ever the treaty was again brought to the floor of the Senate. As the result, as the able Senator from Massachusetts has shown, two sections of the agreement of 1941 were eliminated. Perhaps there are still some sections left which justify the challenge submitted by the Senator from Massachusetts; but I am very sure that almost any student of the subject will agree that in taking out those two sections we largely eliminated the specific thing upon which the constitutional argument was based.

I recite this history to indicate the extent to which those of us who profoundly believe in this enterprise have gone in an effort to meet the constitutional criticism raised by my able friend from Massachusetts. For example, we eliminated the provision which involved perpetual mutual navigation rights in Lake Michigan. As I look back upon it now, I think it is perfectly clear that an obligation of that sort involves a treaty character. We eliminated some other provisions to which it is unnecessary to refer in detail.

The point I am submitting to my able friend and to the Senate is that perhaps there is still a basis for an argument in respect to the impropriety of proceeding by legislative agreement instead of by treaty; but every effort has been made by the proponents of this enterprise, with the best legal advice we could obtain, to put this agreement in such form that it can be reasonably and honestly supported as a legislative agreement instead of a treaty. If we have not completely succeeded, to the entire satisfaction of all our legal perfectionists in the Senate, at least we have made an effort which, in the opinion of those of us who have participated in this effort, completely meets the charges which are submitted by the Senator. If we have failed to impress the Senator, I am sorry; but I feel that on the basis of this

record, this phase of his argument ceases to be of major importance.

I thank the Senator for permitting me to make this comment.

Mr. OVERTON. Mr. President, will the Senator from Massachusetts yield?

Mr. LODGE. I yield.

Mr. OVERTON. I had not intended to interrupt the able Senator from Massachusetts during the course of his argument. However, in view of the fact that the Senator from Michigan has referred to committee hearings conducted by a subcommittee of the old Commerce Committee, of which subcommittee I was chairman at the time, on the very important issue as to whether the compact now submitted between the United States and the Dominion of Canada is or is not a treaty, or is or is not an executive agreement, I wish to make an observation. I have not read the record of the hearings since they were conducted, but I shall speak from memory. If I am in error, the Senator from Michigan can correct me if his memory is more vivid than mine—and probably it is.

The position then taken by the State Department was that whenever the Executive Department determined that a compact was an executive agreement, it was an executive agreement, and should be so treated by the United States Senate. Thereupon I asked the representative of the State Department this question, in substance: "For the purpose of bringing your argument to a logical conclusion and a definite understanding, suppose that the United States and Great Britain should enter into a permanent compact of offensive and defensive alliance, and it should be submitted by the State Department as an executive agreement. Would it be an executive agreement?" His answer was "Yes." When that occurred, I failed to attach much importance to the opinion of the State Department on this subject.

The able Senator from Michigan says that the two issues involved in this treaty have been eliminated by the joint resolution, and that what remains can be properly considered as suitable material for a purely executive agreement, concerning which, however, he still expresses some doubt.

Mr. President, in my humble judgment those issues have not been eliminated, because the fundamental question as to whether a compact is a treaty or is not a treaty depends upon whether it represents a permanent, continuous agreement between two nations. That is De Vattel's analysis of a treaty, and his definition. It has stood practically uncontradicted by the best authorities through all the years. It was De Vattel's definition of a treaty which the framers of the Constitution had before them at the time they employed the term "treaty" and made provision for it in the Constitution of the United States.

On the other hand, an executive agreement is one which is temporary in character, or one which has but one single object to be achieved, which can be achieved within a limited time. That is a very plain definition. If we follow it, we shall not get into trouble.

What is the project now under discussion? Is it one project to be completed within a certain time? Is the agreement a temporary agreement? Not so. It is a continuous agreement. It contemplates not only the present agreement, but restatements and revisions of that agreement throughout the years. It is permanent in character. It is to last forever, so long as there is a United States and a Dominion of Canada, and a St. Lawrence flowing between them and emptying into the Atlantic within the bounds of the Dominion of Canada. Therefore, it seems to me that the contention is not correct that the objection that this compact is a treaty has been removed by the elimination of the two instances to which the able Senator from Michigan refers, because the issue still remains. The agreement still remains a permanent agreement, continuous in its performance.

Mr. VANDENBERG. Mr. President, will the Senator yield?

The PRESIDING OFFICER (Mr. O'CONOR in the chair). Does the Senator from Massachusetts yield to the Senator from Michigan?

Mr. LODGE. I am delighted to yield.

Mr. VANDENBERG. The Senator from Louisiana asked me to check his memory in respect to the hearings before the Commerce Committee. I think his memory is entirely accurate. We confronted what to me, as well as to the Senator from Louisiana, was the rather shocking concept from the State Department, that the way to distinguish between a treaty and an agreement was to consult the desire of the State Department as to the particular form in which it wished to submit the question to the Congress.

I rejected that thesis, as the Senator knows, just as specifically as did the Senator from Louisiana. All the points of legal controversy may not have been eliminated, but all I am saying is that those of us who believe in the project, and who are supporting it in the form in which it is submitted, rejected the theory of the State Department, and undertook upon our responsibility to eliminate, with the best legal opinion we could obtain, those factors which were calculated to put it into the treaty aspect. I think we succeeded. The Senator from Louisiana does not think so. The fact remains that the record shows that this agreement has been rewritten in complete repudiation of the original theory to which the Senator refers, that the character of a compact is at the option of the State Department as to whether it shall be an agreement or a treaty. We undertook to cure the errors, if there were any, and we think we succeeded.

Mr. AIKEN. Mr. President, will the Senator from Massachusetts yield?

Mr. LODGE. I yield to the Senator from Vermont.

Mr. AIKEN. I am sorry that I did not arrive in the Chamber until after the Senator from Massachusetts was well along in his discourse. Is my understanding correct that the Senator from Massachusetts claims that if the United States and the Dominion of Canada wished to construct a dam across the St. Lawrence River, it would be necessary to have a treaty between those two countries authorizing its construction?

Mr. LODGE. I think anything that is permanent, far-reaching, and significant, anything which is not transitory or routine in character, ought to be done by treaty.

Mr. AIKEN. Would such a dam be supposed to be permanent?

Mr. LODGE. I would think so; yes.

Mr. AIKEN. If the State of New York and the Province of Ontario desired to construct a dam across the St. Lawrence River, does the Senator believe that would require a treaty between the two Governments, inasmuch as it would be probably the same dam, and would permanently affect the flow of the water in the river?

Mr. LODGE. All I could do would be to give a quick answer to that question, because I have never heard of it before. I would say, as Calvin Coolidge once said, that no single State in the Union has foreign relations.

Mr. AIKEN. Then does the Senator believe that a treaty would be at least desirable, if not necessary, in case the State of New York and the Province of Ontario desired to construct such a dam?

Mr. LODGE. I think if a State once starts to run foreign relations on its own and sends foreign ministers around, it will get into trouble.

Mr. AIKEN. I think it would require an act of Congress, at least. Does the Senator believe that if the Niagara-Hudson Power Co., a private utility, undertook to construct a dam across the St. Lawrence River, it would require a treaty between the two countries, assuming it is the same dam, at the same place?

Mr. LODGE. I do not know. I have not gone into that subject at all.

Mr. AIKEN. I should think the Senator from Massachusetts would have gone into it.

Mr. LODGE. I have been discussing the St. Lawrence seaway project.

Mr. AIKEN. Does the Senator believe that if the United States and the Dominion of Canada desired to place a bridge across the St. Lawrence River it would require an agreement?

Mr. LODGE. I should think that anything of a permanent character, or which would change the customs, the social life, and the commercial existence of the people on both sides of the border, should be done by treaty, but that anything which is of short view, such as the Greek loan, does not require a treaty. I do not think this project is at all comparable with the Greek loan.

Mr. AIKEN. I am not comparing it with the Greek loan. I was simply asking the Senator's opinion as to whether he thought these actions, taken in different ways, whether by Government or by State or by private interests, would all require a treaty between the two countries concerned.

Mr. LODGE. I think as a general proposition, if it is a far-reaching, permanent matter, it would require a treaty. If it is a routine, transitory thing, it does not require a treaty. But as to special cases involving the State of New York and the Province of Ontario, I cannot go into that.

Mr. AIKEN. Of course, the Senator is aware that bridges have been thrown

across the St. Lawrence River without a treaty, under the treaty of 1909.

Mr. LODGE. There was a treaty. If a bridge were built under the terms of a treaty——

Mr. AIKEN. Bridges were built under the clause of the treaty which permits bridges or dams or anything affecting the international waters to be acted upon by a simple act of the Congress and of the Canadian Parliament.

Mr. LODGE. I think that is a thoroughly constitutional thing, because the fundamental theory is that it is ratified by treaty.

Mr. AIKEN. Does the Senator believe that dams thrown across the St. Johns River between the State of Maine and the Province of New Brunswick, Canada, which is an international river the same as is the St. Lawrence River, are there now in violation of law, inasmuch as the question of a treaty was never raised when the private power interests desired to construct dams across international waters?

Mr. LODGE. I have not the slightest idea. The Senator is asking me questions on which I know he has very detailed and special knowledge. They are questions which I have never looked into and which have not the slightest connection with the proposition I am discussing. I certainly cannot answer his questions.

Mr. AIKEN. The Senator must know whether the treaty of 1909 has been used before.

Mr. LODGE. I know that dams and bridges have been constructed subject to the treaty of 1909, but I do not know where the approaches are located or whether they are two- or three-lane approaches. I have no knowledge of that.

Mr. AIKEN. I simply want to suggest that the question now raised by the Senator from Massachusetts was never once raised by a single one of the opponents of the St. Lawrence project when the private power interests were asking for and getting leave to construct dams across an international river.

Mr. LODGE. I am sure that if the Senator from Vermont says that is true, it is true. I do not happen to know anything about it.

Mr. AIKEN. If the Senator from Massachusetts is correct in his contention, it appears to me that those dams of private power companies across the St. Johns River are illegally there, and have no standing in law between the two countries.

Mr. LODGE. I dare say that is correct. I do not know anything about the dam business, and I am not discussing it. All I am talking about is the fact that when something is involved between two governments which is permanent and far reaching, and which changes the social, economic, and commercial life of the people, it should be done by treaty.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I yield.

Mr. WILEY. Is the Senator acquainted with the International Bridge at the Thousand Islands, or with the Detroit tunnel?

Mr. LODGE. No. I am not a bridge expert or a tunnel expert. The Senator can ask me about bridges and tunnels in this country or in Iraq or Australia, and I do not know anything about them.

Mr. WILEY. Would the Senator think, if they were put through, it would necessitate a treaty or an agreement?

Mr. LODGE. Perhaps I did not make myself clear to the Senator. The Senator said something about the Greek loan, which the Senator compares with this project. The Senator from Wisconsin said that I voted for the Greek loan and should be in favor of this proposition. The Greek loan amounted to $300,000,000 to be expended for food, clothing, shoes, gas, and maybe a little ammunition—things which are expendable—whereas this project involves something which will permanently change the geographical factors of the North American Continent. If I have not made that distinction clear to my good friend from Wisconsin, I just cannot do it.

Mr. WILEY. Will the Senator further yield?

Mr. LODGE. I yield.

Mr. WILEY. The Senator has made it very clear that he is following the tactics of bringing up the Constitution every time.

Mr. LODGE. I hope we shall not go into motives. Let us keep the discussion on the merits and on the facts, and we shall do much better.

Mr. WILEY. Very well. As between locks between Canada and the United States and some other place, and the construction of locks on the St. Lawrence River, does the Senator see any difference?

Mr. LODGE. I cannot give an answer to a question such as that, on which engineers and lawyers have spent 40 years of their lives.

Mr. WILEY. Would the Senator say that a lock constructed between Michigan and Canada, which is a border lock, built under agreement and legislative authority, should be differentiated from a lock built between New York and Canada, and that one requires a treaty and the other requires an agreement? Can the Senator make a differentiation?

Mr. LODGE. I just come back to my original statement: That if a thing is fundamental, if it is far reaching and permanent and long lasting, and has a basic effect upon the civilizations of the two countries concerned, it should be handled by treaty. If something that is far reaching and fundamental has not been handled by treaty, then I say two wrongs do not make a right.

Mr. WILEY. Mr. President, will the Senator further yield?

Mr. LODGE. I yield.

Mr. WILEY. Would the Senator from Massachusetts think that the incorporation of the State of Texas into the Union was necessary to be done by treaty?

Mr. LODGE. Mr. President, the Senator from Wisconsin is trying to get me into legalisms. I am not a lawyer; I am not trying to get into legalisms. I am discussing a question of principle, namely, whether we should circumvent the Constitution or should not circumvent it. If the Senator from Wisconsin, who is a very able lawyer, is trying to get me involved in regard to section 408 (b) and the question of where we should put the comma, I am not his man. I cannot go into such things as that.

I am trying to decide the question on its merits, on the basis of the principle involved. If the State Department says, "We shall try to get this done by majority vote, instead of by two-thirds vote," I do not like that.

Mr. WILEY. Mr. President, will the Senator further yield?

Mr. LODGE. I yield.

Mr. WILEY. I wish to compliment the Senator upon evading the question.

Mr. LODGE. I am not evading the question. When the Senator asks me a question about some bridge, I simply refuse to answer. I am not evading.

Mr. WILEY. Does the Senator from Massachusetts see any difference between a treaty and an executive agreement between two countries, subject to the approval of the legislatures of those countries?

Mr. LODGE. I must ask the Senator to repeat the question, please.

Mr. WILEY. Inasmuch as the Senator from Massachusetts was speaking of executive agreements, I point out that we know there are many types and varieties of executive agreements. Some of them are within the province of the Executive, without legislative approval. I ask whether the Senator would see any difference between those agreements and agreements where legislative approval is required.

Mr. LODGE. Yes; I can see where there would be a difference between an Executive agreement that did not require legislative approval and one that did. But all those are legalistic questions.

Mr. WILEY. Is the Senator from Massachusetts aware that throughout our history, when a treaty has been made, agreements have been made afterwards, implementing the treaty?

Mr. LODGE. Does the Senator from Wisconsin ask whether that has been done?

Mr. WILEY. Yes; is the Senator from Massachusetts acquainted with that practice?

Mr. LODGE. I presume it has been done; yes.

Mr. WILEY. Mr. President, I did not mean to interrupt, and I thank the Senator from Massachusetts for his courtesy.

Mr. LODGE. Not at all, Mr. President; I am always glad to have questions asked me by the genial Senator from Wisconsin. Let me also say that I always welcome questions by the distinguished Senator from Michigan [Mr. VANDENBERG], with whom I am so often in agreement. I admire his candor in telling the Senate the way he was troubled when this matter first arose, and of course I respect his opinion that the parts of the treaty which were of the most fundamental character have been removed from the scope of the joint resolution. I could only wish that all of it had been thus removed, and then there would be no doubt about it.

Mr. VANDENBERG. Mr. President, will the Senator yield to me?

Mr. LODGE. I yield.

Mr. VANDENBERG. The Senator from Michigan is not a lawyer, either, so he and the Senator from Massachusetts can chat on this subject on the level. I

did not mean that lawyers, too, cannot speak on the level, if they wish to do so.

Mr. LODGE. Lawyers are wonderful men when you are in trouble.

Mr. VANDENBERG. The point I wish to make with the Senator—and I know he will be fair enough to recognize it—is that it is utterly unfair in this debate to leave any implication that on this question of a choice between action by treaty or action by agreement, the proponents of the pending measure and the majority of the Senate Foreign Relations Committee have simply surrendered to a State Department view in respect to a State Department preference. I simply want, in fairness—and the Senator from Massachusetts would be the first man in this Chamber upon whom I would rely for fairness—to make the record plain that everything he is saying was given faithful consideration by the proponents of the joint resolution, and the State Department was required to change the proposal, so far as we are concerned, so as to bring it into what we believe to be complete conformity with appropriate action.

Mr. LODGE. The Senator from Michigan is quite correct in saying that I wish to be fair. I think I have been; and in my original statement I made it very clear that sections 7 and 9 of the treaty have been removed from the purview of this joint resolution, and I made reference to that matter at another time. I think some of the most vital matters involved in the treaty have been removed from consideration in connection with the joint resolution now before us, and they will have to be dealt with later by a treaty with Canada. But the complete job of surgery has not been done. I hope that tomorrow Senators will read in the RECORD the analysis which Professor Borchard made of the matters which are still included within the scope of this joint resolution, and which I think bear out my contention that it is a pity that it was not decided to take all of it up in the form of a treaty. So I ask Senators to read that analysis in the RECORD; I shall not burden them with reading it at this point.

Mr. WHERRY. Mr. President, will the Senator yield now for a question about the first part of his discussion of this matter?

Mr. LODGE. I yield.

Mr. WHERRY. In the course of the hearings, was offer made of any amendments relative to the objectionable provisions which it is claimed should not be subject to such an agreement?

Mr. LODGE. I was not in the committee meeting at the time, so I shall be glad to have the Senator from Wisconsin answer the question.

Mr. WILEY. I think I understand the question. Every point that has been raised is fully answered by the opinion which I have put into the RECORD. In my opinion, at least, as a lawyer, it answers every legal question.

I wish to supplement that by saying that following last year, when the objections were raised, the joint resolution was revised. The result has been that the joint resolution which the Senator from Michigan [Mr. VANDENBERG] introduced this year has omitted sections 7 and 9, so as to meet the objections then raised.

Now the opponents have raised additional objections; they now come up with other objections. But in the extensive opinion to which I have referred, every point that has been raised is fully answered.

Mr. LODGE. Mr. President, I do not know whom the Senator from Wisconsin means when he says that "they" have raised other questions or objections at this time.

Mr. WILEY. Mr. President, in the opinion to which I have just referred, Senators will find an answer to every point raised by the Senator.

Mr. LODGE. I did not raise any questions, the last time. This is my first approach to this subject. I have read repeated references to how patient the proponents of this proposition have been because it has been here 34 years or some similar length of time However, I have not been in the Senate 34 years. Most Members of the Senate are now making their first approach to this subject; and this is the first time I have ever had to contemplate this prospectus.

Mr. WHERRY. Mr. President, will the Senator further yield?

Mr. LODGE. I yield.

Mr. WHERRY. I did not wish to raise again any question as to the answers. During the last several days I have read quite thoroughly the report, as well as the analysis made by several experts, giving their opinions.

I simply wish to know whether the Senator can answer my question as to whether offer has been made of amendments to clarify the objectionable features which the Senator has so ably discussed here today; and I also wish to know whether such amendments, if offered, have been turned down, or whether any effort has been made to clarify or cure the objectionable features.

Mr. LODGE. So far as I know, none have been.

Mr. President, I now wish to discuss the self-liquidating aspect of the pending proposal. This is one of the two issues which were the subject of hearings before the subcommittee last spring. The question can be stated very simply, namely, can this project be made to pay its own way through the imposition of a maximum toll of $1.25 per ton of cargo?

The proponents argue that on the basis of the evidence available to them, the answer is "Yes." The opponents contend that this evidence is not really evidence at all, but is mere speculation, and that on the basis of the available facts there is no justification for a finding that the seaway can be made self-liquidating.

I should point out that the proponents and the opponents, however, approach this problem with rather different fundamental attitudes. Those who favor the seaway and maintain it can be made to pay its own way announce positively that the seaway can be made self-liquidating. Our contention is that the evidence does not conclusively prove this point, and that the data contained in the most authoritative study which has been made of the project to date indicate quite the opposite conclusion. But we do not pound the table and positively assert that the seaway cannot possibly ever be made self-liquidating through the imposition of tolls. We simply say that on the basis of the best evidence available, no reasonable man can fairly conclude that the project could be made self-liquidating. I hope this difference in attitude will be kept in mind as we proceed with the somewhat complicated discussion.

Mr. President, this self-liquidating feature is new just this year. It appears in section 3 (a) of Senate Joint Resolution 111.

In the first place, it will be noted that the question of the tolls through which the principle of self-liquidation is to be implemented is left for negotiation with the Government of Canada during the period of construction of the seaway project.

The implementing section prescribes a maximum toll of $1.25 per ton. In addition, it sets forth certain other principles to be followed which would result in a toll charge much lower than $1.25 per ton on boat cargo, depending on its character, which would probably constitute the majority of the traffic.

This section leaves unanswered some important and material questions having a substantial bearing on determining whether this project could in fact be made to pay its own way. These unanswered questions include such important matters as the following:

First. The amount of the toll to be charged is not designated except for a maximum. Appearing before the subcommittee, the Secretary of Commerce assumed that bulk commodities and agricultural commodities would carry a toll of between 25 cents and 50 cents per ton, and that all other commodities would carry the maximum toll of $1.25 per ton. By the Secretary's own estimate of the potential traffic, he shows that 80 to 85 percent thereof would be bulk commodities carrying the 25-cent- or 50-cent-per-ton toll charge. Thus, we have left undetermined the question of what toll would be charged on 80 to 85 percent of the traffic, with an admitted possible variation of 100 percent insofar as that class of shipping is concerned.

Second. Also to be added to your collection of unanswered questions is the question of how tolls would be collected. It is not known, for example, whether they would be collected partly by the United States and partly by Canada, or whether they would be collected by a joint agency of the two countries.

Third. Still more important, it remains a mystery how the receipts will be divided between Canada and the United States. What is to determine the right of each of the two countries to the receipts from the tolls? Lieutenant General Wheeler, Chief of Army Engineers, assumed an equal division between the United States and Canada, while other proponents took a very different view. In our minority views, we have assumed, simply for the sake of calculation, that the United States would be entitled to tolls from United States ships. We had indeed no other choice, because nobody knows what method of allocation will be agreed upon. Are they to be based on costs, or on the basis of the contribution which each country has made toward

the construction of the waterway, or is some other method to be used? An irrelevant point, say the proponents, but it does not seem so to me.

Fourth. There also remains for decision in connection with this matter the question of who is to determine, and by what standards, just which costs are chargeable to navigation and which are chargeable to power and other purposes. It is not difficult to imagine the facility with which confusion can be introduced in the determination of questions of this type. The proponents leave this to our imagination.

I say at the outset, therefore, that it is really quite difficult to see how we can form any reliable opinion as to whether the St. Lawrence project would in fact be self-liquidating when faced by so many unanswered questions which involve fundamental and basic factors. There are many other uncertainties to which reference will be made later. Certainly these questions could and should be resolved before we are asked to pass judgment on a project of such magnitude, complexity, and importance. The lack of these essential data which we need as a basis for sound decision makes it much more difficult to prove concretely that the project stands no chance of being self-liquidating, and it is for that reason that we are forced to take a somewhat less positive attitude on this point than would otherwise be possible. In the Senate we are in the habit of wanting to know what we are voting on. Good will and pious assurances that everything will come out all right, and replies of "don't worry" usually are out of place here. Why the St. Lawrence is an exception I do not know.

The provisions of section 2 raise other questions. It will be noted that this section would have the United States commit itself to these tremendous expenditures, largely to create an added transportation facility, at a time when our perpetual navigation rights on the Great Lakes, on the connecting channels and canals, and in the wholly Canadian sections of the St. Lawrence, have not been settled. These questions are left for future negotiation by treaty with Canada.

If no difficulties are anticipated in the drafting of such a treaty, I ask, why should it not be done promptly, and in advance of our commitment for the construction of the seaway? In fact, why has this not been done during the many years when this project has been in contemplation? One need not trouble to look in the record of hearings this year or any other year to find the answer to that question. I looked, and it is not there. I certainly am willing to concede, and am glad to concede, the generally friendly and cooperative attitude of our highly esteemed neighbor, but I ask, is it the part of wisdom and prudence that the United States should expend any such large sum of money as would be required for the proposed project without a clear and incontrovertible establishment of our rights of navigation? Since it appears that we are called upon to bear the major share of the cost of the project, would our position in the negotiations be strengthened if we deferred our commitment until our rights were settled?

Certainly no businessman would commit himself to an expenditure of the relative magnitude here involved without being assured in advance as to the extent of his subsequent right to use the project for which he was paying. That is not an unreasonable request, but apparently the proponents of the seaway do not ask or expect the United States Senate to act in a sound business way.

It will also be noticed from section 3 as it is now framed that the project may be proceeded with and completed even though no tolls are ultimately imposed, and even though the project may be wholly government subsidized. Section 1 of the joint resolution merely requires that before the agreement to proceed with the project enters into force, Canada must agree to the principle of making the project self-liquidating. No agreement other than as to principle is required before construction commences and government funds are expended. Section 3 directs that, during the period of construction, the President shall negotiate an agreement with respect to the actual tolls and charges to be imposed. Thus, the project may be proceeded with before any agreement is reached on the tolls themselves, and even though the negotiations required by section 3 may not result in any agreement, and hence in any imposition of tolls. It is a far different matter to agree to something in principle, than to agree in detail. It is apparent that there is nothing in Senate Joint Resolution 111 which gives assurance that the project will be self-liquidating in whole or in part. Those who believe that we should restrict government spending can certainly find little comfort in the provisions of sections 1 and 3 of the proposed resolution.

Moreover, if we examine the best available evidence, it is quite apparent that the project if carried out in accordance with what provisions there are in Senate Joint Resolution 111 cannot reasonably be made self-liquidating. To substantiate this, it is necessary to consider, first, the probable cost of the project; second, the probable traffic; and, third, the limitation of section 3.

The general conclusion of the opponents is that there are no conclusively accurate or reliable recent figures to show whether or not the St. Lawrence waterway project would be self-liquidating. As stated before, there can, however, be clearly indicated how it is unreasonable to assert conclusively, as do the proponents, that it will be self-supporting.

I agree with the statement made on Monday by the senior Senator from Wisconsin, when he presented this matter, that no very constructive purpose is served by quibbling and wrangling over cost figures and bookkeeping methods to be used in arriving at the annual amount which must be met by the collection of tolls if this project is to be considered truly self-liquidating. He himself has stated, and I am quoting from his remarks appearing on page 513 of the RECORD for January 26:

> There are several alternative financial and accounting policies that may be adopted in bringing about a sound administration of this project on a self-liquidating basis. There are choices to be made in the matter of interest rates, in the matter of amortization policy—whether straight or sinking fund or a depreciation policy—and in the period over which the retirement of investment should be effectuated. Any one of these alternatives would be sound and acceptable, and they have been used both by private industry and by Government.

I am willing to accept his assumptions and work from that. But what I should like to express, before passing on to the matter of estimates and figures, is my own astonishment that in a matter of this kind—that is, the financial and accounting policy to be used in computing the retirement of the amount which we will be asked to appropriate for the seaway project—there should at this point be any uncertainty at all. If, as the proponents maintain, the project is to be self-liquidating, it would seem of basic importance that we know for sure just what accounting procedure is to be followed. Why has this not been worked out with Canada? Why must we be asked to put the cart before the horse by first authorizing the project in the expectation or hope that it will be self-supporting before knowing with certainty the mechanics by which the project will be liquidated? Why must this, together with so many other important factors, be left to the uncertainties of the future?

But since we are dealing with alternatives, any of which may or may not be adopted, I agree that it would not be particularly enlightening to embark upon an extended debate regarding the details of the various alternatives. Confusion would be multiplied by further confusion. I am perfectly willing to accept for discussion purposes the cost figures and the table of annual charges to be liquidated which appear on page 15 of the majority report.

There it will be noticed that one of the alternatives adopted by the committee report shows that the total United States amount to be liquidated by tolls every year is, in round numbers, $17,000,000. Now, please keep that figure in mind. That is the total amount to be liquidated every year by tolls, $17,000,000. In our minority views we have used the figure of $20,000,000.

Mr. THYE. Mr. President, will the Senator yield for a question?

Mr. LODGE. I stated at the beginning, I will say to the Senator from Minnesota, that I would decline to yield until I had completed each of these separate arguments, but that at the end of my discussion of each one, I would be glad to yield.

Mr. THYE. I am sorry.

Mr. LODGE. We use the figure of $20,000,000 in our minority views, but, as I have said, there is room for difference on that, and I will accept $17,000,000 for the purpose of discussion. Under the present limitations of section 3 of Senate Joint Resolution 111, which prescribes a maximum toll of $1.25 per ton, there is no prospect that the amount which the United States is expected to liquidate by tolls every year can be met. This is true even if we use the lower figure of $17,000,000 as the annual

charges to be liquidated. Certainly $20,000,000 could not be liquidated, and I am going to try to show that $17,000,000 could not be liquidated.

Everything hinges on the crucial figure of expected tonnage to pass over the seaway. This is the estimation upon which proponents and opponents differ sharply.

In 1941, the United States Department of Commerce completed a seven-volume study entitled "The St. Lawrence Survey," of which part VII, the so-called summary report, contained a discussion pertinent to the all-important question of the expected volume of traffic over the seaway. Without any "if's," "and's," or "but's," it was stated in this report that in addition to the 9,000,000 tons of Canadian and United States traffic then using the existing 14-foot channel, there was a potential new capacity of 16,000,000 tons.

So we have $17,000,000 to liquidate, and further we have 9,000,000 tons of Canadian-United States traffic, and a new capacity of 16,000,000 tons. Of this new tonnage of 16,000,000 tons, it was calculated that 6,000,000 tons would be Canadian and 10,000,000 tons would be United States traffic. The 16,000,000 tons is an important figure, and it appears in the report in different connections, three separate times.

Mr. President, I ask that these excerpts, which are unrelated, be printed at this point in the RECORD. I will not read them, but I mention them because not once but three times does this figure of 16,000,000 tons altogether, and 10,000,000 tons American, appear in the figures of the Department of Commerce. I ask that the excerpts may be printed in the RECORD at this point.

There being no objection, the excerpts were ordered to be printed in the RECORD, as follows:

The total new capacity of the proposed seaway will be 16,000,000 tons, to be divided between Canada and the United States and between incoming and outgoing traffic (p. 46).

The 10,000,000 tons of additional American traffic which may use the St. Lawrence at maximum utilization would be but a fraction of the expected increase in railroad activity (p. 40).

In the face of these magnitudes, it is plain that the additional American traffic of 10,000,000 tons that may use the St. Lawrence seaway at its maximum utilization recedes into insignificance (p. 50).

Mr. LODGE. Mr. President, a word on this 1941 Commerce Department survey of the St. Lawrence seaway project. I have said heretofore that it is in seven volumes. It is the most complete, thorough, and authoritative study recently made on the economics of the seaway. The estimated additional 10,000,000 tons of American and 6,000,000 tons of Canadian traffic was in harmony with the finding announced by the Army engineers that the total capacity of the proposed seaway, including both old and new traffic, would be 25,000,000 tons a year. Its findings were accepted by a host of expert witnesses appearing before the subcommittee last spring, and among these witnesses was the representative of the Port Authority of the City of New York. I mention this particular witness because it is a well-known fact that the traffic estimates of the New York Port Authority, which operates a vast enterprise, including all the bridge and tunnel entrances into New York, have always come remarkably close to actual performance.

I ask Senators to keep this figure of anticipated 10,000,000 tons of new United States traffic in mind, because it is a key figure. I have accepted it, as have many experts far more qualified than I in these matters, because it represents the result of a long and careful study of the problem. I do not accept this figure simply because it happens to suit my purposes. I submit that such an estimate, in which the Army engineers concurred—and they have not changed their position on this matter—is a perfectly reasonable one.

So, in 1941 the long Commerce Department Survey concluded that we may expect 10,000,000 tons of new American traffic every year over the seaway if it is constructed.

But in 1947, the Secretary of Commerce testified before the subcommittee that the expected total United States-Canadian tonnage would exceed 40,000,000 tons a year and in a table which was submitted later and incorporated in the committee report, the estimate appears as being between 38,000,000 and 52,000,000 tons a year. In other words, the estimates increased as much as 100 percent between 1941 and 1947.

In submitting his estimates, the Secretary used very careful language. Let me quote from page 400 of the record of hearings in 1947:

The Department has not yet made a detailed study of potential traffic on the seaway in the light of these revised capacity estimates.

Notice the statement that the Department has made no detailed study.

Moreover, the Department has been able to make only very preliminary judgments concerning the effect of tolls on traffic which might use the waterway and the level of tolls which can be imposed. My subsequent comments on traffic which might use the seaway must accordingly be considered only as very rough estimates rather than conclusions resulting from careful study.

I will say that they are very rough.

These limitations should be kept clearly in mind in appraising the estimates which are included in the table attached as an appendix to my statement.

Later in his testimony the Secretary again issued a careful warning—and I read from page 403 of the record:

I wish to emphasize again that the traffic figures which I have been indicating do not constitute the results of detailed recent surveys but rather the best judgment of the experts of the Department.

Now, why do the proponents ask the Senate to reject the careful 1941 traffic estimates—the best work done on the subject so far—and to substitute therefor the "very rough estimates" not the "results of detailed recent surveys" submitted by the Secretary of Commerce?

The answer is perfectly obvious. All that is needed is a small calculation in simple arithmetic. Take the annual United States amount to be liquidated by tolls appearing on page 15 of the majority report—the figure of $17,000,000. Divide this figure by $1.25, the maximum toll per ton permitted under the joint resolution. We come out with about 14,000,000, the annual amount of new American annual traffic which must move over the seaway in order to meet this conservative estimate. And this division is more than fair, because it assumes that all the traffic would pay the maximum toll of $1.25, which certainly would not be the case, as we shall presently see. I am assuming, of course, that the shippers are all paying maximum tolls, which they would not. I am assuming that. I want to be more than fair.

Somebody did this arithmetic and discovered that the 1941 survey fell 4,000,000 tons short of the necessary 14,000,000 tons moving at the maximum toll of $1.25, because there are little boats and big boats, and they do not all pay the same amount. It did not take whoever did this arithmetic very long to appreciate that there was a dilemma here. Either the 1941 survey, which estimated 10,000,000 tons of new American traffic, had to be discarded, or the maximum amount of tolls had to be raised considerably. Otherwise a balance could not be obtained. The latter scheme would be obviously unfeasible, so the first alternative was chosen, to throw the 1941 St. Lawrence survey out the window and come up with something more favorable.

I am not attacking the Secretary of Commerce; let me make that clear. He was perfectly frank in submitting what he considered to be a theoretical capacity of the seaway. He warned the subcommittee very carefully that he was giving only very rough estimates. He was perfectly frank in saying that the earlier estimate was an estimate of practical rather than theoretical capacity.

The great error here, as I see it, lies in ignoring his careful warning and, on the basis of certain unsubstantiated assumptions, in completely discarding the thorough and detailed survey prepared by his Department in 1941 because these estimates were square pegs in round holes.

The proponents now seek to transform these very rough estimates into conclusive evidence by referring us to a remarkable document which has recently made its appearance. This document is published by the Bureau of Foreign and Domestic Commerce of the Department of Commerce and bears the title "Economic Appraisal of the St. Lawrence Seaway Project." It forms the subject-matter of the August–November 1947 issue of Industry Report on Domestic Transportation.

I am telling the complete truth when I say that this publication came to my attention shortly after Christmas, after the minority report had been submitted to the Foreign Relations Committee. It came to my office in the mail without any covering letter or word of explanation. If this is the great final word on this aspect of the St. Lawrence seaway as now claimed by the proponents, I am somewhat surprised that it came to me in such a casual way. It has been generally known for some time that I am interested in the St. Lawrence project. If this document is the modern authoritative study for which we have been

hoping, it would not seem unreasonable to have expected it to be brought to my attention with at least a word of explanation from its backers.

But be that as it may, I am trying to reconcile this great study with a very significant comment which Lieutenant General Wheeler, Chief of the Army Engineers, made before the subcommittee last spring. He said, as I quote from page 389 of the record:

> Before the Corps of Engineers could render a definite finding as to whether the new deep-water navigation works on the St. Lawrence River could be made to pay out by the imposition of tolls, it would be necessary to make a thorough study of all prospective traffic, the character and amount of tonnage that would actually move under a toll system in conformity with certain assumed principles and toll rates such as those set forth in section 3 (a) of Senate Joint Resolution 111, and the actual net income from these tolls as compared with the assessed navigation costs.

Then General Wheeler testified—and please get this—

> Such a study by the Corps of Engineers would appear to require definite authorization by the Congress and would take more than 1 year to complete.

That is what General Wheeler said would have to be done in order to obtain really authoritative information on the self-liquidation feature of the problem.

Later on in his testimony, General Wheeler, in reply to a question, elaborated as follows—as appears on page 392 of the record:

> I attempted to point out in my presentation a few minutes ago that such a study involves a great deal of field work and a cost that we feel has not been authorized for us to do. In making such a study we have to canvass the field by field contact and by questionnaires to find out the potential users; we have to study the boundaries of the area that would be economically affected, the nature of the water-adapted commerce and the volume of it, which is a study which requires a long time. We estimate that such a study would take about a year to complete.

I have quoted General Wheeler on this point because I believe, with him, that such a study does require many people, much field work, considerable time, and probably a great deal of money. With reference to this new Commerce Department study, I should like to ask how long it has been in preparation, how many people were involved in it, how much field work and how much money was involved in its preparation—in other words, was it along the lines of study indicated by General Wheeler as being essential? Was it authorized by Congress? I believe that these inquiries are what lawyers call establishing the qualifications of the witness, or laying a basis for the testimony. I am frank to admit that I have not as yet had an opportunity to go through this document with any great care, but I do note from the introduction that there is some apology there because of "limited time and staff." If this was another hurry-up job, accomplished with only a few people and during the summer months and not at all along the lines suggested by General Wheeler, then I think we ought to know about it. Until such time as these pertinent facts are established, I am not inclined to be any more impressed with this document than I was with the Secretary of Commerce's very rough estimates, which raised the careful estimates of 1941 more than 100 percent.

Let me say at this point that I should be glad to vote for a real study. I think this matter is important enough to justify us in appropriating some money, and we should secure a proper staff and get proper direction, and really go to the bottom of the matter. But to undertake to adopt this project on a self-liquidating basis in the confusion which exists regarding the fundamental figures at this time is not wise.

In spite of the hopes of the proponents, we always come back to the 1941 Commerce Survey. We always come back to that figure of 10,000,000 additional American tonnage per year from which will have to come the money to meet the annual $17,000,000 charges set forth in the majority report.

As stated before, the 1941 survey estimates—with which General Wheeler did not differ—shows that we are 4,000,000 tons short of the necessary annual income to meet expenses, assuming that all these tolls go to the United States and assuming the ridiculous fact that the $1.25 maximum toll would be charged on all this new tonnage. We certainly cannot lightly assume that any of the present toll-free 9,000,000 tons of combined United States-Canadian traffic will be diverted to toll-paying vessels. We must reasonably expect that the new traffic will have to bear the brunt of the tolls.

Suppose only half of this new American traffic pays the $1.25 maximum toll and the remainder pays from $1 to 50 cents or 25 cents? The initial shortage of 4,000,000 tons jumps up considerably. In this connection, let me refer again to that part of section 3 (a) of Senate Joint Resolution 111, which states in part:

> Tolls shall vary according to the character of the cargo.

And that they may not—

> Exceed the equivalent of $1.25 per short ton of laden cargo and may be less.

I am giving the utter maximum.

Let me refer to that part of section 3 (a) which states that "the total charges shall be fair and equitable and shall give due consideration to encouragement of increased utilization of the navigation facilities." Let me remind Senators that it is necessary for the Federal Government now to subsidize most of our domestic shipping in order to permit it to meet the lower costs of foreign competition. I ask Senators to keep these matters in mind and ask themselves: How much of this new tonnage will pay the maximum $1.25 toll and how much will be able to bear only nominal tolls?

Look at the table on page 20 of the majority report and note that it is anticipated that only about 20 percent of the expected traffic will bear the $1.25 maximum toll, while the remaining 80 percent will pay from 25 to 50 cents. On the basis of 10,000,000 additional new American tonnage, we can quickly figure out that the revenue from 8,000,000 tons at 25 cents would be only $2,000,000 and the revenue from 2,000,000 tons at $1.25 would yield $2,500,000 for a total of $4,500,000—somewhat short of the needed $17,000,000 income a year. Small wonder that the 1941 St. Lawrence survey estimates are not popular with the proponents of the seaway. Small wonder that they must have inflated figures or nothing at all to justify what they are doing.

Now, Mr. President, I come back to the original cost estimate. In order to prevent this discussion from becoming any more confused than is absolutely unavoidable, I have accepted the majority's figure of $491,609,000 as the total American cost to complete the navigation and power projects. They indicate in their report that they think this figure may be too high. On the contrary, there is every indication based on the evidence of other similar projects, that this figure is far too low. In the construction of the Panama Canal, for example, the actual cost exceeded by 250 percent the original estimate. Of course, there was a change of plans in the Panama Canal, but we have no guaranty that the St. Lawrence seaway will not be subject to a similar change. To mention other examples: The amount of increase over estimated costs in the construction of the Bonneville Dam was about 50 percent. In construction of the Grand Coulee Dam the increase of actual over estimated was about 30 percent. In the case of the Hoover Dam there was almost a 100-percent increase. In the case of the Welland Canal there was a tremendous increase in the actual cost over the estimated cost—some 300 percent—and similar large increases occurred in the case of the Chicago Drainage Canal and the New York State Barge Canal. These figures appear on page 22 of the minority report and I think that they are interesting and significant in this connection. Today's high prices, together with the uncertainties inherent in a project of this nature, certainly cannot lead us to the conclusion that the estimated costs will be lower than those originally submitted. The lessons of experience point in quite the other direction.

Indeed, if the St. Lawrence follows the familiar pattern which has been seen in other similar projects, it may well be that the amount to be liquidated every year by collection of tolls from cargoes passing through the seaway might rise as high as $50,000,000 annually.

No discussion of the cost of this project would be complete without emphasizing one of the most glaring omissions of which the proponents of the seaway have been guilty. This is their total failure to recognize as an essential element in the St. Lawrence project the deepening of harbors on the Great Lakes. It certainly seems elementary to me that adequate harbor and docking facilities in the Great Lakes area constitute an absolutely necessary link in the chain.

Let us look at the facts. Remember what I said earlier concerning the draft of vessels which could use the 27-foot channel. The latest statistical information, which is based on the annual report of the Chief of Engineers of the United States Army in 1944, discloses that there is no access channel to the outer docks on any Great Lakes harbor with a

depth of 27 feet. Three harbors do have a basin depth of 26 feet. Five harbors have a basin depth exceeding 21 feet, 13 exceed 19 feet. None of the present connecting channels on the Great Lakes have a 27-foot draft.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I yield.

Mr. WILEY. What is the date of that report?

Mr. LODGE. It is the 1944 report of the Chief of Engineers. I checked it yesterday afternoon by telephone.

Nowhere in the majority report will there be found a discussion of this all-important point. If it is not fundamental to this whole contemplation, I cannot imagine what is. It certainly does not seem to be of much use to have a 27-foot channel through the St. Lawrence part of the seaway and then to neglect wholly the terminal points to which this seaway presumably leads. Somebody is going to have to pay for these improvements, and I do not think it is a $64 question as to who is expected to foot the bill. Obviously it will be Uncle Sam. Therefore, to the cost of the project as indicated by the proponents there must be added the amount of Federal funds which will be required to make the harbors usable for these great fleets of ocean-going vessels which are supposedly going to steam up and down the St. Lawrence River.

The remarkable part of this aspect of the problem is that there is no authoritative figure whatsoever telling us how much this will cost. Some years ago the Brookings Insitution put the estimate in the neighborhood of one hundred and seventy-five million. I believe that there have been estimates running as high as two hundred and fifty million. I am not aware of any recent estimate on this point adjusted to present-day prices and costs. I have, consequently, no way of knowing what even a reasonably accurate estimate would be. It is probably in the neighborhood of two hundred million—which is almost 50 percent of the total cost of the St. Lawrence navigation and power projects contemplated in Senate Joint Resolution 111. Because I have no way of knowing what the figure is, I have not included it in the calculations which yield the annual 20,000,000 figure to be liquidated by tolls. But certainly, this figure would have to be included either in the annual amount to be liquidated by tolls or in a straight appropriation not to be liquidated at all. No matter how we look at it, it is part and parcel of the picture. If it is to be a straight appropriation, then the proponents of the seaway are being less than frank in emphasizing the self-liquidating feature of the project. If it is contemplated that this figure is to be included in the amount to be liquidated, there does not seem to be anything in Senate Joint Resolution 111 which would authorize such procedure.

If we include the cost of deepening the Great Lakes harbors in the total cost of the St. Lawrence seaway project, then the grand total could well run close to $1,000,000,000—including both navigation and power projects, on both the Canadian and American sides.

We are confronted with an expenditure of $6,800,000,000 for European recovery under the Marshall plan; and we are asked to undertake this added commitment, which, if we add the cost of deepening the harbors and the connecting channels on both the Canadian and American sides, may conceivably run as high as $1,000,000,000. To repeat, if we do include the cost of deepening the Great Lakes harbors in the total cost of the St. Lawrence seaway project, the grand total could well reach the sum of $1,000,000,000, including both navigation and power projects on both the Canadian and American sides.

Let any Senator ask himself if this investment of money is justified, when we stop to consider that at the present time we have projects for flood control and for improvements on our rivers and harbors for which $3,250,000,000 have been authorized by Congress, but for which no funds have ever been appropriated. As far as I know, there are no flood-control problems along the St. Lawrence and the Great Lakes, but I need hardly point out that this is a very real and pressing problem, indeed, in the valleys of some of our own great rivers. In view of the fact that there is no estimate of the cost of the St. Lawrence seaway project included in this year's budget estimates, I ask how this unnecessary and substantial item is going to affect these unappropriated rivers and harbors projects and flood-control programs. How will it affect tax reduction?

To return for a moment to this very important question of the failure to include the deepening of our Great Lakes harbors in order to match the draft of the St. Lawrence 27-foot channel, when this very question was raised during the course of the address of the Senator from Wisconsin on Monday, the following answer was given, and I quote from page 530 of the January 26 CONGRESSIONAL RECORD:

> Mr. WILEY. First, I want to put in the RECORD the answer to the claim that the harbors will have to be dredged. I merely wish to call the attention of the Senate to the fact, at this time, as a preliminary to answering the question, that some of the greatest harbors in the world do not qualify to accommodate ships with oceangoing draft. Of the ports with less than 27-foot draft, I may cite the following:

	Feet
Stettin, Germany	26
Seville, Spain	18–21
Vera Cruz, Mexico	27
Bangkok, Siam	14
Nassau, Bermuda	24
Canton, China	16
Guayaquil, Ecuador	26
Hypong, Indochina	21
Rosario, Argentina	22
Basra, Iraq	27

> I shall try to provide answers to the questions, though I realize that one is supposed to know a great deal about this subject that I do not know. If one looks at the map of the Great Lakes hanging on the wall here, he realizes that through this one little port at the Soo pass 120,000,000 tons downtraffic practically in one season of 7 months, and he gets an idea of the commerce on the Lakes. I, who have been living close to the Lakes, though I live in the western part of Wisconsin, have seen man's ingenuity in developing boats to such an extent that, whereas formerly the boats had a capacity of 1,000 to 2,000 bushels of wheat, the shippers will now transport in the boats 10,000 tons. The development in the building of boats is such that all the bug-a-boo as to what can be done will, I think, disappear in the mist, when it is realized that here is an area served by the St. Lawrence canal, with 50,000,000 souls, who are doing more business in tonnage than is handled in three-fourths of all the ports of the Pacific and Atlantic together.

That does not seem to me really to meet the issue, because in citing the harbors of the world which are less than 27 feet in depth he mentioned Nassau, Bermuda. Nassau is on another island altogether. The harbor in Bermuda is Hamilton. The fact that that harbor is 23 feet in depth will not be of great comfort to our shippers who have occasion to go into our Great Lakes harbors which are much more important, much bigger, and have a greater interest to serve. That is the only answer we have so far on this all-important question.

I submit again that until we have some definite information on what work will have to be done to deepen the access channels to the outer docks of the chief Great Lakes harbors, and until we have some reasonably accurate idea of the cost, the record is fatally defective.

There has been much talk—and I suppose there will continue to be—of traffic estimates and figures and other speculative data quickly brought forward to support the claims of the proponents for the necessary tonnage over the seaway. For a while, may I suggest that we hear not from Government experts, not from people versed in figure-juggling, but from the men who may be presumed to know about as much about shipping and tonnages as any group in this country. I refer to the heads of our important shipping lines. The proponents choose to ignore what is certainly the most significant piece of evidence bearing on the question of expected new tonnage for the St. Lawrence seaway.

On May 8, 1947, the senior Senator from Louisiana [Mr. OVERTON] placed in the RECORD letters from various shipping companies. In placing these letters before the Senate, the Senator from Louisiana said:

> He (referring to the late Senator Bailey) addressed a letter to each of the American flag steamship lines operating from Atlantic and Gulf ports and on the Great Lakes asking the various steamship lines whether they expected to utilize the seaway if constructed, and to what extent, and requesting their views generally on the subject matter of the proposed treaty.

I should like to point out at this point how the Senator from Louisiana very pointedly refers to the so-called executive agreement as a treaty. Continuing with the Senator's remarks:

> He received replies from practically all the steamship companies to which he addressed letters. He addressed them to the American lines operating along the eastern seaboard and the Gulf coast and to quite a number of steamship companies operating on the Great Lakes.
>
> He received 32 replies. He was anxious prior to his death that these replies be laid before the United States Senate. That task has been assigned to me. I regard it as a very solemn obligation. I am proposing now to discharge the duty which I owe to the late Senator Bailey.

I now ask unanimous consent that the remarks of the Senator from Louisiana, together with the 32 replies, be inserted in the RECORD at the end of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit A.)

Mr. LODGE. Mr. President, let me just read a few extracts—I might add, a few typical extracts—from these letters.

Here is what Seas Shipping Co., Inc., of New York, had to say:

At this time we have no plans to navigate the St. Lawrence with any of our vessels. The vessels which we own and will operate in commercial service are all large and could not safely navigate the proposed 27-foot channel when fully laden. This condition is true of a very great majority of commercial vessels under the American flag today.

The Colonial Navigation Co. had this to say:

It would appear that the 27-foot depth of the channel would not be sufficient and, further, that because of the fact that for a large portion of the year the waterway will be closed because of ice conditions, it would not seem to warrant the large expenditure of money necessary to carry the project to completion. The shallow draft, plus the very great cost, should be sufficient to dispose of the project unfavorably.

The American Petroleum Transport Corp. has this to say:

It is my firm belief that this seaway would be of very little benefit, if any, to American steamship owners, and I see no possibility of the St. Lawrence seaway being used by our ships.

Cargo Carriers, Inc., of Minneapolis, Minn., wrote Senator Bailey:

We have no plans for the use of this seaway. Inasmuch as the plans for the proposed seaway appear to provide a channel of no more than 27 feet, we cannot conceive of these newer, better, and more economical ocean ships going into the Great Lakes with cargoes or to get cargoes. It is our belief that should the seaway be completed, it would be found that very few large ships, and therefore comparatively small amount of freight, would make the trip direct between our Great Lakes ports and foreign countries.

The Moore-McCormack Lines, Inc., of New York City, declared:

As ship operators, we are opposed to construction of this proposed St. Lawrence seaway, while we do not believe that construction of such a seaway would be to our interest or to the interest of the country. No plans have been made by the company to utilize the St. Lawrence seaway.

The Eastern Steamship Lines, Inc., of Boston, stated:

From the standpoint of the seaway operation, I see nothing whatever in it for a company in the domestic steamship service. I believe that anyone familiar with present-day steamship costs and rates, and land transportation rates, must necessarily reach this unequivocable conclusion. Any studies that I know of that have been made in the past in this connection must now be thrown into the waste basket, as steamship operating costs are so much higher than they were. It must be borne in mind that a preponderant majority of American ships in the enormous fleet which has been built and is now available for ocean operations consists of large vessels which could not sail the seaway with more than about 60 percent of their carrying capacity in tons of cargo.

The Marine Transportation Lines, Inc., New York, had this comment to make:

After careful examination into the possibilities of use of the improved waterway facilities projected and after considering the information gathered as to present and prospective traffic, we arrived at the conclusion that so far as transportation is concerned the expense for the seaway project would be unwarranted. We accordingly felt that there was no justification insofar as our company is concerned for extending our operations into the Great Lakes area via the St. Lawrence other than in small ships which from time to time have been suitable for such trade under existing conditions.

From the Alcoa Steamship Co., of New York, this reply was received:

We have no plans for using the proposed seaway. We doubt very much whether the project can be considered an economic one.

The President of the Grace Line, Inc., wrote Senator Bailey, in part, as follows:

The Grace Line has nearly completed a construction program of 18 new vessels, not one of which could safely navigate the proposed seaway without leaving unfilled some 15 to 20 percent of their cargo capacity. Your familiarity with shipping matters will enable you to understand without further explanation that no vessel can compete in international trade unless it is able to take advantage of its size and capacity. It is conceivable that there might be some economies for shippers from the Great Lakes area to northern Furope by the use of the proposed St. Lawrence waterway, but it is our considered judgment and that of the entire shipping industry that such economies would be the aggregate, be insignificant as compared with the cost of the construction, maintenance, and operation of the proposed seaway.

The Calmar Steamship Corp., of New York, wrote:

We have no plans to navigate the St. Lawrence seaway with our own vessels and are unalterably opposed to the proposed St. Lawrence seaway. It is in our opinion economically unsound and highly detrimental to the best interests of the American Merchant Marine.

From the Pan American Petroleum Transport Co., of New York, came this statement:

From an oil-tanker angle, it would be rather difficult for any company to utilize the seaway as at present outlined. As you are aware, the T-2 and T-3 tankers built by the United States Government will make these tankers practically the standard for the carriage of oil on ocean waterways for large numbers of years to come. The proposed channel for the seaway being limited to 27 feet would absolutely eliminate the use of the T-2 or T-3 type of tanker.

This is of interest now, in view of the suffering of people on the eastern seaboard by reason of lack of oil.

The president of the Mississippi Shipping Co., Inc., of New Orleans, wrote:

The St. Lawrence seaway would offer no inducement to us.

The American-South African Line, Inc., stated:

I have given this subject detailed study and consideration and have reached the conclusion that whether or not such a project is completed it is not economically feasible for American-South African Line to use it. * * * this area is noted for the frequent occurrence of fog and mist. If one of our ships were caught in a narrow stretch of this canal, in a fog or mist, it is considered the ship would be in extreme danger, and the danger would be greatly aggravated by the possibility of the current of the river swinging the vessel onto the rocks. I do not believe that a conscientious steamship operator is justified in jeopardizing a large ocean-going vessel by sending her on such a voyage, with its attending risks of loss of life, cargo, and vessel. These added risks would contribute substantially to an increase in insurance rates. This, too, would be reflected in increased rates to the shipper. I do not believe that the St. Lawrence seaway would be attractive to the vast majority of American ship operators.

Mr. J. J. Kelleher, president of United Fruit Co., wrote Senator Bailey:

It appears that the proposed 27-foot channel would preclude something over 90 percent of the American merchant marine, a good part of which was constructed during the war period, and over 80 percent of the world's tonnage, from using the seaway. Even if the seaway project should become a reality in the future, it is most unlikely that this company's vessels would ever make any use of it.

The Strachan Shipping Co., of Savannah, Ga., said:

We have no plans to navigate the St. Lawrence seaway with our ships and it does not appear to me that this trade route will prove very attractive to American shipping operators.

The Plant Shipping Co., of New Orleans, wrote:

From the standpoint of risks and increased costs of insurance, the seaway would not be attractive to ship operators. I have no plans to use the St. Lawrence seaway at all and as far as I am concerned, I earnestly hope that it will never materialize.

The Wilson Line, of Philadelphia, Pa., said:

The Wilson Line is not interested in operating steamboats on the Great Lakes or through the proposed new lock and channel.

The Stokard Steamship Corp., of New York, said:

Purely from the point of view of a shipping facility the seaway is absolutely unsound. We have no plans to navigate the St. Lawrence seaway and sincerely hope that the taxpayers' money will not be wasted on this venture.

From the Barbor Steamship Lines, Inc., of New York, came this reply:

I consider the project unsound economically and of no practical value commercially, and to specifically answer your question my company has no plans to navigate the St. Lawrence seaway.

The United Fruit Co., of Boston, Mass., stated, through Mr. William Jackson, vice president:

This company does not plan to navigate the St. Lawrence seaway.

The Lykes Brothers Steamship Co., Inc., of New Orleans, said:

We have no plans to send our ships into the Great Lakes.

The Chicago, Duluth, & Georgian Bay Transit Co., of Detroit, Mich., wrote:

The proposed seaway would have no direct benefits insofar as our operation as presently set up is concerned.

It is only fair to state that among these letters one reply was favorable, the

reply received from the Tomlinson Fleet, of Bay City, Mich., which said:

The development of the St. Lawrence seaway would be a wonderful thing for America and particularly for the fifty-odd millions of people residing in the middle section of the United States.

The writer does not advance any reasons why he believes it to be a wonderful thing for America, except for the fact that he was associated with an early commission which recommended construction of the seaway.

From the late James Thayer McMillan, long-time president of the Detroit & Cleveland Navigation Co., of Detroit, Mich., came the reply:

So far as the Detroit & Cleveland Navigation Co. is concerned, we would have no use for the St. Lawrence waterway.

The Pioneer Steamship Co., of Cleveland, Ohio, brought out some interesting points:

Typical oceangoing cargo ships are not equipped to navigate locks. Great Lakes vessels are equipped with mooring engines and chocks of special type passage through the locks. Ocean ships have smaller rudders than Great Lakes ships and are not designed for navigating canals and narrow channels with swift and changing currents. Great Lakes ships are not designed or suitable for ocean navigation nor could they be loaded or unloaded expeditiously in ocean ports. Loading and unloading machinery in Great Lakes ports is highly specialized and the design of the ships is such that they are coordinated with the dock machinery. To our knowledge there are not now in existence ships which embody both Great Lakes and ocean characteristics. While such a ship might be designed, it could not be operated as economically as the vessels built for the special service in one or the other trade. Because of the navigation hazards of the St. Lawrence River, it would be uneconomical to operate large ships between Great Lakes and ocean ports. We have no plans for navigating the St. Lawrence seaway. The passage is more hazardous than the routes of our present traffic.

The Interlake Steamship Co., of Cleveland, Ohio, said:

We have no plans for future navigation of the St. Lawrence seaway should it materialize.

In closing this enumeration, I wish to refer to a letter from Mr. Basil Harris, president of United States Lines, Inc., of New York City, whom some Members of the Senate know. He says:

Speaking out of my long experience as a steamship operator, I must say that the seaway would be too shallow. Our Maritime Commission insists that owners and operators shall sail their ships full and down.

This is the answer to proponents of the seaway who are already arguing that ships using the seaway take aboard smaller loads to keep within the 24-foot draft. Another reason why the project is unfeasible is that for about 5 months of each year it would be closed by winter. In addition, the canalized section at many points would be dangerous. Navigation would menace each other when passing, and the rocky shores of the canalized area would mean sinking and in many instances total losses in case of collision. Then, too, fogs are prevalent and there would be few spots where the channel is narrow for ships to anchor with safety. All in all, from the point of view of feasibility, the proposal to spend hundreds of millions to provide this seaway is a fantastic one. * * * Concluding your letter, you ask me to say: (1) Whether the seaway as proposed would provide a saving to shippers and would prove attractive to shipowners; (2) whether our company, the United States Lines, plans to navigate the seaway. The answer to these questions is a blunt "No." Need I add that I am irrevocably opposed to the construction of this project?

Mr. President, I think these letters are most revealing and most significant, and I do not wonder that the proponents of the St. Lawrence seaway project simply choose to ignore them. When this point was raised on Monday, the Senator from Wisconsin dismissed it with the remark, "That is one of the arguments that is used continually."

But, Mr. President, I submit that these letters cannot be ignored. They constitute the considered and informed opinion of men whose life work has been in this field of ocean and lake shipping. These men head companies which would, presumably, have the greatest interest in supporting any means of transportation which would be economical and feasible, and which would open up new areas of operations. These men know the problem from top to bottom. They come from the Gulf coast, the Atlantic coast, and the Great Lakes. They are no visionaries; they are hard-headed businessmen who must look at these things realistically; and, with the exception of one, they all reject the seaway.

Now let us go back and take a look at the figures which the Secretary of Commerce submitted as a very rough estimate—those were his words—and upon which the majority base their entire conclusion that the seaway could be made to pay its way through the imposition of tolls. It should be emphasized that all of these replies to Senator Bailey's inquiry were written before the toll-paying feature had been introduced. The record of this year's hearings show that this new feature was not greeted with any enthusiasm by these shipping men, and there is no likelihood that this has changed their minds at all about the economic feasibility of the St. Lawrence seaway.

It will be recalled that Secretary of the Army Royall, when testifying before the subcommittee, said that the seaway would be helpful to the national defense "if found economical." Those were his words. I submit that all the reasonable evidence we have indicates that the seaway would not be economical at all.

I say that the time has come when we must put an end to "very rough estimates"—to use once again the words of the Secretary of Commerce—and to basing decisions of this importance on guesses and tailor-made figures. Let us put away the crystal ball and if necessary put some authoritative independent Government agency to work studying this thing in the light of present-day conditions and the present-day world situation. Let us get the questions answered. I suppose the proponents of the seaway will come back with the stock answer: "Well, we just can't wait any longer on this thing; we've been waiting a long, long time." Of course, the St. Lawrence project has been around for quite a long time, but we should also remember it has been rejected twice. Yet it always comes back for more, and every time it comes back the figures get hazier, the expectations grow larger, and the wonderful benefits flowing from this iceway—I submit that is the better term, rather than seaway—seem more glowing and hopeful than ever. We always seem to be in too great a hurry to get the truth. I, for one, cannot cast my vote in favor of an economic project based on "very rough estimates."

Let us remember, too, that the self-liquidation feature was new in 1947, when it was the subject of only 6 days of hearings before the subcommittee.

Mr. President, that concludes my remarks on the self-liquidation feature, and I pause now for questions, if there are any to be asked. My next remarks will relate to the national defense aspects of the proposal.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I yield with pleasure to my able friend the Senator from Wisconsin.

Mr. WILEY. I wish to know whether the Senator from Massachusetts is acquainted with testimony appearing on page 970 of the 1946 hearings, where it is said that it was authoritatively estimated that, based upon 1941 costs, the cost of providing entrance and access channels to the outer docks of nine of the principal harbors on the Great Lakes would be $9,000,000. I have asked the engineers to bring that cost down to date, and they say now that it would be $14,000,000.

In that connection, I should like to ask whether the Senator is acquainted with the undisputed testimony, given by Mr. Hoan, that the cities of Chicago; Gary, Ind.; Milwaukee, Wis.; and Muskegon, Mich., have already built commercial ports far out into the lake, where the channels are in excess of 30 feet. I also point out the following further testimony:

I defy the opposition to find one single city that will not readily finance whatever additional piers, warehouses, or docks that may be needed to accommodate greater draft vessels.

Is the Senator acquainted with that testimony; and is there any dispute of it?

Mr. LODGE. My statements regarding the inadequacy of the ports on the Great Lakes come from the Army engineers, and I confirmed them over the telephone yesterday.

Mr. WILEY. I may say that the Army Engineers gave the figure I have just referred to with respect to bringing the $9,000,000 figure down to date.

I ask the Senator from Massachusetts whether the harbors throughout the eastern coast and western coast of this country have been improved by the Army engineers.

Mr. LODGE. Are these costs included in the project?

Mr. WILEY. No, for the simple reason——

Mr. LODGE. They are not included in the amount to be liquidated by the tolls?

Mr. WILEY. No, because——

Mr. LODGE. Let me ask why they are not included.

Mr. WILEY. Because of the undisputed testimony, to which no one took

exception, that there is not a city on the Great Lakes that will not finance any expense that is necessary to provide the harbors about which the Senator has spoken. I am ready to quote——

Mr. LODGE. Mr. President, before the Senator goes on to his next point, let me say that both he and I have been in public office a little while, and we know that people often say one thing in advance; but when every other harbor in the United States is being dredged and built up with Federal funds, I simply cannot believe that the harbors on the Great Lakes will not come to Uncle Sam for help. I think that cost should be included in the amount to be liquidated by the payment of tolls. The Senator from Wisconsin frankly and honestly says it is not included.

Mr. WILEY. I call the Senator's attention to the mistake he made when he said that there are not any harbors of sufficient size there. I call attention again to the fact that Chicago; Gary, Ind.; Milwaukee, Wis.; and Muskegon, Mich., have already built commercial ports far out into the lake where the channels are in excess of 30 feet. I wish to know whether the Senator is acquainted with the Maritime Commission figures of 1946, provided by Edward Macauley, showing that as of September 30, 1945, there were 763 United States vessels within the 25-foot range; 1,173 United States vessels within the 27-foot range, having an aggregate tonnage of 3,490,770 and 6,232,356, respectively. Also, if there are added to those figures the figures for Liberty ships and Victory ships, which have drafts of 27 feet 9¼ inches and 28 feet 6¾ inches, respectively, the number reaches 3,997, with an aggregate tonnage of 26,671,935.

Mr. LODGE. My figures from the Maritime Commission are that 91 percent of American ships draw too much water for this proposed seaway.

Mr. WILEY. The figures the Senator from Massachusetts has given are based upon the fact——

Mr. LODGE. They are Maritime Commission figures.

Mr. WILEY. Yes; and they are based upon the fact that if the maximum draft of those vessels were fully utilized they could not clear the locks of the seaway.

Mr. LODGE. That is correct.

Mr. WILEY. Does the Senator have the figures as to the number of vessels going through the Panama Canal which are only 75 percent filled?

Mr. LODGE. Not very many of them are.

Mr. WILEY. There is a tremendous number of such vessels.

Mr. LODGE. No. I had information as to that yesterday.

Mr. WILEY. I shall give the figure in just a moment.

Mr. LODGE. No; the Maritime Commission wants all ships to be operated at what it calls "full and down." And according to the Maritime Commission, 91 percent of American ships would draw too much water for this seaway.

Mr. WILEY. If loaded, according to the Senator's figures, 100 percent. That is what the Senator means.

Mr. LODGE. But shipowners will not use their ships uneconomically. When they have a ship, they will fill it to capacity.

Mr. WILEY. But let me call attention to the fact that the ships which can sail through the present locks have to transfer their freight to smaller ships going down to Montreal, and there the cargoes are reloaded. If the tonnage which can be carried from the Lakes to Montreal is increased by means of the seaway, so that reloading is not necessary, ships of greater draft will be used; and when they reach Montreal, eastbound, they will be loaded with full supplies of fuel and water for the voyage across the Atlantic, thus increasing their draft to 27 feet. That is the way they will be navigated.

Mr. LODGE. That might be done, of course.

Mr. WILEY. Such ships when making the westward trip across the Atlantic and carrying full cargoes of freight would intentionally almost exhaust their supplies of water and fuel before reaching the locks, and then they would go through the locks. Having passed through the locks, they then could take on the supplies of fuel and water necessary for the remainder of the voyage—on the Lakes. In the meantime they would have carried their full cargoes of freight.

When the Senator talks about the draft of a ship, as was referred to the other day, he is talking about the draft that ship has when she is fully loaded down in the water, carrying her maximum cargo and full water and fuel tanks. However, when she has less than full supplies of water and fuel, her draft will be less than 27 feet. On the other hand, as I suggested the other day, if the ship were fully loaded with automobiles or any other cargo which does not bring her down to her maximum draft of 27 feet when fully loaded—as contrasted with her maximum draft when loaded with ore—her holds could be completely filled, and yet she would have a draft of less than 27 feet, even when her water and fuel tanks were full.

Mr. LODGE. I think the Senator from Wisconsin makes a very appealing contention; but the shipping men who are in this business professionally and for their livelihood do not agree with him. They say that it is not economical to operate a ship otherwise than full, and also that the seaway would be frozen up, or would have little traffic on it, for 5 months of the year.

Mr. WILEY. Who says that?

Mr. LODGE. The shipping men whose names I have just read. I do not want to read them all over again.

Mr. WILEY. No, I say, who said that?

Mr. LODGE. Most of these ship operators.

Mr. WILEY. Very well. Now, let me quote the United States Maritime Commission on that.

Mr. LODGE. They are not operators.

Mr. WILEY. From a letter just received, I quote:

> There is, however, one more element of great importance to be considered in connection with the St. Lawrence River project. The 27-foot channel from the head of the Lakes to Montreal will not limit its use to ships of 27-foot draft or less. On the contrary, ships loaded on the Lakes of maximum draft suited for passage through the channel may, and customarily would, defer bunkering until arriving at Montreal. Bunkering at Montreal for the round-trip passage to Europe or elsewhere would be the normal economical procedure. Practically all of our depth vessels would carry capacity loads to and from the Great Lakes.

That is signed by W. W. Smith, Chairman of the United States Maritime Commission.

Mr. LODGE. To ships of what size does that refer?

Mr. WILEY. He does not specify any ship.

Mr. LODGE. He does not say?

Mr. WILEY. But he does say that any ship having a draft of 27 feet or more could navigate the 27-foot channel by following this process.

Mr. LODGE. The Senator asked me earlier where I got my figures regarding depths of the harbors in the Great Lakes. I have found the statement. It is from the Chief of Engineers of the United States Army. I verified it over the telephone yesterday afternoon. The statement is:

> There is no access channel to the outer docks of any Great Lakes harbor with a depth of 27 feet.

Then, I am advised that 3 harbors have a basin depth of 26 feet, 5 harbors have a basin depth exceeding 21 feet, 13 exceed 19 feet. None of the present connective channels on the Great Lakes have a 27-foot draft.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I yield.

Mr. WILEY. I want to show the Senator again how wrong he was in his statement about the Panama Canal. This comes from Edward Macauley, Acting Chairman of the United States Maritime Commission:

> Of ships greater than 27-foot draft, the Victories and the Liberties are of special interest. Victories can go through the canal loaded to 79 percent, and the Liberties to 85 percent of their total dead weight capacity.
>
> The preponderance of vessels transiting the Panama Canal normally have been composed of vessels loaded only to two-thirds of capacity.

Mr. LODGE. Does the Senator know why that is?

Mr. WILEY. I am telling the Senator. That is not what the question was, before. The question was what took place, and the Senator stated that what I said then was not correct.

Mr. LODGE. Oh, no, I did not. What did I say?

Mr. WILEY. I am giving the Senator the testimony.

Mr. LODGE. Oh, no, I did not say that. Wait a moment. I did not say that.

Mr. WILEY. What did the Senator say? I am happy to have him correct himself.

Mr. LODGE. No, I do not need to correct myself yet. When I need to, I certainly shall. There is nobody that I would rather have correct me than the Senator from Wisconsin, because I am so fond of him, but he has not been able to do it.

My statement is that the St. Lawrence seaway is too shallow for about 91 percent of the American ocean-going vessels, and that if a ship goes through the

Panama Canal not completely loaded, it is not because the Panama Canal is too shallow; it is simply because they did not get the business, that is all.

Mr. WILEY. Then the Senator would agree with me that "the preponderance of vessels transiting the Panama Canal normally have been composed of vessels loaded only to two-thirds of capacity"?

Mr. LODGE. That word "normally" is a regular, all-Potomac-fever bureaucratic word. What year is the Senator talking about?

Mr. WILEY. Then will the Senator agree with me in the statement I just read in the RECORD, that vessels with a draft of more than 27 feet could traverse the whole of the St. Lawrence system? Following the practice stated by the Commission, the ships would take on water and fuel at Montreal and they would then traverse the thousand miles to the sea.

Mr. LODGE. I would agree with the Senator that a ship that draws less than 27 feet can go through the St. Lawrence seaway and can go through the Panama Canal. I will say that a ship that draws more than 27 feet cannot get through the St. Lawrence seaway, but can go through the Panama Canal.

Mr. WILEY. Does the Senator mean ships that are loaded 100 percent?

Mr. LODGE. Why, of course. One does not want to make a thing that is not going to be used.

Mr. WILEY. But here is evidence that the preponderance of vessels transiting the Panama Canal are loaded to only two-thirds capacity.

Mr. LODGE. But it is not said when. The statement just says "normally," one of these regular old "gobbledegook" bureaucracy words. "Normally," when do they do that? They would do it when business is slack and the shipping companies cannot get full loads. That is why they do it. They do not go through the Panama Canal unloaded merely because the Panama Canal will not take the business; of course that is not the reason. I do not want the Senator to give people the false impression that this projected seaway is to be anything like the Panama Canal. Another thing, there is never any ice in the Panama Canal, says the Senator from Wisconsin [Mr. WILEY]. That is another point to remember. The Panama Canal is never frozen up tight, so far as traffic is concerned, for 5 months of the year.

Mr. WILEY. Will the Senator yield?

Mr. LODGE. I yield.

Mr. WILEY. Now that the Senator speaks about ice, I want to tell him that in the winter we of the Northwest do not hesitate to take railroad cars on car ferries right across Lake Michigan, running to Milwaukee and to another port indicated on the map, right across the lake.

I want to comment further about the transportation.

Mr. LODGE. Just a minute. Mr. President, I thought I heard the Senator admit Monday that this seaway was going to be frozen up for 5 months in the year. I was going to say 4½, but the Senator, with unaccustomed generosity, said 5 months of the year.

Mr. WILEY. I am glad the Senator concedes to me a little generosity.

Mr. LODGE. I do not mean unaccustomed generosity on his part.

Mr. WILEY. I want to say that seasonality of navigation is no handicap to extensive commercial utilization of the seaway. The St. Mary's Canal at Sault Ste. Marie, Mich., connecting Lakes Superior, Huron, and Michigan, is also icebound for 4 months of the year. Yet it can hardly be said that this canal is uneconomic when the tonnage moving through it during an 8-month season exceeds the combined tonnage of the Panama and Suez Canals during the 12-month season. The Great Lakes, which are also closed for the same period, carry two-thirds as much traffic in 8 months as all the United States Atlantic, Gulf, and Pacific coast ports combined. The navigation season on the St. Lawrence River is roughly the same as on the Lakes.

Mr. LODGE. But that traffic is not going up the St. Lawrence; that is coming from the lake ports.

Mr. WILEY. Just a minute. Despite the limited season, the Port of Montreal, which lies on the St. Lawrence River, 1,000 miles inland from the Atlantic Ocean, is the second largest exporting port on the North American Continent, being exceeded only by New York.

When I start to tell about car ferries going across the lake, I just want to say to the Senator that the tonnage carried on the Lakes in 7 months far exceeds the combined tonnage handled in the Boston and New York Harbors in 12 months. That indicates the "guts" of the people of the Middle West. Then, in the middle of the winter, we do not let a little ice interrupt traffic. We move the freight on car ferries across the lake, allowing trainloads to be transported right through the ice. I say to the Senator that the business exists. If the people of the East want this project, we will keep it open to traffic. It will extend transportation on the Lakes at least from 30 to 60 days longer each year and we will show what the Middle West can do. If they are unwilling to cooperate, as I said the other day, millions of dollars will be spent in plants to take care of the low-grade ores in the Middle West. That is uneconomic. I shall of course seek to answer that argument in detail later on, but I just wanted to set right the few figures about which I thought the Senator was a little bit upset.

Mr. LODGE. No; I am not upset at all.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. LODGE. I will yield in just a moment.

Mr. WILEY. The Senator's source material is upset.

Mr. LODGE. No; the source material is correct. Let us just recapitulate. The statement that channels within the harbors on the Great Lakes are not deep enough comes from the Army engineers. Nothing has upset that. The statement that 91 percent of American ocean-going vessels draw too much water to permit transit through the projected seaway has not been upset. I agree that the Senator's figures are correct about the volume of business done on the Great Lakes, during the time when they are not frozen up, and I admit that during the time when the Lakes are frozen up, because of the great virility of the people up there, of which the Senator from Wisconsin speaks, they do a tremendous amount of business, but the fact remains that if the Senator wanted to bring some fuel oil up to his constituents during the winter, he would have to transport it in ice boats.

I now yield to the Senator from Vermont.

Mr. AIKEN. Mr. President, I assume that when the seaway is constructed there will be a considerable amount of business done between ports on the Great Lakes and ports in other parts of the world. It would obviously not be expected that ships would load and unload at the Great Lakes ports unless they could also load and unload at other ports of the world. Will the Senator from Massachusetts advise us how many ports of the world outside of the United States have a depth of 27 feet or more?

Mr. LODGE. No, I could not tell the Senator that.

Mr. AIKEN. I think if the Senator will investigate he will find that there is a very small number; that we have most of the ports of that depth, with a few conspicuous exceptions, such as Liverpool, and a few other great ports.

Mr. LODGE. Yes, but this area is so important, and it does such a tremendous business, as the Senator from Wisconsin has pointed out, that it is important to have harbors which are on a par with that at Liverpool, and similar ports.

Mr. AIKEN. It is important, and it would be gratifying, also, to have such ports.

Mr. LODGE. I think that ought to be figured into the liquidation cost, but it is not.

Mr. AIKEN. It probably would not be expected that the *Queen Mary* would want to dock at Manitowoc, Wis., or even at Buffalo, N. Y.

Mr. LODGE. No, but we would want the seaway open to at least 91 percent of the tonnage. Does not the Senator from Vermont think that the cost of the deepening of the harbors on the Great Lakes ought to be included in the amount of money to be liquidated? Will the Senator answer that question?

Mr. AIKEN. Does the Senator expect that the Federal Government will deepen all those harbors?

Mr. LODGE. I expect the Government will do for those harbors what it will do for other harbors in America.

Mr. AIKEN. Does the Senator recall that in 1941 Mr. Frank Davis, of Boston, testified before a House committee to the effect that the Federal Government had spent $50,000,000 in deepening and improving Boston Harbor?

Mr. LODGE. Exactly.

Mr. AIKEN. And therefore should not spend money in improving any other harbor to compete with Boston Harbor?

Mr. LODGE. I do not agree with that statement.

Mr. AIKEN. It is in the record. I will read it if the Senator desires that I do so.

Mr. LODGE. There are many things in the record with which I do not agree.

Mr. AIKEN. The Senator ought to agree with Mr. Davis.

Mr. LODGE. I am asking the Senator from Vermont a very simple question. Does he not think that the cost of improving these harbors should be counted in with the amount of money that is to be liquidated by the tolls?

Mr. AIKEN. Not if the harbors are to be improved by cities like Chicago and Cleveland. I have not heard those cities raise any question about that.

Mr. LODGE. Does the Senator think the Atlantic ports are the only ones that should receive Federal funds for the improvement of their harbors?

Mr. AIKEN. I think some of the funds for improving Atlantic ports have been misspent. When I see the decline of the shipping out of Boston Harbor I wonder if we were wise in putting so much money into improving Boston Harbor. When I see our shipments declining year after year and swinging over to the Pennsylvania Railroad terminal and other terminals in New York City I wonder if the money for improving Boston Harbor was wisely spent.

However, that consideration was not what caused me to rise. The Senator from Massachusetts said that 91 percent of our ships could not use the St. Lawrence Channel. Is that correct?

Mr. LODGE. I did not say that. It was the Maritime Commission which said that.

Mr. AIKEN. Did the Maritime Commission officials present such testimony before the committee?

Mr. LODGE. They said that 91 percent of the American ships draw more than 27 feet. They furnished this figure in the statement presented to the Library of Congress. I can produce it for the RECORD.

Mr. AIKEN. Did they include naval vessels, such as battleships and other warships?

Mr. LODGE. I am sure they did not.

Mr. AIKEN. Capt. Edward Macauley, Vice Chairman and Acting Chairman, United States Maritime Commission, testified before the subcommittee of the Committee on Foreign Relations of the Senate in 1946 as follows:

> A somewhat corresponding situation is revealed by an analysis of the United States Fleet of similar vessels. This shows that as of the same date there were 763 vessels within the 25-foot draft range and 1,173 vessels within the 27-foot range, having aggregate gross tonnages of 3,490,770 and 6,232,356, respectively. As in the case of the world fleet, the United States vessels consisted largely of freighters but with some tankers and combination passenger and cargo ships. If there are added Libertys and Victorys, which have drafts of 27 feet 9¼ inches and 28 feet 6¾ inches, respectively, the number reaches 3,997 and the tonnage, 26,671,935.

Mr. LODGE. In what year did the Senator say that statement was made?

Mr. AIKEN. Year before last, 1946. I do not think much of a change would have occurred between 1946 and 1947.

So, about two-thirds of the vessels are under the 27-foot draft. But the fact remains, if the Senator wants to bring the testimony up to date, that Secretary Marshall testified before the subcommittee last year, 1947—

> In other words, 80 percent—
>
> Referring to our shipping—
>
> 80 percent could use the waterway, and about 20 percent would be barred by the 25-foot channel.

I am sure the Senator misunderstood the Maritime Commission if they told him that 91 percent of all our ships were over the 27-foot draft.

Mr. LODGE. No; it is a question of whether it is thought to be a good thing to build a seaway that will be used by ships which are not filled, that is all. We can continue reading statements by the various agencies downtown until we are blue in the face, but the fact is that here are all these shipping men whose opinions were read, and it seems to me that their opinions should carry some weight. They say 91 percent of the ships will not use the seaway.

Mr. AIKEN. The testimony I was reading from the 1946 hearings was given by Edward Macauley, who at that time was Acting Chairman of the Maritime Commission. That was before Admiral Smith's testimony. The other testimony given last year was given by Gen. George Marshall.

As far as existing shipping lines not wanting competition is concerned, wanting to have all the export trade go through the terminals which they now own, that is a human feeling. They are simply responding to the urge of monopoly which exists in the breast of practically every human being. They do not want competition. But if we can save the wheat grower of the West 10 cents a bushel, if we can save the automobile manufacturer $15 a car, and so on, I think competition would be good for some of the shipping lines.

Mr. LODGE. I think competition is good for everybody. It never occurred to me that shipping lines would only send their ships to those places where they own terminals. I thought they would send their ships around to other ports. There are many shipping lines which send their ships to places where they do not own the terminals, where they rent them.

I am very sorry that the proponents of this matter are not willing to figure the cost of deepening some of these harbors and channels, and putting that cost into the total cost of the project, and adding those figures to the amount to be liquidated by the proposed tolls. I do not think that is being frank. The Senator from Vermont refuses to answer my question on that point, which it is his perfect right to do, but I want the record to show that that is not being frank with the Senate.

Mr. AIKEN. No; Mr. President, I will answer the Senator. Certainly the cost of deepening the Port of Chicago—the Port of Duluth will not need deepening, I believe—and deepening some other Lake ports should not be charged against the seaway, any more than the cost of improving Boston Harbor, which may be the other terminus of the run, should be charged against the seaway.

Mr. LODGE. The Senator from Wisconsin thinks some of it should be, I understood him to say to me. It seems to me that the Senator from Wisconsin and the Senator from Vermont do not quite agree on that point.

Mr. WILEY. On what point?

Mr. LODGE. On the point as to whether the deepening of the approach channels to the Great Lakes harbors and deepening the Great Lakes harbors should be included in the cost which is subject to liquidation by the tolls.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I yield.

Mr. WILEY. I will say that that matter was considered by the committee in this respect. The committee had before it the testimony—and no one raised the point until the Senator from Massachusetts raised it now—that the harbors themselves would take care of the expenses, which were figured at that time at some eight million dollars, but because of increased costs—and I have had the calculations made—the amount would now be $14,000,000.

I desire to ask the Senator from Massachusetts a question. I wonder if my colleague from Massachusetts has been struck by the amazing coincidence that the arguments raised against the St. Lawrence seaway project are similar, and in given cases virtually identical, to arguments which were raised at the turn of the twentieth century against the construction of the Panama Canal. The railroads were opposed to that artery, too. The shipping men were, in many instances, opposed. Many United States Senators were opposed. They, too, questioned whether the Panama Canal would be used at all or whether it would be a drain on the revenues of the country.

I ask my colleague, therefore, whether he has noted this amazing coincidence and similarity of arguments, and I ask him whether he is not impressed by the fact that within a few years all of the contentions of the Panama Canal opponents were smashed to smithereens, were irrevocably refuted and debunked by the actual use of that great artery of commerce?

Mr. LODGE. Mr. President, that is a very well written question. I have listened to its reading with a great deal of admiration. Of course, the Senator knows that the engineers are engaged now in changing the Panama Canal over—they want at least to change the Panama Canal over—to a sea-level canal.

Mr. AIKEN. When was that approved?

Mr. LODGE. That proposal was made some time ago. I am coming to that point in a moment.

Mr. AIKEN. The Senator said that they were changing it over from a lock canal to a sea-level canal.

Mr. WILEY. Mr. President, will the Senator yield to me for an inquiry?

Mr. LODGE. Wait a moment, I have the floor. Let us not all talk at once. If I said that they were changing the Panama Canal over to a sea-level canal, I misspoke, and I correct the statement. It has been officially suggested by the engineers, and a recommendation has been sent up by the President, that the

Panama Canal be changed over to a sea-level canal. That statement is in answer to the Senator's eloquent question. That is one difference between the St. Lawrence seaway and the other proposal, because I do not believe the Senator from Wisconsin, ingenious as he is, has figured out a way to make the St. Lawrence seaway a sea-level affair.

There are other differences between the St. Lawrence seaway and the Panama Canal. One is, as we have already developed, that the Panama Canal is deeper. Another is that there is never any ice in Panama. Those are some of the differences.

Mr. WILEY. There is plenty in Massachusetts.

Mr. LODGE. There is plenty in Massachusetts; but I am not asking anyone to construct a seaway through the heart of Massachusetts.

It was stated in the Senator's written question that at the time the Panama Canal was proposed there were Senators opposed to it and Senators in favor of it, and that therefore it is like this project, because there are Senators in favor of it and Senators opposed to it. To that extent there is a resemblance. In my opinion, that is about the only resemblance.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I yield.

Mr. WILEY. I invite the Senator's attention to a statement he made which I think needs a little elaboration. He made the argument that in view of the expense of this project this is no time to enter into such an undertaking. If this project were to be approved, its completion would require 6 years. The pending measure is merely an authorization. It is like many other authorization measures. I invite attention to the fact that some of our great economists say that within the next 5 years we shall have a recession. In my judgment it is a good thing to have projects ready, into which money can be put for really constructive purposes, rather than the many activities which were carried on under the old WPA. In spite of the brilliance of the Senator's argument, I think it is very clear that the opposition springs from a fear on the part of those interested in Boston harbor, and the others whom I mentioned yesterday. I happen to have in my hand the instrument showing that they want to move——

Mr. LODGE. Does this involve the argument that they want to move the steel industry to Boston?

Mr. WILEY. Yes.

Mr. LODGE. It is alleged that they want to move it to the East.

Mr. WILEY. Yes.

Mr. LODGE. That is what Al Smith would have called a "phonus balonus."

Mr. WILEY. Mr. President——

Mr. LODGE. Mr. President, I will not yield further, because I wish to answer that argument. I deeply regret that the Senator from Wisconsin should be so hard up for arguments that he has now resorted at last——

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I decline to yield. The Senator has now resorted to the sectional argument. A great part of his speech on Monday was occupied in giving the Senate his idea of the kind of argument he thought I was going to make. It was entirely sectional. It involved the interest of the railroads and the port of Boston.

Mr. WILEY. What is it?

Mr. LODGE. Mr. President, I decline to yield.

The PRESIDENT pro tempore. The Senator declines to yield.

Mr. LODGE. I did not heckle the Senator from Wisconsin, and I will ask him please not to heckle me.

Mr. WILEY. Mr. President, will the Senator yield?

Mr. LODGE. I decline to yield at this time. I will yield after I have made my statement.

The Senator from Wisconsin spent a large part of his time on Monday telling the Senate the kind of speech which he thought the opponents were going to make, based entirely on sectional and selfish grounds. I announced at the outset of my speech today that I would not make a single, solitary sectional or local argument. I have not done so, and I will not do so. It could be done on the part of those who oppose this project. It could be done by those who favor the project. I will not make such an argument. At the beginning of my speech I expressed the hope that we would discuss this question on a national basis, and that we would not impugn each other's motives, and would not enter into sectional arguments. It was somewhat horrifying to me the other day to hear the statement that there was a desire to cut the throat of the Middle West. I had hoped that Senators would not use violent language of that kind.

I repeat what I said at the outset of my speech, that it is profoundly distasteful to me to have such a possibility mentioned. I have lived in all parts of the country. I have friends in all parts of the country. Those friendships were formed in college, in my newspaper work, and during the time I have been in Congress, as well as during my service in the Army. During such a time one forms a particularly close type of friendship.

I have not made a single sectional argument. I hope we can keep this discussion on a high plane, and that we will not impugn each other's motives.

I now yield to the Senator from Wisconsin.

Mr. WILEY. Mr. President, I assure the distinguished Senator that nothing that I said was intended to impute to him anything except the highest motives in seeking to look after his own little section. If that is a sectional argument——

Mr. LODGE. That is precisely what I object to; and it is precisely what I have not done.

Mr. WILEY. I ask the Senator if he is acquainted with the poll of business opinion conducted by Modern Industry magazine.

Mr. LODGE. No; I do not know anything about such things.

Mr. WILEY. Is the Senator acquainted with the fact that even in New England the vote among businessmen was 54 in favor of the St. Lawrence seaway, as against 46 businessmen against it?

Mr. LODGE. No; I do not follow such things. That is not the way I try to do my job here.

Mr. WILEY. I appreciate that that is not the way the Senator is doing the job.

Mr. LODGE. I must do my job as my conscience tells me how to do it.

Mr. WILEY. That is correct. However, behind that screen there is the result which is desired, and that is to deprive us of our economic lifeblood. That is indicated by the letter from the New England News Letter Service, which I ask to have printed in the RECORD at this point.

Mr. LODGE. I do not want it in the RECORD at this time. I object. This is my speech, and I am not going to have something totally irrelevant, something which is an entire misrepresentation of my whole spirit in this matter, printed in the middle of my speech.

Mr. SMITH. Mr. President, will the Senator yield?

Mr. LODGE. I yield to the Senator from New Jersey.

Mr. SMITH. I want to ask the Senator from Massachusetts a few questions in order to clarify my understanding of his position. The first one is this: Even if the proposed seaway should conceivably damage some of the ports on the Atlantic coast, that consideration would have to be secondary to the national interest, if that issue should arise. Does the Senator agree with me that we would have to think in terms of the national interest?

Mr. LODGE. I have been trying consistently to take a national view, and all the arguments I have given are national arguments. There is one Senator who does not agree with me.

Mr. WILEY. I think the arguments are clever.

Mr. SMITH. I come from the State of New Jersey, in which this question might arise in connection with the Port of New York Authority, a body created by the States of New York and New Jersey. But I am raising the question in order to make it clear that the Senator and I agree up to the point that the national interest would be paramount in any consideration of the over-all picture presented by the proposal to build the St. Lawrence seaway.

Mr. LODGE. That is correct.

Mr. SMITH. The next question involves the whole issue of transportation. I am advised that a great many of the railroad companies feel that the project would damage the railroad business. I do not share that view. My own judgment is that if we can increase our productivity by any means of transportation, it will be of benefit, although it might cause some temporary dislocations, and that whether it be the railroad industry, the storage truck industry, or whatever industry it may be, we are all interested in seeing the necessary transportation facilities, at low cost, established, to develop the country to its highest productivity. Is that correct?

Mr. LODGE. I think that is correct. But this proposal does not commend itself to me on that ground. I do not think it would be a practical or valuable

addition to our transportation system, but I agree that that should be the aim.

Mr. SMITH. I want to ask the Senator another question in order to clarify further my own thinking as to his position. Does the Senator at this moment oppose for all time any development of the seaway, or is he criticizing the small capacity of the seaway today, in part, or is he opposed to this type of seaway?

Mr. LODGE. I am not opposed to this type of undertaking, in principle. I think the way it is proposed to handle it at this time makes it unacceptable.

Mr. SMITH. Is the Senator trying to defeat it, or postpone its consideration until agreements with Canada on tolls can be brought about, and further study given as to whether the locks should be larger than proposed or whether the canal should be deeper than is proposed? Is that his position?

Mr. LODGE. My position is that we do not have the answers to enough of the fundamental questions to take up the proposal at the present time. I should like to see it come up after we have had an opportunity to get the final answers.

Mr. SMITH. But would the Senator like to see it developed further through planning in such a way as to take care of all possible benefit to the whole country, and especially giving to the inland cities on the Great Lakes access to the sea?

Mr. LODGE. I announced earlier that I would be willing to support legislation which would provide for the kind of thoroughgoing study of which General Wheeler spoke, for an adequate staff, to take a year to get to the bottom of the economics involved. I have not completed my presentation. I have a good deal to say from the national defense standpoint. I am not opposed to this type of activity in principle.

Mr. SMITH. I did not think the Senator was opposed to it, and I wanted to get it clear that what he is now criticizing is the particular presentation of the plan now before the Senate.

Mr. LODGE. It is like many things we see so often in a legislative body, something which at first blush is very attractive, and then the blush wears off, and, on the practicalities, it does not stand up.

Mr. SMITH. Does the Senator feel that the development of trade in the postwar period may have a bearing on what this particular project should be, or does he think we should build the project before we know what the development of postwar trade will be?

Mr. LODGE. I think it should be considered in the light of a number of bottom facts.

Mr. SMITH. Including, possibly, as the Senator suggested earlier, the fact that larger types of freighters might be used than are being used today, which would make it necessary to enlarge the canal?

Mr. LODGE. Yes.

Mr. SMITH. I recall in the testimony that even Mr. Hoover, as great an advocate of the project as he is, recommended that we build 30-foot locks now, even though it is proposed to have a 27-foot canal. I think that is a relevant point to consider.

Mr. LODGE. I am glad the Senator brought up that point.

Mr. SMITH. I shall have some more questions later, but I wanted to get those two things clarified before the Senator proceeded further.

Mr. LODGE. I am glad the Senator asked me the questions. They are very valuable.

Mr. AIKEN. Mr. President, will the Senator yield?

Mr. LODGE. I yield to the Senator from Vermont.

Mr. AIKEN. May I call the Senator's attention to the fact that the Department of Commerce has completed its study on grain, ore, petroleum, and coal? The study relating to ore started long before the hearings on the St. Lawrence project were started. The study involving grain has been carried on for a long period of time in connection with the Department of Agriculture. I do not know how long they have been engaged on the study of petroleum. But the report is not a hasty report. It purports to cover only these four commodities, but the Department of Commerce intends to make a report on other commodities at a later date. It made its report on those four commodities at this time because, in its belief, the tonnage of those four commodities will amount to approximately 40,000,000 tons a year after the traffic is established, and the tolls will be sufficient to pay for the amortization and other costs of the canal. I wanted to make it clear that this study is not yet complete. It is made only on those four commodities on which the report has been presented. The report is in the pamphlet which was issued approximately a month ago.

NATIONAL DEFENSE

Mr. LODGE. Mr. President, I turn now to a discussion of what is another most important aspect of the St. Lawrence seaway project. I refer to the contention made by the proponents that in the year 1948 we must construct the seaway because the national defense demands it.

As one who is most vitally interested in the military strength and security of this country, I have undertaken to analyze this argument with great care and in considerable detail. As a consequence, I have come to the firm conclusion that not only would the St. Lawrence seaway project not constitute an asset of national security, but on the contrary it might well prove a most serious liability. Let me undertake to review my reasons for reaching both these conclusions.

One of the most serious limitations on this project as a means of securing the national defense lies in what is generally referred to as the seasonal factor. By this is meant that the St. Lawrence and the Great Lakes channels are closed by ice an average of approximately 4½ months during the year. Sometimes the period of closure is 4 months and in other years it goes as long as 5 months. Five months is the period accepted on the floor of the Senate by the Senator from Wisconsin. From the early part of December until the latter part of April ice puts a complete end to navigation through these waters. It is impossible to move a vessel of any kind, except an ice boat, across the channel. I ask unanimous consent that a table prepared by the Library of Congress and showing for each year from 1920 to 1947 the dates marking the last departure for sea from Montreal and the first arrival from sea at Montreal, be printed at this point in my remarks.

The PRESIDENT pro tempore. Is there objection?

There being no objection, the table was ordered to be printed in the RECORD, as follows:

Duration of season of open navigation on St. Lawrence River

	Channel open [1] Quebec to Montreal	First arrival from sea at Montreal	Last departure for sea from Montreal
1920 [2]	Apr. 18	Apr. 25	Dec. 7
1921	Mar. 29	Apr. 21	Dec. 8
1922	Apr. 13	Apr. 24	Dec. 2
1923	Apr. 29	May 3	Do.
1924	Apr. 17	Apr. 24	Dec. 3
1925	Apr. 10	Apr. 22	Dec. 9
1926	May 1	May 3	Dec. 6
1927	Apr. 11	Apr. 12	Do.
1928	Apr. 26	Apr. 26	Dec. 9
1929	Apr. 10	Apr. 20	Dec. 7
1930	Apr. 12	Apr. 21	Dec. 12
1931 [3]	Mar. 19	Apr. 15	Dec. 11
1932	Mar. 27	Apr. 14	Dec. 8
1933	Mar. 23	do	Dec. 6
1934	Mar. 28	Apr. 26	Dec. 8
1935	Mar. 30	Apr. 15	Dec. 9
1936	Mar. 28	Apr. 13	Dec. 11
1937	Apr. 9	Apr. 19	Dec. 8
1938	Apr. 12	Apr. 18	Dec. 4
1939	Apr. 29	Apr. 29	Dec. 12
1940	Apr. 23	Apr. 24	Dec. 5
1941	Apr. 14	Apr. 19	Dec. 17
1942	Apr. 17	May 2	Dec. 16
1943 [4]	Apr. 29	May 24	Dec. 13
1944	Apr. 20	Apr. 21	Dec. 9

[4] Canada Year Book 1946 (1942-5).

Mr. LODGE. Mr. President, it is for this reason that quite a large number of people have somewhat facetiously, but certainly quite accurately, described the project as the St. Lawrence "iceway."

Whenever one hears people undertake a favorable comparison between the St. Lawrence seaway and such great canals as the Panama or the Suez, he should bear this one fact in mind: Neither the Panama nor the Suez Canal is ever rendered impassable because of ice. I cannot for the life of me understand how the proponents of this seaway, or "iceway," can seriously contend that it would constitute a national defense asset, in the light of the uncontroverted and plain fact that it is completely unusable for approximately 40 percent of the year.

This seasonal factor raises many important considerations. In the first place, it must be remembered that the cargoes which are now being carried over the present Great Lakes-St. Lawrence system are of a nature which permits seasonal stock piling. In other words, those who use the present system so organize and schedule their activities as to permit them to move an entire year's supply during the open or navigating season. These cargoes amount to an average of about 9,000,000 tons annually. Now take a look at page 20 of the majority report, and in the middle of the page note the proposed traffic of 52,000,000 tons. I am coming

back to this figure later in another connection, but I point it out here in order to raise what, to me, is a somewhat perplexing question, namely, how are these additional 43,000,000 tons which the majority have produced out of a crystal ball to be attuned to the present carefully worked-out system? These 43,000,000 new tons will be able to move only during some 7 months of the year. Are they all to be of a nature which permits stock piling in order that 1 year's supply can be moved during the short season? I do not know the answer, but I raise the question simply to emphasize one of the problems which the seasonal factor poses, and to which the supporters of the project give us no answer.

Another problem which suggests itself is this: When all these vast fleets of ships which are expected to sail up and down the seaway are either bottled up inside or kept outside because of frozen conditions, presumably cargoes will either be stock-piled, and, of course, not moved at all, or else they will have to move over other means of transportation, such as by railroad, truck, and aircraft. The terminal points will, of course, have to be our Atlantic, Gulf, and Pacific ports, as they are today. But I ask this question: Will these port facilities still exist if they are used only some 4 or 5 months of the year? How are we to maintain ports, or the personnel and all the organization that goes with them when they will be used during only a relatively short period of the year? To the extent that we come to place reliance on the seaway as a means of transportation, it is inevitable that other means of transportation will necessarily fall into neglect. If the predictions of the majority are true with respect to estimated tonnage, will our railroads, our trucking lines, our air lines, and our port authorities have any incentive to improve their facilities? Consequently, when winter drives the cargo from the "iceway," will they be equipped to handle the peak load? Again I do not know the answer to these questions, but they are perfectly reasonable and certainly typical of the kind of problem which the seasonal factor causes us to consider.

Or look at it from this point of view. One of the reasons advanced by the proponents to justify construction of the seaway is the opportunity which will be afforded for great new shipbuilding and ship-repairing yards within this supposedly secure Great Lakes area. It is fairly typical of the way many people have thought about this project that they completely ignore or purposely overlook the fact that these shipbuilding and ship-repairing facilities will be completely icebound for 4 or 5 months of the year. I utterly fail to see the value of a ship-repairing facility that can be reached only some 240 days out of the year at the most. I utterly fail to see the value of a shipbuilding facility wherein a ship which is constructed during the late fall would be incapable of moving out to the ocean before springtime. It is difficult for me to greet with enthusiasm a project where a slight miscalculation in the coming of the late autumn freeze could bottle up new shipping and ship-repair facilities for a period of 4 to 5 months.

Indeed, it would be most injudicious on our part if we were to place reliance on this area for any major portion of a shipbuilding or ship-repair program in time of war. Keep in mind, if you will, Mr. President, the constant Russian search for ice-free ports, and balance that fact against the alleged wisdom of this iceway. The answer to me is appallingly obvious and I cannot understand how it could be otherwise. I mentioned this seasonal factor at the outset because it constantly enters into any discussion of any phase or aspect of the St. Lawrence project. Every argument which proponents of the seaway bring up must be tempered in the light of this all-important factor of the short season.

When the seaway was first proposed many years ago, it was universally and, at that time, correctly believed that it would traverse a relatively secure area from the point of view of hostile attack. Even during the early days of World War II, this belief could be maintained with considerable justification. Thus, when the late President Roosevelt recommended to the Congress in 1941 the authorization of the St. Lawrence project on national security grounds, it is only fair to say that he had no way of knowing—and certainly very few but the most advanced researchers had any way of knowing—that in 1948 the northern one-third of this country could no longer regard itself as being invulnerable to hostile attack. The tremendous development in the speed and the range and the carrying capacity of modern bombers has changed the picture completely. There have been so many expert pronouncements regarding the possibility that any foreseeable future attack against the United States would come by air, using the polar route, that the point scarcely seems to need much elaboration. The most recent authoritative finding on this point is brought out in the report of the President's Air Policy Commission. The conclusion is unmistakable, and most unhappily so, that the Great Lakes region lies in the most vulnerable area of the United States. When we bear in mind that one of the many arguments advanced for the St. Lawrence project is that it will encourage increased industrialization on the Great Lakes area, and if we set off against this argument the further theory that, in the light of atomic and other scientific developments, industrial mobilization planning is all toward dispersion, even to the point of placing the most important facilities underground, we cannot help but question most seriously the advisability of encouraging an expanded industrial plant in the vulnerable area which is now considered to offer priority targets for hostile air attack. It seems to me that on this score, the St. Lawrence project runs counter to the best interests of national security. If additional facilities which could be readily converted in time of war are to be built, it would seem far more in the interest of national security to disperse future industries toward less vulnerable areas, rather than to impose on the already advanced and congested industrial areas in and around the Great Lakes.

The St. Lawrence seaway would require military manpower and matériel for its defense, thus aggravating what is already one of our primary national security problems. This is what Secretary of the Army Royall told the committee this year:

> The committee will note that the views I express are somewhat less positive than those previously expressed by the War Department.

Note that, Mr. President.

> It would mean an added defense commitment which would require more men and equipment and money than would be necessary if the seaway were not constructed.

I told the subcommittee and I repeat the statement here with all the emphasis at my command, that we cannot assess the value of any kind of a defense project unless we have the manpower to implement it from a military standpoint. Those who saw so many of the defensive works which were hopefully erected in the last World War—and I saw them in Sicily and in parts of the Italian coast and southern France, and there were many others in Normandy and elsewhere—who saw that they were empty and in many cases useless because there were no defending forces in them, certainly will testify to the truth of my statement regarding the lack of value of defense projects without the necessary manpower. Our military forces are already spread so thinly as to cause deep alarm, and our voluntary recruiting system is not producing anywhere near the number of enlistments required to maintain our armed forces at even a minimum peak of efficiency. It is no exaggeration to say that we are from 60 percent to 70 percent short of combat troops at this moment. We already have commitments all over the world which we are inadequately prepared to meet from a military manpower point of view. The ever-increasing seriousness of the world situation suggests that at least a few more commitments may become necessary. We simply cannot be strong everywhere at one and the same time. No country can be. We have to concentrate our military strength at the points where it will do the greatest good. This, I submit, is a most important consideration to bear in mind when evaluating the St. Lawrence project from the national-defense point of view. The question must be asked: Is it wise to increase our burden with one more commitment which requires the expenditure of men as well as money? Is it wise to do this when we do not have the men with which to meet this commitment? No one knows the number of troops which it would take to defend the St. Lawrence seaway. No one knows the extent of the defensive installations which would have to be installed along the more than 2,000 miles of its length. These are some more unanswered questions, and certainly they are questions of primary and fundamental importance. I should like to know the answers. How many men will it take to defend the seaway, and where shall we get them? Or shall we simply not defend it at all? The voluntary recruiting system has broken down and is not producing a sufficient number of men. If the seaway is constructed, will recourse

be had to a selective-service system or some similar system? Certainly if we are to build this great project as a national defense installation, we should have clearly in mind how we shall get the men needed in order to make it defensible and usable.

The subcommittee was presented with emphatic and categorical evidence—and I may add that it is authoritative evidence—to the effect that the seaway could not be defended at all.

One witness was Maj. Gen. Follett Bradley, of the Air Force, whose record during World War II as organizer of air defense was of a highly superior quality. He stated, and I quote directly from his testimony on page 224 of the 1947 hearings:

> That part of the St. Lawrence waterway now in operation, notably the Sault Ste. Marie and the Welland Canal, is not defensible against determined air attack. Its defense would not be strengthened by the proposed additions.

Later on in his testimony, General Bradley said:

> The real question is: Can the project, with its 50 locks, more or less, and its proposed dams and powerhouses be defended against enemy air attack? I answer categorically, "No."

General Bradley reminded the subcommittee—and remember that his evidence was of a first-hand nature—of our successful attacks during World War II against German dams, canals, and similar installations. He reminded the subcommittee of the tremendous and crushingly decisive damage resulting from these attacks. He warned that we could not expect an enemy any the less determined. His emphatic conclusion, and this conclusion was shared by several other military experts appearing before the subcommittee this year, that the project could not be defended, is an argument which, standing alone, seems to me almost entirely decisive of the entire matter. These are the conclusions, not of an alarmist, but of a man of proven experience and authority.

I am utterly at a loss to understand the casual way in which the proponents brush off this question in their majority report. In it they say, on page 10:

> The locks and powerhouse of the St. Lawrence project are no more vulnerable than many important installations in the northern third of the North American Continent, such as Grand Coulee, the Mesabi iron range, the Soo locks.

They also mention various large cities. It seems almost too obvious to point out the utterly different problems involved in the defense of single installations, as against those involved in the defense of a project of the tremendous length of the St. Lawrence. Yet the majority claim that it can be defended. I would be very much interested in seeing a plan, even a tentative one, for the defense of the seaway. I feel sure that there are many other Senators who would be interested in seeing such a plan. But the majority of the committee are silent as to details. They airily dismiss the problem with the simple statement:

> The strategic problem of defending it against air attack does not seem to create additional commitments substantially different or greater than the armed forces now confront in the defense of the centers above named.

But, Mr. President, of course that is the merest assumption. We have seen how this "iceway" lies in the most vulnerable part of the United States, and how in the words of the Secretary of the Army it would mean an added defense commitment which would require more men and equipment, which are not available, and which, even if available, most probably would not be successful in resisting attack. This brings me to a consideration of the effect which hostile attack would have on the usefulness of the seaway as a national-defense asset.

At this point I believe it is very apt to refer to a report which was prepared by the Governor of the Panama Canal Zone, and was concurred in by the Joint Chiefs of Staff, and was submitted to the Congress on December 1, 1947, with the approval of the President. This report calls for some $2,500,000,000 for the construction of what the report describes as a safe, sea-level canal in lieu of the present lock-structured Panama Canal. The report stated that a lock-structured canal could be put out of operation for years or perhaps permanently by a single atom bomb hit, and that only a sea-level canal would be bombproof. Gatun Lake, the report said, could be breached with ordinary bombs and closed for at least a year. This report I believe to be of most tremendous significance, and pertinent indeed to the issue now before us. It is now manifestly the considered opinion of the President, of the Joint Chiefs of Staff, and of the man who is charged with the on-the-spot responsibility for the air defense of the Panama Canal, that a canal constructed and linked by means of locks cannot be defended against air attack. I point this out, Mr. President, that whatever may have been the earlier view of the Joint Chiefs of Staff as to the value of the lock canal as a national defense asset, this recent recommendation clearly supersedes it.

The same proposition was emphasized again only last Wednesday by Col. James H. Stratton, supervising engineer of the Panama Canal, in an address delivered before the American Society of Civil Engineers in New York. He pointed out, significantly, that at a cost of $2,307,000,000 a lock canal designed for maximum security could be constructed, but, Colonel Stratton emphasized, it would still be deficient in resistance to modern weapons. He also described how a sea-level canal would not require assistance from the shore to operate in an emergency, and if radioactivity made the area uninhabitable it might still be possible for ships to make their way through.

Of course, it is utterly out of the question to convert the proposed St. Lawrence Seaway project into a sea-level canal. Circumstances of geography and geology make it impossible. Yet we are now being asked to authorize the construction of a canal precisely similar to the type which is officially declared to be an easy and dangerous target for air attack, whether atomic or otherwise. I do not know what the outcome of the Panama Canal proposal will be. But I do submit in all seriousness that the Senate is being simultaneously asked to take action in two entirely inconsistent directions. In one breath we are being asked to abandon the lock canal in favor of a sea-level canal and in the other breath we are asked to appropriate vast sums to construct a lock canal. Both cannot be right. The choice seems obvious.

Explicit in the Panama Canal report of last December is the tremendous damage which would come in the wake of the crippling of a single vital link in the chain. Precision bombing is not the exclusive property of this country. One well-aimed bomb could very easily put the proposed St. Lawrence project out of commission for at least a year, perhaps 2 years, or perhaps indefinitely. Then what would happen to all these millions and millions of tons of cargo that are going to move over the seaway? What is going to happen to the railroads and the trucks and the airlines and the port facilities that we have neglected because of our reliance on this seaway? What is going to happen to all the great ships being built or repaired in the Great Lakes area? Can we in good sense and in good conscience put our sanction and our faith in a project which could bring such disastrous results? The dropping of a single well-aimed bomb or the dive of one fanatic suicide plane is not a very big price for an ambitious enemy to pay for so juicy a reward as this.

But it would not necessarily take an attack from the air to put a lock out of commission. An ingenious enemy would experience very little difficulty in working an effective act of sabotage on one of these vital installations with the same disastrous results. Or it could happen by accident. These are no fantasies—these are probable and foreseeable actualities in the tragic event of another war. But the proponents of the seaway still vision these great fleets of ships sailing up and down the seaway, and they show little concern for the realities of the situation.

On page 10 of the majority report, there is quoted a statement by Secretary of the Army Royall to the effect that the St. Lawrence waterway, because of an added advantage of some 1,200 miles less ocean distance, would minimize to some extent the risk and danger of submarine and other attack.

Mild as this language is as a justification for the seaway, it is still an exaggeration. Admiral Willson told the subcommittee that only about one-eighth of the Montreal route can be considered safe from submarines. He pointed out how submarines operated very successfully throughout the entire war in the Gulf of St. Lawrence as far west as the Gaspee Peninsula just below Quebec. While there was not much traffic out of the St. Lawrence, relatively speaking, during the war, Admiral Willson pointed out that there were six ships sunk in this area by submarines and, he added significantly, there were no submarines sunk at all. The reason he gave is that the conditions in this area are very favorable for submarines. Admiral Willson went

on to point out that even an advantage of a one-eighth safety factor was merely theoretical. He said:

> I have recently talked with the officer who ran the operating end of the antisubmarine warfare for Admiral King. There is no higher authority on the subject. It was his opinion, and I fully concur, that due to technical considerations, namely facilities for diversion, weather for air coverage and underwater sound conditions, the routes from New York or Boston to Europe are as safe or safer than the route from Montreal.

In this connection it must be borne in mind that the prevailing theory of defense in naval operations is towards dispersion. Tests Able and Baker at Bikini give this theory validity. When we hear people talking about how the St. Lawrence would provide a safe route to Europe during wartime, remember that it is not possible for a ship to adopt zigzag tactics in a narrow channel. It is impossible to disperse in a narrow channel. A ship caught in any part of the channel is as long from a target standpoint as the channel is wide. One is reminded of the old saying about shooting ducks in a bathtub. No better description could be found to describe the situation in the St. Lawrence insofar as naval defense is concerned.

But the supposed element of safety is illusory not only from the point of view of what the enemy might do but also from the known fact that these waters are notoriously dangerous and treacherous to navigate even under peacetime conditions. One witness, an experienced seaman on the Great Lakes for many, many years, described the seaway's course as being "tortuous, fog-ridden, and hazardous." The area is subject to constant fogs, which increase the dangers of navigation. I am informed that one must indeed be an experienced and ingenious skipper in order successfully to bring his ship through these waters. And I am talking about peacetime conditions. Wartime navigation would, of course, be that much more difficult. You would necessarily have less experienced men in command of ships. Certainly, as an elementary precaution, you would have to navigate under black-out conditions. And remember that even in peacetime the density of ships per square mile upon the Great Lakes-St. Lawrence route is probably greater than on any comparable body of water in the world. During a season a ship passes the city of Detroit every 19 minutes. As one witness pointed out to the subcommittee:

> To permit foreign ocean ships or others to be navigated on the Lakes by persons unfamiliar with the rules for the prevention of collisions and the practices of ship navigation on these waters would jeopardize still further the safe navigation of all ships. Under any circumstances, navigation is difficult and often unsafe.

When the Secretary of the Army testified that this route would minimize to some extent the risk and danger of submarine and other attack, I say with all due respect that I do not think that he could have taken into consideration the factors which I have briefly discussed. Talk to anybody who is familiar with navigation on these waters and he will agree that they are very tricky and often dangerous even under ideal conditions.

The Secretary of the Army's statement, that the seaway would furnish a route which he believed to be somewhat shorter from certain Lake ports to England is adduced by the proponents as a further justification for the seaway from a national defense point of view. This somewhat guarded statement is also a slight exaggeration. It is true that statisticwise there is a slight distance advantage in favor of the St. Lawrence route to Great Britain and to certain north European ports, but it must also be remembered that the mileage advantage is to these points only and that there is no time saving at all to be expected from any Midwest Lake ports to Europe. Under war conditions, of course, the important factor is time and not distance. Let me give a brief example. At the present time, if a shipment is going, let us say, from Chicago to Liverpool by the customary rail and water route, third morning delivery is customary on shipments from Chicago to the Port of New York, for example. Transit time from New York to Liverpool is only slightly greater than from Montreal on ships of comparable speed. It might be added parenthetically that in view of the natural handicaps of the proposed route between Chicago and Montreal via the Great Lakes and the St. Lawrence it seems most unlikely that vessels from Chicago would equal the speed of ships from New York. But assume that equally fast ships are operating over these two routes. If you have at Chicago two loads for Liverpool, and if you send one by railroad to New York and the other by ship down the St. Lawrence, the load sent by rail via New York would reach Liverpool first, about 3 days ahead of the load that was shipped via the Great Lakes and the St. Lawrence waterway to Liverpool.

I cite this example, because when talking about defense and security one must bear in mind that longer journeys in wartime mean longer exposure to the risks of aircraft attack and submarine attack. Time from a safety viewpoint is always of the essence. Add to that the necessity for getting shipments to their destination in the least time practicable and it becomes apparent that the supposed distance advantage of the St. Lawrence seaway means nothing at all. And remember that the brief example which I just gave assumes ideal conditions. It is far more likely that it would take at least a week and perhaps longer for a shipment to travel from Chicago to Liverpool via the St. Lawrence and Montreal than it would between Chicago, New York, and Liverpool. And let us not forget the ever-present factor of the short season. Even assuming the St. Lawrence route were safer—and of course it is not—it would be a safe route only some 60 percent of the year, because it is utterly unusable for the remaining 40 percent. But the proponents do not like to be reminded of that.

Let me discuss briefly another statement of the Secretary of the Army which is one of the cornerstones of the argument advanced by the proponents to justify the seaway from the national defense point of view. The Secretary said:

> This new route to Europe would serve both as an alternate and as a reserve route in the event of war.

This statement is, of course, subject to the limitations already discussed, the limitations of the short season, vulnerability to air attack, the problem of defense, the problems of dangerous navigation and easy prey to submarine and other attack, and the problem of longer exposure to danger. But it is also subject to another very real criticism.

It will be remembered that the proposed St. Lawrence seaway channel will be 27 feet in depth. This provision is found in the annex of the 1941 so-called agreement between the United States and Canada, where it is stated that "all navigation channels to be excavated to 27-foot depth."

If this 27-foot channel is to be effective as a reserve or alternate route in time of war, as the proponents maintain, it must be manifest that fully-loaded cargo ships will be physically able to navigate this channel. This would seem a basic factor. Let us look at this. Here are some figures now that are utterly binding, on this matter of whether the engineering features of this proposition are sound. Let us look at the facts. The Port Warden Regulations in Montreal for oceangoing ships require a draft clearance of 2½ feet for ships of 8,500 tons deadweight, that is, underneath the bottom; they require 3 feet for ships of 10,500 tons deadweight; they require 3½ feet for 12,000 tons deadweight.

Our ships operating in the overseas trades have a total dead-weight capacity as follows, and these include cargo, bunkers, stores, and so forth, and these figures apply to fully loaded draft in salt water:

A Liberty ship's dead-weight capacity is 10,590 tons. Thus loaded, a Liberty draws 27 feet 9¼ inches. That is already 9¼ too much.

A Victory ship's dead-weight capacity is slightly more than a Liberty's—10,681 tons—and it draws 28 feet 3¾ inches.

A C–2 type ship has a 10,560-ton capacity and draws 27 feet 8 inches.

A C–3 type ship has a dead-weight capacity of 12,041 tons and draws 27 feet and 1 inch.

T–2 and T–3 tankers, which are even larger ships than the C–3's, draw 30 feet. Those are the big Standard Oil tankers.

No prudent ship operator would load ships such as these deeper than 24 feet, as there must be at least a 3-foot clearance under the keel for these sized ships; moreover, allowance for squat and variation of fresh water would amount to nearly one additional foot. "Squat" is the possibility of a ship going down a little lower. They always go down lower when they are running.

A 24-foot loaded draft would be the deepest within a reasonable degree of safety. Obviously to load a Liberty, Victory, C–2, and C–3 to only 24 feet would be economically unsound, although it does not seem to be admitted here by everybody.

From the foregoing—and I hope Senators will look it over at their leisure—it can be readily seen that nearly all ships under United States registry, engaged in the overseas trade, and such ships fully loaded, drawing on the average 28 feet, must necessarily be excluded, on account of draft limitation, from navigation over the proposed St. Lawrence seaway. The figure is about 90 percent. While there may be a few American flagships under 24-foot draft, these vessels are too small, particularly on account of the excessively higher costs of operation, profitably to engage in overseas trades.

In the light of these very specific limitations, it is awfully hard for me to understand how it is possible to go on talking realistically about this project as an effective alternate or reserve route in time of war. Even if we exclude all the other limitations, it might be an alternate or reserve route for a few small ships, but it certainly would not be effective for ships built to our present specifications.

Many of the proponents of the seaway have recognized that a 27-foot seaway would not be an economically feasible waterway. But, fearful of what the cost might be if estimated at a greater depth initially, their strategy apparently is to try to obtain approval for construction of the project at a 27-foot depth, and then wait until after the completion of this depth before seeking to have it deepened and enlarged. There is, of course, no question but that construction of the seaway in piecemeal fashion to a depth, say, of 35 feet would be far more expensive than its initial construction to that depth. I think it is only fair and honest that before we have a vote on this project, qualified proponents should be required to put themselves squarely on record as to the adequacy of the proposed waterway for ships of American registry. Until we have those facts, let us not talk of this seaway as an alternate or reserve route in time of war, or, for that matter, as economically feasible in time of peace.

I have already alluded briefly to the argument which is advanced by the proponents of the seaway that it would constitute a valuable national-defense asset because it would provide for the construction and repair of oceangoing vessels in the relatively secure area, as the proponents describe it, of the Great Lakes. This point merits some further attention.

Of course the reference to the relatively secure area is wholly unsound, and I will not comment further on this extraordinary statement.

I do not want to be understood as minimizing in any way the very notable role which the Great Lakes shipbuilding yards played in the ultimate victory in the last war, but I cannot see anything in the foreseeable nature of future war which requires us to build this seaway in order to provide a different role for the Great Lakes shipbuilding area. The yards there built some 500 small war vessels, up to and including destroyer escorts and submarines. The record of the last war indicates that our 12,000 miles of tidewater are perfectly adequate to meet all our shipbuilding needs for deep-draft vessels, and, significantly, they offer far greater safety, because of the possibility of dispersion, from any polar attack. The small-vessel construction program which was so notably accomplished in the Great Lakes area, and for which I want to express my appreciation, represented only 12½ percent of the number of these small types of vessels constructed during the war.

I ask this question: What justification is there for seeking to change the type of shipbuilding construction now available in the Great Lakes area? It cannot be justified on the grounds that it would tend to decentralize the industrial and shipbuilding arrangements of our other coasts. Certainly, as I said earlier, the Great Lakes area is as much in need of decentralization in this atomic age as is any other region. To build this seaway just so that we can have different facilities in the Great Lakes area would have exactly the opposite effect. So that cannot be the reason.

Another consideration must be borne in mind. If the seaway is constructed so that we can have new shipbuilding and ship-repair facilities in the Great Lakes area, obviously these facilities will have to be built in peacetime if they are to be useful in the swift war of the future. That means that we will have to draw from our tidewater facilities a nucleus of trained personnel. Now, Senators are all probably familiar with the present critical situation which exists in our existing yards because of the lack of experienced men and because of the tremendous decrease in the construction and repair work which these yards need so badly in order to retain their trained and skilled workers. It is obvious, consequently, that if we are going to expand the Great Lakes shipbuilding industry we can do so only by taking men from our existing shipyards. I ask this question, therefore: What justification is there for this diversion of men? It would seem to me to be far more in the interest of national defense to maintain those plants we now have at their highest possible degree of efficiency in order that they may be prepared to meet any future emergency. I have heard no convincing argument which would justify us to embark on an experimental program of this type which at best would be drastically limited by natural and tactical handicaps—I refer, of course, to the ever-present seasonal factor and to the vulnerability of the area.

I come now to an argument which the proponents advance and an argument which is very difficult to deal with because it is so nebulous and general in nature. Senators will find it set forth as point No. 4 on page 11 of the majority report. Let me quote it briefly. This is a point to which a great deal of thought could well be given:

> The subcommittee believes that it is important to recognize that the economic health of the middle western region is a vital component of national defense. Were this region to be economically depressed, as might well occur in view of the potential depletion of iron-ore resources, there would result what would amount to a blighted area of the United States which, in turn, could only serve to weaken the productive potential of the Nation and to aggravate problems of national security.

Mr. President, I certainly agree that the economic health of the Middle West is a vital component of national defense. It is a vital component of national well-being. But it is the subsequent part of the paragraph I wish to analyze.

I am not altogether positive but I think I know what the proponents are driving at here. I think that they are trying to advance their cause by contending that there is immediate need of a deep waterway from the Great Lakes to the iron-ore deposits of Labrador because a supposed complete exhaustion of the Mesabi Range ore is imminent. In this connection, just a little over a month ago, Mr. Wilfred Sykes, president of the Inland Steel Co., made an address in New York City entitled, "The Steel Industry Outlook." I am going to quote a few passages from Mr. Sykes' address because I think that they are very pertinent here.

In that part of his remarks which were addressed to the subject, Future Demand for Steel, Mr. Sykes declared:

> Now what of the future? Prof. Martin Barloon, in an article in Harper's magazine of August 1947 talks about Steel, the Great Retreat. His theme is that the ore bodies—for instance, we have been drawing most of our ore supply in the Mesabi Range—are being depleted to such an extent that future additions or future steel production will have to be on the Atlantic seaboard, and ore will be brought in by boat from foreign lands, such as Labrador, Venezuela, Chile, Brazil, and Sweden.
>
> The only trouble about Mr. Barloon's prediction is that it is not based on fact or knowledge of the facts. At the present time, in spite of the stories you hear, we have in sight or pretty close to sight—in fact, we are pretty sure of some of the things but we don't want always to find our ore—according to competent geologists, about 1,300,000,000 tons of high-grade easily mined ores, and that is not the total by a long way.
>
> Under the present taxation laws, if you find a body of ore you immediately have to pay taxes on it, so we are not so very anxious to go out and drill a hole in the ground and find a nice new mine unless we have need for a mine. If we do so, we may be paying taxes for the next 25 or 30 years before we get down to using it. There are large areas which have not been explored, and in which we are pretty certain there are large bodies of ore, but we don't want to find them under present tax conditions.
>
> I think we have in sight enough ore to last us say for 30 or 40 years; that is, the ordinary, high-grade, easily mined ores. But that is not the end of the steel business by a long way on the Mesabi Range. There are large quantities of magnetic taconites—that is a technical name; it is simply a magnetic iron mixed with silica which has to be concentrated. We have to remove the silica or a large part of it, so as to have material fit to be put into a blast furnace or for any other purpose.
>
> We know the way to do that. In the last few years there has been a great deal of investigation carried on, and we know how to concentrate these ores; but, of course, it will cost more to take these ores, crush them, concentrate them, and then put them together again into lumps that you can use, than it will be to dig ore out of an underground mine or out of an open pit. But the

amount of additional cost is not so much that it would seriously increase the price of steel. I don't think it would be very significant.

Now that kind of material, known, in sight, represents five to ten billion tons of high-grade concentrates, which, depending on what you assume the consumption to be, is good for another 75 to 150 years after the easily mined ores are exhausted.

But that is not all. There is another iron-bearing material which is not magnetic that we think we know how to concentrate today. We could make the iron magnetic so that it could be concentrated by the same methods as the ore previously referred to. And of that material there is in sight from 30 to 40 billion tons of concentrate—enough to last us, oh, for 400 or 500 years, or something like that; and beyond that I don't think we will be worrying about it. But you will see that there is no danger of any exhaustion of the ores or materials that can be used for ores in the Mesabi Range.

I will say again that this is a statement by Mr. Wilfred Sykes, of the Inland Steel Co., a man who certainly speaks with authority on the subject.

This quotation is not merely an isolated opinion. It has been corroborated by many other recognized leaders in the steel and iron-ore industry. Let me, for example, refer Senators to page 188 of the 1947 hearings, where they will find a similar statement by Mr. Alexander C. Brown, president of the Cleveland-Cliffs Iron Co., of Cleveland, Ohio, which is the third largest shipper and the largest independent merchant shipper of iron ore from the Lake Superior district. Let me also refer Senators to page 191 of the 1947 hearings, where the statement of Mr. R. C. Allen appears. Mr. Allen is president of the Reserve Mining Co. The most recent detailed discussion of this problem which I have seen is in an article entitled "Drama on the Iron Range," appearing in the January 1948 issue of the United States Steel Corp. News. It is too long for inclusion here, but I commend it to Senators' attention.

Of significance in this connection is a news story which was carried in the January 5, 1948, New York Herald Tribune. This brief article tells of the activities and potentialities of Ontario ore mines. Since I believe that it is worthy of attention, I ask unanimous consent that the article be printed in full at this point in my remarks.

There being no objection, the matter referred to was ordered to be printed in the RECORD, as follows:

IRON-ORE OUTPUT UP, NATION NOW MAJOR SUPPLIER—STEEP ROCK, STILL IN ITS THIRD YEAR, IS SECOND LARGEST PRODUCER ON CONTINENT

North of the Great Lakes lies treasure that is bringing Canada rapidly to the fore as a world source of iron ore.

Ontario's Steep Rock mine, now in its third year of production, was among the biggest iron-ore producers on the North American Continent last year. And on the Quebec-Labrador border new mines are under way in an area believed to contain one of the greatest iron-ore deposits in existence.

Canada produced 1,581,000 tons of iron ore in 1946, a jump of 445,000 tons over 1945. Steep Rock alone produced more than 1,200,000 tons in 1947, making it the second largest single iron mine on this continent.

It was only 4 years ago that the Steep Rock company began the huge task of diverting the Seine River from Steep Rock Lake, pumping out water and removing the waste material that covered its B ore body.

Besides the 1,200,000 tons produced annually from the B body, open-pit mining will be developed on the A ore body, which is expected to step up total output to the 3,000,000-ton mark annually within a short time.

Steep Rock's high-quality ore stands it in good stead at a time when the grade of ore produced from the older ranges in the Lake Superior district is progressively deteriorating.

It is estimated that Steep Rock has 60,000,000 tons of open-pit ore or a 20 years' supply available at the production rate of 3,000,000 tons a year. Then, too, Algoma Steel Co. is said to have reserves of 100,000,000 tons in its Helen deposit, while a large section of the Algoma deposits have not been explored.

The Wabana mines on Bell Island, Newfoundland, are the chief source of iron ore for the Sydney plant of Dominion Steel & Coal Corp., with annual capacity totaling 1,600,000 tons of ore containing 52 percent iron.

Little is known as yet of the C ore body at Steep Rock. No reserves have been calculated, but geological evidence suggests the presence of a considerable amount of ore. In addition, the reserves of 30,000,000 tons for the A and B bodies are calculated on a depth of only 160 feet in A and 400 feet in B. Yet, drilling has proved the ore to extend to 1,600 feet in depth.

Mr. LODGE. Mr. President, when reading this article, bear in mind that Ontario's Steep Rock mine is on the main line of the Canadian-National Railroad, and is as near Port Arthur as is the Mesabi Range to Duluth. Also bear in mind that Port Arthur is considerably nearer to the Lake Michigan and Lake Erie smelters than even Duluth.

To return for a moment to the matter of Labrador ores, I believe that before we build the St. Lawrence seaway for the purpose of importing these ores it might be well to look into the question quite carefully. I say this particularly with reference to a statement which appears on page 14 of the Commerce Department pamphlet entitled "An Economic Appraisal of the St. Lawrence Seaway Project."

In this report, after writing off most of the European ores and damning the Newfoundland ores with faint praise, and passing up the Cuban, Venezuelan, and Chilean ores, and having made a case against our own taconites, and having overlooked the newly expanding Ontario sources just mentioned, the concession is made that "incomplete data are available on the recently discovered Labrador deposits."

Then, in language which could emanate only from a Government bureau, the conclusion is drawn:

All indications point to the existence of vast reserves of ore possibly comparable in quantity and grade to those of the Mesabi Range.

"Possibly comparable"—note those two words.

I think we should know, before authorizing construction of this "Iceway" in order to import ore from Labrador for which only "incomplete data are available," something just a little bit more definite than the opinion that "all indications point to vast reserves of ore possibly comparable in quantity and grade" to those sources now available to us. There may or may not be these vast reserves. They may or may not compare favorably in amount and quality to our own ores. But a conclusion based on "incomplete data" does not seem particularly convincing to me.

Before leaving this particular phase of the national-defense aspect of the seaway, one further basic consideration merits careful consideration.

Viewing the situation purely from a national security point of view, it seems obviously far more preferable that we continue to rely upon readily available domestic and Canadian sources of iron ore and concentrates for our steel industry.

For, if we rely upon foreign imports of iron ore, we will be placing ourselves in precisely the same position as we found ourselves during World War II with respect to rubber, for example. If we build the seaway for the purpose of facilitating the import of foreign ores, we discourage further exploitation of our own potentialities. If we bring in foreign and cheap ores to compete with our American market, not only are we in effect subsidizing disastrous competition, but we take a step which seems to me definitely not in the best interests of national defense. On the contrary, we should give every possible encouragement to the further development of our own possibilities and to the development of new processes for extracting high-grade iron ore. To my way of thinking the argument advanced here by the proponents is not progress. This is going backward.

Another illusory argument which is advanced by the proponents of the seaway in the name of national defense and security deals with the question of the relationship between this project and our railroads. The contention is made that national defense would be aided because the seaway would ease the strain on our railroads in time of war. The Secretary of the Army stated:

Rail transportation would be less concerned in a future emergency if water transportation were available for the entire haul from the Great Lakes region to trans-Atlantic destinations.

I think this argument can be dealt with quite briefly. Senator, you will recall that the general consensus, based on the only authoritative study ever made of anticipated new tonnage over the proposed seaway, calculates that we may expect to have a combined American-Canadian increment of some 16,000,000 tons of freight annually over the seaway. Remember, this includes traffic both ways.

During the war, that is, the years 1941–44, our railroads originated an annual average of 1,405,000,000 tons. It takes only a very rapid calculation to compute the percentage by which anticipated new tonnage over the seaway would ease the burden on railroads during wartime. Just divide 16,000,000 into 1,405,000,000 and it will be seen that the amount of easement is about 1 percent. That is taking a favorable view of the subject. Taking into consideration the fact that wartime freight is essentially one way, it

is probably more accurate to take the figure of 8,000,000 tons rather than 16,000,000 tons for this calculation. If we do that, we find that the amount of easement on the railroads is less than 1 percent—about six-tenths of 1 percent. Even if we take the fantastic figure of 52,000,000 annual tonnage which the proponents of the seaway have gleaned from their crystal ball, we find that the amount of easement is only 4 percent.

I leave with Senators the question whether construction of the seaway can be justified on this particular ground.

I do not deny, of course, that our railroads do carry a tremendous burden during wartime.

Remember that during the war the most dire shortage of transportation was in the movement overseas of goods from our ports. This fact makes it seem highly unlikely that vessels capable of employment in overseas traffic would be used to parallel land transportation for more than 1,000 miles. The probabilities are more likely that vessels normally in this trade during peacetime would be diverted to the movement of goods from our eastern ports and Gulf ports, throwing an increased burden on the railroads serving the Great Lakes area. It is a known fact that vessels in coastwise, intercoastal, and Great Lakes service were diverted from these services during and just before the war, leaving their previous traffic to be carried by the railroads.

I think that the solution to the burden which the railroads have to carry during wartime emergencies is a problem which is outside the scope of this discussion today. But I can state with conviction that in my opinion the solution does not lie in building the St. Lawrence seaway.

In concluding this discussion of the national defense aspect of the St. Lawrence seaway project, I can do no better than emphasize the attitude which the Department of the Army has taken with respect to its supposed value. The proponents quote the all-revealing statement which Secretary Royall made before the committee. In one brief sentence, the Secretary made it abundantly clear that the military attitude is one of damning with faint praise. Mr. Royall said:

> The Army's position and the War Department's position is that the St. Lawrence seaway is not vital to national defense but that the project would be helpful to the national defense.

Apparently the implications of this statement totally escape the majority. It should be realized that there are a great many things which would be useful and helpful to the national defense, but upon which we do not embark. It might very well be useful and helpful to construct an immense underground city in which we could put some of our strategic factories. I give that as one example but we do not do it.

We must always decide which of several projects is the most valuable. Is the St. Lawrence seaway more valuable or more helpful to the national defense than the construction of high-powered wind tunnels for the testing of missiles and projectiles? Is it more valuable than the expenditure of an equivalent amount of money for various types of scientific activities? Is it more valuable than making an appropriation for 70 air groups for our Air Force, something which the Senate refused to do last June? Is it more desirable than making an adequate stock piling of strategic raw materials which we must have to defend our country in the event of future war? Is it more valuable than making the Panama Canal a sea-level canal, so that it will be safe against bombardment? Is it more valuable than the recently proposed project to develop synthetic petroleum? We must measure it against those things. We cannot say that it has an absolute value for the national defense. All these things are relative, and we must measure one thing against another when we consider the national defense. I give these simply as examples of the fact that there are a great many things which, from a purely abstract point of view, would be very useful and very helpful if once they had been done, but we do not do them for the very simple reason that they are not quite helpful enough or not quite useful enough to justify the tremendous effort and the tremendous cost. In the case of the St. Lawrence seaway, as I have tried to point out, it is not simply a question of whether it is helpful or not or whether it is more helpful than some other project or not; we must take into consideration the very real dangers and risks involved in relying on such an undertaking.

To summarize what I have said, I have given 12 arguments so far as the national defense aspect of the St. Lawrence seaway is concerned.

First, the seasonal factor: No discussion of any aspect or phase of the St. Lawrence seaway is possible without taking into account the fact that the seaway or the "iceway" as it may more appropriately be called, is closed for approximately 40 percent of the year to traffic of any kind. This raises great problems, such as the adjustment of cargo schedules to the navigation season, the interrelationship between the seaway type of transportation and other existing land and air transportation and port facilities, the problem of scheduling projected shipbuilding and ship-repair activities with this short season, the problem of overhead and other personnel and many other allied questions.

Second, the vulnerability of the Great Lakes-St. Lawrence area: The uncontradicted testimony is that this seaway would traverse the most vulnerable area, from a defense point of view, of the United States.

Third, the manpower problem: The seaway is an added defense commitment, in the words of the Secretary of the Army, of such magnitude that it would require an uncalculated amount of additional men and material for its defense. The present depleted condition of our armed forces makes it virtually impossible to assure that such men and material would be available.

Fourth, the actual defense of the seaway: It has been pointed out by several military experts in the field of air defense that the seaway simply could not be defended at all from a determined air attack.

Fifth, special vulnerability to bombing, sabotage, and accident: Almost every witness called attention to the ease with which a lock-structured canal of this type is open to air attack. It has recently come to be acknowledged that even the Panama Canal is, because of its structure, dangerously sensitive to this type of attack. An attractive and remunerative objective is set up for fifth-column activity, either by way of sabotage to the locks themselves or to ship-scuttling, or even accident. There was a great deal of evidence as to the disastrous effect which such action would bring in its wake.

Sixth, navigational and other hazards: Attention has been drawn to the fact that not only is the St. Lawrence a peculiarly hazardous route because of numerous locks, narrow, treacherous and dangerous channels, through islands and reefs of granite rock with currents and frequent fogs and mists, but is also an easy and remunerative target for attack by submarine or aircraft because of the very nature of the channel itself and the difficulty for taking proper evasive tactics.

Seventh, the distance and time factors: I have pointed out that while there is a slight distance advantage, this factor is of little consequence and that the important thing, from a national defense point of view, is that as much time as possible be saved in order to speed up shipments and in order to reduce the period of exposure to hostile attack. It has been conclusively shown that insofar as this vital time factor is concerned, the St. Lawrence seaway offers no advantage whatsoever; indeed it is at a disadvantage compared with existing routes.

Eighth, types of ships which could use the seaway: American shipping lines could not operate through the proposed seaway because of the limited draft. The 27-foot canals and channels mean that vessels can operate only with a draft of about 24 feet. Ninety percent of United States cargo vessels operate with a loaded draft substantially in excess of that, and most of the ships built under our wartime program for cargo carriers exceed this draft. This utterly eliminates the usefulness of the seaway as an alternate or reserve route in time of war. This unquestionably means that substantially all the traffic which might move via the proposed waterway would be in foreign bottoms. Recollection of the sad state in which we found our merchant marine at the outset of the war and of the most unhealthy consequences of such a condition ought to be sufficient to prevent our deliberately contributing to the reestablishment of that situation.

Ninth, shipbuilding and ship-repairing facilities: No convincing justification has been advanced for changing the pattern of our shipbuilding and ship-repair industry. It served us well in the last war, and there is nothing to indicate that the foreseeable war of the future demands any such drastic change as is contemplated here. Not only is there no justification, but the situation itself, because of the other factors involved, would make

such an undertaking very questionable indeed.

Tenth, the iron-ore situation: Testimony from experienced and expert witnesses indicate that the often-reported depletion of iron-ore reserves in the Lake Superior region is distorted. The development of the St. Lawrence seaway would be a very important step in the direction of making this country dependent upon importation from foreign countries for iron ore, one of our most vital raw materials. We still remember with regret our dependence at the beginning of World War II upon importations from foreign countries for rubber and certain other vital raw materials. Our policy in connection with a material as vital to our safety and economy as iron ore should be farsighted and not shortsighted. The farsighted policy in this case certainly calls for development of our own resources of iron ore, and the Federal Government should certainly refrain from placing obstacles in the way of pursuing such a course.

Eleventh, the amount of easement on railroads and port facilities: It has been clearly demonstrated, using even the most favorable and optimistic estimates of proposed new tonnage over the seaway, that the amount by which the seaway would ease the wartime strain on other means of transportation is wholly negligible and cannot be taken into account when dealing with this problem.

Twelfth, the Army's attitude: The Secretary of the Army has testified that the St. Lawrence seaway is not vital to our national defense. The best he could say for it was that it was helpful.

I submit that there are so many things which we have not done and which we should do for our national defense, things which are absolutely vital, that it shows a complete lack of sense of proportion to embark on this project when we have left unsolved the question of adequate American air power, when we have left unsolved the question of military manpower, when we have left unsolved the question of developing a military strategic plan for the defense of the United States, and when we have left in an unfinished condition the project of developing stock piles of strategic raw materials without which we cannot hope to fight a modern war.

I submit, in closing this phase of the discussion, that we would be doing the people of this country a very great disservice if we sought to justify construction of this seaway on the grounds of national defense. I have mentioned other pressing problems pertaining to our national security which demand priority and which have a real potential value as defense assets.

Mr. President, in the remarks which I have made, I have sought to demonstrate, first, that this matter should be before us as a treaty and not as an executive agreement. I have tried to convey to the Members of the Senate how dangerous it is to let the executive branch decide that a matter should be passed through the Senate by a majority vote rather than by a two-thirds vote simply because the executive branch happens to think that it is important. If this principle is carried to its logical conclusion, there may very well never be another treaty before the Senate.

Second, I tried to show that the self-liquidating feature depends on considerations which lead one to the conclusion that the tolls which are contemplated could not possibly pay for the project—although they would increase the shipping costs.

Third, I have sought to demonstrate that the contention which is made in behalf of the St. Lawrence seaway that it will be an addition to the national defense is untrue, and that the reverse might more nearly be the case.

Fourth, I have set forth the opinions of the best experts and engineers to show that the seaway is an impracticality from a realistic standpoint, in that the channel is too shallow for modern ships, that the seaway is frozen for such a large part of the year as to render it unusable, and that a host of the leading shipping men in America have stated over their signatures that they would not use it.

Fifth, this, of course, should disqualify the project even in the minds of those who favor an effective seaway which would actually work. Even the Senator from Wisconsin would certainly not be benefited by a seaway which could not be used by American shipping—and the people of the Middle West certainly would not.

Sixth, Mr. President, we confront enormous expenditures this year for the Government as a whole. We are being asked to appropriate $6,800,000,000 for the first 15 months of the Marshall plan. These huge expenditures are one factor which contributes to those forces of inflation which are threatening the very livelihood of the American people.

Is this the time to add to this burden, and to add to it in an unspecified amount? I say unspecified because no one knows and none of the proponents have asserted what the ultimate cost of this project may be, when we add to the cost of the seaway the cost of deepening the chief harbors of the Great Lakes. Certainly, a figure of $750,000,000 does not seem an extravagant one to claim for the net cost of the project.

These are the arguments which I present to the Senate. I said at the outset of my remarks that I would not present a single sectional consideration. I have not done so. The arguments which I submit must appear with equal force to every Senator, no matter what part of the country he represents. We can all appreciate the importance and value of canals and seaways in principle—I know that I do—and still realize that this project as it is presented to us today does not by any reasonable argument justify itself.

EXHIBIT A

[From the CONGRESSIONAL RECORD, May 8, 1947, in the Senate]

THE ST. LAWRENCE SEAWAY

Mr. OVERTON. Mr. President, when the proposed compact between the United States and the Dominion of Canada with reference to the St. Lawrence seaway was presented to the Senate, the bill undertaking to improve it and implement it, together with the compact—or treaty, as I prefer to call it—was referred to the Committee on Commerce. Since then another bill has been introduced and has been referred to the Committee on Foreign Relations of the Senate.

When the St. Lawrence seaway treaty was before the Senate, together with the first bill, known as the Aiken bill, and was under the jurisdiction of the old Committee on Commerce, that committee was headed by the late Josiah W. Bailey, of North Carolina. Blessed be his memory. The late Senator Bailey was not only a great student, a man of profound knowledge and great ability but was very thorough in any undertaking to which he applied himself. He wanted all the information he could obtain with reference to the treaties which existed between Canada and the United States regarding boundary lines and boundary waters, and also all the information he could obtain with respect to the proposed compact. Therefore, among other things, he addressed a letter to each of the American-flag steamship lines operating from Atlantic and Gulf ports and on the Great Lakes asking the various steamship lines whether they expected to utilize the seaway if constructed, and to what extent, and requesting their views generally on the subject matter of the proposed treaty. He received replies from practically all the steamship companies to which he addressed letters. He addressed them to the American lines operating along the eastern seaboard and the Gulf coast and to quite a number of steamship companies operating on the Great Lakes.

He received 32 replies. He was anxious prior to his death that those replies be laid before the United States Senate. That task has been assigned to me. I regard it as a very solemn obligation. I am proposing now to discharge the duty which I owe to the late Senator Bailey.

I shall not at this time enter upon a discussion of the treaty. I merely wish to read these letters in order that they may appear in the body of the RECORD. I ask that I may proceed without interruption until the reading of the letters has been concluded.

The first letter which I shall read is from the Robin Line, Seas Shipping Co., Inc., 39 Cortlandt Street, New York 7, N. Y. It is dated April 12, 1946, addressed to Hon. Josiah W. Bailey, and reads as follows:

SEAS SHIPPING CO., INC.,
New York, N. Y., April 12, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SIR: Receipt is acknowledged of your letter of March 12, 1946, in which you requested my views on the proposal to construct a seaway through the Great Lakes and St. Lawrence River and install power production facilities in the international section of the St. Lawrence River. You asked whether we have any plans to navigate the St. Lawrence with our own ships.

At this time we have no plans to navigate the St. Lawrence with any of our vessels. The vessels which we own and will operate in commercial service are all large and could not safely navigate the proposed 27-foot channel when fully laden. This condition is true of a very great majority of commercial vessels under the American flag today.

The proposed seaway might be helpful to foreign shipowners who have vessels of medium size and with comparatively shallow draft. The majority of American shipowners seem to be opposed to the proposition since they anticipate that the seaway would be used by foreign-flag vessels with a consequent reduction in freight available to American-flag vessels using the major seaports of the United States.

It does not appear to me that the proposed seaway would offer any very great savings to shippers. Water transportation via the Great Lakes and New York State Barge Canal is

available to Midwest shippers, and I doubt that the savings afforded by direct steamer service from the Great Lakes ports would be of any great consequence.

Leaving aside any power production or national-defense considerations which may or may not be sufficient to justify its construction, I consider the proposed seaway to be economically and commercially unjustifiable. It does not appear to me that there is any possibility that it would ever be a self-liquidating project, since I understand it is to be free of toll.

There have been widely varying estimates of its cost, and even if the most optimistic view is taken, it appears to me that the savings which might be effected would redound to the benefit of one section of the country and one segment of its economy to the prejudice of other very important regions and industries.

There are also, as you know, very conflicting views as to the volume of freight which might move on such a waterway. It would be open to navigation at best for only about 7 months of the year. If it should be used to the extent which its advocates visualize, other forms of transportation would undoubtedly suffer and the shippers using the waterway might find themselves unable to secure adequate transportation for their products during the months in which the proposed seaway would be closed to navigation.

Another consideration which seems to have been overlooked by many of the proponents of the seaway is that in order to accommodate the volume of ocean-going traffic which is contemplated, it would be necessary to construct very extensive and costly harbor improvements at ports on the Great Lakes. This would add very greatly to the over-all cost of the seaway and no doubt impose a burden on States and/or municipalities along the Great Lakes.

I have seen no figures which convince me that the proposed seaway would not constitute a direct drain on the Treasury of the United States, nor that the gains to the national economy would in any degree offset this drain. Consequently, the expense would come from the pockets of the taxpayers, and, in my opinion, it is most necessary that efforts be made to reduce governmental expenditures, reduce our public debt instead of increasing it, and reduce taxes, in order to stimulate business, industry, and employment.

Very truly yours,

ARTHUR R. LEWIS, Jr.,
President.

The next letter is from the Colonial Navigation Co., of New York City, dated April 4, 1946, addressed to the late Senator Bailey, and reads as follows:

COLONIAL NAVIGATION CO.,
New York City, April 4, 1946.

Senator JOSIAH W. BAILEY,
United States Senate.

DEAR SENATOR: Since our operations have been confined to the coastwise trade we have not given detailed study to the project, but from my knowledge of the characteristics of American ships operating in the foreign trade, it would appear that the 27-foot depth of the channel would not be sufficient and, further, that because of the fact that for a large portion of the year the waterway will be closed because of ice conditions, it would not seem to warrant the large expenditure of money necessary to carry the project to completion. There are, I understand from statements submitted, a great many other objections, but I think the shallow draft—plus the very great cost—should be sufficient to dispose of the project unfavorably.

Very truly yours,

J. B. DUNBAUGH,
President.

The next letter, which is from the American Petroleum Transport Corp., of New York City, dated April 2, 1946, addressed to the late Senator Bailey, reads as follows:

AMERICAN PETROLEUM TRANSPORT CORP.,
New York, N. Y., April 2, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate.

DEAR SIR: I wish to acknowledge receipt of your letter of March 12, relative to the proposed seaway through the Great Lakes and the St. Lawrence River.

I have always felt that this seaway is not justified, that the expense would be totally unwarranted for the traffic involved, and that the present waterway can handle all of the traffic that is required from the ocean to the Great Lakes and return.

It is my firm belief that this seaway would be of very little benefit, if any, to American steamship owners, and I see no possibility of this St. Lawrence seaway being used by our ships.

Very truly yours,

AMERICAN PETROLEUM TRANSPORT CORP.

Mr. President, the next letter is from Cargo Carriers, Inc., of Minneapolis, Minn., and is dated April 1, 1946. It reads as follows:

CARGO CARRIERS, INC.,
Minneapolis, Minn., April 1, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate.

DEAR SENATOR BAILEY: We appreciate your letter of the 12th asking for our opinion with respect to the St. Lawrence seaway.

We have no plans for the use of this seaway, although we move large amounts of freight from points on Lake Superior and Lake Michigan to the seaboard, both for export and for domestic use, and we also forward substantial quantities of this freight from the seaboard to foreign destinations, principally Europe. Our business is the transportation of bulk commodities, principally grain.

Further it is our belief that the amount of goods moved direct from Great Lakes points to foreign countries over the proposed St. Lawrence seaway, if constructed, will be disappointingly small, very much less than claimed by the proponents of the seaway.

In order to bring about a movement of goods directly between foreign countries and points on the Great Lakes, or between points on the Atlantic seaboard, and points on the Great Lakes by way of the proposed St. Lawrence seaway, it would be necessary that ships built for operation on the Great Lakes also operate on the ocean and that ships built for ocean operation also operate on the Great Lakes. We do not feel that either of these operations would be practical or economical for the better classes of ships now in operation.

Practically all of the ships operating on the Great Lakes are a special type of construction, built for operation only on the Great Lakes. It is our opinion, and we believe the opinion of all other operators, that these ships could not operate successfully on the ocean. They carry large cargoes at comparatively shallow drafts because of their length in proportion to the other dimensions. Because of this greater length in proportion to the other dimensions than is used in ocean boats, these lake boats would not be safe for ocean operation.

Just before the war, and during the war, there have been built a great number of new cargo vessels, enough to carry a large part of the commerce of the important maritime nations. These new boats, such as our country's Liberty ships and Victory ships, require a channel much deeper than 27 feet when they are fully loaded; many of them requiring channels as deep as 35 feet. Inasmuch as the plans for the proposed seaway appear to provide a channel of no more than 27 feet, we cannot conceive of these newer, better, and more economical ocean ships going into the Great Lakes with cargoes or to get cargoes.

It may be said that these ships can go to a port on the Great Lakes, such as Duluth or Chicago, and load enough cargo to put them down to a draft of 26 feet or 27 feet, and then complete their cargo by loading to their full draft at Montreal or some such port as that. No doubt that could be done, but it is our opinion it is not economical for ships, especially those with heavy operating costs, to travel more than 2,200 miles with only a part cargo one way, or even both ways.

It may be possible to make changes in the plans for the seaway which would provide a channel as deep as 35 feet. However, if this were done, we would think it would increase the cost to a point which would be considered prohibitive even by those who now favor the seaway. In the case of grain, we do not see how the cost of the transportation alone between a Great Lakes port and a foreign country would be reduced by shipping direct under the cost of the transportation which is now in use. The saving, if any, would be the saving due to the elimination of the cost of transfer from lake ships to ocean ships. At most, this involves two transfers between Duluth and the foreign country at an aggregate cost of no more than 2 cents per bushel. It is our opinion that the greatest possible amount of grain exports over the proposed seaway would be an average of 50,000,000 bushels per year. Assuming the maximum possible saving of 2 cents per bushel, the total possible saving on grain would be $1,000,000 per year.

It is our belief that should the seaway be completed, it would be found that very few large ships, and therefore comparatively small amount of freight, would make the trip direct between our Great Lakes ports and foreign countries. It occurs to us that there may follow a demand for some encouragement for such business to use the seaway. No doubt it would be suggested that some sort of Government subsidies be provided to encourage the through transportation and use of the seaway. We may be needlessly concerned about this, but such a demand seems to arise whenever any new vessel operation is found to be unprofitable and uneconomical.

In this letter we have tried to confine ourselves to approaching the matter from our own point of view as a vessel operator. A number of other thoughts and comments which we have with respect to the proposed seaway have been reported in the newspapers and news letters as having been well covered in Senate committee hearings. In case more detailed information or a statement of our views at greater length is desired, we shall be glad to furnish them.

Yours very truly,

F. J. HAYS.

The next letter is from the Moore-McCormack Lines, Inc., of New York City, and is dated March 30, 1946. It reads as follows:

MOORE-MCCORMACK LINES, INC.,
New York, N. Y., March 30, 1946.

Hon. JOSIAH W. BAILEY,
Committee on Commerce,
United States Senate.

DEAR SENATOR BAILEY: In response to your letter of March 12, in which you have asked for our view with regard to the feasibility and economy of navigating the proposed Great Lakes-St. Lawrence seaway, with vessels which would be adaptable to operation on the Great Lakes, the St. Lawrence River, the Welland Canal section, and at the same time be suitable for continuous navigation on the high seas.

We are operating the following overseas routes:

1. North Atlantic ports and South Atlantic ports of the U. S. A. to the east coast South American ports.

2. North Atlantic ports of the United States of America to the Scandinavian and Baltic ports.

3. Pacific coast ports of the United States of America and Canada, to the north coast and east coast South American ports via the Panama Canal.

Of the 16 vessels which were taken over by the Government (only a part of which have been thus far returned to us for private operation) and seven additional C3 vessels which are now in the course of construction, and three other vessels which we plan to build in the immediate future, there is but one—a C1 vessel—which could navigate safely the 27-foot channel of the proposed seaway.

Of course, all these ships could load to a depth which would permit them to traverse this seaway, but it would mean they would have to complete this loading at Montreal and other St. Lawrence ports, in order to give them full cargoes, thereby further building up Canadian commerce and commercial activities.

As ship operators, we are opposed to the construction of this proposed St. Lawrence seaway, for we do not believe the construction of such a seaway would be to our interest or to the interest of the country. It is our opinion that such a seaway, if constructed, would be of particular value to foreign operators of small vessels. The diversion of traffic between the interior points and the Atlantic seaboard ports would militate against the maintenance of a strong and efficient American merchant marine.

No plans have been made by the company to utilize the St. Lawrence seaway. The position of the American steamship operators has been ably presented to the Senate Foreign Relations Subcommittee by the American Merchant Marine Institute, Inc., and from the Maritime Association of the port of New York, copies of which statements are attached for your convenience. We endorse the position taken by these two associations.

Very truly yours,

ALBERT V. MOORE, *President.*

I next read a letter from the United States Lines Co.:

UNITED STATES LINES CO.,
New York, March 28, 1946.

Hon. JOSIAH W. BAILEY,
Committee on Commerce,
United States Senate,
Washington, D. C.

MY DEAR SENATOR BAILEY: You were kind enough to ask me in a letter received a few days ago my opinion of the proposed St. Lawrence seaway as authorized in the joint resolution pending before Congress.

You inquire as to the "feasibility and economy of navigating the proposed seaway." Answering this, and speaking out of my long experience as a steamship operator, I must say that the waterway would be too shallow. The proposed 27-foot channel between Montreal and Lake Ontario would, in reality, be only a 24-foot channel because only ships of that or lesser draft could use it. Remember that a vessel should have a clearance of about 2 feet 6 inches, and that in addition a ship will draw 6 inches more in fresh than in salt water. Our Maritime Commission insists that owners and operators shall sail their ships "full and down." This is the answer to proponents of the seaway who are already arguing that ships using the seaway take aboard smaller loads to keep within the 24-foot draft.

Another reason why the project is unfeasible is that for about 7 months in each year it would be closed by winter. In addition, the canalized section at many points would be dangerous. Navigation would menace each other when passing, and the rocky shores of the canalized area would mean sinkings and in many instances total losses in case of collision. Then, too, fogs are prevalent and there would be few spots where the channel is narrow for ships to anchor with safety. All in all, from the point of feasibility, the proposal to spend hundreds of millions to provide this seaway is a fantastic one.

As to economy of navigation, there can be none because in its broader aspects the seaway discriminates against this Nation's merchant fleet. Into the merchant ships constituting this, our American taxpayers have poured more than $50,000,000,000. It is plain that the seaway would help reverse the American policy of fostering an American merchant marine. You might ask why, and my answer would be because only about 8 percent of our merchant ships could use it, and many of those ships are already obsolete. We have a war-built merchant marine of more than 5,000 vessels. Only about 400 of these have a draft of 24 feet or less. And remember, a small vessel such as might navigate the seaway is relatively as costly to operate as a large one and will carry only about one-third the cargo and earn only about one-third the money that its big brother will. The preponderance of ships able to navigate the canalized river would be foreign (more than 70 percent). Most of the traffic would move in tramp ships, none of American registry, and to the great detriment of our regularly operated American lines. Moreover, hazards encountered in the canalized section, due to narrow channels, currents, and fog would send the insurance rates soaring.

Another thing, nearly 100,000,000 tons of iron ore are lifted by America's tremendous lake fleet annually. The presence of this fleet in time of war is a national necessity. But if the seaway is constructed this fleet now carrying ore to the American railroads will languish and ultimately become dissipated.

And what of the domestic carriers which now give regular and satisfactory service from the Great Lakes to our American eastern seaboard? Will the railroads be satisfied and keep rates down if permitted to serve lake traffic only 5 months in the year?

In turn, how can the American steamship companies on the east coast afford to give virtually daily sailings to Europe during 12 months in the year when for 7 months cargo would be diverted from the east coast and carried in foreign tramp ships paying crews subnormal wages? Rate structures, built up through the years, would be shattered.

I shall not attempt to quote statistics to demonstrate that our port of New York, the greatest in the world, will inevitably suffer if the St. Lawrence seaway is built. The loss of commerce here will run into the hundreds of millions. Proponents of the canal have indicated their belief that the traffic diverted from New York would amount to only about 8 percent of the amount which goes through this port normally. They fail to emphasize that this 8 percent by value would amount to almost 25 percent. As an example, may I quote the following:

"Custom figures for 1938 fixing $413 a ton for passenger cars foreshadow an annual loss to the port of New York of $208,937,000 in value should automobile carryings be diverted to the seaway. What would be the loss to New York City, suffered by longshoremen, shipowners, brokers, truckers, warehouses, and pier rentals, cannot be estimated."

Concluding your letter, you ask me to say:

1. Whether the seaway as proposed would provide a saving to shippers and would prove attractive to shipowners.

2. Whether our company, the United States Lines, plans to navigate the seaway.

The answer to these questions is a blunt "No." Need I add that I am irrevocably opposed to the construction of this project?

Thanking you for providing me with this opportunity to express my views, and with kindest personal regards and warmest wishes,

Most cordially,

BASIL HARRIS.

Mr. President, I now read a letter from A. B. Sharp, president of the Eastern Steamship Lines:

EASTERN STEAMSHIP LINES, INC.,
Boston, Mass., March 28, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate, Washington, D. C.

DEAR SENATOR BAILEY: This refers to your letter of March 12 regarding the construction of a seaway through the Great Lakes and the St. Lawrence River, and the installation of power facilities in the international section of the St. Lawrence River.

I cannot add anything to the mass of information that has been submitted to Congress on this subject during recent years, except my personal opinion.

New England is largely against the project, but I think I am not particularly biased on account of being located in this area, as I grew up on the shores of Lake Michigan and have been here only a few years.

From the standpoint of the seaway operation, I see nothing whatever in it for a company in the domestic steamship service, as the length of the haul as compared with the land haul from any American port on the Great Lakes to any American port elsewhere, would positively prevent successful steamship operation. I believe that anyone familiar with present-day steamship costs and rates, and land transportation rates, must necessarily reach this unequivocal conclusion. Any studies that I know of that have been made in the past in this connection must now be thrown into the wastebasket, as steamship operating costs are so much higher than they were when private steamship operations ceased almost entirely because of the war—increases in steamship labor nearly 100 percent; repairs and maintenance probably more than 100 percent, fuel over 50 percent.

With respect to use of the seaway for foreign commerce, there is no possibility of its use in competition with foreign-flag ships unless the Government pays large subsidies. This would appear to accomplish only the elimination of income for the labor and capital now engaged in competitive land transportation, transfer a large part of the income to foreign labor and capital, and place a heavy burden on all the taxpayers of the country.

With respect to both domestic and foreign trade, it must be borne in mind that a preponderant majority of American ships in the enormous fleet which has been built and is now available for ocean operations, consists of large vessels which could not sail the seaway with more than about 60 percent of their carrying capacity in tons of cargo. The 27-foot proposed depth of water simply would not permit it. Smaller foreign craft now in existence, and many more building, would surely have an overwhelming advantage in foreign trade, and again there is no way to overcome this advantage unless the Government builds another fleet for use in the seaway, and provides it with subsidies sufficient to make competition possible.

To me this proposal is a wild, uneconomical scheme which will cost vast sums of money to place in operation, and will impose a never-ending additional great burden upon the people of our Nation.

Very truly yours,

A. B. SHARP,
President.

The following is a letter from Arnold Bernstein, of 17 Battery Place, New York:

ARNOLD BERNSTEIN SHIPPING CO., INC.,
New York, N. Y., March 28, 1946.
Hon. JOSIAH W. BAILEY,
United States Senate,
Chairman, Committee on Commerce,
Washington, D. C.

DEAR SENATOR: Responding to your letter of March 12, I would say that, generally speaking, I favor the development of natural waterways and installation of power facilities made possible thereby.

I can give no opinion with regard to any specific development, except perhaps to comment on the effect that a new seaway from the Great Lakes through the St. Lawrence River would have on changing the movement of ocean cargo.

If such a seaway could be operated throughout the whole year and not be closed by ice through the winter months, I would favor this project, despite losses and inconveniences that may be anticipated during the initial period of readjustment and adaptation. Since this new seaway could be used for 6 months of the year only, however, I should think—

(a) Assuming that export and import will reach the prewar level, a substantial percentage of the traffic of the whole lake area will use the new seaway instead of going overseas from New York;

(b) Water transportation does not involve only supplying ships and shipping needs, but railroad yards, warehouse facilities, piers, bunker facilities, and many other installations run by experienced organizations;

(c) Deviation of a great percentage of cargo means proportionate idleness of such installations in New York, and at the same time the construction in the new loading and discharge ports of the same kind of facilities;

(d) The lines serving the various world routes from New York and out-ports will either lose the traffic diverted to the new seaway to new lines founded for this purpose, or will have to open branches of their service, allocating part of their tonnage to the traffic carried directly from the Lakes. Since the most important lines combine passenger and cargo service, and since the passenger service can hardly be transferred from New York, in many cases the provision of additional cargo steamers will be involved, creating quite a serious problem for the established lines.

Without careful study, I do not feel qualified to give an opinion in regard to the benefit industry and agriculture may gain from the project. However, for the reasons indicated above, it seems to me doubtful, at least as far as shipping and port facilities are concerned, if the gain reasonably to be expected from the new seaway would justify the new investment, and at the same time, losses that New York as a world harbor must expect from the loss of part of its traffic.

Respectfully,

ARNOLD BERNSTEIN.

I now read letters from 23 other steamship companies whose names appear on the headlines of the letters:

MARINE TRANSPORTATION LINES, INC.,
New York, N. Y., March 26, 1946.
Hon. JOSIAH W. BAILEY,
United States Senate,
Committee on Commerce,
Washington, D. C.

MY DEAR SENATOR BAILEY: We have endeavored to keep informed concerning the proposed seaway to the Great Lakes and St. Lawrence River and the construction of power facilities contemplated by pending legislation before the Congress, and about which you deal in your letter of March 12.

After careful examination into the possibilities of use of the improved waterway facilities projected, and after considering the information gathered as to present and prospective traffic, we arrived at the conclusion that, so far as transportation is concerned, the expense for the seaway project would be unwarranted. We accordingly felt that there was no justification, insofar as our company is concerned for extending our operations into the Great Lakes area via the St. Lawrence, other than in small ships which from time to time have been suitable for such trade under existing conditions. Our consideration led us to believe that no substantial savings to shippers would result from the development proposed.

From the standpoint of the American merchant marine, it seems to me that the project might prove to be disadvantageous, altogether aside from the matter of initial and recurring costs for the development, both construction and maintenance.

Yours very truly,

W. N. WESTERLUND,
President.

ALCOA STEAMSHIP CO., INC.,
New York, N. Y., March 26, 1946.
The Honorable JOSIAH W. BAILEY,
The United States Senate,
Washington, D. C.

DEAR SIR: In your letter of March 12 you ask for our view regarding the proposed St. Lawrence seaway and inquire whether we plan to navigate the seaway with our ships.

We have no plans for using the proposed seaway. If the seaway is used to any considerable extent for overseas shipping the vessel operators, port facilities, and the railroads serving the United States north Atlantic ports will suffer the disadvantage of a peak during about 5 months of the year and a slump during the balance of the year, resulting in higher costs and less efficiency. Conceivably, an increase in ocean and rail rates would follow. Such a prospect would certainly discourage modernization and improvement of the facilities at Atlantic ports.

Considering the capital required for construction of the canal, the handicaps of seasonal operation, and the adverse effects on the railroads and north Atlantic ports, we doubt very much whether the project can be considered an economic one.

Yours very truly,

HARMAN LEWIS,
President.

GRACE LINE, INC.,
New York, N. Y., March 21, 1946.
Hon. JOSIAH W. BAILEY,
United States Senate,
Committee on Commerce,
Washington, D. C.

DEAR SENATOR BAILEY: Receipt is acknowledged of your letter of March 12, asking for our views in respect to the proposed construction of a seaway through the Great Lakes and St. Lawrence River. This project has been under consideration for a long time and has received careful thought and study by the shipping industry of the country. I believe it entirely correct to say that the shipping companies are unanimous in their opposition to the St. Lawrence waterway plan insofar as that plan would contemplate the development of ocean-going traffic as contrasted with that part of the proposal relating to the development of electric power. The American Merchant Marine Institute, whose members own and operate the major portion of the American flag merchant fleet engaged in foreign and domestic deep-sea trade, and of which we are a member, has expressed its opinion on the subject with our entire concurrence in a letter to the Honorable CARL A. HATCH, chairman, Senate Foreign Relations Subcommittee, under date of February 26, 1946.

Replying more specifically to the questions raised in your letter regarding this company's possible interest in operating its vessels through the proposed seaway if it is constructed, I have to advise you that Grace Line has nearly completed a construction program of 18 new vessels, not one of which could safely navigate the proposed seaway without leaving unfilled some 15 to 20 percent of their cargo capacity. Your familiarity with shipping matters will enable you to understand without further explanation that no vessel can compete in international trade unless it is able to take full advantage of its size and capacity.

The normal peacetime operations of the Grace Line are between the Atlantic, Gulf, and Pacific coast ports of the United States, and the countries to the south of us in Central and South America. Such of the cargo normally carried in our ships as originates from or is destined to the Great Lakes area is moved to and from seaboard by existing transportation systems such as railroads, canals, and trucks. Particularly as to our ships servicing the United States Gulf area, the Mississippi Barge Canal system has offered cheap and efficient transportation of export and import cargo to the manufacturing centers of the Middle West. Insofar as trade with Central and South America is concerned, it is inconceivable to us that there would be any economy in the transportation of goods originating in and destined to the Great Lakes area via the circuitous route of the St. Lawrence waterway and thence along the entire Atlantic seaboard on the water routes leading to the South.

It is conceivable that there might be some economies for shippers from the Great Lakes area to northern Europe by the use of the proposed St. Lawrence waterway, but it is our considered judgment and that of the entire shipping industry that such economies would, in the aggregate, be insignificant as compared with the cost of construction, maintenance, and operation of the proposed seaway.

I trust that these individual views may be of some value and would be delighted to reply to any further questions which you may have.

Respectfully,

R. R. ADAMS,
President.

CALMAR STEAMSHIP CORP.,
New York, N. Y., March 21, 1946.
Hon. JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

SIR: We acknowledge receipt of your letter of March 12 in which you advise that there is pending before the Congress a joint resolution to authorize an agreement with the Canadian Government for the construction of a seaway through the Great Lakes and the St. Lawrence River and the installation of power facilities in the international section of the St. Lawrence River.

We have no plans to navigate the St. Lawrence seaway with our own vessels and are unalterably opposed to the proposed St. Lawrence seaway for the following reasons:

1. Vessels that may use this proposed seaway will only be able to load up to a draft of 24 feet. At the present time the vessels we are operating, fully loaded, have a draft of 28 feet 6 inches, and the vessels we propose to operate will have a draft of 27 feet 8 inches. Due to the lesser density of fresh water, a vessel will draw 6 inches more than in salt water. The port rules of Montreal require 2 feet 6 inches bottom clearance for the issuance of a sailing permit. Therefore, our vessels could never load full cargoes if we were to use the proposed St. Lawrence seaway.

2. We load our vessels at Baltimore, Md., and Philadelphia, Pa., and discharge them at Boston, Mass., New York, Philadelphia,

Pa., and Baltimore, Md. The time for safe navigation on the Great Lakes and through the proposed seaway will be limited to about 7 months a year, depending on weather conditions. To retain dock facilities for only 5 months out of a year at the ports mentioned, such facilities to be idle during the 7 months of open navigation on the proposed seaway and Great Lakes, is economically unsound.

3. The suggestion has been made that American operators could use the proposed St. Lawrence seaway by only partially loading their vessels instead of bringing them down to their legal-load marks. In our opinion, the proposed St. Lawrence seaway would provide little, if no savings to shippers, because of necessity vessels that load such part cargoes and must incur 8,238 miles of extra steaming, would have to secure a great deal higher rate for cargo loading at lake ports.

4. The proposed St. Lawrence seaway has no attraction to the ship operator, either from the standpoint of economy or from the standpoint of business.

The proposal for the construction of a seaway through the Great Lakes and St. Lawrence River is in our opinion economically unsound and highly detrimental to the best interests of the American merchant marine.

Very truly yours,

H. W. WARLEY,
President.

PAN AMERICAN PETROLEUM & TRANSPORT CO.,
New York, N. Y., March 21, 1946.

The Honorable JOSIAH W. BAILEY,
Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SIR: In reference to your letter of March 12 regarding the joint resolution which is now pending before the Congress to authorize an agreement with the Canadian Government for the construction of a seaway through the Great Lakes and the St. Lawrence River and the installation of power facilities in the international section of the St. Lawrence River, we have no plans to navigate the proposed seaway with our ships if and when such legislation should be approved.

Our company operates along the Atlantic coast and points adjacent thereto in the 17 States from Maine to Florida. The seaway would therefore be of no benefit to us. From an oil-tanker angle, it would be rather difficult for any company to utilize the seaway as at present outlined. As you are aware, the large quantity of T-2 and T-3 tankers built by the United States Government, and which were necessary for the successful prosecution of the recent war, will make these tankers practically the standard for the carriage of oil on ocean waterways for a large number of years to come. These boats have a 30-foot draft when fully loaded in salt water and would have a draft of very close to 31 feet in fresh water. The proposed channel for the seaway being limited to 27 feet would absolutely eliminate the use of the T-2 or T-3 type of tanker.

Inasmuch as the normal movement of oil by tanker is from the Gulf coast, the distance to be covered to the mouth of the St. Lawrence River, which is approximately latitude 50° north, and then the long southwest movement through the seaway and the Great Lakes, would increase the cost of the movement of products to such an extent that the writer does not see how it would be possible to compete with the more efficient pipe-line movement of crude and products from the Gulf to the central and northern portion of the United States which now obtains.

From the standpoint of the petroleum industry, there certainly can be no justification for the tremendous expenditure which would be required of our Government to make this artificial waterway, and also the heavy annual upkeep which would be necessitated by its use.

Very truly yours,

JAMES PATTERSON,
Vice President.

MISSISSIPPI SHIPPING CO., INC.,
New Orleans, March 20, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

MY DEAR SENATOR BAILEY: I have your inquiry of March 12 concerning the probability of navigation between the ocean and the Great Lakes through the proposed St. Lawrence seaway.

The commercial interests in the Mississippi Valley have generally opposed the seaway. The ground of opposition has been that it would divert import and export traffic from the Mississippi system which has already been improved by the National Government at heavy expense.

I have not actively opposed the project, personally, because I have grave doubt that a large two-way traffic could be practically developed. The Great Lakes can and do handle the exportable surplus of grain at costs as low as anything known in ocean transportation under the United States flag.

If the seaway were constructed as planned, it would enable lake boats to carry both American and Canadian grain down to Montreal and shift the transfer point from Buffalo 500 miles farther toward the sea. That would be the big exportable surplus which might attract ocean ships into the Great Lakes. However, in the reverse direction, the canal would be available to merchandise from the western Europe and little else and I doubt whether Middle West distributors of this limited type of freight, when divorced from the great distribution through Atlantic and Gulf ports, would give a paying two-way traffic for many ocean-going ships. Furthermore, while the depth of 27 feet is adequate for Great Lakes boats and most Great Lakes harbors are hardly dredged to this depth, 27 feet would necessarily prove a very definite limitation which would bar the newer and better ships which are now being built for ocean traffic. For example, the standard C-2 and C-3 vessels, the Libertys and Victorys, cannot safely be loaded to full draft and navigate this channel, and certainly 30 feet over the miter sills of the 15 locks would put a very definite limitation upon the seaway's future value.

At New Orleans, we have a lock 75 feet by 600 feet with 30 feet 6 inches over the miter sills which leads from the Mississippi River into the newer inner harbor. This is proving such a limitation upon our harbor development that we are presently urging the United States Government to give us a direct seaway from inner harbor to the Gulf with a depth of 40 feet and a bottom width of 600 feet. It is our belief that any port served by a channel of lesser dimensions will be greatly limited in its future expansion.

The fleet of the Delta Line is made up of Standard C-2 and C-3 ships. We operate between Gulf ports and the east coast of South America. The St. Lawrence seaway would offer no inducement to us.

The barge rates on the Mississippi River from New Orleans, offer the cheapest entrance to the port of Chicago of any we know. It is our judgment that the cost of operating deep-sea ships through inland passages of 2,250 miles with the time spent in passing through 15 locks, would be more expensive than the single cost of one transfer from the ship to barge at New Orleans in view of the existing barge rates for a 1,500-mile haul from New Orleans to Chicago.

Very truly yours,

THEODORE BRENT,
President.

AMERICAN SOUTH AFRICAN LINE, INC.,
New York, March 20, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Committee on
Commerce, United States Senate,
Washington, D. C.

DEAR SENATOR BAILEY: Thank you for your letter of March 12, asking my view on the proposed St. Lawrence seaway.

I have given this subject detailed study and consideration and have reached the conclusion that whether or not such a project is completed, it is not economically feasible for American South African Line to use it. In the following paragraphs I shall try to set forth my explanation for this belief in greater detail.

The first question to be considered is the draft of the channel. The proposed draft is 27 feet. American ships are expensive to construct and expensive to operate. To enable some degree of competition with foreign lines, we have increased the draft of our ships so as to carry more cargo per voyage. The new fleet of American South African Line is composed of United States Maritime Commission C-3 type vessels. These ships have a draft, when down to their marks, of 29 feet 1 inch. Minimum navigation requirements of the St. Lawrence seaway require 2 feet 6 inches between the bottom of the hull of the vessel and the river bed. Another 6 inches of the draft would be lost by reason of the fact these ships would be operating in fresh water rather than in salt water.

Homeward cargo from South and East Africa is mainly manganese and chrome ore; that is weight cargo. If our ships were to use the St. Lawrence seaway, instead of loading them to the marks, 29 feet 1 inch, they could only be loaded to a draft of 24 feet. For a ship of the C-3 type, approximately 58 tons of cargo are required to change the draft 1 inch. This means that, if one of our ships were to be loaded for the passage through the St. Lawrence, she would carry 3,498 tons of cargo less than her capacity. This is not economically justified.

With the high cost of American ship construction and operation, as opposed to foreign-flag lines, I do not believe it would be sound policy to construct smaller ships specifically for this trade. The St. Lawrence is considered safe for navigation only 7 months of the year. If special ships were designed and constructed for this trade, they would not be able to compete with our present vessels during the balance of the year, inasmuch as their cost of operation would be about the same but carrying capacity would be so much less. It would not be sound policy to leave these ships idle for the 5-month period the St. Lawrence is not navigable. On the other hand, their presence in other routes, during the off season, would only cause great confusion and disorganization in the shipping industry.

If our ships were to go to the Great Lakes ports, we should have to add a considerable sum to our cost per voyage, resulting in greatly increased cost to the shipper. This increase would consist not only of the expense of vessel operation for a longer time per voyage than at present, but we should also have to include the cost of maintaining branch offices or agencies at each of the ports of call for the entire year. I do not consider it advisable to open and close these offices for only a part of each year or to shift

the personnel to various other offices at off seasons. The operation of a ship requires too much detailed knowledge of a port to make such shifting of personnel sound policy.

Another question of vital importance is the question of safe navigation. It is understood many parts of the St. Lawrence seaway will be blasted out of solid rock—that, in parts, the channel will be suitable for one-way passage only.

This area is noted for the frequent occurrence of fog and mist. If one of our ships were to be caught in a narrow stretch of this channel, in a fog or mist, it is considered the ship would be in extreme danger, and the danger would be greatly aggravated by the possibility of the current of the river swinging the vessel onto the rocks. I do not believe a conscientious steamship operator is justified in jeopardizing a large oceangoing vessel by sending her on such a voyage, with its attending risks of loss of life, cargo, and vessel.

These added risks would contribute substantially to an increase in insurance rates. This, too, would be reflected in increased rates to the shipper.

In view of the foregoing, I wish to repeat most emphatically, the St. Lawrence project would not be attractive to American-South African Line, nor do I believe it would be attractive to the vast majority of American ship operators. Further, considering their long-range interests, I do not believe it would provide a real saving to shippers. On the contrary, I believe it would seriously disorganize present services from North Atlantic ports and would react to the detriment of both shippers and ship operators.

I thank you for giving me this opportunity to set forth my views on the St. Lawrence project and hope that they will be of assistance in determining your own actions with reference to Senate Joint Resolution 104.

Yours very truly,

JAMES A. FARRELL, Jr.,
President.

UNITED FRUIT CO.,
New York, N. Y., March 19, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SIR: Your letter of March 12, addressed to Mr. John A. Werner, president of the Fruit Dispatch Co. and asking his opinion as to the feasibility and economy of navigating the proposed St. Lawrence seaway, has been referred to the undersigned. The Fruit Dispatch Co., a subsidiary of the United Fruit Co., handles the distribution of our principal product, but the operation of the vessels is under the control of the parent company and for this reason Mr. Werner has turned your letter over to me.

For the past several years we have followed rather closely the arguments for and against this project and it is my considered opinion that the rather doubtful gains of a few sections of the country do not warrant the vast expenditure involved. I have read varying estimates of the cost of this project, ranging from $300,000,000 to almost $1,000,000,000, a large portion of which would be assumed by Canada. Is it not possible that Canada might find it difficult to meet this huge expenditure, thereby further increasing the portion that would have to be paid by United States funds?

First of all, it appears that the proposed 27-foot channel would preclude something over 90 percent of the American merchant marine, a good part of which was constructed during the war period, and over 80 percent of the world's tonnage, from using the seaway. In any event, because of the winter freeze the St. Lawrence would be navigable for only about 7 months of the year, and the same holds true to a lesser extent for the Great Lakes.

So far as this company's normal peacetime operations are concerned, it is imperative that the banana, a perishable commodity, reaches its markets with the least possible delay after the fruit is cut in the tropics, and even though the fruit is carried in refrigerated vessels it would be decidedly unwise to expose it to the extended additional distance that would be necessary in transit to Great Lakes ports; not only from the point of view of the additional mileage involved but also the necessarily reduced speed of the vessels in transiting the proposed seaway. It would be much more economical to discharge the fruit at United States Atlantic and Gulf ports and rail it to the interior markets.

Under these circumstances, even if the seaway project should become a reality in the future, it is most unlikely that this company's vessels will ever make any use of it.

I appreciate the opportunity you have afforded us to express our views in this matter.

Yours very truly,

J. J. KELLEHER.

STRACHAN SHIPPING CO.,
Savannah, Ga., March 19, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate,
Washington, D. C.

DEAR MR. BAILEY: Your letter of March 12 has been received.

Chicago, Detroit, Toledo, and Milwaukee and perhaps other outports of the Great Lakes, have for some time been served by relatively small vessels capable of navigating the present locks and crossing the Atlantic Ocean, this service having been initiated and operated by Scandinavian owners.

It has been my understanding that these vessels have been able to select freight which gave the highest revenue, and the operation must have been profitable because I understand now that the war has ended it is about to be resumed.

A very large volume of traffic originates in the Middle West and it appears that the contemplated seaway through the Great Lakes and the St. Lawrence River would be utilized, but I am incapable of expressing an opinion as to whether the projected channel for larger and deeper draft vessels would justify the enormous construction cost.

Again, I seriously doubt if the large, fast, expensive American-flag ships would be able to compete successfully in this trade when their cargoes on regular runs would likely be made up of a large percentage of low-paying freight. There must be a considerable slowdown in negotiating 15 locks, and I am sure these vessels would not be able to run at full speed in the canal.

It also seems to me that vessels with slower speed, and perhaps these would be largely under foreign flags, would get the greatest benefit from this seaway development, because of their cheaper cost of construction and operation.

One thing that impresses me is that at present ships that are operating in the Atlantic and in the Gulf are compelled to make a number of ports of call in order to fill, and if this traffic from the Great Lakes area, which now largely moves to the eastern ports and to the Gulf, is withdrawn, it would make it all the more difficult for the ships serving the eastern and Gulf ports to fill, and would perhaps mean either curtailing of service or additional ports of call.

This proposed direct service from the Lakes would unquestionably provide some savings to shippers during the open season.

While we have no plans to navigate the St. Lawrence seaway with our own ships, and have made no careful study of the possibilities, it does not appear to me that this trade route will prove very attractive to American ship operators.

RONI W. GROVES,
Partner.

SEATRAIN LINES, INC.,
New York, N. Y., March 18, 1946.

Hon. JOSIAH W. BAILEY,
Committee on Commerce,
United States Senate,
Washington, D. C.

MY DEAR SENATOR BAILEY: We have your letter of March 12 regarding the construction of a seaway through the Great Lakes and the St. Lawrence River.

We wish to advise that we have no plans to navigate the St. Lawrence seaway and we have been very skeptical that the additional cost over and above that required for power development would be warranted from a transportation standpoint. We doubt if the difference in cost between rail transportation through the seaway for only portions of the year is so great as to warrant any large expenditure for such a seaway.

Very truly yours,

GRAHAM M. BRUSH,
President.

WEST INDIA STEAMSHIP CO.,
New York, N. Y., March 18, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Senate Committee on Commerce, United States Senate, Washington, D. C.

DEAR SENATOR BAILEY: In response to your letter of March 12, 1946, relative to the projected St. Lawrence seaway, have to advise you that we are opposed to it.

Most of the reasons for our opposition are set forth in the statement made in behalf of the Maritime Association of the Port of New York by Mr. Cornelius H. Callaghan, executive vice president of said association, before a subcommittee of the Senate Committee on Foreign Relations on February 28, 1946, which statement has our full endorsement.

Thanking you for having written us, we are,

Yours very truly,

MORRIS MALKIN,
President.

MERCHANTS & MINERS
TRANSPORTATION CO.,
Baltimore, March 16, 1946.

Hon. JOSIAH W. BAILEY,
Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SENATOR: I have your letter of March 12 regarding the seaway from the Great Lakes to the Atlantic and regret that particular section and business is not sufficient to warrant me to express any view on the subject.

Regretting my inability to be of any help in this matter and with kindest regards.

Very truly yours,

A. D. STEBBINS,
President.

PLANT SHIPPING CO., INC.,
New Orleans, La., March 15, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate,
Washington, D. C.

DEAR SIR: Your letter of 12 March about the St. Lawrence seaway.

My observation is that, aside from every other consideration, sending vessels through 15 locks would be a most hazardous undertaking at any time, and it strikes me that the cost of insurance on vessels navigating such waterways would be greatly increased. Accordingly, from the standpoint of risk and increased cost of insurance, the seaway would not be attractive to ship operators.

From the standpoint of savings to shippers, I believe that any cheaper inland freight rate to shipside would be greatly offset by the higher freight rate that the shipowner would have to ask for the increased risk and expense just mentioned.

I have no plans to use the St. Lawrence seaway at all, and, as far as I am concerned, I earnestly hope it will never materialize.

Very truly yours,

GEORGE PLANT,
President.

WILSON LINE, INC.,
Philadelphia, Pa., March 15, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
Senate Office Building,
Washington, D. C.

MY DEAR SENATOR BAILEY: In reply to yours of March 12, the Wilson Line is not interested in operating steamboats on the Great Lakes or through the proposed new locks and channel.

However, I am greatly opposed to the joint resolution before Congress to authorize these improvements, inasmuch as the railroads would be adversely affected and I believe that they will have a hard enough time in the next 10 years without this competition.

Very truly yours,

GEORGE B. JUNKIN,
President.

STOCKARD STEAMSHIP CORP.,
New York, N. Y., March 15, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

MY DEAR SENATOR: Replying to your letter of March 12 asking my opinion with respect to the feasibility and economy of navigating the proposed seaway through the Great Lakes and the St. Lawrence River, it is my opinion that this seaway is of no practical value. I do not question the feasibility of constructing this seaway, but purely from the point of view of a shipping facility the seaway is absolutely unsound. In the first place it can only be used for 8 months out of the year because of ice conditions. The present shipping facilities available at Montreal and to New York are just as economical to operate as would be the case should oceangoing vessels proceed to load at Chicago and/or other Great Lakes ports.

The seaway would provide no savings to shippers nor would it prove attractive to ship operators except possibly to a few foreign-flag lines that presently operate from the Great Lakes to the United Kingdom, European continent, and Scandinavia during the summer season. Ship operations between ports other than those mentioned in the preceding sentence are more economical via the eastern seaboard of the United States. This can be accounted for by the fact that the earth is round, and if you calculate distances from Chicago to places other than northern Europe, including the United Kingdom, you will find the excess steaming distances too great (say, from Chicago) to make it economical.

We have no plans to navigate the St. Lawrence seaway, and sincerely hope the taxpayers' money will not be wasted on this venture.

Yours faithfully,

L. N. STOCKARD,
President.

BARBER STEAMSHIP LINES, INC.,
New York, N. Y. March 14, 1946.

Hon. JOSIAH W. BAILEY,
Chairman, United States
Senate Committee on Commerce,
Washington, D. C.

DEAR SENATOR BAILEY: I have received your letter of March 12, with reference to the proposed St. Lawrence seaway, and I am enclosing herewith a statement which I made a short time ago, which will acquaint you with my views as to this project.

For the many reasons advanced in my memorandum, I consider the project unsound economically and of no practical value commercially, and to specifically answer your question, my company has no plans to navigate the St. Lawrence seaway.

In closing, might I express the hope that the replies which you will receive from the steamship owners, whom I gather, you have circularized, will be such as to lead you to the conclusion that you should vote against this proposed bill.

Very truly yours,

EDWARD J. BARBER.

UNITED FRUIT CO.,
Boston, Mass., April 8, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate,
Washington, D. C.

DEAR SENATOR BAILEY: Your letter of March 12 to Mr. Zemurray, president of the United Fruit Co., relative to the proposed St. Lawrence seaway project, has been referred to me for reply.

As indicated in your letter, the project calls for a usable channel 27 feet deep. This will prevent the use of vessels drawing more than 24½ feet. It is my understanding that less than 8 percent of the total American merchant marine has this light a draft, and, of course, practically all of this light-draft tonnage is already in use in other trade routes. It, therefore, seems highly doubtful that the St. Lawrence seaway project can have any material advantage to the American merchant marine. It seems more likely that any ships using the seaway would be foreign-flag ships. The operation of small ships under the American flag because of the highly increased cost of wages and other costs is becoming more difficult. The St. Lawrence seaway, in my opinion, would be wholly unattractive to American-flag operators.

* * * * *

One of the principal arguments in favor of the waterway is that it might reduce the ocean rates on grains and other bulk commodities moving from the Great Lakes area into foreign commerce, and that this would be of benefit to the farmers of the Middle West. I suggest that the freight on these commodities is paid by the foreign purchasers and it is doubtful whether a slightly lower freight rate to these foreign purchasers would be of any value to the shippers of the Middle West.

This company does not plan to navigate the St. Lawrence seaway.

Very truly yours,

WILLIAM JACKSON,
Vice President.

LYKES BROS. STEAMSHIP CO., INC.,
New Orleans, La., April 26, 1946.

Hon. JOSIAH W. BAILEY,
United States Senate,
Washington, D. C.

MY DEAR SENATOR BAILEY: Apology is made for delay in answering your letter of March 12 re the effect of proposed St. Lawrence-Great Lakes seaway on United States flag ships and asking if we have any plans to send our vessels into the Great Lakes.

Because of the high cost of building American ships and operating them, they cannot compete with foreign-flag ships unless subsidized. For American ships to enter the Great Lakes trade, they would need to be subsidized just as they are on the high seas. Would Congress authorize such a subsidy when the Great Lakes seaway would be in fact a competitor of the domestic transportation lines in the United States?

Then there are 15 ship locks to pass through.

Foreign-flag ships would go into the Great Lakes during the open-water season. For the most part, these would probably be tramp ships which do not, as a rule, conform with the rules and regulations applying to regular liners, which would mean disturbance to the economy of the regular liners and to the domestic carriers.

Thus the opening of the Great Lakes seaway would in fact be a subsidy in favor of foreign-flag ships and against the United States merchant marine.

The transportation system of the United States is organized to use existing and developed seaports and domestic transportation, which would be disturbed by the Great Lakes seaway.

The railroads which would compete with the seaway would need to lower their rates not only for the 7 months of navigation but year around, thus again giving the east and west drift of commerce an advantage over the north and south drift, on which much money is being spent.

The Great Lakes region now enjoys low import-export freight rates and has an advantage over most of the country.

It is felt the proposed seaway would be decidedly detrimental to southern ports, from which our company exclusively operates.

We are attaching hereto pamphlet prepared by the Mississippi Valley Association, also copy of letter from American Merchant Marine Institute, dated February 26, to Senator HATCH.

We have no plans to send our ships into the Great Lakes.

Very truly yours,

J. T. LYKES,
President.

CHICAGO, DULUTH & GEORGIAN
BAY TRANSIT CO.,
Detroit, Mich., April 11, 1946.

Hon. Senator JOSIAH W. BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SENATOR: Please do accept our apology for delayed acknowledgment of your letter of March 12 to our Mr. D. Dwight Douglas, president, regarding Great Lakes-St. Lawrence Seaway.

We note the contemplated plans and data for this project, and we have endeavored to keep in touch with the progress of this proposal.

As to our own service, we are an exclusive passenger line, operating the steamers *North American* and *South American*, between the ports of Chicago, Duluth, Detroit, Cleveland, and Buffalo, in regular service during the period May 15 to September 15.

The probability of operating our present ships outside of the Great Lakes area is most remote, as our company has been built on service on the Lakes. There is a definite demand for such service, and we hope to continue it and improve upon it as time goes on.

Passenger lines on the Great Lakes, as you are aware, are restricted by legislation, permitting capacity operation only during 4 months of the year—May 15 to September 15. During the other 8 months of the year capacity is reduced to such an extent that we cannot operate.

The proposed seaway, therefore, would have no direct benefits insofar as our operation as presently set up is concerned.

We appreciate having this opportunity to express our views.

Very respectfully,

EMERY B. HATCH,
Vice President and General Manager.

DETROIT & CLEVELAND NAVIGATION CO.,
Detroit, Mich., March 18, 1946.

Mr. JOSIAH W. BAILEY,
Committee on Commerce, United States Senate, Washington, D. C.

DEAR MR. BAILEY: We have your letter of March 12, 1946, in connection with the proposed changes in the St. Lawrence River.

So far as the Detroit & Cleveland Navigation Co. is concerned, we would have no use for the St. Lawrence waterway. However, we do feel that the locks should all be the same size as the Welland locks for national security. We believe that the present depths of the locks would suffice.

Yours very truly,

JAMES T. McMILLAN,
President.

BUFFALO, N. Y., *March 20, 1946.*

Mr. JOSIAH W. BAILEY,
Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SIR: Your letter of the 12th has remained unanswered owing to the writer being absent from the city.

We do not feel that there is any transportation by water that is cheaper than that which prevails on the Great Lakes. We therefore feel that there is no economy in the proposed seaway, as we do not feel that the boats that are adapted for the lakes and ocean navigation, can compete with our lake boats for the long water haul from the Head of the Lakes—Lake Superior—and Chicago, to the St. Lawrence Gulf. It is only at times, when there is a bigger demand than we have boats, that the rate between the head of Lake Superior to the Gulf ports would be of any interest to ocean-borne traffic.

We have had the practical experience in the movement of large tonnages of grain from the Northwest to Montreal, and the majority of years in which we have been in business, there is no ocean ship which could compete with the rates which prevail for the movement of this grain from Duluth and to Fort William to Montreal and also from Chicago.

Very truly yours,

AMERICAN STEAMSHIP CO.
JOHN J. BOLAND.

CLEVELAND, OHIO, *March 20, 1946.*

Hon. JOSIAH BAILEY,
Chairman, Committee on Commerce,
United States Senate,
Washington, D. C.

DEAR SENATOR BAILEY: Referring to your letter of March 12, 1946, we have given careful consideration to your inquiries concerning the proposed St. Lawrence seaway as a navigation project. In treating with your letter, we have rephrased the inquiries in question form and have added, under a new heading, additional comments in which we believe you will be interested. The questions, answers, and additional comments are:

"Would it be feasible and economical to navigate the proposed seaway with vessels which would be adapted to the Great Lakes and at the same time be suitable for continuous navigation on the Atlantic Ocean?"

Typical oceangoing cargo ships are not equipped to navigate locks. Great Lakes vessels are equipped with mooring engines and chocks of special type for passage through locks. Ocean ships have smaller rudders than Great Lakes ships and are not designed for navigating canals and narrow channels with swift and changing currents. Great Lakes ships are not designed or suitable for ocean navigation, nor could they be loaded or unloaded expeditiously in ocean ports. Loading and unloading machinery in Great Lakes ports is highly specialized and the design of the ships is such that they are coordinated with the dock machinery. To our knowledge there are not now in existence ships which embody both Great Lakes and ocean characteristics. While such a ship might be designed, it could not be operated as economically as the vessels built for special service in one or the other trade.

"What are the distances from Duluth, at the head of Lake Superior, on the one hand, and Chicago, on the other, to the Gulf of St. Lawrence?"

The distances stated in your letter refer to Cabot Strait lying between the Gulf of St. Lawrence and the Atlantic. The distances from upper Great Lakes ports to the Gulf of St. Lawrence would be about 300 miles shorter. The distance from Duluth to New York via the St. Lawrence is 3,014 miles and via the New York State Barge Canal, 1,477 miles. The distance from Cleveland to New York via the St. Lawrence is 2,204 miles and via the New York Barge Canal, 667 miles.

"From the viewpoint of a ship operator, do you believe this seaway, as proposed, would provide savings to shippers and prove attractive to ship operators?"

The savings claimed for traffic on the waterway are based on the carrying of full loads in ships of the largest class able to navigate a 27-foot channel, or, in some cases, on the assumption that the rates to or from Great Lakes ports would be the same or only slightly higher than rates to Atlantic coast ports.

It seems doubtful that full cargoes could be often assembled on the Great Lakes for transport to one or two foreign ports. Failure to obtain such cargoes would militate against any great amount of traffic in manufactured products. The passage by ocean vessels through a distance of some 2,000 miles and return, including the navigation of several locks and many miles of restricted channels, would add appreciably to the cost of operation, although the distance from Chicago to Liverpool is only about 836 miles farther than from New York to Liverpool.

There is a possibility of some savings in the transport of grain from the Canadian Lake Superior ports, Fort William, and Port Arthur, because of saving in transshipment. The saving might amount to 3 cents a bushel or $1 per ton. The cost of capital charges, operation, and maintenance of the St. Lawrence, however, would mean a United States subsidy of some 2 or 3 dollars per ton for the amount of traffic likely to develop, while the savings would relate mainly to Canadian grain.

The maximum draft of a ship navigating the seaway could probably not exceed 24 feet. It was determined in 1941 that only about 13 percent of American ocean ships would be able to traverse the proposed St. Lawrence seaway at full draft. Doubtless there were built during the war many American ships which could navigate the proposed seaway. However, when fully loaded, those ships draw in excess of the maximum draft which the seaway would furnish. Thus their economy in the Great Lakes trade would be impaired. Our opinion is that seaway commerce would be carried mainly in foreign-owned tramp ships operating on much lower costs as to capital charges and crew wages than American vessels. Such vessels, entering the Lakes for grain, would be at liberty to bring foreign coal to Canada at ballast rates replacing our exports of coal to Canada. These export shipments by lake vessels in 1944 exceeded 12,000,000 tons.

"Have you any plans to navigate the St. Lawrence seaway with your own ships; if so, how many?"

This company owns and operates 18 ships of the Great Lakes bulk-cargo type, having an aggregate trip capacity of about 165,000 tons on a 20-foot draft. The largest is 621 feet in length over-all and carries in excess of 15,500 gross tons at a full draft of 24 feet. We have no plans for navigating the St. Lawrence seaway. The passage is more hazardous than the routes of our present traffic. Our ships are not fitted for ocean navigation. The expense of operation due to initial costs and wage rates, as compared with foreign tramp ships would make competition impracticable without a subsidy, which has never been required or requested for the Great Lakes industry, although transportation rates on the Lakes are only about 1 mill per ton-mile.

COMMENTS CONCERNING OTHER ASPECTS OF THE PROFOSED SEAWAY

Since the hearings before your committee in 1944 on the Aiken bill, you are thoroughly familiar with the manner in which the 1941 agreement deals with navigation rights. We venture, however, to review this subject from the standpoint of the Great Lakes ship operator. Navigation rights of American ships in Canadian waters, and of British ships in American waters, are secured through existing treaties. By the treaty of 1871, American ships are given the right of free navigation in the St. Lawrence River from the place where the international boundary leaves the river to the sea. The treaty provides that this right of free navigation is subject to local laws and regulations not inconsistent with that right. Reciprocal rights of navigation are secured to the ships of both countries, in boundary waters, by the treaty of 1909. For purposes of navigation, Lake Michigan, which lies wholly within the United States, is considered part of the boundary waters. The 1909 treaty contains two conditions not found in the 1871 treaty. Those conditions are (1) any restrictive laws or regulations imposed by either country upon the ships of the other, shall operate with equal effect upon its own ships and (2) any tolls imposed for the sale of canals and locks by one country upon the ships of the other, likewise must be applied with equal force to its own ships.

Since the greater portion of the navigation project would lie in the lower St. Lawrence River, the protection afforded by the 1909 treaty, with respect to the equal applicability of tolls and other restrictions, would not be applicable. It seems most unfortunate that the United States should be committed to a reciprocal policy for the Great Lakes and that the same policy is not expressly extended to waters which lie wholly within Canada. The opportunity for discrimination, if not an actual temptation to place burdens upon the American ships for competitive purposes, would seem too great to permit a disparity of this kind to remain.

We are advised that by article IV, paragraph (d), of the 1941 agreement, Canada would be assured sufficient waters from the Great Lakes to maintain her own channels, at and below Montreal, at such depths as she might choose to improve them. There is some opinion that in the event the navigation project is completed Montreal would grow as a part of transshipment.

Because of the navigation hazards of the St. Lawrence River, it would be uneconomical to operate large ships between Great Lakes and ocean ports. It has been suggested that a special Great Lakes-type ship could be developed so that cargoes moving from Great Lakes ports for export could be transported to Montreal for transshipment in ocean vessels. There is very definite trend toward deeper draft for ocean ships. To enable such ships to operate profitably as far inland as Montreal, Canada might very well improve channels of the lower St. Lawrence River to greater depth. The river is already improved from Montreal to Quebec and beyond. Substantial improvement of the navigable channels in the lower St. Lawrence would be of no avail unless the greater depth were compensated by dams or by the use of additional water. That additional water, according to the agreement, would be obtained

by increasing the flow of water through the St. Lawrence from Lake Ontario. Lake Ontario is the smallest of the Great Lakes. To maintain its level with increased abstraction of water would require greater flow from the other lakes; thus the entire system would be adversely affected.

It is a well-established national policy, reflected in domestic law and in the 1909 treaty, that the waters of the Great Lakes should be preserved for navigation and commerce. Both the Federal Government and the Great Lakes States have opposed the abstraction of water from Lake Michigan through the Chicago Drainage Canal, on the ground that the abstraction would adversely affect the levels of the Great Lakes. By the 1909 treaty, Canada and the United States, bound themselves to refrain from making any diversions, in their respective waters, which would affect the level of the waters in the territory of the other, except as the other gave her consent. The provision of the 1941 agreement, with respect to the maintenance of channel depths at and below Montreal, would obviously sacrifice the Great Lakes for the lower St. Lawrence River.

The history of navigation, through the St. Lawrence River, shows that it serves British commerce to a greater extent than United States commerce. If the navigation project is completed, that situation would be accentuated. The British Isles have always been large consumers of grain grown in the Canadian northwest. The Ottawa conference of 1932 gave tariff preference to Canadian wheat transported from the growing fields to Liverpool by British facilities. Canadian wheat loaded at Fort William-Port Arthur, Ontario, on Lake Superior, was formerly transported in large volumes by means of American ships to Buffalo, N. Y., and then transshipped either by way of New York or Montreal. The imperial preferences had the effect of routing Canadian wheat down the Great Lakes in Canadian facilities. If the United States intends to participate in the proposed navigation project and finance the greater portion of the cost, the United States should insist that Great Britain refrain from asserting discriminatory measures against United States ships.

We greatly appreciate this opportunity to make known to you our views concerning this proposed seaway. It will be considered a pleasure to respond to any further inquiries which may occur to you.

Respectfully yours,

THE PIONEER STEAMSHIP CO.,
J. T. HUTCHINSON, *President.*

THE INTERLAKE STEAMSHIP CO.,
Cleveland, Ohio, March 28, 1946.

Hon. J. W. BAILEY,
Chairman, Committee on Commerce,
United States Senate.

DEAR SENATOR BAILEY: Because of absence from my office, your letter of March 12 regarding the St. Lawrence waterway, has just come to my attention. I do not believe that there is very much that I can add, from the viewpoint of a bulk-vessel operator on the Great Lakes, to the facts and conclusions already presented before the Senate Foreign Relations Committee by the Lake Carriers Association. This group, which is composed of substantially all the operators of bulk-dry-cargo vessels operating on the Great Lakes, has made a thorough study of the St. Lawrence waterway proposal and, in my opinion, you can have full confidence in the facts and the conclusions they have presented.

In answer to your first question, it would be folly to say that the proposed seaway would not provide savings to some shippers, nor prove attractive to some operators. However, it is my opinion that it would not provide sufficient savings to a sufficient number of American shippers, nor prove attractive to a sufficient number of American ship operators to justify the required expenditures. I personally fail to see where a sufficient number of Americans will be benefited to justify the expenditure of the public's money on the enterprise.

In answer to your second question, our company is engaged in the transportation of iron ore, coal, limestone, and grain. Our vessels are not adaptable to ocean navigation and, furthermore, the expense of operation due to initial cost and high American wage rates would make it impractical to compete with foreign tramp ships. We, therefore, have no plans for future navigation of the seaway should it materialize.

I trust that the above answers your questions. If you have any further questions, I would be only too pleased to hear from you.

Very truly yours,

THE INTERLAKE STEAMSHIP CO.

THE TOMLINSON FLEET,
Bay City, Mich., March 20, 1946.

Hon. JOSIAH W. BAILEY,
Senate Office Building, Washington, D. C.

MY DEAR SENATOR: On my return from Cleveland, I find your letter of the 12th, addressed to me as president of the Inter-Ocean Steamship Co., 2900 Terminal Tower, Cleveland 13, Ohio. I am very glad indeed to hear from you in regard to the St. Lawrence seaway and power project.

About 40 years ago the State of Michigan authorized a sum of money to be spent and the Governor, Fred M. Warner, to appoint a commission to see what could be done about improving the St. Lawrence waterway. I happened to be selected by Governor Warner as a member of that commission and I am the only one of that original Great Lakes-St. Lawrence Tidewater Commission left, the others having passed on. Our commission set to work at once to interest other States in this great project and eventually we had 23 States contiguous to the Great Lakes that had formed associations favorable to the St. Lawrence waterway.

When this matter was called to the attention of President Coolidge, he decided that it was time to appoint a commission from the United States to act jointly with a similar commission from the Dominion of Canada, and he appointed as the United States-St. Lawrence Commission the following:

Herbert Hoover, chairman; William C. Breed, New York; James P. Goodrich, Indiana; James E. Davidson, Michigan; Charles L. Allen, Massachusetts; James R. Howard, Iowa; James F. Noonan, Missouri.

Joint Board of Engineers: Maj. Gen. Edgar Jadwin, Chief of Engineers; Col. William Kelly and Lt. Col. George B. Pillsbury, Corps of Engineers.

To work in conjunction with the American commission, the Canadian Government appointed the following engineers: Duncan W. Maclachlan, Department of Railways and Canals; Oliver O. Lefevre, chief engineer, Quebec-St. Lawrence commission; Brig. Gen. Charles Hamilton Mitchell.

Many meetings were held and Herbert Hoover, with the commission and engineers, has been over this route three times. After years of study, preparation of plans and specifications and estimates of cost, we recommended the St. Lawrence route as the cheapest, most accessible, and best route, not only to shorten the distance to the seaboard, but to show the best promise in the reduction of freight rates.

At about this time the Dominion of Canada commenced work on its new Welland Canal locks in anticipation of the St. Lawrence project being completed. These locks now connect Lake Erie and Lake Ontario, so that the only impediment preventing the use of the St. Lawrence seaway by oceangoing ships is the rocky shallows in the river for a minimum distance of 21 miles, or a maximum distance of not more than 24 miles.

I am president not only of the Inter-Ocean Steamship Co., but of all the companies noted at the head of this letter, except the Sierra Steamship Co., of which my son is president. All the ships owned by these companies are large, modern, steel freighters and there are 11 of them altogether. They are now engaged in the general lake trade, carrying ore, coal, limestone, and grain. Our largest ships carry considerable grain from Duluth, Minn., down through the new Welland Canal on to Lake Ontario and to Oswego, N. Y., which is right near the St. Lawrence River entrance to Lake Ontario. The new locks installed by the Dominion of Canada are splendid in every way and will take care of at least 80 percent of all ocean tonnage.

My family has been engaged in the Great Lakes transportation for upwards of 75 years. In the early days the ships were small wooden sailing vessels, carrying about 21,000 bushels of grain, but as time advanced we kept pace with shipbuilding progress and have built larger and larger ships for our fleets.

Buffalo, N. Y., is my former home. My father and mother were born there, as were all their children. I am still interested in companies doing business in that city and would not do anything to hurt Buffalo. However, all the lower lake ports can get along very well without stevedoring business; that is, the transferring of freight from lake ships to the railroads or canal boats navigating the Erie Canal. The development of the St. Lawrence seaway will be a wonderful thing for America, and particularly for the fifty-odd-millions of people residing in the middle section of the United States.

Thank you for your inquiry, and I shall be very glad to answer any specific questions that you have occasion to propound.

With sincere regards, I am,

Yours very truly,

JAMES E. DAVIDSON.

Mr. WILEY. Mr. President, I secured unanimous consent to have printed at the conclusion of the remarks of the Senator from Massachusetts today, a memorandum entitled, "Constitutionality of St. Lawrence Legislation," submitted by the Department of State to a subcommittee of the Committee on Foreign Relations, on Senate Joint Resolution 104, Seventy-ninth Congress, first session, the memorandum being signed by Dean Acheson, Under Secretary of State. I now present the memorandum for the RECORD.

There being no objection, the memorandum was ordered to be printed in the RECORD, as follows:

CONSTITUTIONALITY OF ST. LAWRENCE LEGISLATION

INTRODUCTION

There is pending before the Senate a joint resolution [1] "approving the agreement between the United States and Canada relating to the Great Lakes-St. Lawrence Basin with the exception of certain provisions thereof; expressing the sense of the Congress with respect to the negotiation of certain treaties; authorizing the investigation through the Department of State and with Canada of the feasibility of making the Great Lakes-St. Lawrence seaway self-liquidating; and for other purposes."

Identical proposals are pending in the House of Representatives. The purpose of these measures is to provide for the construction of the Great Lakes-St. Lawrence seaway and certain power facilities in the Inter-

[1] S. J. Res. 104, 79th Cong., 1st sess.

national Rapids Section of the St. Lawrence River and for the negotiation of an agreement with the State of New York for the transfer to it of such power facilities.

QUESTION

The question has been raised as to the constitutionality of Senate Joint Resolution 104 on the ground that it is not within the power of Congress to pass legislation authorizing the United States to construct the St. Lawrence seaway and power project in cooperation and pursuant to an agreement with Canada, and that such construction may be undertaken by this country only pursuant to a treaty ratified in the case of this country by the President by and with the advice and consent of the Senate.

CONCLUSION

It has been concluded that the United States may validly and constitutionally undertake to perform its share of the construction of these projects pursuant to legislation approving the agreement with Canada and authorizing the execution of the provisions thereof, and therefore that Senate Joint Resolution 104, when enacted by a majority vote of both Houses of Congress and approved by the President, will be a valid and constitutional enactment.

I. STATEMENT OF FACTS

On March 19, 1941, there was executed an agreement between the United States and Canada (herein called the "agreement" or "1941 agreement")[2] providing in substance for the construction of certain works necessary for the completion of the Great Lakes-St. Lawrence deep waterway and for the construction of certain power works in the International Rapids Section of the St. Lawrence River.

Provisions of the agreement

Article I of the agreement provides that the Governments of the United States and Canada agree to establish and maintain a Great Lakes-St. Lawrence Basin Commission the duties of which would be generally to supervise the construction of the works. Section 4 of article I states that the Governments may, by exchange of notes, extend or abridge the powers and duties of the Commission. In view of fears expressed in the Senate in December 1944,[3] that advantage might be taken of this provision to increase the obligations of the United States Government under the agreement, section 4 (b) of Senate Joint Resolution 104 would provide that unless Congress by law authorizes such action, no amendment of the agreement, and no exchange of notes under article I, section 4, thereof, shall impose additional financial or other obligations on the United States. This provision of Senate Joint Resolution 104 is similar to those which have been inserted in various recent joint resolutions which have been passed to effectuate international agreements of the United States, including those with respect to UNRRA and the Bretton Woods agreements discussed below. A similar provision is included in the bill creating the Niagara Falls Bridge Commission also discussed below.

Under articles II and III, respectively, the Governments of Canada and the United States agree to construct or complete the respective portions of the works allocated to both countries by the proposed International Commission. Each country is to operate or arrange for the operation of works situated in its respective territory.

Article IV contains certain ancillary provisions related to the construction and operation of the works including a provision with respect to the control of the flow of water out of Lake Ontario into the St. Lawrence River during the construction and upon the completion of the works so as not to impair navigation in the Canadian section of the river.

Article V contains a general reservation of sovereignty over the respective territories of both countries. Article VI provides that either Government may at any time construct within its own territory alternative facilities for navigation in the international section. Article VIII relates to the preservation of the level of the Great Lakes system.

Articles VII and IX of the agreement are proposed to be excepted from the approval of the Congress under the pending legislation. The first of these would provide in effect that the rights of navigation accorded under the provisions of existing treaties between the United States and Great Britain should be made permanent regardless of any termination provisions in such treaties. (The waters primarily affected under this provision would be those of Lake Michigan as to which navigation rights are extended to Canada under article I of the Boundary Waters Treaty of 1909 referred to below, so long as that treaty remains in force.) Article IX relates to obligations with respect to the preservation of the scenic beauty of Niagara Falls and, in paragraph (b), provides that diversions of the waters of the Niagara River above the Falls additional to the amounts specified in the Boundary Waters Treaty of 1909 may be authorized and permitted by the Governments in accordance with a procedure set forth in article IX. Articles VII and IX of the 1941 agreement therefore purport to amend provisions of an existing treaty through a procedure other than the treaty process. Since this aspect of these provisions has been the primary source of discussion as to the constitutionality of the procedure used in this case, and since these provisions do not relate directly to the principal subject matter of the 1941 agreement, it was felt desirable by the sponsors of Senate Joint Resolution 104 to limit the approval of the Congress to those provisions of the 1941 agreement which do not purport to alter or extend rights created by previous treaties and which relate to the St. Lawrence seaway and power project. The pending legislation would except these two articles from approval and would express the sense of the Congress that the subject matter thereof should be dealt with by treaty. In this way every effort is made to facilitate the consideration of the St. Lawrence project on its merits while at the same time articles VII and IX are excepted from approval solely by reason of considerations of a constitutional nature.

Article X provides for the disposition of certain claims which may arise during the course of the construction and certain related matters.

Article XI states that the agreement shall be subject to the approval of the Congress of the United States of America and the Parliament of Canada and that following such approval the agreement shall be proclaimed by the United States and ratified in respect of Canada and that it shall enter into force upon the exchange of the instrument of ratification and a copy of the proclamation.

Legislative background

The agreement was signed on March 19, 1941, and later that year extensive hearings were held before the Committee on Rivers and Harbors of the House of Representatives on H. R. 4927, Seventy-seventh Congress, first session, which provided for the approval by the Congress of the agreement and the negotiation of an arrangement with the State of New York for the transfer of the power facilities. These hearings were primarily devoted to the economic merits of the two projects and concluded in a favorable report by the committee on the measure by a vote of 17 to 8. There was incidental discussion during the course of these hearings concerning the constitutional problems herein discussed, and there was submitted the opinion of the then Attorney General of the United States expressing the view that—"it is legally unobjectionable so far as this country is concerned for the executives of the United States and Canada to enter into an agreement regarding the Great Lakes-St. Lawrence deep waterway project conditioned for its effectiveness upon the subsequent enactment of necessary legislation by the Congress and by the Canadian Parliament"—and that—"if an agreement is executed and approved in this manner its provisions would be binding upon the United States as respects Canada."[4] Although the bill was favorably reported by the committee, further consideration of the matter at that time was prevented owing to the Pearl Harbor attack.

In November 1944, hearings were held before a subcommittee of the Committee on Commerce of the Senate with respect to S. 1385, Seventy-eighth Congress, first session, which was substantially similar to the bill considered by the Rivers and Harbors Committee in 1941. These hearings were specifically limited to the constitutional issue discussed herein, and testimony was taken both in favor of and against the view that the agreement might legally be brought into force as to the United States through concurrent legislation rather than through the treaty procedure. Much of this discussion revolved about the proposed modification by articles VII and IX of the 1941 agreement of rights brought into being by previous treaties. Upon the conclusion of the hearings no report was made by the subcommittee and no action taken by the Committee on Commerce with respect to the proposed legislation. Thereafter, in December 1944, an effort was made to include the substance of S. 1385 as an amendment to the then pending rivers and harbors legislation. This motion was defeated by a vote of 56 to 25.[5] A number of Senators voting in the negative on this motion stated that they were doing so solely out of a desire not to prejudice the rivers and harbors bill or because of their feeling that full hearings should be held on the merits of the St. Lawrence project in the Senate and that, accordingly, their votes were without prejudice to their position at the time that the issue of approving the St. Lawrence project might be presented to the Senate on its merits.

Thereafter considerable time was devoted by a nonpartisan group of Members of the Senate, in cooperation with representatives of the executive department, to prepare legislation which would meet the objections which had been raised on constitutional grounds by Members of the Senate during the hearings and discussion on the floor in November and December 1944, and which would facilitate the consideration of the agreement in the Senate on its merits. The result of these deliberations was the introduction of Senate Joint Resolution 104 on which hearings are now being held.

HISTORICAL BACKGROUND[6]

The St. Lawrence seaway has been a source of discussion and study for more than 1^0 years and in fact a complete, navigable channel throughout the route in question has been in operation for the greater part

[5] 90 CONGRESSIONAL RECORD 9382.

[6] For a more complete chronological statement, see 90 CONGRESSIONAL RECORD 9362. For a statement as to the provisions of earlier treaties with reference to the Great Lakes-St. Lawrence system, see sec. VI below of this memorandum.

of that time. In 1895 an international commission was created to examine the feasibility of constructing a ship canal from the Great Lakes to the Atlantic Ocean which would necessitate the deepening of the existing facilities. That commission reported unanimously in favor of the construction of the seaway and accordingly in 1897 the United States appointed a board of engineers which reported in 1900 in favor of the construction of a waterway on United States territory.

In 1905 an International Waterways Commission was created which reported from time to time on various subjects including certain phases of the seaway proposal. In 1920 the United States and Canadian Governments instructed the International Joint Commission created under the Boundary Waters Treaty of 1909 to consider the possibility of improving the St. Lawrence for navigation and for hydroelectric power and recommended in 1922 that engineering plans and specifications be prepared and that the Governments take steps to authorize the project. At this time the Canadian Government requested more time to study the matter. In December 1923 President Coolidge recommended to Congress a program for the development of the St. Lawrence Basin, and in February 1924 the United States accepted the proposal of the Canadian Government for a further engineering investigation. In 1924 the United States appointed a St. Lawrence Commission, of which Mr. Herbert Hoover was named chairman, and, in the same year, Canada likewise appointed a National Advisory Committee, the purpose of both of which was to restudy the entire problem. At the same time both countries created a Joint Engineering Board, which reported back in 1926 in favor of the construction of the seaway, the United States members favoring a single-stage project and the Canadian members, a double-stage project. In 1932 the Joint Engineering Board made another report on the subject which was followed in July 1932 by the signature of a treaty between the two countries for the construction of the seaway and power project. This treaty failed of ratification in the United States, the vote in the Senate on March 14, 1934, in favor of ratification having been only 49 to 43, thus lacking the necessary two-thirds majority.

In May 1938 negotiations were renewed between the two countries for the conclusion of a treaty or agreement with respect to the project. In January 1941 the United States and Canadian committees on the St. Lawrence project again reported favorably with reference to the two projects. On the basis of these reports, the present agreement was signed in March 1941. The principal difference between the agreement and the earlier treaty is that the present document provides for a single-stage project with reference to the seaway whereas the earlier document provided for a double-stage project.

The following is an excerpt from a letter dated May 23, 1944, from former Secretary of State Hull to Senator VANDENBERG concerning the procedure used in this case.

"There were two special considerations which impelled the present administration to sign the Great Lakes-St. Lawrence agreement in a form which would involve its becoming effective upon approval by the Congress and by the Canadian Parliament. The issues involved in the project are largely domestic rather than international. The project would involve the expenditure of approximately $285,000,000 Federal funds to complete our share of the works (of this sum roughly $93,000,000 would be repaid by the State of New York for the United States share of the water power). It, therefore, seemed appropriate that the House of Representatives should have a voice in passing on an international obligation involving so large an appropriation of Federal funds.

"To my mind it is a question of little importance which method is pursued. What is of importance is that we should not lose the benefits of this great international waterway system, with all its potentialities." [7]

II. POWERS OF CONGRESS

The subject matter of the pending legislation relates directly to powers which under the Constitution are vested in the Congress and which repeatedly have been construed by the Supreme Court of the United States to clothe the Congress and the Federal Government with authority to engage in or authorize the construction of projects such as those with which we are here concerned. Article I, section 8, of the Constitution, provides that Congress shall have the power "to regulate commerce with foreign nations, and among the several States * * *." By virtue of this provision legislative authority with respect to all matters concerned with interstate and foreign commerce is vested jointly in the House of Representatives and the Senate.

In particular the development of the natural resources of the United States through action of the Federal Government under these powers has been a fundamental policy of the Nation regardless of the political party in power for generations. The Congress has repeatedly exercised these powers to authorize the construction of navigation and power projects of great magnitude and of profound significance to the economic life of the United States. Many of the greatest man-made undertakings have resulted from this policy, including Boulder Dam, the Tennessee Valley Authority, and the great Federal projects on the Columbia River. Some of these have been built wholly by the Federal Government; others, by the Federal Government in conjunction with the States. The constitutionality of the acts of Congress authorizing these projects is firmly established by a long line of judicial decisions interpreting and clarifying the powers of Congress under the commerce clause of the Constitution.

Judicial decisions under commerce clause

One of the earliest and most authoritative examinations of the powers of Congress in this regard is contained in the opinion of Chief Justice Marshall in the case of *Gibbons* v. *Ogden*,[8] which invalidated an act of the Legislature of the State of New York granting to certain persons the exclusive right of navigation of all of the waters within that State, on the ground that such act was in contravention of the powers of Congress under the commerce clause. In so holding the Court stated as follows:

"But, in regulating commerce with foreign nations, the power of Congress does not stop at the jurisdictional lines of the several States. It would be a very useless power if it could not pass those lines. The commerce of the United States with foreign nations, is that of the whole United States. Every district has a right to participate in it. The deep streams which penetrate our country in every direction, pass through the interior of almost every State in the Union, and furnish the means of exercising this right. If Congress has the power to regulate it, that power must be exercised whenever the subject exists. If it exists within the States, if a foreign voyage may commence or terminate at a port within a State, then the power of Congress may be exercised within a State.[9]

"We are now arrived at the inquiry, What is this power? It is the power to regulate; that is, to prescribe the rule by which commerce is to be governed. This power, like all others vested in Congress is complete in itself, may be exercised to its utmost extent, and acknowledges no limitations, other than are prescribed in the Constitution. These are expressed in plain terms, and do not affect the questions which arise in this case, or which have been discussed at the bar. If, as has always been understood, the sovereignty of Congress, though limited to specified objects, is plenary as to those objects, the power over commerce with foreign nations, and among the several States, is vested in Congress as absolutely as it would be in a single government, having in its constitution the same restrictions on the exercise of the power as are found in the Constitution of the United States." [10]

Another early decision of the Supreme Court in this regard was *Pennsylvania* v. *The Wheeling and Belmont Bridge Company*.[11] In this case the State of Pennsylvania had brought suit to remove an alleged obstruction to the navigation of the Ohio river caused by the erection of bridges at Wheeling. The Supreme Court had in May 1852 rendered a decree directing the removal of the obstruction as being in violation of an earlier act of Congress which was deemed to have secured to the public free and unobstructed use of the river. In August 1852 the Congress passed a law providing that the bridges in question were declared to be lawful structures anything in the laws of the United States to the contrary notwithstanding. Defendants relied on this statute as authority for continuing the bridge and in holding in their favor the Court stated:

"We do not enter upon the question, whether or not Congress possess the power, under the authority in the Constitution, 'to establish post offices and post roads,' to legalize this bridge; for, conceding that no such powers can be derived from this clause, it must be admitted that it is, at least, necessarily included in the power conferred to regulate commerce among the several States. The regulation of commerce includes intercourse and navigation, and, of course, the power to determine what shall or shall not be deemed in judgment of law an obstruction to navigation; and that power, as we have seen, has been exercised consistent with the continuance of the bridge."

In *Wisconsin* v. *Duluth*,[12] there was involved the right of the Congress to control the improvement of the harbor of Duluth and in particular to direct the construction of a canal for navigation on a course approved by the Congress which was objected to by the State of Wisconsin. In holding that the action of the Congress was proper, the court stated:

"Nor can there be any doubt that such action is within the constitutional power of Congress. It is a power which has been exercised ever since the Government was organized under the Constitution. The only question ever raised has been how far and under what circumstances the exercise of the power is exclusive of its exercise by the States. And while this Court has maintained, in many cases, the right of the States to authorize structures in and over the navigable waters of the States, which may either impede or improve their navigation, in the absence of any action of the general government in the same matter, the doctrine has been laid down with unvarying uniformity, that when Congress has, by any expression of its will, occupied the field, that action was conclusive of any right to the contrary asserted under State authority. The adjudged cases in this Court on this point are numerous."

The case of *Arizona* v. *California* [13] carried this doctrine further in upholding the constitutionality of the Boulder Canyon Project Act.[14] This act authorized the Secretary of the Interior at the expense of the United States and in cooperation with the several States of the Colorado River Basin to con-

[14] 45 Stat. 1057.

struct at Black Canyon on the Colorado River a dam, a storage reservoir, and a hydroelectric plant; provided for their construction and operation by the United States; and declared that this authority was conferred "for the purpose of controlling floods, improving navigation, and regulating the flow of the Colorado River * * * and for the generation of electric energy. * * *" The constitutionality of this act was attacked by the State of Arizona in a petition which charged the invasion of its rights in the waters of the Colorado River. The Court in upholding the validity of the law specifically stated that "the Federal Government has the power to create this obstruction in the river for the purpose of improving navigation if the Colorado River is navigable" and found that the river was navigable.[15]

In *Ashwander* v. *Tennessee Valley Authority*,[16] there was not involved directly the constitutionality of the Tennessee Valley Authority Act of 1933 [17] but the Court explicitly upheld the constitutional authority of the Federal Government to construct and operate one of the principal component dams, namely, Wilson Dam, which had been constructed under the authority of the National Defense Act of 1916.[18] In so holding the Court stated:

"The act of 1916 also had in view 'improvements to navigation.' Commerce includes navigation. 'All America understands, and has uniformly understood,' said Chief Justice Marshall in *Gibbons* v. *Ogden* (9 Wheat. 1, 190), 'the word "commerce" to comprehend navigation.' The power to regulate interstate commerce embraces the power to keep the navigable rivers of the United States free from obstructions to navigation and to remove such obstructions when they exist. 'For these purposes,' said the Court in *Gilman* v. *Philadelphia* (3 Wall. 713, 725), 'Congress possesses all the powers which existed in the States before the adoption of the National Constitution, and which have always existed in the Parliament in England.' " [19]

In *United States* v. *Appalachian Electric Power Company*, the Supreme Court stated:

"In our view, it cannot properly be said that the constitutional power of the United States over its waters is limited to control for navigation. * * * In truth the authority of the United States is the regulation of commerce on its waters. Navigability, in the sense just stated, is but a part of this whole. Flood protection, watershed development, recovery of the cost of improvements through utilization of power are likewise parts of commerce control * * * the authority of the Government over the stream * * * is as broad as the needs of commerce. Water-power development from dams in navigable streams is from the public's standpoint a byproduct of the general use of the rivers for commerce. * * * The point is that navigable waters are subject to national planning and control in the broad regulation of commerce granted the Federal Government." [20]

It may be of interest to note that in a case involving the right of the Federal Government to license pilots on Lake Ontario and the St. Lawrence River, the Circuit Court of Appeals for the Second Circuit said: "Congress unquestionably has power to regulate commerce upon the waters involved." [21]

Agreements with Canada through legislation

The 1941 agreement with Canada for the construction of the St. Lawrence seaway and power project represents a continuation of the policy of the Federal Government in participating under the authority of the commerce clause in projects for the development of the natural resources of the United States. The commerce clause applies not only to commerce between the States but also to commerce with foreign nations. On numerous occasions Congress has exercised its powers with respect to foreign commerce to provide for the conclusion or effectuation of agreements between this country and foreign countries. As is to be expected many of these instances have involved our nearest neighbor, Canada, whose geographical propinquity brings about many problems of a similar nature with respect to the regulation of commerce and navigation as have arisen domestically. The power of the Federal Government to participate in the development of the resources of the St. Lawrence River, an international stream, rests not only upon its power to regulate commerce between the States but also upon its power to regulate commerce with foreign countries.

International Bridges

One of the most frequent examples of the use of the powers of Congress under the commerce clause in respect of construction projects with foreign countries relates to the construction or authorization of bridges over international streams. Examples of such legislation, the effectiveness of which has been conditioned upon similar action on the part of the foreign country concerned, are found in nearly every volume of the Statutes of the United States. Thus by the act of March 18, 1924,[22] the consent of Congress was granted "for the construction, maintenance, and operation by the State of Maine and the Dominion of Canada, jointly, of a bridge, to be erected across the St. John River * * * : *Provided*, That the construction of said bridge shall not be commenced until the consent of the proper authorities of the Dominion of Canada * * * shall have been obtained."

Other examples include the act of June 3, 1924,[23] relating to a bridge across the Niagara River at Buffalo; the act of June 28, 1935, relating to a bridge across the St. John River at Madawaska,[24] the act of June 16, 1938, creating the Niagara Falls Bridge Commission;[25] and the act of December 16, 1940,[26] which authorized the State of Michigan, acting through the International Bridge Authority of Michigan and "in order to facilitate international commerce, improve the postal service, and provide for military and other purposes * * * to construct, maintain, and operate a bridge across the St. Marys River * * * subject to the conditions and limitations contained in this act, and subject to the approval of the proper authorities of the Dominion of Canada." It is of particular interest to note the explicit reference in this last act to the facilitation of international commerce as constituting one of the considerations on which the passage of the act was based.

The importance of this type of legislation in relation to the question at issue here has been minimized by the opponents of the St. Lawrence project on the ground that there is nothing unusual about legislation to construct a bridge.[27] With this in mind and in view of the fact that many of the bridges referred to above such as the bridge at Niagara Falls have involved expenditures of many millions of dollars, a detailed examination of one of these cases may be instructive. In particular, the act of June 16, 1933, with respect to the bridge at Niagara Falls has many features which are strikingly similar to certain of those in connection with the St. Lawrence legislation with which we are here concerned.[28] This act, taken in conjunction with the corresponding action of Canada to authorize the construction, in effect brings into being an international agreement through concurrent action of the two countries for the construction of a project of major importance to the commercial relations of the two nations. In enacting the authorizing legislation and order in council, respectively, the United States Congress and the Canadian Government had before them a specific plan for the construction of the bridge. The United States legislation, which again recites that its purpose is "to facilitate international commerce," authorized the construction and operation of a bridge across the Niagara River at Niagara Falls subject "to the conditions and limitations contained in this joint resolution and subject to the approval of the proper authorities of the Dominion of Canada."

The resolution created the Niagara Falls Bridge Commission which was vested with broad powers to sue and be sued; to hold and convey real property; to contract; and in general to exercise all powers necessary to carry out the purposes of the legislation. It was provided that the Commission should consist of four members to be appointed by the Governor of New York and four to be appointed by Canada or the Province of Ontario. The Commission was given power to condemn land in New York and "to exercise in the Dominion of Canada all rights, power, and authority which shall be granted or permitted to the Commission by the proper authorities of the Dominion of Canada or the Province of Ontario, including the entering upon lands and acquiring, condemning * * * such real estate * * * in the Dominion of Canada as may be needed for such location * * * such bridge." The Commission was authorized to charge tolls and to issue its sinking fund bonds in order to provide for the payment of the cost of the bridge, income from which bonds was to be exempt from all Federal, State, and local taxation on the ground that "the bridge constructed under the authority of this joint resolution shall be deemed an instrumentality for international commerce authorized by the Government of the United States." [29]

With respect to tolls the act provided that no toll should be charged officials or employees of the Commission or of the two Governments or their political subdivisions while in the discharge of their duties. After payment of the bonds provision was made for the transfer of the bridge to and its subsequent operation by appropriate authorities of New York and Canada and for the liquidation of the Commission, except that if appropriate arrangements could not be made for the transfer of the bridge to New York and Canada, title to the bridge should remain in the Commission. Section 10 of the act provided that all provisions thereof could be enforced by appropriate remedy brought by the attorney general of New York, the United States district attorney or by the Solicitor General of Canada. Finally, the Congress expressly reserved the right to alter, amend, or repeal the joint resolution. Although the constitutionality of this act

[27] See sec. V concerning arguments of the opponents.

[28] Concurrent action was taken by Canada to authorize the construction of the Niagara Falls Bridge through the issuance of Order in Council P. C. 890, April 15, 1939, under the Navigable Waters Protection Act (ch. 140, Rev. Stat. Canada 1927). The Niagara Falls Bridge Commission legislation is similar in many respects to the act of June 14, 1933, creating the St. Lawrence Bridge Commission and authorizing the construction of a bridge from Ogdensburg, N. Y., to Prescott, Ontario (48 Stat. 141; 53 Stat. 621).
[29] This provision was subsequently repealed, 53 Stat. 1083.

has not been challenged, the act was cited with apparent approval by the Supreme Court in the case of *Keifer & Keifer* v. *Reconstruction Finance Corporation*.[30]

The Niagara Falls Bridge Act is a complex and important legislative enactment by Congress under its powers with respect to interstate and foreign commerce. The arrangement which this legislation and the concurrent action of Canada brought into being contains provisions of mutual interest to the two countries of a substantial and continuing nature and of such importance as to necessitate the creation of an autonomous commission of representatives of the two countries or their subdivisions to supervise the execution of these undertakings. It is submitted that this legislation constitutes a striking precedent for the procedure with which we are here concerned.

Reciprocal Wrecking Privileges

The powers of Congress under the commerce clause have been used frequently to bring about international arrangements through reciprocal or concurrent legislation with Canada on a variety of other subjects. An important example of this procedure concerned the negotiations which concluded in 1893 in an arrangement expressed in concurrent laws and proclamations with respect to reciprocal privileges to the vessels of the two countries to render aid to wrecked vessels of their respective nationalities in the contiguous waters of each country. The act of June 19, 1878,[31] as amended by the act of May 24, 1890,[32] provided:

"That Canadian vessels and wrecking appurtenances may render aid and assistance to Canadian or other vessels and property wrecked, disabled, or in distress in the waters of the United States contiguous to the Dominion of Canada: *Provided*, That this act shall not take effect until proclamation by the President of the United States that the privileges of aiding American or other vessels and property wrecked, disabled, or in distress in Canadian waters contiguous to the United States has been extended by the Government of the Dominion of Canada to American vessels and wrecking appliances of all descriptions. This act shall be construed to apply to the Welland Canal, the canal and improvement of the waters between Lake Erie and Lake Huron, and to the waters of the St. Marys River and canal: *And provided further*, That this act shall cease to be in force from and after the date of the proclamation of the President of the United States to the effect that said reciprocal privilege has been withdrawn, revoked, or rendered inoperative by the said Government of the Dominion of Canada."

In 1892 the Parliament of Canada passed a law[33] to extend to American wreckers privileges reciprocal to those provided for Canadian wreckers in the United States legislation, conditional upon the issuance of a proclamation by the Governor General of Canada. The Canadian act, however, made no reference to the Welland Canal, as the result of which omission there ensued protracted negotiations between the Department of State and the Canadian authorities in which the United States took the position that it would issue no proclamation until Canada has complied fully with the requirements of the United States legislation.[34] Ultimately, in order to bring the negotiations to a close, the Secretary of State requested the Congress to amend further the legislation of 1878, as amended by the legislation of 1890, by deleting the reference to the Welland Canal, and this was done by the Congress in the Department of State Appropriation Act of 1893.[35] Thereupon the negotiations bore fruit in the issuance by Canada of the necessary proclamation,[36] whereupon the corresponding proclamation was issued by President Cleveland stating:

"I, Grover Cleveland, President of the United States of America, in virtue of the authority conferred upon me by the aforesaid act of Congress, approved May 24, 1890, do proclaim that the condition specified in the legislation of Congress aforesaid now exists and is fulfilled and that the provisions of said act of May 24, 1890, whereby Canadian vessels and wrecking appliances may render aid and assistance to Canadian and other vessels and property wrecked, disabled, or in distress, in the waters of the United States contiguous to the Dominion of Canada, including the canal and improvement of the waters between Lake Erie and Lake Huron and the waters of the St. Marys River and Canal, are now in full force and effect." [37]

It is believed that this is one of the most striking examples of the conclusion of an agreement of vital importance to the two nations through the use of reciprocal legislation. The protracted negotiations which were carried on to arrive at precise reciprocity, culminating in the action of the Congress in reamending the United States legislation to accord exactly with the terms of the Canadian legislation, is of especial significance as bearing upon the mutuality of the arrangement which was ultimately concluded.

Nondiscriminatory Tolls

A simultaneous controversy with Canada which was settled through substantially the same procedure concerned alleged discrimination by Canada with respect to tolls upon traffic through the Welland Canal. In 1891 the Lake Carriers Association complained to the Department of State of such allegedly discriminatory tolls and suggested that in order to remedy the situation the United States should place in effect a system of tolls in the St. Marys Falls Canal which would operate against Canadian vessels in like manner. Formal representations to Canada by the Department of State not having brought about an alleviation of the situation,[38] Congress enacted the act of July 26, 1892,[39] entitled "An act to enforce reciprocal commercial relations between the United States and Canada, and for other purposes" providing:

"That, with a view of securing reciprocal advantages for the citizens, ports, and vessels of the United States, on and after the 1st day of August 1892, whenever and so often as the President shall be satisfied that the passage through any canal or lock connected with the navigation of the St. Lawrence River, the Great Lakes, or the waterways connecting the same, of any vessels of the United States, or of cargoes or passengers in transit to any port of the United States, is prohibited or is made difficult or burdensome by the imposition of tolls or otherwise which, in view of the free passage through the St. Marys Falls Canal, now permitted to vessels of all nations, he shall deem to be reciprocally unjust and unreasonable, he shall have the power, and it shall be his duty, to suspend, by proclamation to that effect, for such time and to such extent (including absolute prohibition) as he shall deem just, the right of free passage through the St. Marys Falls Canal, so far as it relates to vessels owned by the subjects of the Government so discriminating against the citizens, ports, or vessels of the United States, or to any cargoes, portions of cargoes, or passengers in transit to the ports of the government making such discrimination, whether carried in vessels of the United States or of other nations."

By proclamation of August 18, 1892,[40] the President, acting under the authority of this statute, imposed the required toll upon Canadian traffic. Further negotiations between the Department of State and Canada having resulted in the passage of an order in council of Canada suspending the Canadian toll in the Welland Canal,[41] President Harrison on February 21, 1893, issued a proclamation [42] suspending the provisions of the earlier proclamation. In communicating this information to the British Embassy in Washington, the Secretary of State, Mr. Foster, expressed his "gratification that this understanding in the mutual interest of the commerce of the United States and her Majesty's Dominion of Canada has thus been reached * * *." [43]

Tariff Reciprocity

Another example of the exercise by Congress of its powers under the commerce clause to reach agreement with Canada on economic matters was the procedure followed during the administration of President Taft with respect to tariff reciprocity. By exchange of notes dated January 21, 1911, between the Secretary of State and the Canadian Minister, there was set forth an agreement of the two Governments in regard to reciprocal tariff legislation which provided that the President of the United States would communicate to Congress the conclusions reached therein and recommend the adoption of legislation to give effect to the "proposed arrangement"; and that simultaneously parallel action would be taken in Canada. It was agreed that the United States legislation might contain a provision that it should not come into operation until the United States was assured that corresponding legislation had been passed by Canada and that a similar provision might be included in the Canadian legislation.[44] On July 26, 1911, the President approved the Canadian Reciprocity Act [45] which set forth a schedule of duties on imports of specified products from Canada and provided that such duties should take effect whenever the President of the United States shall have satisfactory evidence and shall make proclamation that, on certain specified articles exported from the United States, duties at not in excess of the rates set forth in the act should be charged thereon when imported into Canada. Under section 3 of the act the President was authorized and requested to negotiate further trade agreements with Canada, provided that "said trade agreements before becoming operative shall be submitted to the Congress of the United States for ratification or rejection."

Although the agreement was not effectuated, since the Canadian Parliament did not take the requisite action to enact the reciprocal legislation required, the act of July 26, 1911, is nevertheless a striking example of the exercise by Congress of its powers over foreign commerce to carry out an agreement with a foreign nation. The argument of the opponents of the St. Lawrence legislation that the Canadian Reciprocity Act of 1911 is not a precedent, on the ground that tariff measures customarily originate in the House of Representatives, is entirely inconsistent with their principal thesis that agreements with foreign countries must be handled through the treaty process regardless of whether the subject matter of the agreement relates to one of the delegated powers of the Congress.

Joint Regulation of Fur Seals

Another example of legislation under the commerce powers of the Congress to effectuate an agreement with Canada is the act of February 26, 1944, to give effect to the Provisional Fur Seal Agreement of 1942 between the United States and Canada; to protect the fur seals of Pribilof Islands; and for other purposes.[46] By exchange of notes between the Secretary of State and the Canadian Minister in Washington in December 1942, there was brought into being an agreement for the protection and utilization of the fur seal herd of the Pribilof Islands, which agreement defined the rights of the nationals of the two countries in respect thereof.[47] Under article IX of the agreement, each of the parties agreed—"to enact and enforce such legislation as will be necessary to make effective the foregoing provisions with appropriate penalties for violations thereof" and "to cooperate with each other in taking such measures as will be appropriate for the enforcement of the foregoing provisions."

Article X provided that the agreement should enter into force when concurrent legislation should be adopted by both countries to provide for its enforcement.[48] Finally it was provided that the agreement should remain in effect for the duration of the emergency and 12 months thereafter unless either Government should enact contrary legislation or until 12 months after either Government shall notify the other of its intention of terminating the agreement. The act of February 26, 1944, in effect enacted an elaborate series of regulations designed to bring the provisions of the agreement into force as to the United States. Section 19 of the act provides that—

"The provisions of this Act which implement the Provisional Fur Seal Agreement of 1942 concluded between the United States of America and Canada shall remain in effect only for the duration of the present hostilities, and 12 months thereafter unless either the Government of the United States or the Government of Canada enacts legislation contrary thereto, or until 12 months after either Government shall have notified the other Government of its intention to terminate the agreement."

Taken together, the exchange of notes and the implementing acts of the United States and Canada, therefore, form a binding arrangement on a subject of mutual interest to the commercial relations of the two countries. Although this agreement was provisional, the power of Congress to act with respect to the matter did not arise because of that fact but was based rather upon its inherent constitutional powers.

Alaska Highway

One of the outstanding examples of cooperation between the United States and Canada in recent years was furnished by the construction of the Alaska Highway pursuant to the terms of an agreement effected in March 1942 by an exchange of notes between the United States Minister in Ottawa and the Canadian Minister of External Affairs.[49] Under this agreement, the United States Government agreed at its expense to construct the road and maintain it until 6 months after the end of the war. While this action was taken under the special war powers of the Executive, there is a long record of action in Congress with respect to the highway which is of interest to this study. By act of May 15, 1930,[50] the President was authorized to designate three special commissioners "to cooperate with representatives of the Dominion Government in a study regarding the construction of a highway to connect the northwestern part of the United States with British Columbia, the Yukon Territory, and Alaska, with a view to ascertaining whether such a highway is a feasible and economically practicable project," and there was authorized the appropriation of $10,000 for such subject. The commissioners made an exhaustive study of the project[51] and concluded that the highway was feasible and could be built at a reasonable cost. They further recommended that the financing of the road should be primarily the responsibility of the nation within its own jurisdiction, but realized the possibility of equity involving other arrangements and suggested that "any departure from the plan of primary responsibility of financing by each nation should be by international agreement."

By act of August 1935,[52] it was provided:

"That the President of the United States is requested, through such channels as he may deem proper, to negotiate and enter into an agreement or agreements between the Governments of the United States and of the Dominion of Canada, for the survey, location, and construction of a highway to connect the Pacific northwestern part of continental United States with British Columbia and Yukon Territory, in the Dominion of Canada, and the Territory of Alaska; in cooperation with the Government of the Dominion of Canada to cause a survey or surveys to be made to determine the most practicable route for such highway, as well as specifications and estimates of the probable cost thereof, and plans for financing its construction and maintenance.

"SEC. 2. The President is hereby authorized, upon the conclusion of the negotiations and the execution of the agreement or agreements herein authorized, to designate such existing agency of the Government of the United States as he may select for this purpose, or such officials or agency as he may specially appoint or create for the purposes of this act, to carry on the work of survey and location of the route for such highway, and of the construction thereof after such route shall have been determined and approved by the President. And such agency or officials, so designated or appointed by the President hereunder, shall be, and they are hereby, authorized and empowered to communicate directly with a like agency or officials to be appointed by the Government of the Dominion of Canada, for the purpose of coordinating and expediting the work of such survey, location, and construction of such highway."

Thereafter negotiations under the authority conferred by the act of August 20, 1935, failed to produce tangible results,[53] and by act of May 31, 1938,[54] there was created the Alaskan International Highway Commission to conduct negotiations and studies with representatives of Canada with respect to such a highway. The act of June 11, 1940,[55] extended the life of the Commission. Appropriations have been made for the work of this Commission,[56] parts of which have been used in connection with surveys in Canada. Both the acts of May 31, 1938, and June 11, 1940, required the Commission to report to the President on the results of their activities and provided that the President should transmit such reports to the Congress. Owing to the intervention of the war, the construction of a highway from the United States to Alaska became a matter of military concern, and a highway was built as noted above under the Presidential war powers rather than through action by the Congress. The Alaska Highway was built from Dawson Creek, British Columbia, to Fairbanks, Alaska, rather than along more westerly routes which had been studied under the earlier acts of Congress. Since the conclusion of the highway there has been considerable interest in the Congress for the construction of another highway to Alaska through Canada from northwestern United States, and various measures have been introduced in the Seventy-ninth Congress looking to that end.[57]

At all times in the long history of the consideration of this project, which is of major importance, economically as well as militarily, to the United States, it has apparently never been questioned that the Alaska Highway was a proper subject for congressional action. It has apparently always been assumed, furthermore, that the power of Congress to legislate with respect to this matter would not cease to exist simply because an agreement with a foreign country would be required for the consummation of the project. It should also be particularly noted that although most of the acts of Congress with respect to the highway have been of a preliminary nature, the act of August 20, 1935, constituted a final and complete authorization to the President to enter into an agreement with Canada for the construction of the project. In addition, all of the other acts indicate a clear intention that Congress should retain jurisdiction over this subject until its consummation, and provisions to this effect are included in all of the pending bills. It is submitted, therefore, that the history of the Alaska Highway in the Congress constitutes a striking example of the exercise of the powers of Congress with respect to a construction project analogous to the St. Lawrence project and that this history is highly pertinent to the subject here under consideration.[58]

[55] 54 Stat. 262.

[56] E. g., 53 Stat. 987.

[57] See H. R. 2654, 79th Cong., 1st sess.; H. R. 2871, 79th Cong., 1st sess.; H. R. 3547, 79th Cong., 1st sess.; H. R. 3548, 79th Cong., 1st sess.; S. 548, 79th Cong., 1st sess.; and S. 849, 79th Cong., 1st sess. These bills would either recreate the Alaskan International Highway Commission in order to make studies in cooperation with Canada with regard to the western highway or would authorize the President to enter into an agreement with Canada to provide for the construction of the highway.

[58] The following excerpt from the report of the Committee on Foreign Relations of the Senate with respect to the act of May 31, 1938 (S. Rept. 1782, 75th Cong., 3d sess.), contains language which is so pertinent to the St. Lawrence situation that it is reproduced in part at this point:

"This Government has for many years sought a basis of cooperation with Canada for the construction of a highway to Alaska. Because the major part of the territory to be traversed lies in the Canadian Province of British Columbia, an unsettled portion, difficulties have been encountered. Canada's desire to aid cannot be questioned. Its ability to share the cost of the portion of the road in British Columbia has remained the main obstacle. Were this territory between Alaska and the United States within the confines of our country, this road would have been built 25 or 30 years ago by our Government. Although most of the remaining construction is in Canadian territory, the benefits resulting are as great for us as for Canada. The feasibility and necessity for the highway to both countries is unquestioned. Now, more than ever, should the project be pushed and efforts made by both countries to reach a solution for its construction. The project has been a matter of some concern and interest to every administration for the past 20 years.

"* * * It appears, with all this evidence of desire for international cooperation to build the road, that all that remains to be done to culminate a plan of construction and finance would be for two specially designated bodies to have the opportunity to sit around a table and work out the details. It is sincerely hoped and believed that this legislation will accomplish this purpose."

Agreements with Panama

The relations of the United States with Panama have also required from time to time the exercise by Congress of its delegated powers to authorize the construction of projects in foreign territory in cooperation with the Republic of Panama. Thus, by act of February 25, 1939,[59] the Secretary of Commerce was authorized "subject to the consent of the Republic of Panama and suitable diplomatic arrangements for protecting the interests of the United States, to establish and maintain aids to navigation, including the purchase of sites, if necessary, on Jicarita Island and on Morro Puercos * * * said sites belonging to the Republic of Panama."

By act of July 20, 1939,[60] there was authorized to be appropriated the sum of not to exceed $1,500,000 "to enable the United States to cooperate with the Republic of Panama in connection with the construction of a highway between Chorrera and Rio Hato, in the Republic of Panama: Provided, That the expenditure of such sum shall be subject to the receipt of assurances satisfactory to the President from the Government of Panama of its cooperation in such construction.[61]

By act of May 3, 1943,[62] there was authorized to be appropriated the sum of $2,700,000 to compensate the Republic of Panama for expenses which it had incurred in connection with the Rio Hato Road owing to certain changes which had been brought about by reason of military considerations arising after the date of the original authorization.[63]

Inter-American Highway

One of the most important projects involving foreign construction in which the Congress has exercised its powers in recent years is the Inter-American Highway. The first expression of congressional interest in this matter was the act of May 4, 1928,[64] which referred to a resolution of the Sixth International Conference of American States at Habana recommending the adoption of agreements for the construction of a Pan American Highway; directed that the Government of the United States should manifest the utmost interest in the project and cooperate to this end; and requested the President to keep the Congress informed in the premises. The act of May 4, 1929, authorized appropriations of $50,000 to enable the Secretary of State to cooperate with the other American Republics in surveys and to report to Congress as to the possible routes, probable cost, economic service and other relevant facts pertaining to the proposed highway.[65] Pursuant to this act, the Bureau of Public Roads, in cooperation with certain Central American governments, made a survey for an inter-American highway between the United States and Panama and in a report dated January 22, 1934, stated that the construction of such a road would be feasible and economically desirable from the standpoint of the United States.[66] On the basis of this report, the Congress passed the act approved June 19, 1934,[67] which appropriated the sum of $1,000,000 "to meet such expenses as the President may deem necessary to enable the United States to cooperate with the several governments, members of the Pan American Union, in connection with the survey and construction of the proposed Inter-American Highway. * * * The expenditure of such sum shall be subject to the receipt of assurances satisfactory to the President from such governments of their cooperation in such survey and construction."

By the act of March 5, 1938,[68] an additional amount of $34,000 was appropriated for this purpose and by the act of August 9, 1939,[69] a further amount of $40,000. The latter act stated that the appropriation was "for continuation of cooperation with the several governments, members of the Pan American Union, in connection with the survey and construction of the Inter-American Highway as provided in * * * 45 Stat. 1097, as amended or supplemented, and for performing [by the Public Roads Administration] engineering service in Pan American countries * * *."

With the funds authorized by these acts, a substantial amount of work was done toward the construction of the Inter-American Highway up to the close of fiscal year 1938 through the execution by the Public Roads Administration of some 39 separate projects connected with the highway in Panama, Guatemala, Honduras, Nicaragua, and Costa Rica.[70]

In the meantime, in order to secure the cooperation of all of the American republics in this project, there was signed at Buenos Aires December 23, 1936, the Convention on the Pan American Highway, which, after receiving the advice and consent of the Senate to ratification was proclaimed September 16, 1937.[71] In this convention the parties agreed to collaborate toward the speedy completion of the Pan American Highway; to form an expert commission to complete studies and formulate projects in those countries which might need the cooperation of the Commission; and to consult with a view to appointing a financial committee of representatives of three of the governments to study problems concerned with the construction of the highway and report thereon.

In 1941 preliminary work and cooperative arrangements under the earlier acts of Congress having progressed to such a point that it was desirable to push to completion the work on the highway in Central America, the Congress passed the act of December 26, 1941—"to provide for cooperation with Central American republics in the construction of the Inter-American Highway."

This act provided, in part: "That there is hereby authorized to be appropriated a sum not to exceed $20,000,000 to enable the United States to cooperate with the governments of the American republics situated in Central America—that is, with the Governments of the Republics of Costa Rica, El Salvador, Guatemala, Honduras, Nicaragua, and Panama—in the survey and construction of the proposed Inter-American Highway within the borders of the aforesaid republics. Expenditures of such sums in any such country shall be subject to the receipt of a request therefor and of satisfactory assurances from the government of that country that appropriate commitments have been made by such government to assume at least one-third of the expenditures proposed to be incurred henceforth by that country and by the United States in the survey and construction of such highway within the borders of such country. In no such country shall the expenditures of this Government from the appropriations herein authorized exceed two-thirds of the total expenses henceforth incurred for said survey and construction in that country. No expenditures shall be made hereunder for the construction of said highway until the government of each of the above-named countries shall have given satisfactory assurance to the United States that it will assume at least one-third of the expenditures proposed to be incurred henceforth by that government and by the United States in the survey and construction of such highway within the borders of such country, or has given other assurances satisfactory to the President that it has made appropriate arrangements to complete such survey and construction within a reasonable period."[72] Under the authority of this act the United States has entered into agreements with individual Central American countries relating to the construction of the highway in those countries.[73]

These acts of Congress with respect to the Inter-American Highway extending over a period of many years constitute another important example of the use by the Congress of its powers to authorize the construction of a project in foreign countries of primary

---

[59] 45 Stat. 1261.

[60] 53 Stat. 1071.

[61] The Chorrera to Rio Hato Road is entirely independent of the Trans-Isthmian Highway provided for in the Convention proclaimed July 27, 1939, between the United States and Panama, Treaty Series No. 946.

[62] 57 Stat. 74.

[63] See S. Rept. 201, 78th Cong., 1st sess. The act of May 3, 1943, also authorized the transfer to the Republic of Panama of the title of the United States, acquired pursuant to the Treaty with Panama of 1903, to certain water and sewerage systems in the cities of Colon and Panama, in anticipation of the requirement of said treaty that such property should be transferred to Panama in 1957, as well as the transfer to Panama by the Panama Railroad Company of certain lands in the same cities. These provisions of this act in themselves constitute an example of the exercise by Congress of its powers to effect through legislation a settlement of major importance with a foreign country with respect to property in said country.

[64] 45 Stat. 490.

[65] 45 Stat. 1697. The act of June 18, 1934 (48 Stat. 993, 996), authorized an additional amount of $75,000 for the continuation of such surveys.

[66] S. Doc. No. 224, 73d Cong., 2d sess.

[67] 48 Stat. 1021, 1042.

[68] 52 Stat. 88.

[69] 53 Stat. 1305.

[70] See letter dated May 26, 1941, from Commissioner of Public Roads to Chairman of House Foreign Affairs Committee, hearings before House Foreign Affairs Committee on S. 1544, 77th Cong., 1st sess., June 3, 1944, in which the Public Roads Commissioner reported favorably upon the bill which later became 55 Stat. 860 referred to below. The following excerpts from this letter are of some interest in connection with the subject matter of this memorandum:

"* * * In every case the funds appropriated have been spent under the supervision of the Public Roads Administration, Federal Works Agency, under conditions agreed upon with the Department of State. The rights of the United States have been amply protected by Executive agreements and by specific contracts. These agreements and contracts have taken care of such questions as free entry for American machinery, the disposal of the machinery after the termination of the work contemplated, purchase of gasoline free of customs duty, admission of American personnel, and similar matters. * * *

"In view of the satisfactory accomplishments through the use of Executive agreements described above, and the expressed interest of the several governments of the countries concerned in the proposed road, it is not believed that any condition requiring prior or simultaneous formal agreement by all countries should be made a condition of participation, nor does it appear that the details of cooperation need be established by law. Agreements to be entered into by negotiation through the Department of State, will, it is confidently believed, effect the desired purpose of completing the construction and protecting the interests of the United States * * *"

[71] 51 Stat. 152.

[72] 55 Stat. 860.

[73] See for example the agreement with Panama effected by exchange of notes in May and June 1943, Executive Agreement Series 365, in which the Government of Panama stated that it "desired to avail itself of the benefits of law 375 (55 Stat. 860) of the Congress of the United States on the construction of the Inter-American Highway and that it agreed to assume one-third of the total cost of said work in the Panamanian section."

importance to the United States.[74] It is true that some 10 years after Congress began to legislate on this project the United States became a party to a treaty obligating the parties thereto to collaborate in the speedy completion of the highway. However, it seems clear that such treaty was not necessary in the case of this country to lay the basis for United States participation in this work on which substantial progress had already been made by the time the treaty was signed and that the treaty was desired primarily in order to lay the basis for the cooperation of all nations in developing the entire Pan American Highway system. The act of December 26, 1941, does not refer to the treaty as giving authority for the legislation nor does the report of the Senate Foreign Relations Committee in connection therewith. Subsequent appropriation acts have made separate appropriations to the Public Roads Administration for the purpose of the treaty and for the purpose of carrying out the work under the act of December 26, 1941. Thus one such act made appropriations—"(a) * * * to enable the President to utilize the services of the Public Roads Administration in fulfilling the obligations of the United States under the Convention on the Pan American Highway * * * [and] for the continuation of cooperation with the several governments, members of the Pan American Union, in connection with the surveying and construction of the Inter-American Highway as provided in * * * 45 Stat. 1697 * * * $100,000," and "(b) * * * for surveys in connection with the construction of the Inter-American Highway, in accordance with the provisions of the Act approved December 26, 1941 (55 Stat. 860) * * * $5,000,000."[75]

Thus it is submitted that the action of Congress in relation to the Inter-American Highway, and in particular the act of December 26, 1941, represents an extremely important example of the use by Congress of its powers to adopt legislation substantially similar in concept to the legislation with which we are here concerned.

Summary

The cases and statutes cited above have been included at this point in order to show that (1) Congress has far-reaching powers over interstate and foreign commerce, and in particular, to regulate navigation and to authorize the construction of projects related thereto; and (2) Congress has frequently exercised its powers under the commerce clause to authorize or effectuate agreements with foreign countries in connection with matters related to such powers and, in particular, to authorize the participation by private persons, by States, or by the Federal Government of construction projects in, or in cooperation with, foreign countries.

The legislation with which we are here concerned would represent simply another exercise by Congress of its traditional powers in this regard. No new principle is involved nor will any precedent be set with reference to the respective functions of the two branches of the Government in the field of foreign affairs. As in the case of the Boulder Canyon project, it is proposed that a State government, in this case New York, participate in bearing the cost of the program. In this case, however, owing to geographical requirements, a foreign country will also be associated in the enterprise. In general the agreement provides that each country will construct the works in its own territory, although there will be occasions upon which the nature of the construction involved will require that operations be performed by employees of one country in the territory of the other. In this respect, however, the arrangement under consideration does not go as far as many of the instances cited above in which the United States undertook all or a major part of particular construction projects in foreign countries.

The question at issue in this case is whether the Congress is deprived of its powers to authorize a navigation project simply because the construction involved is related to or is designed to effectuate an agreement with a foreign country. In considering this question it should be borne in mind that the broad questions of policy to be decided by the Congress in relation to this project would be in large part the same if the entire project were to be constructed within the United States. The fact that an agreement with a foreign country is involved arises solely by reason of geographical considerations and is entirely incidental to the substantive questions to be considered by the Congress in passing upon the merits of the project. The foreign relations aspects of this case are of much less prominence than in the case of the usual international treaty or agreement, at least in relation to the total importance and magnitude of the program. Thus, if the St. Lawrence River ran entirely through the United States in the northern part of the States of New York, Vermont, New Hampshire, and Maine, for example, the questions involved in relation to a decision to open the Great Lakes area to ocean commerce through an overland water route and to construct a public-power project of this magnitude in this area would be largely the same as they are given the actual geographical circumstances. With respect to the power project, the issues are of a substantially similar character to those with which the Congress has been confronted in considering the authorization of other great power projects.

To summarize this point, the subject matter of the legislation under consideration involves powers which under the Constitution are vested in the Congress and present issues of domestic economic import which have been traditionally in the province of the Congress to decide. If the legislation is passed, it will involve the appropriation of substantial sums of money and the negotiation of an agreement in connection therewith with the State of New York, both of which matters involve important powers of Congress. For the foregoing reasons, it is submitted that unless section 2 of article II of the Constitution provides the only method, namely, the treaty power under which the United States may proceed to enter into international arrangements, the St. Lawrence agreement may constitutionally be acted upon by the Congress in the form presented.

There have been enumerated above many instances in which Congress has exercised its delegated constitutional powers in situations analogous to those under consideration here. There are set forth in the next section several important and long-standing additional examples of legislation to authorize, effectuate, or approve international agreements where the subject matter thereof concerns a power vested in the Congress under the Constitution.

III. INTERNATIONAL AGREEMENT THROUGH LEGISLATIVE ACTION

The following are important examples of foreign negotiations in which apparently the fact that a particular international act affected a legislative power vested in the Congress was deemed to override, or present a preferable alternative method of procedure to the treaty power.

1. Commerce and Navigation

As early as 1815, the Congress was concerning itself with problems incident to reciprocal rights with reference to commerce and navigation. In that year a statute[76] was enacted repealing provisions of earlier statutes imposing on ships or goods imported in them duties that were discriminatory as compared with vessels of the United States and their cargo, provided that such repeal should take effect in favor of any foreign nation whenever the President should be satisfied that the discriminatory duty of such foreign nation as applied to the United States had been abolished. These provisions were extended in other closely related acts of Congress.[77] Under the authority of this legislation the United States completed an arrangement with Austria[78] providing for equality of treatment for the vessels of each nation in the other's ports.

In 1830 Congress enacted legislation providing for equality of treatment with reference to commerce and navigation between the United States and Great Britain and certain of its colonial possessions[79] under which President Jackson subsequently proclaimed, after negotiations with the British Government, an arrangement in relation to trade between the United States and British possessions.[80] Under this general authority the United States during the years 1884–88 entered into a series of agreements with Spain for the elimination of discriminatory customs duties and establishment of national treatment of shipping with respect to certain Spanish possessions.[81] Likewise in 1925, the United States and Finland entered into an agreement providing for substantially the same matters.[82]

2. Postal Treaties

A notable example of the exercise of congressional power in the foreign field concerns postal arrangements with foreign countries under the power of Congress "to establish post offices and post roads." The act of June 8, 1872, provides in part: "That for the purpose of making better postal arrangements with foreign countries, or to counteract their adverse measures affecting our postal intercourse with them, the Postmaster General, by and with the advice and consent of the President, may negotiate and conclude postal treaties or conventions, and may reduce or increase the rates of postage on mail-matter conveyed between the United States and foreign countries."[83]

Under this authority President Grant in 1874 entered into a "treaty concerning the formation of a General Postal Union," which provided for an extensive system of regulation of postal rates and transmission of correspondence on a multilateral basis and for the organization of the General Postal Union and of a congress of plenipotentiaries to meet every 3 years to consider changes in the system of the Union.[84] Although the "treaty" dealt comprehensively with a vital aspect of our economic and social relations with virtually all of the nations of the world, it was not submitted to the Senate for its

[74] Justifications of the Inter-American Highway have repeatedly stressed the commercial importance of the project to the United States; see, for example, Rept. No. 354 of the Committee on Foreign Relations, 77th Cong., 1st sess., on S. 1544 (55 Stat. 860).

[75] 57 Stat. 179. For substantially similar provisions see 56 Stat. 101 and 409; 58 Stat. 370.

[76] 3 Stat. 224.

[77] 4 Stat. 2, and 4 Stat. 308.

[78] 3 Miller, 521.

[79] 4 Stat. 419.

[80] 4 Stat. 417.

[82] United States Treaty Series (731).

[83] 17 Stat. 283, 304.

[84] 19 Stat. 577. The name of the organization was later changed to the Universal Postal Union.

advice and consent in view of the specific action of the Congress in authorizing the executive to enter into such treaties. Presumably the reason for this course of action on the part of the Congress was the fact that matters relating to the transmission of mail to and from foreign countries were intimately related to domestic postal matters for which the Congress had made provision under its constitutional powers.[85] The same practice has been adhered to practically without exception in connection with our negotiation of postal arrangements with foreign nations. In 1934 the authority granted by the act of 1872 was renewed and the Postmaster General was authorized "by and with the advice and consent of the President [to] negotiate and conclude postal treaties or conventions and * * * reduce or increase the rates of postage or other charges on mail matter * * * between the United States and foreign countries."[86]

In connection with the postal conventions it is of interest to note that section 273 of the act of June 8, 1872, contains a provision for reciprocity with Canada with respect to transit of mails which is of special interest in relation to the various reciprocal arrangements with Canada discussed above. This section authorized the Postmaster General, by and with the advice and consent of the President, to make arrangements to allow the mails of Canada to be transported over the territory of the United States upon obtaining a like privilege for the transportation of United States mail through Canada. Similar arrangements were authorized with respect to any other country bordering upon the United States.[87]

3. Copyrights and Trade-Marks

With respect to copyrights and trade-marks, the Congress has also exercised in the foreign field its power under article I, section 8, of the Constitution "to promote the progress of science and useful arts, by securing for limited times to authors and inventors the exclusive rights to their respective writings and discoveries." In 1891, in a statute making comprehensive provision with respect to copyrights, it was provided that the benefits of the act should "only apply to a citizen or subject of a foreign state or nation when such foreign state or nation permits to citizens of the United States of America the benefit of copyright on substantially the same basis as its own citizens; or when such foreign state or nation is a party to an international agreement which provides for reciprocity in the granting of copyright, by the terms of which agreement the United States of America may, at its pleasure, become a party to such an agreement."[88]

Under this legislation, agreements on this subject were entered into with Germany in 1892;[89] with Spain in 1895;[90] with Italy in 1915;[91] with Argentina in 1934;[92] and in 1911 with France in relation to rights in China.[93]

With respect to trade-marks, Congress in 1881 enacted a statute providing that "the owners of trade-marks used in commerce with foreign nations, or with the Indian tribes, provided such owners shall be domiciled in the United States, or located in any foreign country or tribes which by treaty, convention, or law, affords similar privileges to citizens of the United States, may obtain registration of such trade-marks by complying with"[94] certain requirements. Under this authority agreements recognizing the existence of the reciprocal requirements were concluded in 1883 with the Netherlands[95] and Switzerland[96] by exchange of diplomatic notes. A similar agreement was concluded in 1889 with Great Britain with respect to reciprocal protection of trade-marks in Morocco.[97]

4. Reciprocal Trade Agreements

Of all the examples of the exercise of congressional power in the foreign field, one of the most notable is the Trade Agreements Act of 1934, as subsequently amended, which provides that the President shall have authority "to enter into foreign trade agreements with foreign governments or instrumentalities thereof" for the purpose of expanding foreign markets for the products of the United States.[98] Under this authority some 27 reciprocal trade agreements have been entered into and promulgated by the President, making provision with reference to customs duties, most-favored-nation treatment, and reciprocity. The act and the agreements negotiated thereunder have constituted during the last 10 years the cornerstone of this country's foreign economic policy. The Trade Agreements Act of 1934, which had been successively extended in 1937, 1940, and 1943, was again extended by the act of July 5, 1945,[99] which also increased the authority of the President to reduce tariffs. Each time that the trade agreements program has been before the Congress, serious questions have been raised as to the constitutionality of the legislation in relation to the treaty power. Each time the Congress has sustained the validity of the procedure of congressional authorization of foreign-trade agreements. During the consideration of the 1945 extension, the issue was again thoroughly debated. The following is an excerpt from the report of the Committee on Ways and Means on this bill:

"On the treaty issue the precedents and authorities are equally conclusive. Again the precedents go back to the early days of the Republic. Many of the agreements entered into by this Nation which have been brought into force without being submitted to the Senate under the treaty-making procedure were concluded pursuant to congressional authorization; for example, the postal conventions and, notably, the reciprocal tariff agreements negotiated pursuant to the McKinley Tariff Act of 1890 and the Dingley Tariff Act of 1897. These latter reciprocity agreements, some 27 of which were concluded without Senate ratification, constitute inescapable precedents on the treaty issue for the trade agreements which are authorized by the Trade Agreements Act. In 1937 the Supreme Court spoke unmistakably to the point when it stated in respect to certain executive agreements concluded by this Government:

" 'The assignment and the agreements in connection therewith did not, as in the case of treaties, as that term is used in the treaty-making clause of the Constitution (art. II, sec. 2), require the advice and consent of the Senate (*United States* v. *Belmont* (301 U. S. 324, 330).'

"Five times now, beginning in 1934, this committee has given the most serious study to the so-called constitutional objections which have been raised by the opponents of the program, and our conclusion remains the same as in 1934: We consider that it is clear, on the basis of precedent and authority, that no constitutional or other legal considerations require Senate ratification of trade agreements * * *."[1]

5. Civil Aviation Agreements

Congressional power under the commerce clause has been exercised in the field of civil aviation to facilitate international negotiations with foreign countries for the extension of reciprocal rights for commercial and other types of airplane travel. These statutory provisions and the negotiations with other countries thereunder are similar in many respects to the developments in connection with maritime navigation discussed above.

Section 6 of the Air Commerce Act of 1926,[2] as amended by section 1107 of the Civil Aeronautics Act of 1938,[3] provides that "If a foreign nation grants a similar privilege in respect of aircraft of the United States and/or airmen serving in connection therewith, the Civil Aeronautics Authority may authorize aircraft registered under the law of the foreign nation and not a part of the armed forces thereof to be navigated in the United States."

Sections 802 and 1102 of the 1938 act provide, respectively:

"SEC. 802. The Secretary of State shall advise the Authority of, and consult with the Authority concerning, the negotiation of any agreements with foreign governments for the establishment or development of air navigation, including air routes and services.

* * * * *

"SEC. 1102. In exercising and performing its powers and duties under this act, the Authority shall do so consistently with any obligation assumed by the United States in any treaty, convention, or agreement that may be in force between the United States and any foreign country or foreign countries, shall take into consideration any applicable laws and requirements of foreign countries and shall not, in exercising and performing its powers and duties with respect to certificates of convenience and necessity, restrict compliance by any air carrier with any obligation, duty, or liability imposed by any foreign country."

Under these statutes the United States some 15 years ago commenced the negotiation of a series of bilateral agreements with foreign countries.[4]

One of the most recent and significant of these agreements is the "Agreement for Civil Air Transport" between the United States and Canada dated February 17, 1945,[5] which provides, among other things, for the reciprocal granting of rights for international air routes and services of the carriers of the two countries; for the prevention of discriminatory practices by agreement that each government shall not permit higher charges for airports and similar facilities to the aircraft of the other country than are paid by its

[85] See opinion of William H. Taft, Solicitor General of the United States, passing upon the practice followed in entering into "postal treaties" in which he stated:

"Foreign mail is so closely connected with a proper system of inland mail as that the power to organize and carry on a general post-office system would seem to imply a power to organize, in connection therewith, a system of foreign mails, and, in the maintenance of such a system, a power to conclude contracts with the post-office departments of other countries" (19 Op. Atty. Gen. 513, 520).

national aircraft, nor give any preference to its national aircraft in relation to customs and similar matters; and for the requirement that the aircraft of the two nationalities shall conform with the airworthiness requirements of their respective governmental authorities.

Under the authority of existing legislation in the field of aviation the United States has entered into a series of multilateral international agreements in this field as the result of the International Civil Aviation Conference held in Chicago, November–December 1944. This conference concluded in the preparation of four multilateral agreements, namely, an Interim Agreement on Civil Aviation, a Convention on International Civil Aviation, an International Air Services Transit Agreement, and an International Air Transport Agreement.[6]

The interim agreement provides, among other things, for the creation of a provisional International Civil Aviation Organization to conduct certain research and recommendatory functions relating to standards and procedures in the field of civil aviation; for the adherence to certain principles relating to flight over the territory of members and with respect to such matters as documents carried by aircraft, certificates of airworthiness, and licenses of personnel; and for certain undertakings whereby members agree to file copies of contracts with the Organization and to apply certain recommendations with respect to aviation practices. All of these matters are within the power of the executive branch of this Government to perform under provisions of existing legislation; consequently, this agreement has been accepted by this Government subject only to compliance with the constitutional processes of the United States in respect of the contribution of funds for administrative expenses of the Organization.[7]

The transport and transit agreements, commonly referred to as the two-freedoms and five-freedoms agreements, provide primarily for the reciprocal granting by each signatory country to the other signatories of certain privileges in respect of scheduled international air services; in the first case, the privilege to fly across its territory without landing and to land for nontraffic purposes, and, in the second case, the same privileges plus the privileges to carry passengers, mail, and cargo to and from each signatory country and intermediate points. In view of the provisions of existing law with reference to the granting of commercial right to foreign aircraft, these agreements are within the power of the executive to carry out without additional legislative authority and consequently they have been brought into force as to the United States.

The convention has been submitted to the Senate for advice and consent to ratification.[8]

6. World War Debts

The powers of Congress under article I, section 8, of the Constitution with respect to monetary and financial matters have been frequently used during the history of this Nation to bring about agreements with foreign countries in matters of vital interest to the welfare of the United States. An interesting and important example of the exercise of congressional power with respect to financial arrangements with other countries is found in the history of the debts arising out of the last World War. The First Liberty Loan Act of 1917[9] authorized the President to enter into arrangements for the purchase of obligations of other governments with the view to establishing credit and providing for the prosecution of the war. Under this authority the United States entered into a series of agreements with foreign countries in the form of contracts concluded by the Treasury Department under Presidential authority.[10] After the conclusion of hostilities the liquidation of these and other credits extended during the war became an economic problem of major importance in the efforts to reestablish normal intercourse between nations. By act of February 9, 1922, as amended by the act of February 28, 1923, Congress provided for the creation of a World War Foreign Debt Commission consisting of the Secretary of the Treasury and four (later seven) other members to be appointed by the President by and with the advice and consent of the Senate. This Commission was authorized, subject to the approval of the President "to refund or convert, and to extend the time of payment of the principal or the interest, or both, of any obligation of any foreign government now held by the United States of America or any obligation of any foreign government hereafter received * * * arising out of the World War * * *."[11] The legislation, as amended, also provided that "the settlements with foreign governments * * * [should be] subject to the approval of the Congress by act or joint resolution."

As a consequence of this legislation, agreements were effected with 13 foreign countries providing for various adjustments and extensions of maturity of the debts of those countries to the United States. The agreements were subsequently approved by acts of Congress.[12] Similarly the subsequent moratoria agreements with reference to the debts so funded, which were negotiated by President Hoover in 1931, were carried out in conjunction with specific authority conferred by joint resolution of Congress,[13] rather than through the treaty procedure.

7. Stabilization Agreements in World War I

During World War I the Congress, under the banking and currency power, also granted authority to the Executive to make arrangements with foreign countries to stabilize foreign exchange and to obtain foreign currencies. This was contained in section 4 of the supplement to the Second Liberty Bond Act, which provided: "That the Secretary of the Treasury may, during the war and for 2 years after its termination, make arrangements in or with foreign countries to stabilize the foreign exchanges and to obtain foreign currencies and credits in such currencies, as he may use any such credits and foreign currencies for the purpose of stabilizing or rectifying the foreign exchanges, and he may designate depositaries in the foreign countries with which may be deposited as he may determine all or any part of the avails of any foreign credits or foreign currencies."[14]

Several such stabilization agreements, including agreements with Argentina, Bolivia, and Peru, were negotiated by the Treasury Department under the authority of this act and were consummated by exchanges of notes between the State Department and the representatives in the United States of these Governments.

8. Chinese Loan

An interesting example of an international financial agreement entered into by the executive branch pursuant to congressional authorization under the banking and currency power is the agreement with China of March 21, 1942, providing for the extension of financial aid in the amount of $500,000,000.[15] This agreement was authorized by the act of February 7, 1942,[16] which gave the Secretary of the Treasury, with the approval of the President, broad authority to "loan or extend credit or give other financial aid to China in an amount not to exceed in the aggregate $500,000,000 at such time or times and upon such terms as the Secretary of the Treasury with the approval of the President shall deem in the interest of the United States."

9. International Silver Agreement

Another significant financial agreement, which was the memorandum of agreement between the United States, Australia, Canada, China, India, Mexico, Peru, and Spain, with reference to the world price of silver which was negotiated at the Monetary and Economic Conference held in London in July 1933 and was signed on behalf of the United States by Senator Key Pittman, then chairman of the Committee on Foreign Relations of the Senate, who was a delegate to the conference.[17] The agreement was based upon a proposal submitted by the United States delegation to the conference designed to provide permanent measures with respect to the use of silver for monetary purposes which would give necessary assurances both to the silver mining countries and to countries using silver as a basis for their currency. Important commitments were imposed upon the signatory nations under the agreement. Thus the United States, Australia, Canada, Mexico, and Peru agreed that during the existence of the agreement they would not sell any silver and would also in the aggregate purchase, or otherwise withdraw from the market, 35,000,000 fine ounces of silver from the mine production of such countries for each of the next 4 years, and that the silver so purchased or withdrawn should be used for currency purposes or retained from sale during such period. By a supplementary agreement the share of the United States of the aggregate amount to be so purchased was fixed at 24,421,000 fine ounces. The main agreement stated that "this memorandum of agreement is subject to ratification by the governments concerned. The instruments of ratification shall be deposited not later than the 1st April 1934, with the Government of the United States. It shall come into force as soon as the ratifications of all the Governments concerned are received. * * * A notice by any government that the affirmative action necessary to carry out the purposes of this agreement has been taken will be accepted as an instrument of ratification." The supplementary agreement contained the following provision: "That this memorandum is subject to ratification by the proper governmental authorities of the United States, whose delegate has executed this agreement, and the undersigned delegate undertakes to use his good offices to secure such action at the earliest possible date."

The United States gave the necessary notice of ratification on December 21, 1933.[18] The commitments undertaken by the United States under this agreement were in harmony with, and could be carried out under, the authority conferred upon the President by virtue of title III of the Agricultural Adjustment Act of 1933.[19] On December 21,
